

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# THE RECORD

# THE RECORD

to Baie des Chaleurs, he pursued his exploratory cruise, which included three of the present provinces of Canada, casting anchor in Gaspé Basin about the middle of the month. On the bold heights of the entrance of that picturesque sheet of water he planted the cross on the 24th July, and took formal possession of the country in the name of his Royal Master by attaching to the great emblem of Christianity a shield emblazoned with the *Fleur de Lys*, and bearing the legend "*Vive le Roy de France*."

This accomplished, he bent the sails of his two 60-ton vessels and sailed for France to give report of his adventures to a delighted sovereign and court.

Cartier returned in 1535 and completed the explorations of the previous year by going up the St. Lawrence River through the Saguenay, the Canada and the Hochelaga regions. In the course of this cruise he learned that the chief town of the central region, where the fresh water began, was called Canada, and in the *Bref récit de la Navigation faite en 1536-37 par Capt. Jacques Cartier* the name first appears as applied to the whole country as then known (1).

Nothing was done, either in this visit or the two subsequently made by Cartier, in the way of colonization, and the country remained a vast forest, the habitation of savages, until 1608, when, with the advent of Champlain, came the establishment of Quebec as the seat of his government and the first permanent settlement on the shores of the St. Lawrence.

4. Champlain was the founder of Quebec and Three Rivers, and the discoverer of the River Richelieu, of Lakes Champlain, George, Ontario, Simcoe and Huron. When he died, the entire colony consisted of about 250 persons. The historian Charlevoix says that "Canada then comprised a fort at Quebec surrounded by a few miserable houses and barracks, two or three huts on the Island of Montreal, the same at Tadoussac and a few other places on the St. Lawrence, used for the fishing and peltry trade, together with the beginnings of a station at Three Rivers."

For a dozen years during Champlain's time, and afterwards during the Governorship of Champlain's successors (Montmagny, d'Ailleboust de Colonge, Jean and Charles de Lauzon, d'Argenson and d'Avangour) to 1663, the supreme control of the affairs of the colony was vested in a company established by Cardinal Richelieu in 1627, under charter given by the French Government and designated "The Society of 100 Associates."

The Jesuits, who came to Canada in 1625, (2) used to send reports every year to the superior of their order in France. These reports, known by title of the "Relations of the Jesuits," contained information about the country, and the 100 Associates allowed them to be published. In consequence, a good many people were led to emigrate from France. Persons of good family embarked, bringing with them artisans, labourers and domestics. To such persons, the Associates granted tracts of land (seign

(1.) In the second map of Ortelius, published about the year 1572, New France is thus divided:—*Canada*, a district on the St. Lawrence above the river *Chiloga* (Hochelaga), the angle between the Ottawa and St. Lawrence rivers; a district below the river of that name; *Moscona*, south of the St. Lawrence and river Richelieu; *Avocat*, west and south of *Moscona*; *Norumbega*, name of New *Terra Cortesidis*, Labrador—(Parkman's *Pioneers*).

(2.) They first came in 1611 to Port Royal (now Annapolis, N.S.) but at a field after a short residence.

along the St. Lawrence. During the regime of the Associates the foundations of Montreal, the future metropolis of Canada, were laid. In 1667, four years after the 100 Associates had ceased to exist as a chartered company, the white population of New France was nearly 4,000.

5. In 1672 the Count de Frontenac was appointed Governor, and, next to Champlain, he is in every way the most conspicuous figure among the early holders of that office. The chief glory of his administration was the spirit of daring exploration and discovery by which it was characterized, the grandest achievement of all being the exploration of the Mississippi River and the great West under Joliette, Marquette, La Salle and Hennepin.

In 1688 war between France and England led to hostilities between the French and the New England colonies. After nine years of harrying, peace came, and by the treaty of Ryswick (1697) the two nations restored to each other the conquests they had made. The peace lasted four years. The war of the Spanish succession then involved England and France in bloody strife, which, of course, had to be shared by their colonies. Thenceforward until 1713 tragic scenes were enacted from the shores of Acadia to the pathless forests of the West, in which French, English and Indian warriors outvied one another in lust for blood. During the long period of peace following the Treaty of Utrecht (1713), the population of New France slowly increased. The cultivation of the soil was, however, greatly neglected for the seductive fur trade, which possessed for the adventurous *voyageur* and *courreur des bois* a fascination that even its enormous profits did not wholly explain.

In 1744 the war of the Austrian succession once more involved the Colonies in hostilities, which were chiefly remarkable for the capture of Louisbourg. The war terminated between the principals with the Treaty of Aix-la-Chapelle (1748), but this truce was regarded by both nations as only a breathing spell to prepare for the coming struggle that would decide the possession of the continent.

In 1754 the expected conflict opened with a brush between a small body of troopers under Washington and a party of French soldiers under Jumonville, at Fort Duquesne. Washington took the initiative and, as Bancroft says, his command to fire "kindled the world into a flame." It precipitated the tremendous struggle which, fought out to the bitter end on the plains of India, on the waters of the Mediterranean and the Spanish main, on the gold coasts of Africa, on the ramparts of Louisbourg, on the heights of Quebec and in the Valley of the Ohio, resulted in the defeat of the French and the destruction of their sovereignty on the American Continent, and prepared the way for the foundation of the unique Empire which, unlike Russia and the United States, "equally vast but not continuous, with the ocean flowing through it in every direction, lies, like a world-Venice, with the sea for streets—Greater Britain."

6. The era of the French regime in Canada lasted till 1760, when France gave up the contest with England for supremacy on the American Continent, and New France with its population of 70,000 became the Canada whose progress is set forth in the pages following.

7. In 1774 what is known as the "Quebec Act" was passed by the British Parliament. It extended the bounds of the Province from Labrador to the Mississippi, and from the Ohio to the water-shed of Hudson Bay. It established the right of the French to the observance of the Roman Catholic religion without civil disability, and confirmed the tithes to the clergy. It restored the French civil code and established the English administration of law in criminal cases. This act continued to be the rule of government of the province for seventeen years.

8. Soon after the passing of the Quebec Act the "War of Independence" began, one of the first steps taken by the secessionists being to capture Ticonderoga and Crown Point on Lake Champlain. Other forts along the gateway followed, and on the 12th November, 1775, Montreal, then having a population of 10,000, succumbed; but the tide turned when, flushed with their first success, the Americans essayed the capture of Quebec, two daring attempts resulting in disastrous failure.

9. By the terms of the treaty of peace signed at Paris, September 3rd, 1783, Canada lost the region lying between the Mississippi and the Ohio, and was divided from its southern neighbour by the great lakes, the St. Lawrence, the 49th parallel of north latitude and the highlands dividing the waters falling into the Atlantic from those emptying themselves into the St. Lawrence and St. Croix rivers.

10. In 1791 the Constitutional Act was passed by the British Parliament. It divided Canada, then having a population of 161,311, into two provinces, known as Canada East and Canada West, or Upper Canada and Lower Canada. Each province received a separate legislature, consisting of a Legislative Council appointed by the Crown, a Legislative Assembly elected by the people, and a Governor appointed by the Crown and responsible only to it.

11. In 1812-14 Canada was called upon to undergo a severe ordeal caused by the United States declaring war against Great Britain. The United States selected Canada as the first point of attack, but though Canada had less than 6,000 troops to defend 1,500 miles of frontier and a population under 300,000 to match itself against the eight millions of the United States, the Canadians, rallying as one man to the loyal support of their Government, so bore themselves throughout the two years' struggle which ensued, that, when it ended, the advantage lay clearly upon their side, and the victories of Queenston Heights and Chateaugay are to-day pointed to with the same patriotic pride as the Englishman takes in Waterloo or the Frenchman in Austerlitz.

12. When the war was over, the people of Canada turned their attention to domestic matters and began their agitation for Responsible Government, which they never relaxed until in 1840 the Home Government, acting upon the suggestions contained in the report of Lord Durham on the state of the Canadas, determined upon the union of the two provinces and the acknowledgement, in the new Constitution of 1841, of the principle of Responsible Government.

13. The new agitation sprung out of the more rapid growth of population in Upper Canada compared with Lower Canada. It was a demand in Canada West for representation by population. It culminated in 1867 in the Union Act, by which the Province of Canada was divided into two provinces (Ontario and Quebec) and, with New Brunswick and Nova Scotia, became the Dominion of Canada.

14. The first attempt to colonize Acadia (Nova Scotia) was made by the French in 1598. It was unsuccessful. A second and a third attempt in 1599 and 1600 proved abortive. In 1605 Baron de Poutrincourt, a French gentleman-adventurer, established Port Royal (now Annapolis Royal) the first actual settlement by Europeans on the shores of the North American continent. Port Royal holds a unique place in our history. In it was built the first cluster of French homes that ever gladdened Canada; to it came the first body of colonizing Britons that ever left the Mother Isle to found an English-speaking community on our half of this continent. It is the nursery from which sprang the two branches of the two great races, which, after a hundred and fifty years of fierce fighting around Port Royal for supremacy through the arts of war, are now, as they have been for a century and a third, joint proprietors of this Canada of ours, having settled down to nobler rivalries in the arts of peace, with the one common object of making the land we live in a shining example of the prosperity that surely comes from concord and a well cemented union. It holds the record as the most frequently assaulted place on this continent. The following is the record of the changes of masters it has experienced. :

1598. Founded by Poutrincourt.	1680. Restored to French.
1598. Transferred to Virginia by English grant.	1690. Captured by Sir W. Phipps (English).
1613. Destroyed (the fort) by Argal of Virginia.	1690. Captured by Pirates.
1613. Taken possession of by French.	1692. Transferred by charter from the English King to Massachusetts.
1625. Taken possession of by Sir William Alexander (English).	1697. Became French by Treaty of Ryswick.
1634. Ceded to France.	1704. Attacked by Massachusetts under Church.
1675. Granted to the 100 Associates.	1707. Attacked by Massachusetts under Mafch.
1675. Taken by Sir David Kirke (English).	1710. Captured by Nicholson (English).
1682. Transferred to France by Treaty St. Germain.	1711. Attacked by French and Indians.
1694. Scene of battle between D'Aunay and La Tour.	1713. Transferred to Great Britain by Treaty of Utrecht.
1694. Captured from French by Sedgewick with Massachusetts troops.	1722. Threatened by Indians.
1695. Ceded by Oliver Cromwell to France, Treaty Westminster.	1724. Attacked by Indians.
1697. Passed to Sir Thomas Temple (English).	1744. " " "
1697. Became French again by Treaty of Breda.	1744. Attacked by French under Duvivier.
1697. Became English.	1746. Threatened by French ships.
	1746. Threatened by Canadians under De Ramesay.
	1781. Sacked by Pirates.

Nova Scotia was formally ceded to Great Britain by the Treaty of Utrecht in 1713. Under its first name, La Cadie (I), (afterwards Acadia)

1. Acadia in the Micmac language means "abundance"; Shubenacadie, "abundance of salmon"; Apshechikumschwakadi, "abounding in black duck." The river is now called Caswell; in English, Duck River. Nova Scotia abounded in forests, forest animals, fertile lands, streams, fish—everything, in fact. The Indian wanted for nothing. "Acadi" the Indian would say of his country to his visitors; hence, probably, the origin of the early name of the country.

Nova Scotia included a considerable portion of New Brunswick. In 1785 the latter was made a separate province. Prince Edward Island, first named St. John's Island, annexed to Nova Scotia in 1763, was constituted a distinct colony in 1770. Cape Breton, separated politically from Nova Scotia in 1784, was re-annexed to the mother colony in 1820. Vancouver Island, which was a separate colony till 1866, was united that year to the mainland colony. The North-west Territories were acquired by purchase in 1870; other provinces subsequently joined. The island and territory of Northern British America were transferred to the Dominion by the British Government in 1880, and the Confederation, as it stands to-day, was completed. Newfoundland alone, of all the British North American group, remaining outside.

15. Representative institutions were granted by the British Government to Nova Scotia in 1758, to Prince Edward Island in 1770, and to New Brunswick in 1785. Vancouver Island received them in 1849 by Imperial Statutes 12 and 13 Vic., chap. 48, the first Legislature meeting in 1856; the mainland was granted them in 1858 by Imperial Statute 21 and 22 Vic., chap. 99. Responsible government was given by the Imperial Parliament to the Provinces of Canada in 1841, but not definitely established till 1847; to Nova Scotia and New Brunswick in 1848; to Prince Edward Island in 1851, and to British Columbia in 1871. The North-west Territories were governed at first under the administration of the Lieutenant-Governor of Manitoba; then by a Lieutenant-Governor and Council nominated by the Dominion Government (Act of 1880); then by a Lieutenant-Governor and by a Council, part elected and part nominated; then, in 1888, by a Lieutenant-Governor and Elective Assembly. In the Session of 1890 the Federal Parliament provided for the adoption of responsible government.

16. Appended is a list of the Governors General and Governors of the several provinces before Confederation, together with the years of office.

## GOVERNORS GENERAL OF CANADA.

FRENCH.	FRENCH.
1534. Jacques Cartier, Captain General.	1663. Chevalier de Saffray de Mézy.
1540. Jean François de la Roque, Sieur de Roberval.	1665. Marquis de Tracy. (a)
1598. Marquis de la Roche.	1665. Chevalier de Courcelles.
1600. Capitaine de Chauvin (Acting).	1672. Comte de Frontenac.
1603. Commandeur de Chastes.	1682. Sieur de la Barre.
1607. Pierre du Guast de Monts, Lt. General.	1685. Marquis de Denonville.
1608. Comte de Soissons, 1st Viceroy.	1689. Comte de Frontenac.
1612. Samuel de Champlain, Lt. General.	1699. Chevalier de Callières.
1633. " " 1st Gov. Gen'l.	1703. Marquis de Vaudreuil.
1635. Marc Antoine de Bras de fer de Chateaufort (Administrator).	1714-16. Comte de Ramesay (Acting).
1636. Chevalier de Montmagny.	1716. Marquis de Vaudreuil.
1648. Chevalier d'Ailleboust de Coulange.	1725. Baron (1st) de Longueuil (Acting).
1651. Jean de Lauzon.	1726. Marquis de Beauharnois.
1656. Charles de Lauzon-Charny (Admr.)	1747. Comte de la Galissonnière. (b)
1657. D'Ailleboust de Coulange.	1749. Marquis de la Jonquière.
1658. Viscount de Voyer d'Argenson.	1752. Baron (2nd) de Longueuil.
1661. Baron Dubois d'Avaugour.	1752. Marquis Duquesne-de-Menneville.
	1755. Marquis de Vaudreuil-Cavagnal.

(a.) Marquis de Tracy was the King's Lieut. General in America, and during the period he was in Canada, 30th June, 1665, to 28th August, 1667, he was virtually Governor of Canada.

(b.) Acting during captivity of La Jonquière.

GOVERNORS GENERAL OF CANADA—Continued.

ENGLISH.	ENGLISH.
1760. Gen. Jeffrey Amherst. (c)	1820. Earl of Dalhousie.
1764. Gen. James Murray.	1828. Sir James Kempt.
1768. Gen. Sir Guy Carleton. (d) (Lord Dorchester).	1830. Lord Aylmer.
1778. Gen. Frederick Haldimand.	1835. Lord Gosford.
1786. Lord Dorchester.	1838. Earl of Durham.
1797. Major-General Prescott.	1839. Sir John Colborne (Lord Seaton).
1807. Sir James Craig.	1839. Hon. C. P. Thompson (Lord Sydenham).
1811. Sir George Prevost.	1842. Sir Charles Bagot.
1815. Sir Gordon Drummond (Acting).	1843. Sir Charles Metcalfe.
1816. Sir John Coape Sherbrooke.	1845. Earl Cathcart.
1818. Duke of Richmond.	1847. Earl of Elgin.
1819. Sir Peregrine Maitland (Acting).	1855. Sir Edmund Walker Head.
	1861. Lord Monck.

(c) Although Amherst's name is usually placed first on the list of English Governors of Canada it is well known that at the capitulation of Montreal he divided the Provinces into three Governments or Districts, for each of which he appointed a Governor, and that he himself very shortly afterwards left the country and did not return. The Governors of these three Districts during what is commonly called the period of Military Rule, from 8th September, 1760, to 10th August, 1764, were:—

District of Quebec: Gen. James Murray, September, 1760, to August, 1764.

District of Three Rivers: Col. Ralph Burton, September, 1760, to May, 1762; Col. Fred. Haldimand, May, 1762, to March, 1763; Col. Ralph Burton, March, 1763, to October, 1763; Col. Fred. Haldimand, October, 1763, to August, 1764.

District of Montreal: Gen. Thos. Gage, September, 1763, to October, 1763; Col. Ralph Burton, October, 1763, to August, 1764.

(d) Sir Guy Carleton was Lieutenant-Governor and acting Governor General from 24th September, 1766, to 25th October, 1768.

GOVERNORS OF NOVA SCOTIA. (c)

AT PORT ROYAL.	AT HALIFAX.
1603. Pierre de Monts.	1749. Hon. E. Cornwallis.
1610. Baron de Poutrincourt.	1752. Col. Peregrine Hopson.
1611. Charles de Biencourt.	1753. Col. C. Lawrence.
1623. Charles de la Tour.	1760. J. Belcher (Acting).
1632. Isaac de Razilly.	1763. Montagu Wilmot.
1641. Chas. d'Aunay Charnisay.	1766. Michael Franklin.
1651. Chas. de la Tour.	1766. Lord William Campbell.
1657. Sir Thomas Temple. (f)	1773. F. Legge.
1670. Hubert de Grandfontaine.	1776. Mariot Arbuthnot.
1673. Jacques de Chambly.	1778. Sir Richard Hughes.
1678. Michel de la Valliere.	1781. Sir A. S. Hamond.
1684. François M. Perrot.	1782. John Parr.
1687. Robineau de Menneval.	1791. Richard Bulkeley.
1690. M. de Villebon.	1792. Sir John Wentworth.
1701. M. de Broullan.	1808. Sir G. Prevost.
1704. Simon de Benaventure.	1811. Sir John Sherbrooke.
1706. M. de Subercuse.	1816. Earl of Dalhousie.
1710. Col. Saml. Vetch.	1820. Sir J. Kempt.
1713. Gen. Francis Nicholson.	1828. Sir Peregrine Maitland.
Col. Saml. Vetch (2nd time).	1832. Thomas Jeffrey.
1717. Col. Richard Philipps. (g)	1834. Sir C. Campbell.
1725. Lawrence Armstrong (Lieut.-Gov.)	1840. Lord Falkland.
1739. John Adams. (h)	1846. Sir J. Harvey.
1740. Major Paul Mascarene. (i)	1852. Sir John G. le Marchant.
	1858. Earl of Mulgrave.
	1864. Sir Richard G. Macdonnell.
	1865. Gen. Sir Fenwick Williams.

(c.) From 1786 to 1867 the Governor at Quebec held also a commission as Governor of each of the Maritime Provinces, and (from 1791 to 1841) of Upper Canada, the Government

## GOVERNORS OF NEW BRUNSWICK.

1784. Thomas Carleton.	1824. John M. Bliss.
1803. Gabriel Ludlow.	1824. Gen. Sir H. Douglas.
1838. Edward Winslow.	1829. William Black.
1808. Lt.-Col. George Johnstone.	1831. Gen. Sir A. Campbell.
1809. Gen. Martin Hunter.	1837. Gen. Sir J. Harvey.
1811. Gen. William Balfour.	1841. Col. Sir W. Colebrooke.
1812. Gen. Geo. Stracy Smyth.	1848. Sir Edmund Head.
1813. Gen. Sir Thos. Saumarez.	1854. Hon. Sir J. H. T. Manners-Sutton.
1816. Lt.-Col. Harris W. Hailes.	1861. Hon. A. H. Gordon.
1817. Gen. Geo. S. Smyth.	1866. Major-Gen. Hastings-Doyle (Acting).
1823. Ward Chipman.	

## GOVERNORS OF LOWER CANADA.

1766. Guy Carleton.	1790. A. Clarke.
1775. H. C. Cramahé.	1797. R. Prescott.
1785. Henry Hamilton.	1797. R. S. Milnes.
1785. Henry Pope.	1808. Sir F. N. Burton.

## GOVERNORS OF UPPER CANADA.

1792. Col. John G. Simcoe.	1818. Sir Peregrine Maitland.
1796. Peter Russell (Administrator).	1828. Sir John Colborne.
1799. Peter Hunter.	1836. Sir Francis Bond Head.
1805. Alex. Grant (Administrator).	1838. Sir George Arthur.
1806. Francis Gore.	

## GOVERNORS OF CAPE BRETON.

1784. Major J. F. W. Desbarres.	1800. Gen. Despard (Administrator).
1787. Lt.-Col. Macarmick.	1807. Brig.-Gen. Nepean "
1795. D. Mathews (Administrator).	1813. " Swayne "
1798. General Ogilvie "	1816-20. Major-Gen. Anslie.
1799. Brig.-Gen. Murray "	

In 1820 Cape Breton was re-annexed to Nova Scotia.

## GOVERNORS OF PRINCE EDWARD ISLAND.

1770. Capt. Walter Patterson.	1836. Sir John Harvey.
1775. P. Callbeck (Administrator).	1837. Sir Charles A. Fitzroy.
1779. Thomas DesBrisay "	1841. Sir Henry Vere Huntley.
1786. Lt.-Gen. Edmund Fanning.	1847. Sir Donald Campbell.
1805. Col. J. F. W. Debarres.	1851. Sir Alexander Bannerman.
1812. W. Townshend.	1854. Sir Dominick Daly.
1813. Chas. Douglas Smith.	1859. George Dundas.
1824. Col. John Ready.	1868. Sir Robert Hodgson.
1831. Sir Aretas W. Young.	1870. Sir Wm. C. F. Robinson.
1834. George Wright (Administrator).	

of these provinces being administered by a Lieut.-Governor, except during the presence in any province of the Governor General.

(f.) Acadia was held by the English from 1654 to 1670, for although the Treaty of Breda (1667) provided for its restoration to France it was not actually surrendered till July, 1670.

(g.) Philipps appears to have remained Governor of Nova Scotia for several years, Armstrong administering the Government till he died by his own hand in 1739.

(h.) Adams administered the Government after Armstrong's death from 6th December, 1739, to 22nd March, 1740.

(i.) Mascarene administered the Government as President of the Council from 22nd March, 1740, till 1748, when he took command as Lieut.-Governor and Commander-in-Chief in the absence of Philipps. (See his letter to Secretary of State).

GOVERNORS OF VANCOUVER ISLAND.

1859. Richard Blanshard.  
1851. James Douglas.

1864. Arthur E. Kennedy.

GOVERNORS OF BRITISH COLUMBIA.

(Mainland.)

1859. Sir James Douglas.

1869. Capt. F. Seymour.  
(Became 1st Governor of the United  
Province.)

GOVERNORS OF UNITED PROVINCE.

1866. Capt. F. Seymour.

1869. Anthony Musgrave.

17. Chronological landmarks in the History of Canada are:—

- 1497. June 24. Cabot discovered Cape Breton.
- 1500. Gaspar Cortereal entered the Gulf of St. Lawrence.
- 1517. Sebastian Cabot discovered Hudson Bay.
- 1524. Verrazano explored the Atlantic Coast of Nova Scotia.
- 1534. July 1. Landing of Jacques Cartier at Esquimaux Bay. First landing on Canadian soil.
- 1535. July. Second visit of Cartier.  
August 10. Cartier anchored in a small bay at the mouth of the St. John River, which, in honour of the day, he named after St. Lawrence. The name was afterwards extended to the gulf and river.
- 1540. Third visit of Cartier.
- 1542-43. The Sieur de Roberval and his party wintered at Cap Rouge.
- 1598. The Marquis de la Roche landed 40 convicts on Sable Island, where they were left for five years without relief, only twelve being found alive at the end of that time.
- 1603. First visit of Samuel de Champlain to Canada.
- 1605. Founding of Port Royal (Annapolis), Acadia (derived from an Indian word "Cadie," a place of abundance), by the Baron de Poutrincourt.
- 1608. Second visit of Champlain. Founding of Quebec, the first permanent settlement of Canada. The name is said to be an Indian one, "Kebec," a strait. 28 settlers wintered there, including Champlain.
- 1611. Establishment of a trading post at Hochelaga. Jesuits arrive in Port Royal, Acadia.
- 1613. St. John's, Newfoundland, founded. Ottawa River discovered by Champlain.
- 1615. Lakes Huron, Ontario and Nipissing discovered by Champlain. (Champlain sailed up the Ottawa River, crossed Lake Nipissing and descended French River into Georgian Bay and Lake Huron, returning by Lake Ontario).
- 1617. Canada invaded by the Iroquois.
- 1620. Population of Quebec, 60 persons.
- 1621. First mention of the name "Nova Scotia" in a grant of the Province to Sir W. Alexander by James I. First code of laws promulgated at Quebec.
- 1624. Nova Scotia first settled by the English.
- 1625. Jesuits first arrive in New France.
- 1627. Canada granted to the Company of "100 Associates" by the King of France. Feudal system established in Canada.
- 1629. July. Capture of Quebec by the English under Sir David Kirke. 117 persons wintered there.
- 1632. Canada, Cape Breton and Acadia restored to France by the Treaty of St. Germain-en-Laye. First school opened in Canada, at Quebec.
- 1634. July 4. The Town of Three Rivers founded. August 13. Fort Richelieu (Sorel) founded.
- 1635. Sillery founded Jesuits' College in Quebec. Lake Michigan discovered by Nicolet. December 25. Death of Champlain at Quebec.
- 1639. Ursuline Convent founded at Quebec.
- 1640. Lake Erie discovered by Chammonot and Brébeuf.
- 1642. May 18. Ville Marie (Montreal) founded by Maisonneuve.
- 1642-1667. Frequent and serious wars between the French and the Iroquois Indians.
- 1647. Lake St. John discovered.
- 1651. Expedition to Hudson Bay.

1654. Acadia taken by the English.
1659. M. de Laval, first Roman Catholic Bishop of Canada, arrived from France. Lake Superior discovered by French traders.
1663. Company "of 100 Associates" dissolved. Royal Government established. First Courts of Law.
1664. Seigniories granted.
1667. Acadia restored to France by Treaty of Breda. White population of New France, 3,918.
1670. May 13 (n.s.). Hudson's Bay Company founded.
1672. Count de Frontenac appointed Governor. Population, 6,705.
1673. June 13. Cataragui (Kingston) founded.
1674. Iroquois established at Caughnawaga.
1689. August 5. Massacre at Lachine by Indians.
1690. Capture of Port Royal by Sir William Phipps, and unsuccessful attack upon Quebec.
1692. Population of New France, 12,431.
1695. Iberville took English forts in Hudson Bay.
1697. Treaty of Ryswick. Mutual restoration of places taken during the war.
1698. Death of Frontenac. Population, 13,355.
1701. August 4. Ratification of a treaty of peace with the Iroquois at Montreal. Canadians granted leave to manufacture.
- 1709-10-11. Canada invaded by the English. Port Royal (Annapolis) taken by Nicholson (1710).
1713. Treaty of Utrecht, by which Hudson Bay and adjacent territory, Nova Scotia (Acadia) and Newfoundland were ceded to the English.
1715. First ships built at Quebec.
1719. First Government founded by the English in Nova Scotia.
1720. Population of New France, 24,434, and of St. John's Island (Prince Edward Island) about 100. Fort of Louisbourg built.
1721. January 27. Mail stages established between Quebec and Montreal.
1722. Division of settled country in Canada into Parishes.
1739. Population of New France, 42,701. First forge erected in Canada—at St. Maurice.
1745. Louisbourg, Cape Breton, taken by the English.
1747. Militia rolls drawn up for Canada. Courts of Justice constituted in Nova Scotia.
1748. Restoration of Louisbourg to the French in exchange for Madras, by the peace of Aix-la-Chapelle.
1749. June 21. The City of Halifax founded by Lord Halifax; 2,544 British emigrants brought out by the Hon. Edward Cornwallis.
1752. March 23. Issue of the Halifax *Gazette*, the first paper published in Canada.
1755. Expulsion of the Acadians from Nova Scotia. About 3,000 were deported at the request of the New England colonists.
1758. First meeting of Nova Scotian Legislature.
- July 26. Final capture of Louisbourg by the English.
1759. July 26. Capture of Fort Niagara by the English under General Prideaux, who was killed during the assault.
- July 25. Commencement of the siege of Quebec.
- September 12. Battle of the Plains of Abraham and defeat of the French by General Wolfe, who was killed on the field. Loss of the English, 700, and of the French, 1,500.
- September 13. Death of General Montcalm, commander of the French forces.
- September 18. Capitulation of Quebec to General Townsend.
1760. April. Unsuccessful attack on Quebec by General de Lévis. Capitulation of Montreal and completion of the conquest of Canada. Population of New France, 70,000.
1762. British population of Nova Scotia, 8,104. First English settlement in New Brunswick.
1763. February 10. Treaty of Paris signed, by which France ceded and guaranteed to His Britannic Majesty in full right "Canada with all its dependencies." Cape Breton annexed to Nova Scotia.
1764. June 21. Issue of the Quebec *Gazette*. In this year Pontiac, Chief of the Ottawas, organized a conspiracy for a simultaneous rising among the Indian tribes, and a general massacre of the British. The plan was successfully carried out in several places and all the inhabitants put to death, but finally the Indians were forced to succumb.
1768. General Carleton, afterwards Lord Dorchester, appointed Governor General.
1769. St. John's Island (Prince Edward Island) made into a separate province, with Walter Patterson for the first Governor. The first meeting of an elected House of Assembly took place in July, 1773.

1774. The "Quebec Act" passed. This Act gave the French Canadians the free exercise of the Roman Catholic religion, the enjoyment of their civil rights, and the protection of their own civil laws and customs. It annexed large territories to the Province of Quebec and provided for the appointment by the Crown of a Legislative Council, and for the administration of the criminal law as in use in England. North-west coast of British Columbia explored by Vancouver and Cook.
1775. Outbreak of the American Revolution and invasion of Canada by the Americans; every place of importance rapidly fell into their hands, with the exception of Quebec, in an attack upon which General Montgomery was defeated and killed on 31st December.
1776. Reinforcements arrived from England, and the Americans were finally driven out of Canada.
1777. Order of Jesuits abolished by Papal decree and consequent escheat of their estates in Canada to the Crown.
1778. June 3. First issue of the *Montreal Gazette*. This paper is still published.
1783. September 3. Signing of the Treaty of Versailles and definition of the boundary line between Canada and the United States, viz., the Great Lakes, the St. Lawrence, the 45th parallel of north latitude, the highlands dividing the waters falling into the Atlantic from those emptying themselves into the St. Lawrence and the Ste. Croix River.
1784. Population of Canada, 113,012. (United Empire Loyalists in Upper Canada not included.) Fredericton, N.B., founded. Cape Breton separated from Nova Scotia politically.  
British population of Nova Scotia, 32,000 (about 11,000 Acadians not included).
1784. About this time began the migration into Canada and Nova Scotia of the United Empire Loyalists, as they were called—that is, of those settlers in the American States who had remained faithful to the British cause. This migration lasted for several years, and though it is not possible to arrive at any exact figures, it is probable that the number altogether was not less than 40,000. The Loyalists were well treated by the British Government, and large grants of lands were made to them in various parts of the country. The banks of the St. Lawrence and the shores of Lake Ontario, in particular, were settled by about 10,000 persons, on lands allotted to them by the Government.
1785. May 18. Date of charter of St. John, N. B., the oldest incorporated town in Canada. Sydney, C.B., founded by Lieutenant-Governor Desbarres.  
August 16. New Brunswick made a separate province; population, 11,457. Re-introduction of the right of *habeas corpus*.
1787. First Colonial See established in the British Empire in connection with the Church of England, in Nova Scotia.
1788. Western Canada (now Ontario) divided into five districts, and English law introduced. King's College (N.S.) founded.
1791. Division of the Province of Quebec into two provinces, viz., Upper and Lower Canada. Each province to have a Lieutenant-Governor, and a Legislature composed of a House of Assembly and a Legislative Council. The members of the council were to be appointed by the Lieutenant-Governor for life; those of the Assembly to be elected by the people for four years. Population of the two provinces, 161,311.
1792. September 17. First meeting of the Parliament of Upper Canada at Newark (Niagara), under Lieutenant-Governor Simcoe. The House of Assembly consisted of sixteen members.  
December 17. Opening of the Legislature of Lower Canada, at Quebec, by Gen. Clarke. The House of Assembly consisted of fifty members.
1793. Abolition of slavery in Upper Canada. Upper and Lower Canada separated from the Church of England See of Nova Scotia, and founded into a separate See. Toronto founded as York. Rocky Mountains crossed by Mackenzie. Public Accounts first published.
1798. The seat of Government of Upper Canada removed from Niagara to York (Toronto).
1798. The name of St. John's Island changed to that of Prince Edward Island, in honour of the Duke of Kent, the change to take effect in 1800. Population, 4,500.
1799. Education Act passed in Upper Canada.
1800. Jesuits' Estates taken possession of by the Government. King's College (N.B.) granted a royal charter.  
5. Founding of the *Quebec Mercury*.  
22. Issue of *Le Canadien*, the first newspaper printed entirely in French.  
4 Upper Canada, 70,718, and of Lower Canada, 250,000.  
15 founded in Upper Canada.  
16. Lawrence River.  
17. Parliament.

1812. War declared between Great Britain and the United States.  
 July 17. Mackinaw surrendered to the British.  
 July 18 20. Americans repulsed at River Canard.  
 August 5. Tecumseh defeated Americans at Brownstown.  
 August 16. Surrender of Detroit by the Americans under General Hull to General Brock.  
 September 16. Americans repulsed at Presqu'île.  
 September 21. Gananoque raided by Americans.  
 October 12. Americans defeated at Queenston.  
 November 10. Kingston bombarded by Americans.  
 November 20. Americans repulsed at Odelltown.  
 November 28. Americans repulsed near Fort Erie.
1813. January 22. Americans defeated at Frenchtown.  
 February 6. Brockville raided by Americans.  
 February 22. Ogdensburg taken by British.  
 May 5. Americans defeated before Fort Meigs.  
 May 29. Americans defeated at Sackett's Harbour.  
 June 5. Americans defeated at Stony Creek.  
 June 19. American stores captured at Great Sodus.  
 June 24. Americans surrendered at Beaver Dam.  
 July 4. Americans made prisoners at Fort Schlosser.  
 October 1. Americans repulsed at Four Corners.  
 October 26. Americans defeated at Chateauguay. Defeat of three thousand Americans under General Hampton by Colonel de Salaberry and four hundred French Canadian militia.  
 November 11. Americans defeated at Chrysler's Farm. Defeat and rout of Gen. Wilkinson and the Americans by the Canadian Militia under Col. Morrison.
- December 19. Fort Niagara captured by British.  
 December 19. Lewiston destroyed by British.  
 December 31. Black Rock captured by British.
1814. March 30. Americans repulsed at La Colle Mill.  
 May 6. Oswego captured by British.  
 July 19. Prairie du Chien surrendered to British.  
 July 25. Americans defeated at Lundy's Lane.  
 August 12. Americans defeated near Fort Erie.  
 September 17. Americans repulsed at Fort Erie.  
 December 24. War terminated by the Treaty of Ghent.  
 Population of Upper Canada, 95,000, and of Lower Canada, 335,000.
1816. Common schools established in Upper Canada.
1817. First Treaty with the North-west Indians; the Earl of Selkirk signing on behalf of King George III. First banks opened in Montreal and Quebec cities.
1818. October 30. Convention signed at London regulating the privileges of Americans in the British North American fisheries. Halifax and St. John, N.B., made free ports.
1821. Commencement of the Lachine Canal. (First vessels passed through in 1825.)  
 Amalgamation of the Hudson's Bay Co. and the North-west Trading Co.
1825. Great fire in the Miramichi District of New Brunswick. Five hundred lives estimated lost. Three million acres of forest destroyed.
1827. Guelph founded by John Galt. Treaty of London. McGill College received its charter. It was founded in 1811. King's College, Toronto, founded.
1828. Saguenay District explored. Pictou and Sydney made free ports.
1829. Upper Canada College opened.
1831. Population—Upper Canada, 236,702; Lower Canada, 553,134.
1833. August 5. The steamer "Royal William" left Quebec for Pictou, N.S., discharged cargo and coaled, leaving Pictou on 18th August for Gravesend, England, at which port she arrived after a stormy passage, during which she disabled some of her engines. The boat was built at Quebec during 1830-31, and was the first steamer that ever crossed the Atlantic, the motive power of which was entirely steam.
1836. July 21. Opening of the railway from Laprairie to St. John's, the first railway in Canada.
- 1837-38. Outbreak of rebellion in both provinces. It was suppressed in Upper Canada by the militia, and in Lower Canada by the British troops.
1840. Death of Lord Durham, to whose exertions the subsequent union of the provinces was mainly due. Quebec and Montreal incorporated. Montreal daily *Advertiser* founded; first daily journal in Canada.
1841. February 10. Union of the two Provinces under the name of the Province of Canada, and establishment of responsible government. The Legislature was to consist of a Legislative Council and Legislative Assembly, each province to

be represented by 62 members, 42 elected by the people and 20 appointed by the Crown.

Population of Upper Canada, 455,688.

May 17. Land slide from the Citadel rock, Quebec; 32 persons killed.

June 13. Opening of the first United Parliament, at Kingston, by Lord Sydenham.

1842. August 9. Settlement of the boundary line between Canada and the United States by the Ashburton Treaty.

1843. Victoria, B.C., founded by James Douglas.

1844. Population of Lower Canada, 697,084.

1845. Large fires in the city of Quebec; 25,000 people rendered homeless. Welland Canal opened.

1846. Oregon Boundary Treaty.

1847. Grand Trunk Railway begun. Navigation laws repealed.

Electric telegraph line established between Quebec, Montreal and Toronto.

1848. The St. Lawrence Canals open for navigation.

1849. April 25. Riots in Montreal over the passage of the Rebellion Losses Bill, and burning of the Parliament Library at Montreal.

1850. The first sod of the Northern Railway turned by Lady Elgin. The road was opened from Toronto to Bradford on 13th June, 1853, and was the first locomotive railway in operation in Upper Canada. The Robinson Treaties with the Indians of the northern shores of Lakes Huron and Superior concluded. The main features of these treaties, viz.:—Annuities, reserves of land and liberty to fish on the domains of the crown not alienated—have been followed in the subsequent treaties.

1851. Transfer of the control of the postal system from the British to the Provincial Governments, and adoption of a uniform rate of postage, viz.:—3 pence per ½ ounce. The use of postage stamps was also introduced.

Population of Upper Canada, 952,004; of Lower Canada, 890,261; of New Brunswick, 193,800, and of Nova Scotia, 276,854.

Young Men's Christian Association organized in Montreal; first in America.

1852. Commencement of the Grand Trunk Railway. Trinity College, Toronto, and Laval University, Quebec, opened.

1853. The number of members in the Legislative Assembly was increased from 84 to 130, being 65 from each province.

May 9. First ocean steamer arrived at Quebec.

1854. January 27. Main line of the Great Western Railway opened for traffic.

Abolition of Seigniorial Tenure in Lower Canada, and settlement of the Clergy Reserve question.

June 5. Reciprocity Treaty with the United States signed at Washington. It provided for mutual rights of fishing in certain Canadian and American waters, for free interchange of the products of the sea, the soil, the forest and the mine; it allowed Americans the use of the St. Lawrence River and Canadian canals on the same terms as British subjects, and gave to Canadians the right to navigate Lake Michigan. The Treaty was proclaimed by the President of the United States on 16th March, 1855, on which date it came into operation. It was to last ten years.

First screw steamer from Liverpool to the St. Lawrence River.

1856. The Legislative Council of the province of Canada was made an elective chamber. Allan steamship line commenced regular fortnightly steam service between Canada and Great Britain.

1857. March 12. Desjardins Canal railway accident; 70 lives lost.

1858. Adoption of the decimal system of currency. Selection by the Queen of the City of Ottawa as the Capital of the Dominion and permanent seat of Government. Atlantic cable laid between England and Nova Scotia.

April. Gold found in British Columbia.

September. Gold found in Tangier River, Nova Scotia.

1859. New Westminster founded by Colonel Moody.

1860. Winnipeg founded.

First Provincial Synod of the Church of England—held in Montreal.

August 25. Opening of the Victoria Bridge by the Prince of Wales. This bridge crosses the St. Lawrence at Montreal, on the line of the Grand Trunk Railway. It is the largest iron tubular bridge in the world, is 60 feet high in the centre, and nearly two miles in length.

September 1. Laying of the corner stone of the Dominion Buildings at Ottawa by the Prince of Wales. These buildings, together with the Departmental Buildings have been erected at a total cost, up to 30th June, 1894, of \$4,979,242.

City founded in Montreal.

Population of Canada, 1,396,091; of Lower Canada, 1,111,566; of New Brunswick, 193,800; of Nova Scotia, 330,857; of Prince Edward Island, 80,857; of Newfoundland, exclusive of Indians, 3420.

1862. Conference at Charlottetown re Confederation. Manitoulin Island Treaty with Indians arranged by Hon. William Macdougall.
1864. Quebec Conference held. Resolutions passed in favour of Confederation of British North American provinces. Raid from St. Albans into Canada.
1866. Nova Scotia and New Brunswick accept Confederation with Canada.
- Great fire in Quebec, 2,129 houses burned in St. Roch's and St. Sauveur suburbs.
1866. March 17. Termination of the Reciprocity Treaty, in consequence of notice given by the United States. It lasted 11 years.
- June 1. Invasion of Canada by Fenians. Battle of Ridgeway, and retreat of the volunteers.
- June 3. Withdrawal of the Fenians into the United States.
- June 8. First meeting of Parliament in the new buildings at Ottawa. At this meeting the final resolutions necessary on the part of the Province of Canada to effect the Confederation of the provinces were passed.
- November 17. Union of Vancouver Island and British Columbia proclaimed.
1867. February 10. The British North American Act passed by the Imperial Legislature.
- July 1. Union of the provinces of Canada, Nova Scotia and New Brunswick under the name of the Dominion of Canada. The names of Upper and Lower Canada were changed to Ontario and Quebec respectively.
- Lord Monck was the first Governor General of the Dominion, and the first Parliament met on the 6th November, Sir John A. Macdonald being Premier.
1868. April 7. Hon. T. D'Arey McGee, M.P., murdered at Ottawa.
- July 31. The Rupert's Land Act passed by the Imperial Government providing for the acquisition by the Dominion of the North-west Territories.
- Uniform rate of 3 cents for letters throughout the Dominion adopted.
1869. June 22. Bill passed providing for the Government of the North-west Territories.
- October 29. Hon. Wm. McDougall appointed Lieutenant-Governor. Red River Rebellion.
- November 19. Deed of surrender signed, Hudson's Bay Company to Her Majesty.
1870. March 4. Thomas Scott shot at Fort Garry.
- September 24. Arrival at Fort Garry of the expedition under Colonel (now Lord) Wolseley, when the rebels were found to have dispersed.
- May 25. Fenians crossed the frontier at Trout River, in Quebec, but were driven back by the volunteers.
- July 15. Addition of the North-west Territories to the Dominion and admission of the Province of Manitoba into the Confederation. This province was created out of a portion of the newly acquired territory.
1871. Pacific Railway surveys begun. Post cards issued. Stone fort and Manitoba Peace Indian Treaties (Nos. 1 and 2) negotiated.
- May 8. Signing of the Treaty of Washington.
- July 20. Admission of British Columbia into the Confederation.
- Population of the four provinces, 3,485,761; of Manitoba, 18,905; of British Columbia, 36,224, and of Prince Edward Island, 94,021. Total, 3,635,001.
- November 11. The last regular troops left Quebec.
1872. Abolition of dual representation. Dominion archives established.
1873. May 20. Death of Sir George E. Cartier, in London. North-west Angle Indian Treaty (No. 3) signed by Hon. Alex. Morris.
- July 1. Admission of Prince Edward Island into the Confederation.
- November 7. McKenzie Administration formed. Island of St. Juan awarded the United States by the Emperor of Germany.
1874. Qu'Appelle Indian Treaty (No. 4) signed by Hon. A. Morris.
1875. Rupert's Land and North-west Territories placed under jurisdiction of a Lieutenant Governor separate and distinct from Manitoba. Lake Winnipeg Indian Treaty (No. 5) signed by Hon. A. Morris and Hon. J. McKay.
- Presbyterian Church in Canada formed by the Union of all the Presbyterian Churches.
1876. Opening of the Intercolonial Railway from Quebec to Halifax. Forts Carleton and Pitt Indian Treaty (No. 6) signed. Canadians awarded 300 prizes at Exhibition in Philadelphia, U.S.A.
- June 5. Supreme Court of Canada first session. Legislative Council of Manitoba abolished. District of Keewatin created by Act of Parliament.
1877. May. Medical Council of Great Britain decided to recognize Canadian degrees.
- June 20. Great fire in St. John, New Brunswick.
- September. First convention of Dom. Y. M. C. Association in Quebec.
- October. First exportation of wheat from Manitoba to Great Britain.
- November 23. Award by Halifax Fisheries Commission of the sum of \$5,500,000 to be paid by the United States to the Imperial Government. Treaty with the Blackfoot Indians (No. 7) signed by Hon. David Laird.
1878. Conservatives win in General Election. Canadians awarded 225 prizes at Paris Exhibition.

1879. Adoption of a protective tariff, otherwise called the "National Policy."
1880. Death of the Hon. George Brown.  
 All British possessions on North American continent (excepting Newfoundland) annexed to Canada by Imperial Order in Council from 1st Sept., 1880. The Arctic Archipelago transferred to Canada by Imperial Order in Council.  
 Royal Canadian Academy of Arts founded by the Marquis of Lorne.  
 October 21. Contract signed for the construction of the Canadian Pacific Railway. This contract was subsequently ratified by 44 Vic., chap. 1 (1881).
1881. April 4. Population of the Dominion, 4,324,810. Royal Society of Canada founded.  
 May 2. First sod turned by the Canadian Pacific Railway Company.
1882. May 8. Provisional districts of Assiniboia, Saskatchewan, Alberta and Athabaska created.  
 May 25. First meeting of the Royal Society of Canada in Ottawa.  
 June 22. Constitutionality of the Canada Temperance Act confirmed by the Privy Council.  
 August 23. The new seat of Government for the North-west Territories received the name of Regina.
1883. Methodist Churches in Canada formed into one body—The Methodist Church in Canada.  
 First Congress of the Church of England in Canada opened in Hamilton.
1884. Boundary between Ontario and Manitoba settled by decision of Judicial Committee of English Privy Council and confirmed by Her Majesty in Council, August 11, 1884.
1885. March 26. Outbreak of Rebellion in the North-west; commencement of hostilities at Duck Lake.  
 April 2. Massacre at Frog Lake.  
 April 14. Fort Pitt abandoned.  
 April 24. Engagement at Fish Creek.  
 May 12. Battle of Batoche, and defeat of the rebels.  
 May 26. Surrender of Poundmaker.  
 July 1. Termination of the fishery clauses of the Washington Treaty by the United States.  
 July 2. Capture of Big Bear, and final suppression of the rebellion. Total loss of militia and volunteers under fire: killed, 38; wounded, 115. The rebel loss could not be ascertained.  
 November 7. Driving of the last spike of the Canadian Pacific Railway.  
 November 16. Hanging of Riel.
1886. May. 4. Opening of the Indian and Colonial Exhibition in London.  
 June 13. Town of Vancouver totally destroyed by fire; 4 houses left standing; 50 lives lost. First through train left Montreal for Vancouver. First Canadian Cardinal, Archbishop Taschereau.
1887. Interprovincial Conference held at Quebec. At this Conference Sir Oliver Mowat was President. Twenty-one fundamental resolutions were passed—one declaring in favour of unrestricted reciprocity in trade with the United States.  
 April 4. Important Conference in London between representatives of the principal Colonies and the Imperial Government. Canada was represented by Sir Alexander Campbell and Mr. Sandford Fleming.  
 June 14. First C. P. R. steamship arrived at Vancouver from Yokohama.  
 November 15. Meeting of the Fisheries Commission at Washington.
1888. February 15. Signing of the Fishery Treaty at Washington.  
 August. Rejection of the Fishery Treaty by the United States Senate.
1889. September 19. Landslide (second) from Citadel Rock, Quebec; 45 persons killed. Boundaries of Ontario confirmed by Imperial statute.
1890. May 6. Longue Pointe Lunatic Asylum, near Montreal, destroyed by fire; over 70 lives lost. The buildings had been erected at a cost of \$1,132,232.  
 October 6. McKinley Tariff Bill came into operation in the United States.
1891. April 6. Population of the Dominion, 4,833,239.  
 Power given by Parliament to the Government to refer to the Supreme Court of Canada for its opinion important questions of law or fact touching Provincial legislation or the appellate jurisdiction as to education and any other matters.  
 April 29. The first of the new C. P. R. steamers arrived at Vancouver from Yokohama, beating the record by over two days. The mails were landed in Montreal in three days and 17 hours from Vancouver.  
 June 6. The Right Hon. Sir John A. Macdonald, G.C.B., Premier of the Dominion, died.
1892. April 17. Death of Hon. Alexander Mackenzie.  
 May 24. Death of Sir Alexander Campbell, Lieutenant-Governor of Ontario.  
 September 28. Legislative Council of New Brunswick abolished.

1892. December 5. Resignation (from ill-health) of Sir J. J. C. Abbott, K.C.M.G., Premier of the Dominion. Sir John S. D. Thompson called upon to form a Government.
1893. Legislative Council and Assembly of Prince Edward Island merged into one body.
- April 4. The Court of Arbitration, respecting the seal fisheries in Behring Sea, which met formally on 23rd March, began its session. Arbitrators: Baron de Cousse (Belgium), Lord Hannen (Great Britain), Sir John Thompson (Canada), John M. Harlan and J. P. Morgan (United States), Marquis Visconti Venosta (Italy), and M. Gran (Norway and Sweden).
- October 30. Death of Hon. Sir J. J. C. Abbott.
- June 8. First steamer of the new Australia-Canada line arrived at Victoria, B. C. Title "Honourable," as conferred by the Queen in the Duke of Buckingham's despatch, No. 164, of 24th July, 1893, explained by Earl Ripon to extend to all parts of Her Majesty's Dominions. See *Official Gazette* (Canada) August 5, 1893. Canadians awarded 2,126 prizes at Chicago Exhibition.
1894. June 25. Opening at Ottawa of the Colonial Conference to discuss matters of interest to the Empire. The Imperial Government, New South Wales, Cape Colony, New Zealand, Victoria, Queensland and Canada were represented.
- July 23. Canadian readjusted Customs Tariff assented to by Governor General.
- August 27. United States Congress Tariff Bill becomes law without the signature of President Cleveland.
- December 12. Death of Right Hon. Sir John Thompson in Windsor Castle.
1895. October 2. Proclamation giving to the unorganized and unnamed portions of the North-west the following names: Ungava, Franklin, Mackenzie and Klondike Districts.

18. As questions are frequently asked this office respecting events which have affected the relations of the British North American Provinces with the United States of America, the following statement is published:—

#### MOVEMENTS AFFECTING THE RELATIONS OF CANADA AND NEW FOUNDLAND WITH THE UNITED STATES.

1. Secession of the 13 Colonies from the British Empire .....	1775-82
2. Imperial Order in Council restricting trade between the United States and the British Colonies .....	1783
3. Establishment of countervailing and discriminating duties by Imperial statutes .....	1797-98
4. Embargo law passed by United States Congress .....	1807
5. Governors of all the British North American Provinces authorized to open their ports to United States vessels .....	1808
6. Convention of 1815, of which Mr. Cushing says: "It deserves to be mentioned that the convention of 1815 was the first notable departure by Great Britain from the exclusiveness of her navigation laws" .....	1815
7. Convention of 1818, by which the fishery privileges of the United States in British North American waters are defined .....	1818
8. Imperial Order in Council declaring colonial ports closed to United States vessels .....	1827
9. United States President's proclamation declaring trade between the United States and the British North American Provinces suspended .....	1828
10. Arrangement of 1830, by which United States ports are opened to British North American vessels in return for the British West Indian ports opened to United States vessels .....	1830
11. Discriminating Customs duties abolished in the British North American Provinces by Lord Stanley's despatch .....	1843
12. Drawback law put into force .....	1846
13. Corn laws repealed in England .....	1846
14. British North American Provinces obtain power to enact their own tariffs (subject only to the control of the Queen in Council) by the British Possessions Act .....	1846
15. Canadian Legislature acted upon the authority thus secured and reduced duties on American manufactures from 12½ to 7½ per cent and increased those on British manufactures from 5 to 7½ .....	1847
16. Canadian Legislature passed an Act granting to natural products of the United States entry free of Customs duty on the United States reciprocating .....	1847
17. United States restrict colonial vessels' privilege of discharging cargo in United States at port of delivery to port of entry only .....	1849
18. United States Navigation Law of 1817, and British Navigation Law of 1849, came into operation simultaneously, January .....	1850
19. Treaty of Reciprocity comes into force .....	1850

MOVEMENTS AFFECTING THE RELATIONS OF CANADA AND NEW-  
FOUNDLAND WITH THE UNITED STATES—*Continued.*

20. Treaty of 1854 abrogated by the United States to force the British North American Provinces into the American Union.....	1896
21. Confederation of the British North American Provinces, by which free trade is established among them.....	1867
22. Canadian Customs Act of 1868 provides for free entry of United States natural products on condition of the United States reciprocating.....	1868
23. Washington Treaty of 1871 comes into force July.....	1873
24. Hon. George Brown goes to Washington, and in conjunction with the British Minister there, and with Mr. Fish on the part of the United States, prepares a treaty which received the support of the President, but was strangled in secret session of the United States Senate. The draft treaty admitted certain United States manufactures into Canada, but it did not discriminate against British manufactures, which were also to be admitted into Canada free to the same extent as United States manufactures.....	1874
25. National Policy adopted by the Canadian Confederation.....	1879
26. Abrogation by the United States of the fisheries clauses of the Treaty of 1871, thus ending free trade in fish by treaty arrangement.....	1885
27. Hon. Sir L. S. Sackville-West, Hon. Sir Charles Tupper and Rt. Hon. Joseph Chamberlain visit Washington as commissioners appointed by the Queen to negotiate a treaty of commerce, &c., between the United States and Canada. A treaty was negotiated and its provisions embodied in chap. 30, Canadian Acts of 1888, but it failed of ratification by the United States Senate.....	1886

BOND-BLAINE CONVENTION.

28. Under this convention it was proposed to give (1) United States fishing vessels entering the waters of Newfoundland (a) the privilege of purchasing bait fish at all times on same terms and conditions and subject to same penalties as Newfoundland vessels; (b) privilege of touching and trading, selling oil and fish and procuring supplies; (c) special tariff rates for goods imported from the United States into the island ( <i>see</i> Sessional Papers, 1892, No. 23c, page 58); (2) Newfoundland, entrance free of duty into the United States of all products of her fisheries, excepting "green codfish." The arrangement fell through on account of opposition from Canada.....	1890
--	------

19. The following are descriptions of the boundaries of Quebec, Ontario and Manitoba, so far as they have been settled :—

Quebec was first bounded in 1763, in a proclamation by the King of Great Britain, dated 7th of October of that year. The proclamation reads: "First the Government of Quebec, bounded on the Labrador Coast by the river St. John, and thence by a line drawn from the head of that river through the Lake St. John to the south end of the Lake Nipissim from whence the said line, crossing the River St. Lawrence and the Lake Champlain in 45 degrees of north latitude, passes along the islands which divide the rivers that empty themselves into the said River St. Lawrence from those which fall into the sea; and also along the north shore of the Baie des Chaleurs and the coast of the Gulf of St. Lawrence to Cape Rosieres, and from thence crossing the mouth of the River St. Lawrence by the west end of the Island of Anticosti, terminates at the aforesaid River St. John." By the same proclamation all the coast from the River St. John to Hudson Straits, together with the Islands of Anticosti and Magdaline, and all other smaller islands lying upon the said coast, were placed under the care and inspection of the Governor of Newfoundland. The islands of St. John (now Prince Edward) and Cape Breton were at the same time annexed to Nova Scotia. Anticosti was subsequently separated from Newfoundland and placed under the jurisdiction of the Province of Canada.

BOUNDARIES OF ONTARIO.

Sir John Macdonald, in the session of 1889, introduced and carried a resolution for an address to Her Majesty to cause a measure to be introduced into the Parliament of the

United Kingdom, declaring the westerly, northerly and easterly boundaries of Ontario. The Imperial Parliament, in session of 1889, passed an Act in accordance with the address to the Queen by the Canadian Parliament. The boundaries are defined in the Imperial Act as follows: "Commencing at the point where the International Boundary between the United States of America and Canada strike the western shores of Lake Superior; thence westerly along the said boundary to the north-west angle of the Lake of the Woods; thence along a line drawn due north until it strikes the middle line of the course of the river discharging the waters of the lake called Lac Seul, or the Lonely Lake, whether above or below its confluence with the stream flowing from the Lake of the Woods towards Lake Winnipeg, and thence proceeding eastward from the point at which the beforementioned line strikes the middle line of the course of the river last aforesaid, along the middle line of the course of the same river (whether called by the name of the English River or, as to the part below the confluence, by the name of the River Winnipeg) up to Lac Seul, or the Lonely Lake, and thence along the middle line of Lonely Lake to the head of that lake, and thence by a straight line to the nearest point to the middle line of the waters of lake St. Joseph, and thence along that middle line until it reaches the foot or outlet of that lake, and thence along the middle line of the river by which the waters of lake St. Joseph discharge themselves to the shore of the part of Hudson Bay commonly known as James' Bay, and thence south-easterly following upon the said shore to a point where a line drawn due north from the head of Lake Temiscamingue would strike it, and thence due south along the said line to the head of the said lake, and thence through the middle channel of said lake into the Ottawa River.

Boundaries between Ontario and Manitoba settled by decision of English Privy Council, announced 22nd July, 1884, confirmed by Her Majesty in Council, August 11th, 1884.

## CHAPTER II.

The Canadian Constitution.—Subjects assigned to Federal Parliament and to Provincial Legislatures.—Senate and House of Commons.—Franchise.—Elections.—Standing Committees.—Local Legislatures.—Municipal Institutions.—Judiciary.—Unorganized Territory.—Genesis of Confederation.—List of Governors General since Confederation.—List of Members of Privy Council.—Treaties.—Indian Treaties.

20. The system of government established in Canada under the Union Act of 1867 is a Federal Union (the first of the kind in the British Empire), having a general or central government controlling all matters essential to the general development, the permanency and the unity of the whole Dominion, and a number of local or provincial governments having the control and management of certain matters naturally and conveniently falling within their defined jurisdiction, while each government is administered in accordance with the British system of parliamentary institutions. By this Act the Imperial Parliament practically gave to the Dominion Parliament the largest possible rights which can be exercised by a dependency of legislating on all matters of importance to the Union generally.

The position that Canada consequently occupies is that of a semi-independent power. The powers vested in the Parliament of Canada are set forth in the 91st section of the Confederation Act, which provides that the Queen, with the advice and consent of the Senate and House of Commons, may "make laws for the peace, order and good government of Canada in relation to all matters not coming within the classes of subjects by this Act assigned exclusively to the Legislatures of the Provinces"; and for greater certainty it is declared that "the exclusive legislative authority of the Parliament of Canada extends to all matters coming within the classes of subjects next hereinafter mentioned," that is to say :—

1. The public debt and property.
2. The regulation of trade and commerce.
3. The raising of money by any mode or system of taxation.
4. The borrowing of money on the public credit.
5. Postal service.
6. The census and statistics.
7. Militia, military and naval service and defence.
8. The fixing of and providing for the salaries and allowances of civil and other officers of the Government of Canada.
9. Beacons, buoys, lighthouses and Sable Island.
10. Navigation and shipping.
11. Quarantine and the establishment and maintenance of marine hospitals.
12. Sea coast and inland fisheries.
13. Ferries between a province and any British or foreign country, or between two provinces.

14. Currency and coinage.
  15. Banking, incorporation of banks and the issue of paper money.
  16. Savings banks.
  17. Weights and measures.
  18. Bills of exchange and promissory notes.
  19. Interest.
  20. Legal tender.
  21. Bankruptcy and insolvency.
  22. Patents of invention and discovery.
  23. Copyrights.
  24. Indians and the lands reserved for the Indians.
  25. Naturalization of aliens.
  26. Marriage and divorce.
  27. Criminal law, except the constitution of courts of criminal jurisdiction, but including the procedure in criminal matters.
  28. The establishment, maintenance and management of penitentiaries.
  29. Such cases of subjects as are expressly excepted in the enumeration of the classes of subjects by this Act assigned exclusively to the legislatures of the provinces.
21. The 92nd section the Act defines the powers of the local legislatures, which in each province may exclusively make laws in relation to matters coming within classes of subjects next hereinafter enumerated, that is to say :—
1. The amendment from time to time, notwithstanding anything in this Act, of the constitution of the province, except as regards the office of Lieutenant-Governor.
  2. Direct taxation within the province, in order to the raising of a revenue for provincial purposes.
  3. The borrowing of money on the sole credit of the province.
  4. The establishment and tenure of provincial offices and the appointment and payment of provincial officers.
  5. The management and sale of the public lands belonging to the province, and of the timber and wood thereon.
  6. The establishment, maintenance and management of public and reformatory prisons in and for the province.
  7. The establishment, maintenance and management of hospitals, asylums, charities, eleemosynary institutions in and for the province, other than marine hospitals.
  8. Municipal institutions in the province.
  9. Shop, saloon, tavern, auctioneer and other licenses, in order to the raising of a revenue for provincial, local or municipal purposes.
  10. Local works and undertakings other than such as are of the following classes :
    - a. Lines of steam or other ships, railways, canals, telegraph or other works and undertakings connecting the provinces with any other or others of the provinces or extending beyond the limits of the province.
    - b. Lines of steamships between the provinces and any British or foreign country.

c. Such works as, although wholly situated within the province, are, before or after their execution, declared by the Parliament of Canada to be for the general advantage of Canada, or for the advantage of two or more of the provinces.

11. The incorporation of companies with provincial objects.

12. The solemnization of marriage in the province.

13. Property and civil rights in the province.

14. The administration of justice in the province, including the constitution, maintenance and organization of the provincial courts, both of civil and of criminal jurisdiction, and including procedure in these courts.

15. The imposition of punishment, by fine, penalty or imprisonment for enforcing any law of the province made in relation to any matter coming within any of the classes of subjects enumerated in this section.

16. Generally all matters of a merely local or private nature in the province.

22. Section 93 provides that in and for each province the legislature may exclusively make laws in relation to education, subject and according to the following provisions:—

a. Nothing in any such law shall prejudicially affect any right or privilege with respect to denominational schools which any class of person have by law in the province at the Union.

b. All the powers, privileges and duties at the Union by law conferred and imposed in Upper Canada (now Ontario) on the separate schools and school trustees of the Queen's Roman Catholic subjects, shall be and the same are hereby extended to the dissentient schools of the Queen's Protestant and Roman Catholic subjects in Quebec.

c. Where in any province a system of separate or dissenting schools exists by law at the Union, or is thereafter established by the legislature of the province, an appeal shall lie to the Governor General in Council from any act or decision of any provincial authority affecting any right or privilege of the Protestant or Roman Catholic minority of the Queen's subjects in relation to education.

d. In case any such provincial law as from time to time seems to the Governor General in Council requisite for the due execution of the provisions of this section is not made, or in case any decision of the Governor General in Council on any appeal under this section is not duly executed by the proper provincial authority in that behalf, then, and in every such case, and as far only as the circumstances of each case require, the Parliament of Canada may make remedial laws for the due execution of the provisions of this section and of any decision of the Governor General in Council under this section.

23. There are certain rights which the Dominion and Local Governments may exercise in common, among which are public health, and

immigration, respecting which the general Parliament may make laws for any or all of the provinces, and each legislature may do the same for the province over which it has jurisdiction, provided that no Provincial Act is repugnant to any Dominion Act.

24. Either the English or French language may be used in the debates in Parliament and in the legislatures of Quebec, Manitoba and the North-west Territories, and both languages are to be used in the respective records and journals of those Houses, and in the publication of the laws of Quebec, Manitoba and the North-west Territories. Either language may be used in pleadings or processes in the courts of Canada, and in Quebec and Manitoba.

25. The seat of government of Canada is fixed at Ottawa until the Queen otherwise directs.

26. The chief executive government and authority in Canada is vested in the Queen, in whom is also vested the chief command of the militia and of all naval and military forces of or in Canada. Her Majesty is represented by a Governor General, appointed by the Queen in Council, but paid by Canada, whose term of office usually lasts five years. The Governor General's salary is fixed at £10,000 sterling, and forms the third charge upon the consolidated revenue of the country. The Governor General is bound by the terms of his commission, which instrument was revised in 1887, and can only exercise such authority as is expressly intrusted to him. He governs under the advice of a Council or Ministry, known as the Privy Council of Canada, which is responsible to Parliament. The Governor General, as the acting head of the Executive, summons, prorogues and dissolves Parliament, and assents to or reserves Bills in the name of Her Majesty, but, in the discharge of these and other executive duties, acts entirely by and with the advice of his Council; even in matters of Imperial interest affecting Canada, he consults with his Council and submits their views to the authorities in England.

The royal prerogative of mercy in capital cases, formerly exercised on the Governor General's own judgment and responsibility, is now administered, as in England, pursuant to the advice of the Ministry.

27. As the members of the Council hold office only while they retain the confidence of the House of Commons, the majority necessarily sit in that branch, though there is always a certain representation in the Senate; at the present time, there are four members of the Government in the Senate.

An administration, when defeated on an appeal to the country, usually retires without waiting for the assembling of Parliament.

The Governor General has authority to appoint a deputy or deputies to whom he may delegate such of his functions as he may deem expedient.

28. Following the British model as closely as circumstances permit, the Parliament of Canada consists of: 1st, the Queen; 2nd, an Upper House of the Senate; and 3rd, a Lower House styled the House of Commons. The powers and immunities of the two Houses are defined by the Parliament Act, but must not exceed those enjoyed by the Imperial House

of Commons at the time of the passing of the Act by the Canadian Parliament defining such privileges and immunities.

29. The sittings are annual, but may be oftener. Senators are appointed by the Governor General under the Great Seal, upon the recommendation of his Council. They hold office, under certain prescribed conditions, for life, and must be of the full age of thirty years, and have real and personal property worth \$4,000, over and above all liabilities.

The Senators from the Province of Quebec must reside in the electoral divisions for which they are appointed, or have their property qualifications therein; in the case of other provinces, Senators are only required to reside and have their property qualifications within the provincial limits. They must be natural-born subjects of Her Majesty, or become naturalized.

During the session of Parliament the Senate holds a daily session, unless it is otherwise ordered.

The Senate is presided over by a Speaker, who must be a Senator. He is appointed by the Governor in Council, by commission under the Great Seal. Fifteen members, including the Speaker, constitute a quorum. Questions are always decided by a majority of votes, the Speaker always having a vote, and when the voices are equal, the decision is deemed to be in the negative.

Every Senator and every member of the House of Commons and of the Provincial Legislatures must take the oath of allegiance before taking his seat. No Senator can hold a seat in the House of Commons, nor can he sit in any Legislature of the several provinces, excepting in the case of the Legislative Council of Quebec.

Bills can originate in the Senate, excepting revenue or money bills, in which cases the action of the Senate is confined by usage to their rejection—a rejection justified only by extraordinary circumstances.

The Senate, as at present constituted, consists of eighty-one members, twenty-four each from Ontario and Quebec, ten each from Nova Scotia and New Brunswick, four each from Prince Edward Island and Manitoba, three from British Columbia, and two from the North-west Territories.

30. The House of Commons, which is elected by the people for a term of five years, consists at the present time of 215 members. This number is fixed under the provisions of the Act of Confederation, and the representation is rearranged after every decennial census by Act of Parliament, the basis being that Quebec is always to have sixty-five representatives, and each of the other provinces such a number as will give the same proportion of representatives to its population as the number 65 bears to the population of Quebec, as ascertained by the census. British Columbia, by the terms of admission into the Confederation, however, is never to have less than six members.

After the census of 1891 a readjustment became necessary and an Act was passed in the session of 1892 to take effect at the next general election.

31. The proportionate representation of each province, and the number of representatives now and after the dissolution of the present Parliament, are given in the following table :—

PROVINCE.	No. OF REPRESENTATIVES.		POPULATION TO EACH MEMBER.	
	Now.	Under new Act.	Now.	Under new Act.
Ontario.....	92	92	22,982	22,982
Quebec.....	65	65	22,900	22,900
Nova Scotia.....	21	20	21,447	22,350
New Brunswick.....	16	14	20,080	22,947
Manitoba.....	5	7	30,501	21,735
British Columbia.....	6	6	16,269	16,360
Prince Edward Island.....	6	5	18,180	21,815
North-west Territories.....	4	4	16,700	16,700
	215	213	22,477	22,686

The various franchises for the several provinces were adopted by the Federal Parliament for the election of members of the House of Commons previous to 1885, but in that year an Electoral Franchise Act was passed for the Dominion. The franchise, though somewhat complicated in its details, is so broad as practically to be almost manhood suffrage. In addition to those of age and citizenship, the further qualifications of electors are set forth in the following statement :—

#### QUALIFICATION OF VOTERS.

Title of Voter.	Occupation of Premises or Residence in the Electoral District.	Value.
<i>Real Property Franchise.</i>		
(1.) Owner—		
(a.) In his own right.....	Ownership prior to or at the date of the revision of the voters' lists.	Cities, \$300; towns, \$200; other places, \$150.
(b.) In right of wife.....		
(c.) His wife owner.....		
(2.) Occupant—		
(a.) In his own right.....		
(b.) In right of wife.....		
(c.) His wife occupant.....		
(3.) Farmer's son—		
(a.) Father owner.....	Both occupation and residence for one year next before :—(1) The date of his being placed upon the voters' list; or (2) The date of the application for the placing of his name on the list of voters.	Farm or other real proper is equally divided among the father and sons, or mother owner, among sons sufficient according to above values to give each vote.
(b.) Mother owner.....		
4. Owner's son—		
(a.) Father owner.....		
(b.) Mother owner.....		

QUALIFICATION OF VOTERS--*Concluded.*

Title of Voter.	Occupation of Premises or Residence in the Electoral District.	Value.
<i>Real Property Franchise.</i>		
(5.) Tenant.....	.....	.....
(6.) Tenant, farmer's son—	.....	.....
(a.) Father tenant.....	.....	\$2 monthly, or \$6 quarterly,
(b.) Mother tenant.....	.....	or \$12 half yearly, or \$20 yearly.
(7.) Fisherman (owner)....	Prior to or at the date of the revision of the voters' lists.	\$150 land, boats and fishing tackle.
(8.) Indian.....	.....	Possessed of land on a reserve with improvements valued at \$150 and upwards, and those outside of reserve on same conditions as white.
(9.) Income franchise. ....	Prior to or at the date of the revision of the voters' list and one year's residence in Canada.	.....
(a.) Income.....	.....	\$300 a year.
(b.) Annuitant.....	.....	\$100 a year.

Persons specially disqualified are (1) aliens not naturalized, (2) convicts, (3) lunatics, (4) judges of the various courts, (5) revising and returning officers and election clerks, counsel, agents and attorneys, and clerks employed either before or during the election and who have received or expect to receive any sum of money, fee, office, place, or employment from any candidate. (These are disqualified from voting in the district in which they have been so engaged, but not elsewhere.) (6) Indians outside of the four original provinces of the Dominion, (7) Mongolians or Chinese.

Voting in elections is by ballot. The North-west Territories, previously to 1894, had open voting; chap. 15 of Acts of 1894 changed that mode to the one adopted in all the other provinces.

No property qualification is demanded from a member of the Commons, nor is he limited to a residence in the district for which he is elected.

Electors having votes in different electoral districts can exercise their privilege in one or all.

General elections are simultaneous throughout the Dominion of Canada.

32. Writs for new elections for the House of Commons are dated and made returnable on such days as the Governor General shall determine and are addressed to such persons as the Governor General appoints, such persons to be the returning officers at the elections to which the writs relate. Within eight days from the receipt of the writ each returning officer must post up at each polling place in the electoral district for which he is appointed a proclamation setting forth dates for the days of nomination and polling, and for the official declaration of the return of the poll, together with a list of the several polling places. Such proclamation to be posted at least eight days before the day fixed in the writ for nomination. The polling day is the seventh after the day of nomination, except as specially provided.

On the assembling of a new parliament, a Speaker for the Commons is elected by the members from among themselves.

33. Members of both Houses are paid an indemnity at the rate of \$10 a day if the Session is less than thirty days, and a maximum amount of \$1,000 if more than thirty days, \$8 a day being deducted for each day of absence (beyond a certain number of days fixed at each session), if the House is sitting, unless the absence is caused by illness after he has been in attendance. They also receive a mileage allowance of ten cents a mile going and coming.

The salary of each Speaker is \$4,000 a year.

34. Members of the House of Commons, when called to the Government as heads of departments, must at once resign their seats and seek re-election, an exception being made when an exchange of offices takes place without resignation.

All officers of the public service and contractors with the Government are forbidden to sit in Parliament, except in the case of officers in the militia service.

35. The laws enacted for the preservation of the independence of Parliament and the prevention of corrupt practices at elections are contained in chapters 10 and 11, Revised Statutes of Canada, and provide for the appointment of a commission of inquiry in cases where the judges report corrupt practices. The statute provides severe penalties on persons who are disqualified sitting as members.

Since 1874 the House of Commons has given up its jurisdiction over the trial of controverted elections. Instead of special committees, the courts in the several provinces are now the tribunals for the trial of all contested elections. The election expenses of candidates must be published by their agents after the election. A candidate may be disqualified from sitting in the Commons or voting or holding any office in the gift of the Crown for seven years, on conviction of personal bribery.

36. The administration of the several subjects set apart by the Confederation Act for the Federal authorities to deal with is carried on by means of departments, presided over by members of the Privy Council, whose functions are regulated by statute. At present there are twelve heads of departments. These are (1) the President of the Privy Council, (2) the Minister of Public Works, (3) Minister of Railways and Canals, (4) Minister of Trade and Commerce, (5) Minister of Militia and Defence, (6) Minister of Agriculture, (7) Secretary of State, (8) Minister of Justice, (9) Minister of Finance, (10) Minister of Marine and Fisheries, (11) Postmaster General, (12) Minister of the Interior. Customs and Inland Revenue, which are under the general control of the Minister of Trade and Commerce, have at the head of each a Controller who is a member of Parliament, and also a member of the Privy Council. The Solicitor General, who is attached to the Department of Justice, is also a member of Parliament with or without a seat in the Cabinet, as the case may be. The Secretary of State is head of the Department of Public Printing. The Minister of the Interior has under his charge the Departments of the Geological Survey and of Indian Affairs, and the President of the Privy Council is head of the Mounted Police.

37. The fullest discussion is allowed in the Parliament of Canada, and the Houses have never been compelled, through obstruction, to resort to closure of debate.

38. The Standing Committees of the Commons include (1) the Committee on Public Accounts, (2) the Committee on Agriculture and Colonization, (3) the Committee on Privileges and Elections, and (4) Committees to which are referred all private Bills respecting banking and commerce, navigation and shipping, railways and canals, telephone and telegraph lines, bridges, insurance and incorporation of companies for other purposes.

There are also two committees on which members from the two Houses sit, to consider the printing of documents and the management of the Library.

The publication of the Debates of the House of Commons is under the control of a special committee of the House. The Debates have been published daily during the session since 1875, in which year, on motion of Sir Charles Tupper, Bart., the Canadian "Hansard" was first adopted.

The Committees are appointed by a committee of selection, on which the Government has a majority, and both sides of the House are fully represented.

39. At the general elections for the House of Commons held in March, 1891, the total number of electors on the voters' lists (excluding the North-west Territories, where there are no lists) was 1,132,201, an increase of 13.9 per cent over the number in 1887.

In the general elections of 1887 the total number on the lists amounted to 993,914, an increase of 23.62 per cent over the number in 1882.

In 1887, the proportion of persons voting to the total number on the lists was 72.9 per cent, and in 1891 the proportion was 64.5 per cent.

The new voters' lists (1895) show that the number of electors is 1,453,73, an increase of 19.56 per cent over the number in 1891.

#### NUMBER of Voters on the Electoral Lists by Provinces. (1)

	Ontario.	Quebec.	Nova Scotia.	New Brunswick.	P. E. Island.	Manitoba.	N. W. T.	B. Columbia.
1882	406,096	229,067	65,885	54,003	* 20,042	23,533		4,961
1887	495,514	272,564	79,077	68,294	21,462	39,051	10,315	7,637
1891	568,799	301,658	90,045	70,521	24,065	46,669	16,044	14,400
1895	650,021	351,076	111,124	91,697	25,245	65,684	20,878	38,010

\* No voters' lists in 1882; figures approximate.

40. The number of inhabitants to each member, according to the census of 1891, in the following countries was:—

United Kingdom	56,431
Canada	22,477
Victoria	12,000
New South Wales	8,279
Queensland	5,471
South Australia	5,955
Tasmania	4,074
New Zealand	8,838
Western Australia	1,661
United States	170,016

(1.) For number of voters on the lists of 1894, by electoral districts, see paragraph 253. \* This also contains statement of population of the several electoral districts, as redistributed by the Acts of 1892 and 1893.

41. The constitutions of the four provinces, viz., Ontario, Quebec, Nova Scotia and New Brunswick, which composed the Dominion in 1867 (when the Act of Confederation was passed), are the same in principle and details, excepting that Ontario and New Brunswick have only one chamber, a Legislative Assembly.

With respect to the provinces admitted since 1867, it may be said that the provisions of the Act of Confederation that applied to the original provinces were, as far as possible, made applicable to them. Manitoba was given a constitution similar to the other provinces, and it was expressly provided in the terms of the union with British Columbia that the Government of Canada would consent to the introduction of responsible government into that province, and that the constitution of the Legislature should be amended by making a majority of its members elective. Immediately after the union with Canada these reforms were carried out, and the province was placed on the same footing as all the other provinces.

The North-west Territories were governed at first as explained in paragraph 15. The powers conferred on the Legislative Assembly are the same as those conferred upon the other provinces by the 92nd section of the Union Act of 1867, excepting the borrowing of money on the sole credit of the Territories.

42. All the local or provincial constitutions are now, therefore, practically on an equality so far as the executive, legislative and all essential powers of self-government are concerned, and all of them have authority under the organic law to amend their constitutions, except as regards the office of Lieutenant-Governor. British Columbia, Manitoba, New Brunswick (2) and the North-west Territories have only one House, which is elected by the people. In Prince Edward Island, which had two Houses until 1893, the two were in January, 1894, merged into one, but in that one certain members sit as Councillors, being elected by one set of electors, and certain other members sit as Assembly men, being elected by two sets of electors. The arrangement being peculiar, the following explanation is offered:—

Under the old law there were two houses, one called the legislative council, and the other the house of assembly. The legislative council consisted of thirteen members elected from certain large constituencies. The house of assembly consisted of thirty members elected from smaller constituencies. The legislative councillors were elected by voters who owned freehold or leasehold property to the value of \$324. The members of the house of assembly were elected practically by manhood suffrage, that is to say, there were a number of qualifications for the electors, such as property, occupation of land, and performance of statute labour, and taken altogether they practically amounted to manhood suffrage.

The purpose of the change made by the statute passed in 1893 was to amalgamate these two houses, and there is now one house, called the legislative assembly, consisting of thirty members. These thirty members were returned for fifteen constituencies, each constituency returning two members. One of these members, who is called a councillor, is returned by the votes of men who own property, freehold or leasehold, to the value of \$324, which is the same qualification as that for a member of the old

(2.) The Legislative Council of New Brunswick ceased to exist on the 28th September, 1892, having been abolished by Act of the Provincial Legislature.

Legislative Council. The other member, called an assemblyman, is elected by the general vote, the same men being able to vote for him as under the old law could vote for a member of the house of assembly. After they are elected, both councillor and assemblyman stand in the same position. They have the same voting power, and the effect of this is to make simply an amalgamation of the two houses. The protection supposed to be given to property holders by the legislative council still exists.

43. In all the provinces at the present time there is a very complete system of local self-government administered under the authority of the Confederation Act, and by means of the following machinery:—

1. A Lieutenant-Governor appointed by the Governor General in Council, holding office during pleasure, but not removeable in any of the provinces (not including the Territories) within five years from the date of his appointment, except for causes assigned, which, under the constitution, must be communicated to Parliament. He is, therefore, an officer of the Dominion as well as the head of the provincial or local executive. He acts in accordance with the rules governing the relations between the Governor General and his advisers. He appoints his executive council, and is guided by their advice, so long as they retain the confidence of the legislature. The salaries of the Lieutenant-Governors, which are paid from the Dominion treasury, vary from \$7,000, given in the smaller provinces, to \$10,000 paid in the great central provinces of Ontario and Quebec. These officers are appointed by commission under the Great Seal, and on appointment must take the oath of allegiance.

2. An executive or advisory council, responsible to the legislature, which council varies in the number of its members in the several provinces: Ontario and Quebec having at present eight each, Nova Scotia and New Brunswick seven each, Manitoba and British Columbia five each, while Prince Edward Island has six (three without portfolio), and the North-west Territories four.

All the members of the executive council holding departmental and salaried offices must vacate their seats if in the legislative assembly, and be re-elected on accepting office, as in the case of the Dominion ministry. The principle of ministerial responsibility to the Lieutenant-Governor and to the legislature is observed in the fullest sense.

3. A legislature, in all cases, consisting of an elective house with the addition of an upper chamber appointed by the Crown in two provinces—Quebec and Nova Scotia. The legislatures have a duration of four years (in Quebec five), unless sooner dissolved by the Lieutenant-Governor. They are governed by the constitutional principles which obtain in the General Government at Ottawa. The Lieutenant-Governor opens and prorogues the legislative council and assembly in Quebec and Nova Scotia, or the assembly, in the other provinces, with the usual formality of a "speech." A speaker is elected by a majority in each assembly, or is appointed by the Crown in the upper chamber. The rules and usages do not differ in any material respect from the procedure in the Dominion Parliament. The rules respecting private bill legislation are equally restrictive. The same provisions of law apply to the speakership of the assemblies as obtain respecting the speakership of the House of Commons. The legislatures of Ontario and Quebec, like the Dominion Parliament,

must sit once every twelve months, the Act of Confederation containing the proviso for an annual session, apart from the usage of voting supplies for one year only.

Members of the legislative councils, where such exist, have property qualifications, but the members of the assemblies need only to be citizens of Canada of full age. These are elected in Ontario on a franchise which is manhood suffrage, qualified only by residence and citizenship. The conditions are practically the same in the other provinces, excepting in Quebec, where the restrictions are somewhat greater.

Members are paid an indemnity which varies from \$800 in Quebec to \$160 in Prince Edward Island, with a mileage rate in some provinces, or actual travelling expenses in others.

The laws providing for the independence of the legislatures and for the prevention of bribery and corruption are fully as strict as those which are in force for Dominion elections. In all cases the courts are the tribunals for the trial of the controverted elections. Dual representation is illegal, except in the case of the Quebec Legislative Council, a member of which may hold a seat in the Senate.

The Act of Union gives the Lieutenant-Governor, as well as the Governor General, the power to "reserve," also to "veto," a Bill when it comes before him.

As respects the revenues of the provinces, they are largely derived from certain annual subsidies receivable from the general government. The Dominion at the Union assumed the debts of the several provinces, agreeing at the same time to pay them an annual subsidy equal to 80 cents per head of the four original provinces, parties to the Confederation pact, as ascertained by the census of 1861, except in the case of Nova Scotia and New Brunswick, in which it was arranged that the subsidy should be increased after each decennial census until the population in each province reached 400,000. Besides this subsidy there is given to each province an annual allowance for government and also an annual allowance of interest on the amount of the debt allowed, where the province has not reached the limit of the authorized debt.

Under various readjustments, and under the arrangements by which other provinces entered the Confederation, the provincial debts assumed are as under:—

Province of Canada .....	\$62,500,000
Nova Scotia .....	8,000,000
New Brunswick .....	7,000,000
	<hr/>
	\$77,500,000

Debts subsequently assumed or allowed :

Nova Scotia (readjustment of 1869) .....	1,186,756
The Old Province of Canada (readjustment of 1873) .....	10,506,089
Province of Ontario .....	2,848,289
"    Quebec .....	2,549,214
"    Nova Scotia .....	2,343,059
"    New Brunswick .....	1,807,720
"    Manitoba .....	3,775,606
"    British Columbia .....	2,029,392
"    Prince Edward Island .....	4,884,023
	<hr/>
	\$31,930,148

Total Provincial debts assumed ..... \$109,430,148

The subsidies paid by the Federal Government to the provinces amount with interest on allowances to a total sum of \$4,288,719, which is apportioned as under :—

Ontario.....	\$ 1,339,287
Quebec.....	1,086,714
Nova Scotia.....	432,813
New Brunswick.....	483,570
Manitoba.....	482,593
British Columbia.....	242,630
Prince Edward Island.....	221,052

This is \$44,096 more than the amount paid in 1894.

Under chap. 46, sec. 5, R.S.C., Manitoba is entitled to have a readjustment of her per capita allowance every 2½ years, instead of once every 10 years, as is the case in the other provinces.

The provinces retain possession of the lands belonging to them before entering the Union. Manitoba, having no public lands at the time of its creation, has since received a gift of swamp lands from the General Government.

4. A provincial judiciary, to which reference is made in paragraph 46.

5. A civil service with officers appointed by the provincial government holding office, as a rule, during pleasure, and not removable for political reasons.

6. A municipal system by means of which the provinces enjoy local self-government, enabling the people in every local division, whether it be a village, a town, township, parish, city or county, to manage their own internal affairs in accordance with the liberal provisions of the various Statutory enactments which are the result of the wisdom of the several legislatures of the different provinces within half a century. It is in the great Province of Ontario that we find the system in its complete form. While this system is quite symmetrical in its arrangement, it is also thoroughly practical, and rests upon the free action of the ratepayers in each municipality. The whole organization comprises :—

a. The minor municipal corporations, consisting of townships being rural districts of an area of eight or ten square miles, with a population of from 3,000 to 6,000.

b. Villages with a population of over 750.

c. Towns with a population of over 2,000. The council of every town consists of the mayor and of three councillors for each ward, where there are less than five wards, and of two for each ward where there are five or more wards. Such of these as are comprised within a large district, termed a county, constitute :—

d. The county municipality, which is under the government of a council composed of the heads of the different minor municipal divisions in such counties as have already been constituted in the province.

e. Cities are established from the growth of towns when their population exceeds 15,000, and their municipal jurisdiction is akin to that of counties and towns combined. The council of every city consists of the mayor, and three aldermen for each ward.

The townships and villages are administered by a reeve and councillors ; the towns by a mayor and councillors. The governing body of the county municipality is composed of the Reeves and deputy Reeves of the townships,

villages and towns within the county; one of these, who presides, being called the warden of the county.

The councils have power to levy rates, create debts, promote agriculture, trade, manufactures and railways. They have powers relating to drainage, roads, paupers, cemeteries, public schools, free libraries, markets, fire companies, preservation of the peace, and for all other objects falling within the legitimate scope of local municipal requirements. The exemptions from taxation comprise all Government and public property, places of worship and lands connected therewith, and a great number of buildings occupied by scientific, educational and charitable institutions. The official incomes of the judiciary and of all Dominion officers are also exempt from taxation.

The mayors, reeves, aldermen and councillors are elected annually by ballot by the ratepayers. The warden and all the other municipal officers are appointed by the councils. The persons elected must be natural-born or naturalized subjects of the Queen, reside within the municipality and be possessed of certain legal or equitable freehold or leasehold, varying from \$400 in townships to \$1,500 in cities for freehold, and from \$800 to \$3,000 for leasehold.

Manitoba has adopted the municipal system of Ontario in its entirety.

In the Province of Quebec the municipal divisions consist of villages, towns, parishes or townships, and counties. The parish is necessarily recognized in the general law provided for the municipal organization of the province. When a canonical parish has been formed by the proper ecclesiastical authority, acting under statute law, it may be erected into a municipality by civil authority at any time.

The county council is composed of the mayors of the several local municipalities of the county in which these officials have been elected. The councillors elect one of their number to be mayor of the local municipality, and the warden is chosen by the county council. The cities and towns are incorporated by special Acts, and the mayors and councils are elected by the people.

In Nova Scotia the county councils consist of a warden and councillors, the first-named officer being elected from among themselves by the councillors. The municipal officials are appointed by the councils, whose powers are similar to those exercised by councils in Ontario. Cities and towns are incorporated by special Acts, and the mayors and aldermen are elected by the duly qualified electors.

The basis of local self-government in New Brunswick is the parish adopted originally by the "U. E. loyalists" who came from Virginia and Maryland, in which States the parish system was in vogue. In other respects the municipal system is the same as that of Nova Scotia.

The Province of Prince Edward Island has not adopted a complete municipal system, the legislature being practically the governing body in all matters of local improvement. Some of the cities and towns of the province have special Acts of incorporation.

In British Columbia and the North-west Territories liberal provisions exist for the establishment of municipal corporations on the basis of those existing in Ontario. In British Columbia a number of municipalities have been established within the past two years.

11. By Act of Confederation it is provided that the Governor General shall appoint the judges of the superior, district and county courts (except those of the courts of probate in Nova Scotia and New Brunswick), and that their salaries, allowances and pensions shall be fixed and provided by the Dominion Parliament. It is also provided that the judges of the courts of Quebec shall be selected from the bar of that province. There is a similar limitation of the selection of the judges in Ontario, Nova Scotia and New Brunswick until such time as the laws relative to property and civil rights and the procedure of the courts in those provinces are made uniform, provision for which, under the Act of the Union of 1867, can be made by the Dominion Parliament, subject to the proviso that any Act of Parliament for that purpose shall only have effect when adopted and enacted as law by the several provincial legislatures interested.

The administration of justice in each province, including the constitution, maintenance and organization of provincial courts, both of civil and criminal jurisdiction, and also including procedure in civil matters in those courts, is left to the Provincial Government. The highest court within Canada is known as the Supreme Court of Canada. It was constituted in 1875 in accordance with the 101st section of the Union Act, 1867. It has an appellate, civil and criminal jurisdiction in and throughout Canada. It has also an appellate jurisdiction in case of controverted elections and may examine and report upon any private bill or petition for the same. It has jurisdiction in cases of controversies between the Dominion and the provinces, and between the provinces themselves, on condition that the legislatures pass an Act agreeing to such jurisdiction. Under Act of the Parliament of Canada, passed in 1891, the Governor in Council may refer to the Supreme Court for an opinion upon any matter which he deems advisable in the public interest. Either House of Parliament may refer to the court any private bill for its report thereon.

The court is presided over by a chief justice and five puisne judges, at least two of whom must be appointed from the bench or bar of the Province of Quebec, and all of whom must reside at, or within five miles of, the City of Ottawa, where the court holds its sittings three times a year, viz., in February, May and October. From the decision of the Supreme Court an appeal always lies to the Judicial Committee of the Privy Council of England, the court of last resort for the Empire, excepting in criminal cases; in these the judgment of the Supreme Court is made absolutely final by an Act passed in 1887.

13. The Exchequer Court, presided over by a separate judge, who must reside in, or within five miles of, Ottawa, possesses exclusive original jurisdiction in all cases in which demand is made, or relief sought, in respect of any suit or action of the Court of Exchequer on its revenue side, against the Crown or any of its officers. This court also possesses concurrent original jurisdiction in all cases in which it is sought to enforce any law relating to the revenue. The court may sit at any time and at any place in Canada. This court is also a colonial court of Admiralty (*see* Admiralty Act, 54-55 Victoria, chapter 29), having such jurisdiction throughout Canada and its waters, whether tidal or non-tidal, naturally or artificially navigable, and such rights and remedies in all matters connected with navigation, shipping, trade and commerce, as may be had or enforced in any

colonial court of admiralty, under the Imperial "Colonial Court of Admiralty Act, 1890." Admiralty districts, presided over by local judges in admiralty of the Exchequer Court, have been established under the above Act (Admiralty Act, 1891), for the provinces of Quebec, Nova Scotia, New Brunswick, British Columbia, Prince Edward Island and the "Toronto Admiralty District," the limits of which last are fixed from time to time by the Governor in Council.

46. The Superior courts of the several provinces are constituted as follows: "*Ontario*—The Supreme Court of Judicature, consisting of two permanent divisions called respectively the High Court of Justice for Ontario and the Court of Appeal for Ontario. The first division is again divided into three parts, having concurrent jurisdiction, Queen's Bench, Common Pleas and Chancery, the first two of which are presided over by a chief justice and two judges for each, and the third of which is composed of a chancellor and three judges. *Quebec*—The Chief Justice of the Queen's Bench and five puisne judges, and the Chief Justice of the Superior Court and twenty-nine puisne judges, whose residences are fixed in various parts of the province. *Nova Scotia* and *New Brunswick*—The Chief Justice of the Supreme Court, the Judge in Equity and five and four puisne judges respectively. *Manitoba*—The Chief Justice and three puisne judges. *British Columbia*—The Chief Justice and four puisne judges. *Prince Edward Island*—The Chief Justice and two assistant judges. In the North-west Territories there are five puisne judges of the Supreme Court.

47. There are also county courts with variously limited jurisdiction in all the provinces, but not in the North-west Territories. Police magistrates and justices appointed by the Provincial Governments have their place in the administration of justice.

The Mounted Police Force in the North-west Territories constitute a tribunal of justice, the Commissioner and the Assistant Commissioner having all the powers of a stipendiary magistrate, and the Superintendents being *ex-officio* justices of the peace.

48. Part of the unorganized territories came into the possession of Canada by virtue of the Queen's Order of 23rd June, 1870 (*see* Statutes of Canada, 1872, p. lxiii.) and part by virtue of the Queen's Order of the 21st July, 1880 (*see* Statutes of Canada, 1881, pp. ix, x).

As to the portion of the unorganized territory which was by the Queen's Order of June 23rd, 1870, transferred to the Dominion, it may be taken that the law of England as it stood on the 2nd May (o.s.), 1670—the date of the Hudson's Bay Company's charter—applies, subject only to such ordinances as were enacted in reference thereto by the Hudson's Bay Company.

With respect to the other unorganized territories, the title to which was acquired under the Queen's Order of 21st July, 1880, the Order itself states that such territory shall become and be subject to the laws for the time being in force in the Dominion in so far as they be applicable to such territories.

49. As the Confederation of the British Provinces of North America is the great event of recent times in Canada, the history of the genesis and development of the idea is here given:—

ORDER.	ACTION.	DATE.
1st.	Sir Francis Nicholson propounded the idea for this continent. (His project was to unite all the Anglo-American Colonies in a union, the object of which was the defence of these colonies against the encroachment of the French on the north, and against the hostile Indians on the borders.)	1690
2nd.	Pownall, Hutchinson and Franklin proposed Confederation for the British possessions in North America.	1754-55
3rd.	William Smith proposed a plan of Union but was banished and came to Canada as a refugee Loyalist. He became Chief Justice of Canada and was the grandfather of Confederation.	1775
4th.	Colonel Morse proposed a Union of all British North America "for the preservation of the fragments of British power on this Continent."	1784
5th.	R. J. Uniacke, in the Legislature of Nova Scotia, advocated a Federal Union.	1809
6th.	Chief Justice Sewell propounded to His Royal Highness the Duke of Kent a scheme for a Federal Union of the Provinces. (The Chief Justice's proposal included a general representative assembly to consist of 30 members. In his reply to the Chief Justice, His Royal Highness (our Queen's father) suggested that there should be but two divisions for local government purposes, one to consist of the two Canadas and the other of the four Maritime Provinces, which should, he thought, be formed into one union as preliminary to the greater union. The Duke was the first to suggest a Maritime Union. The Capital of the two Canadas for local purposes should be Montreal, he thought, and that of the four Maritime provinces, either Annapolis Royal or Windsor, as would prove most convenient. Quebec city was, of course, to be the capital of the Federation.)	1814
7th.	Chief Justice Sewell and Messrs. Robinson & Strachan prepared and presented, in pamphlet, to the British Government, a scheme for a Federal Union of the Provinces. (Chief Justice Sewell married a daughter of Chief Justice Smith, and was largely influenced by Smith.)	1822
8th.	Nelson's <i>Gazette</i> , May 11th, 1824, published a rumour in circulation in Quebec that His Majesty's Ministers proposed to submit to Parliament a Union of all the British Provinces in North America. The <i>Canadian Spectator</i> , Nov. 6, mentions that a letter had been received from England, stating that "a system of Confederation of the B. N. A. provinces is on the anvil."	1824
9th.	Mr. McCollough, then publishing the <i>Montreal Free Press</i> , advocated in its columns a Federal Union as a "Stock" subject for Editorial work.	1825
10th.	Robert Gourlay, wrote, in advocacy of a Federal Union, a pamphlet. (Gourlay was in prison in London, owing to an assault on a Member of Parliament in connection with grievances against Canada. He wrote from "House of Correction, Cold Bath Fields, London.")	1825
11th.	The <i>New York Albion</i> of 25th Nov., 1826, announced that H. M. Government had formed a plan for uniting the Provinces of B. N. America into one confederate system.	1826
12th.	Wm. Lyon McKenzie advocated a Union of the provinces in a speech.	1831
13th.	The British Imperial Parliament passed a resolution in favour of a Union.	1837
14th.	The Upper Canada Assembly and Legislative Council recommended a Federal Union.	1838
15th.	Rev. Dr. Strachan wrote in favour of Union.	1838
16th.	The Legislature of Nova Scotia voted against the plans proposed in the Upper Canada Legislature, on the ground that they had not been submitted to the N.S. Legislature.	1839
17th.	Lord Durham prepared his Report on Canada, proposing a Union of the Colonies, distinguishing between a Federal and a Legislative union, and thus divided the Unionists into two Camps, the Federalists and the Legislative Unionists.	1839
18th.	Geo. R. Young, of Nova Scotia, wrote a pamphlet in favour of Union of all the Provinces.	1840
19th.	<i>Succow's Magazine</i> published in London, England, gave extracts from several colonial newspapers showing growth of the sentiment of Union.	1844
20th.	Major C. Warburton, M.P., wrote "Hochelaga or England in the New World" (1846) and "The Conquest of Canada" (1849). In the former work he said, "I should rejoice to see all the British North American	

## ORDER.

## ACTION.

- Provinces, Newfoundland included, united under a central colonial government and represented in a common legislature, each, however, retaining its own Assembly for local purposes. It would have the effect of nationalizing England in the new world as distinct from 'America.'
- 21st. Major Robinson and Captain Henderson in their report on the Intercolonial Railway advocated Union on military grounds.
- 22nd. Lord Elgin discussed Union in a dispatch in connection with the Intercolonial Railway project.
- 23rd. The Legislative Council of Canada in an address advocated Union.
- 24th. The British North American League adopted Confederation as a plank in their platform in convention assembled. (Hon. Mr. Morris states that "the league was composed for the most part of young and enthusiastic members of the Conservative party belonging to the advanced wing that rallied round the banner of John A. Macdonald.")
- 25th. Meeting held in Montreal in which a resolution was passed urging Union, attended by Hon. John A. Macdonald.
- 26th. Henry Sherwood published a pamphlet advocating a general Government, two Chambers and a Viceroy, and for each province a Provincial Legislature.
- 27th. The Earl of Derby, in the Imperial Parliament, urged "a prompt action and a liberal course of action which would cement a closer Union between our North American Colonies."
- 28th. Hon. Hamilton Merritt introduced a resolution into the Canadian Legislature looking to a Convention of fifty persons from the several provinces to frame a Constitution to be submitted to the several provincial legislatures.
- 29th. Colonel Rankin advocated Union in the Canadian Legislature.
- 30th. Hon. Jas. W. Johnston, leader of the Conservative party, advocated Legislative Union in the Nova Scotian Legislature. "I wish to see such a union as would unite all the parts into one homogeneous whole, and make a people worthy of the sources from whence they sprung, and perpetuate for all time to come the character, name, honour and institutions of the country of which we are all proud to form a part."
- 31st. P. S. Hamilton, Nova Scotia, wrote a pamphlet in which he advocated Legislative Union. ("The time has now arrived when British America must cease to walk in leading strings. . . . She has now attained her national majority and possesses a degree of strength and vigour which entitles her to stand beside the mother country. . . . British America may then become a member of another Confederation upon the vast and widely scattered territories on which 'the sun never sets'—a Confederation the greatest that the world ever saw"—*The Confederation of the British Empire*.)
- 32nd. Hon. J. H. Grey, in the New Brunswick Legislature, supported Federal Union. ("It would become necessary to check the republicanism of the one section in the Province of Canada and the radicalism of the other by an infusion of the determined loyalty of the truly British provinces of New Brunswick and Nova Scotia by means of a Federal Union of all the North American Provinces.")
- 33rd. Hon. J. W. Johnston and Hon. A. G. Archibald brought the subject before the Colonial Secretary in London, under authority of the Provincial Government of Nova Scotia.
- 34th. J. C. Taché wrote in support of Union. Mr. Taché wrote a series of articles in the "*Courrier du Canada*" in 1857, and these were reproduced in 1858 in a pamphlet in French and English.
- 35th. Hon. A. T. Galt advocated Federal Union in speeches delivered in Toronto and Sherbrooke.
- 36th. Hon. A. T. Galt advocated Federal Union in the Canadian Legislature.
- 37th. Hon. T. D. McGee supported Mr. Galt in favour of a Federal Union, in the legislature of Canada.
- 38th. Governor General Sir Edmund Head, in closing the session of the Canadian legislature, said "I propose during the recess to communicate with Her Majesty's Government and with the Governments of the sister colonies. . . . I am desirous of inviting them to discuss with us the principles on which a bond of a federal character, uniting the Provinces of British North America, may perhaps hereafter be practical."
- 39th. Messrs. Cartier, Ross and Galt were sent to England as a delegation to urge the home government to appoint delegates from all the provinces to discuss the Union.
- 40th. Hon. Alexander Morris delivered a lecture in Montreal in advocacy of a Federal Union. It was published under the title "*Nova Britannia or British*

DATE.	ACTION.
	North America, its extent and future." The <i>Canadian Nature</i> says, "the lecturer sees in the future a fusion of races, a union of all the existing provinces with new provinces to grow up in the West, and a railway to the Pacific."
1858	1st. James Anderson published a letter in the <i>Montreal Gazette</i> , during 1858, under the <i>nom de plume</i> "Obiter dictum," urging Union of the Provinces. In it, referring to Sir John A. Macdonald, he says, "the primary mind of the Canadian Legislative Assembly was long ago prepared for the incorporation of the British American Provinces."
1858	2nd. Nova Scotian delegates, in an interview with Mr. Labouchere, then Colonial Secretary, were informed that the Imperial Government would interpose no obstacles to the Union. Mr. Labouchere himself thought a union of the Maritime Provinces would be highly beneficial.
1858	3rd. Bristol (England) merchants urged upon the Imperial Government the importance of the Intercolonial Railway with a view to advance the Union question.
1859	4th. Liberal Convention held in Toronto in November, 1859, passed a resolution against the Union of the Provinces.
1859	5th. The <i>Halifax Reporter</i> published editorials favouring Federal Union. An elaborate one appeared in the issue published on the day the Prince of Wales landed in Halifax, and elicited from His Royal Highness an expression of approval.
1860	6th. The Canadian Legislature discussed the question of Union in connection with the question of a fixed seat of Government.
1860	7th. Hon. Charles Tupper (now Sir Chas., Bart.) delivered a lecture in favour of Confederation, in St. John, N.B.
1860	8th. Sir John A. Macdonald, in an address to the electors of Kingston, said "The Government will not relax its exertions to effect a Confederation of the British North American Provinces."
1861	9th. Hon. Joseph Howe moved a resolution in the Nova Scotian Assembly requesting the Lieutenant-Governor to communicate with the Colonial Secretary, the Governor General and the several Lieutenant-Governors, in order to ascertain their views.
1861	10th. Duke of Newcastle, then Colonial Secretary, in a despatch to the Governor General, said, "If a union, either partial or complete, should hereafter be proposed with the consent of all the provinces to be united, I am sure the matter will be weighed in this country by the public, by the Parliament and by Her Majesty's Government, with no other feeling than an anxiety to discern and promote any course most conducive to the prosperity, the strength and the harmony of the British communities in it."
1862	11th. Hon. George Brown, from a Committee of the Canadian Legislature, reported in favour of a Federal Union.
1864	12th. Delegates from the Maritime Provinces, under authority of Mr. Howe's resolution, met at Charlottetown to consider Maritime Union. Hon. Mr. Tupper for Nova Scotia, Hon. Mr. Tilley for New Brunswick and Hon. Mr. Pope for Prince Edward Island were instrumental in having a resolution passed by the several legislatures, authorizing the appointment of delegates.
1864	13th. Delegates from the Province of Canada appeared at the Conference in Charlottetown and applied for admission. Those delegates were Messrs. John A. Macdonald, Geo. Brown, G. E. Cartier, A. T. Galt, T. D'Arcy McGee, H. L. Langevin, Wm. McDougall and Alexander Campbell.
1864	14th. From the representations of the Canadian delegates came the adjournment of the discussion and the meeting of delegates at an Interprovincial Conference held in Quebec.
1864	The following are the names of delegates usually called the "Fathers of Confederation":—

CANADA.

- Hon. Sir Etienne P. Taché, Premier.
- " John A. Macdonald, Attorney General, West.
- " Geo. E. Cartier, Attorney General, East.
- " Wm. McDougall, Provincial Secretary.
- " Geo. Brown, President of Council.
- " A. T. Galt, Minister of Finance.
- " Alexander Campbell, Commissioner of Crown Lands.
- " Oliver Mowat, Postmaster General.
- " H. L. Langevin, Solicitor General, East.
- " T. D. McGee, Minister of Agriculture.
- " J. Cockburn, Solicitor General, West.
- " J. C. Chapais, Commissioner of Public Works.

## NOVA SCOTIA.

- Hon. Charles Tupper, Provincial Secretary.  
 " W. A. Henry, Attorney General.  
 " J. McCully.  
 " A. G. Archibald.  
 " R. B. Dickie.

## NEW BRUNSWICK.

- Hon. S. L. Tilley, Provincial Secretary.  
 " J. M. Johnston, Attorney General.  
 " P. Mitchell.  
 " Charles Fisher.  
 " E. Chandler.  
 " W. H. Steeves.  
 " J. H. Gray.

## PRINCE EDWARD ISLAND.

- Hon. Col. Grey, President of Council.  
 " E. Palmer, Attorney General.  
 " W. H. Pope, Provincial Secretary.  
 " G. Coles.  
 " T. H. Haviland.  
 " E. Whalen.  
 " A. A. McDonald.

## NEWFOUNDLAND.

- Hon. F. B. S. Carter, Speaker House of Assembly.  
 " Ambrose Shea.

ORDER.	ACTION.	DATE.
55th.	Hon. Joseph Cauchon wrote a Pamphlet in favour of Confederation . . . . .	1865
56th.	Union resolutions carried in Canadian Legislature in the Council by 45 to 15 ; in Assembly by 91 to 33. The 91 who voted for Union comprised 54 from Upper Canada and 37 from Lower ; 25 from Lower Canada and 8 from Upper Canada composed the minority in the Legislative Assembly . . . . .	1865
57th.	The Legislatures of New Brunswick and Nova Scotia referred the subject to the Imperial Government . . . . .	1866
58th.	Delegates from all the Provinces—Canada, New Brunswick and Nova Scotia, in accordance with the terms of the resolutions passed by the Legislatures of the Maritime Provinces, proceeded to England and organized in London, with Sir John A. Macdonald as chairman . . . . .	1866
59th.	Union Act, as framed by the Conference, passed by the Imperial Parliament and received the Queen's assent, March . . . . .	1867
60th.	Royal Proclamation of the Union issued from Windsor Castle, May 22nd . . .	1867
61st.	The Union proclaimed throughout the four Provinces which thus became the Dominion of Canada, July 1st . . . . .	1867
62nd.	Imperial Order in Council issued transferring Rupert's Land and the North- west Territories to the Dominion, the franchises of the Hudson's Bay Co. being purchased by Canada for £300,000 (money consideration) and other considerations . . . . .	1870
63rd.	Manitoba created a Province by Act of Canadian Parliament, 15th July . . .	1870
64th.	British Columbia joined the Union, 20th July . . . . .	1871
65th.	Fortifications and Military lands, excepting Halifax and Victoria, B. C., transferred by the Imperial Government to the Dominion Government, by Orders in Council . . . . .	1870-71-72
66th.	Prince Edward Island joined the Confederation, 1st July . . . . .	1873
67th.	North-west Territories made a government separate from Manitoba, October .	1876
68th.	Islands of the Arctic Archipelago transferred to Canada by the Imperial Government, 1st September . . . . .	1880
69th.	Boundaries between Ontario and Manitoba defined by decision of the Judicial Committee of the Privy Council of England . . . . .	1884
70th.	North-west Territories given representation in Federal Parliament. Act . . .	1880
71st.	North-west Territories given Elective Assembly. Act . . . . .	1888
72nd.	Northerly, westerly and easterly boundaries of Ontario defined by Imperial Parliament. (See Dominion Acts, 1890) . . . . .	1889
73rd.	Right of appeal from decision of the Supreme Court of North-west Territories to Her Majesty in Privy Council, granted by Order in Council, 30th July .	1891
74th.	Right of appeal from decision of Court of Queen's Bench, Manitoba, to Her Majesty in Privy Council, granted by Imperial Order in Council, 26th November (See Order in Council in Dominion Statute, 1894). . . . .	1892

51. In connection with the foregoing digest of the genesis of Confederation it is proposed to give from year to year, biographical notes of those who took part in the conception and development of that great idea, so that the people of Canada, and especially the young people, may have a vivid realization of the fathers and grandfathers of Confederation.

NOTE 1.—Francis Nicholson came under the favourable notice of King James II., and when, in 1686, a couple of companies of soldiers were sent to the North American colonies, Captain Francis Nicholson was in command of one of them. They landed in Boston in the month of December, 1686. In April, 1688, Captain Nicholson was commissioned Lieutenant-Governor of New England, and accompanied Sir Edmund Andros, his superior officer, to New York, and was left in command when Andros went to Boston to thwart movements, then in progress, calculated to bring on an Indian war.

The changes which resulted from the death of James and the accession of William and Mary caused Nicholson's removal. He went to London and so successfully presented his case that he was appointed Lieutenant-Governor of Virginia. He took an active part in the affairs of the colony, instituted athletic games, and so powerfully supported the efforts to provide Virginia with a college that the College of William and Mary sprang into being. He performed his duties so well that the Assembly voted him a gratuity of £300, which the Crown allowed him to accept.

In 1692 he was superseded and returned to England. In 1693 he was appointed Lieutenant-Governor of Maryland. At the close of his term of office there, in 1698, he was appointed Governor in Chief of Virginia. He carried things with a high hand, till at length the Council wearied, with the continual strife, petitioned in 1703 for his removal, which was ordered by the home authorities. Nicholson went to London in 1705. Notwithstanding these evidences of Nicholson's unpopularity, his co-operation was sought when the colonies were in great straits on account of the incursions from Canada, and in 1708 the Governments of New York, Massachusetts, Connecticut, East and West Jersey, Pennsylvania and Rhode Island addressed him, urging him to take command of all their troops. Nicholson accepted the position, went to England, secured promises of troops, and returning to Boston, set about the task of providing a well drilled colonial contingent. The English troops, however, were needed in Portugal by the exigencies of the European situation. The attempt to curb Canada by way of Lake Champlain failed, and Nicholson, who was in command of the Lake Champlain contingent, had to dismiss the 1,500 troops he had collected, after burning the transport vessels he had built on the lake.

At the request of the several colonies he sailed for England, commissioned to procure assistance for the reduction of Port Royal (now Annapolis Royal, Nova Scotia). The fates being propitious, he succeeded in obtaining from the English authorities the ships of war and the men required, and in September, 1710, the armament sailed from Boston. It consisted of thirty-six vessels. The French Governor, Subercase, made a spirited resistance, but after some days' fighting, surrendered.

After the conquest of Port Royal, which he renamed Annapolis Royal, in honour of Queen Anne, Nicholson went to England. He was recalled in 1711 and given charge of a second land expedition to move

against Montreal by way of Lake Champlain, while Vetch, then Governor of Nova Scotia, was summoned to Boston to take command of the 1,500 provincials who accompanied the British forces which sailed from Boston to enter the Canadian territory by way of the Gulf and River St. Lawrence.

After this expedition had proved a complete failure through the wreck of several of the transports on the *Isle aux Œufs* on the north shore of the St. Lawrence River, and the incapacity of the Admiral, Nicholson returned to England and in 1713 was appointed Governor of Nova Scotia, having as the special object of his governorship the settlement of the French question which had arisen from the terms of the capitulation agreed upon by himself and Subercase in 1710, and subsequently ratified by the Treaty of Utrecht. Nicholson showed the worst side of his nature during the term of his office, and the records of the time are filled with personal complaints of his conduct. He succeeded, however, in preventing the emigration of the Acadians to *Isle Royale* (Cape Breton).

After his term of office in Nova Scotia expired, he returned to England and was Knighted. In 1720 he was appointed Governor of South Carolina and administered his office with his accustomed ability till 1725, when he was made a Lieutenant-General and returned to London, where he died in 1728.

He was a singular compound and was a man of terrible temper. After he had been in one of his fits while he had command of the army, an Indian said to one of his officers, "the General is drunk;" "No," said the officer, "he never drinks liquor." The Indian replied, "I don't mean that he is drunk with rum; he was born drunk," a statement which carries in it the germ of Lombroso's central idea about criminals, and of Naidau's about degenerates. It is told of Nicholson, that falling in love, his suit was opposed by the father of the lady. Nicholson swore to have his blood. Hearing that she was about to be married he threatened to cut the throats of the bridegroom, of the minister who should perform the service, and of the justice of the peace who should issue the license. Suspecting as a rival a clergyman, he waylaid him on the road and in the King's name and as his superior in the church forbade the pastor to enter the lady's house or to speak with her.

Notwithstanding his choleric temper and the peculiarities in which he indulged, Nicholson must have possessed the power to command in an eminent degree. Probably no other man ever acted as governor in so many different provinces. He had a broad and comprehensive view of public affairs and was one of the earliest advocates of a grand scheme of confederation to embrace all the provinces on the North American Continent, the object of which was the defence of these colonies against the encroachments of the French on the north and against the hostile Indians on the borders. He submitted his plan to the King who heartily approved of it and recommended the measure to the favourable consideration of the assemblies. Virginia, however, would have nothing to do with the scheme, which fact so exasperated Nicholson that he recommended that all the American colonies be placed under a Viceroy, and a standing army maintained among them at their own expense. His project was not received with favour by Queen Anne and her ministers.

A writer in the *Magazine of American History* says, "such a career of more than 38 years in the Royal service was remarkable for that day; and when the nature of the service is examined, it becomes more remarkable. For Nicholson, in his Maryland and Carolina experience, had to deal with what was one of the most difficult problems of colonial policy—proprietary governments; while on his Virginia governorship he had to contend with the spirit of growing democracy. That he was successful in the one and unsuccessful in the other is no condemnation of his general capacity for leadership. Perhaps a suave, gentle nature might have placated Virginia, but the rugged force of a soldier was needed to give peace to Carolina, while his leaning to the church and education gave him an influence in Maryland apart from his mere authority. His very ambitions gave him strength, for he foresaw the necessity of uniting the English colonies against the French settlements, and while the means at his disposal were inadequate to carry out his aims, a generation had hardly passed when the encroachments of the French led to the first public employment of Washington to check them. In the light of subsequent history we can give great praise to Nicholson's political foresight and his generous aid to the gentler arts of peace. If his personal failings have given him a bad name, his good deeds should be remembered, and in that remembrance should participate New England, New York, Maryland, Virginia and South Carolina." To this list may be added the Maritime provinces of Eastern Canada.

52. The following is a list of the Governors General of Canada since Confederation, with the dates of their respective appointments:—

## GOVERNORS GENERAL OF CANADA.

NAME.	Date of Appointment.	Date of Assumption of Office.
The Rt. Hon. Viscount Monck, G.C.M.G. ....	June 1, 1867	July 1, 1867
The Rt. Hon. Lord Lisgar, G.C.M.G. (Sir John Young) ....	Dec. 29, 1868	Feb. 2, 1869
The Rt. Hon. the Earl of Dufferin, K.P., K.C.B., G.C.M.G. ....	May 22, 1872	June 25, 1872
The Rt. Hon. the Marquis of Lorne, K.T., G.C.M.G., P.C., &c. ....	Oct. 5, 1878	Nov. 25, 1878
The Most Hon. the Marquis of Lansdowne, G.C.M.G., &c. ....	Aug. 18, 1883	Oct. 23, 1883
The Rt. Hon. Lord Stanley of Preston,* G.C.B. ....	May 1, 1888	June 11, 1888
The Rt. Hon. the Earl of Aberdeen, K.T., G.C.M.G. ....	May 22, 1893	Sept. 18, 1893

\* Succeeded to the Earldom of Derby on the death of his brother, April 21st, 1893.

53. The succeeding tables give the names of the present members of the Dominion Government, arranged according to precedence, and of the members of the Privy Council, and the dates of the opening and closing of each session composing the different Parliaments since Confederation.

## DOMINION OF CANADA.

## SEAT OF GOVERNMENT—OTTAWA.

GOVERNOR GENERAL, THE RIGHT HON. EARL OF ABERDEEN, K.T., G.C.M.G.

## EXECUTIVE COMMITTEE OF THE PRIVY COUNCIL.

1896.

Premier and President of Council.....	Hon. Sir Mackenzie Bowell, K.C.M.G.
Secretary of State.....	" Sir Chas. Tupper, Bart., G.C.M.G., C.B.
Postmaster General .....	" Sir Adolphe Caron, K.C.M.G.
Minister of Marine and Fisheries.....	" John Costigan.
" Finance.....	" George E. Foster.

	6th .....	Jan. 2, 1896..		

\*Adjourned from 21st Dec., 1867, to 12th March, 1868, to allow the Local Legislatures to meet.

†Adjourned 23rd May till 13th August.

54. There have been six complete Parliaments since Confederation. The first Parliament was the longest one, and the second was the shortest. The average length of each session has been 89 days, or nearly 13 weeks. The longest session was in 1885, viz., 24 weeks and 4 days; the next longest was in 1891, viz., 22 weeks. The shortest session was in 1873, and only lasted 2 weeks and 1 day.

55. There have been but two changes of Government and six Ministries since Confederation; and with the exception of the period from 17th November, 1873, to 17th October, 1878, Sir John Macdonald was at the head of the Government from 1st July, 1867, to the day of his death, on

the 6th June, 1891. There have been five Premiers—Rt. Hon. Sir John A. Macdonald, Hon. Alexander Mackenzie, Hon. Sir John Abbott, Rt. Hon. Sir John Thompson and Hon. Sir Mackenzie Bowell.

56. The following are the names of members from time to time composing the Ministries, with the dates of their appointments :—

LIST OF MEMBERS OF THE SEVERAL MINISTRIES SINCE  
CONFEDERATION.

FIRST MINISTRY.

Office.	Name.	Date of Appointment.
Premier .....	Rt. Hon. Sir John A. Macdonald, K.C.B..	July 1, 1867
Minister of Justice and Attorney General.....	Rt. Hon. Sir John A. Macdonald, K.C.B..	July 1, 1867
Minister of Finance.....	Hon. Sir A. T. Galt.....	July 1, 1867
	“ Sir John Rose.....	Nov. 30, 1867
	“ Sir Francis Hincks.....	Oct. 9, 1869
	“ Sir S. L. Tilley.....	Feb. 22, 1873
Minister of Public Works.....	Hon. Wm. McDougall.....	July 1, 1867
	“ Sir Hector L. Langevin.....	Dec. 9, 1869
Minister of Militia and Defence	Hon. Sir George E. Cartier.....	July 1, 1867
	“ Hugh McDonald.....	1, 1873
Minister of Customs.....	Hon. Sir S. L. Tilley.....	July 1, 1867
	“ Sir Charles Tupper.....	Feb. 22, 1873
Minister of Agriculture.....	Hon. J. C. Chapais.....	July 1, 1867
	“ C. Dunkin.....	Nov. 16, 1869
	“ J. H. Pope.....	Oct. 25, 1871
Postmaster General.....	Hon. Sir A. Campbell.....	July 1, 1867
	“ John O'Connor.....	1, 1873
Minister of Marine and Fisheries	Hon. Peter Mitchell.....	July 1, 1867
Minister of Inland Revenue...	Hon. W. P. Howland.....	July 1, 1867
	“ A. Morris.....	Nov. 16, 1869
	“ Sir Charles Tupper.....	July 2, 1872
	“ John O'Connor.....	March 4, 1873
	“ T. M. Gibbs.....	July 1, 1873
Minister of Interior.....	Hon. Sir A. Campbell.....	July 1, 1873
President of Council.....	Hon. A. J. F. Blair.....	July 1, 1867
	“ Joseph Howe.....	Jan. 30, 1869
	“ Ed. Kenny.....	Nov. 16, 1869
	“ Sir Charles Tupper.....	June 21, 1870
	“ John O'Connor.....	July 2, 1872
	“ Hugh McDonald.....	June 14, 1873
Receiver General.....	Hon. Ed. Kenny.....	July 1, 1867
	“ J. C. Chapais.....	Nov. 16, 1869
	“ Theodore Robitaille.....	Jan. 30, 1873
Secretary of State.....	Hon. Sir Hector L. Langevin.....	July 1, 1867
	“ J. C. Aikins.....	Dec. 9, 1869

**LIST OF MEMBERS OF THE SEVERAL MINISTRIES SINCE  
CONFEDERATION—Continued.  
FIRST MINISTRY—Concluded.**

Office.	Name.	Date of Appointment.
Secretary of State for the Provinces.....	Hon. A. G. Archibald.....	July 1, 1867
	“ Joseph Howe.....	Nov. 16, 1869
	“ T. M. Gibbs.....	June 14, 1873
Without office.....	Hon. J. C. Aikins.....	Nov. 16, 1869

The Ministry resigned on 6th November, 1873.

**SECOND MINISTRY.**

Premier.....	Hon. Alexander Mackenzie.....	Nov. 7, 1873
Minister of Public Works.....	Hon. Alexander Mackenzie.....	“ 7, 1873
Minister of Justice and Attorney General.....	Hon. A. Aimé Dorion.....	Nov. 7, 1873

## HIGH COMMISSIONER FOR CANADA IN LONDON.

OFFICE—17 Victoria Street, London, S.W.

HON. SIR CHARLES TUPPER, BART., G.C.M.G., C.B.

SECRETARY—JOSEPH G. COLMER, C.M.G.

PREVIOUS HIGH COMMISSIONERS.

Name.	Date of Appointment.
Mr Alexander T. Galt, G.C.M.G. ....	May 11, 1880.
Mr Charles Tupper, G.C.M.G., C.B. ....	" 30, 1883.
Mr Charles Tupper, G.C.M.G., C.B. ....	" 23, 1888.

In January, 1887, Sir Charles Tupper resigned the High Commission, having accepted the position of Minister of Finance, which he resigned in May, 1888, on being re-appointed High Commissioner. In January, 1896, Sir Charles Tupper resigned the position, having become Secretary of State, but continued to administer the office without the salary attached.

A list is given below of the Sovereigns and Rulers of the principal countries in the world, with dates of birth, titles and dates of assumption of office. It will be seen that Queen Victoria has reigned 11 years longer than any other ruler mentioned in the table, having succeeded to the throne in 1837, at the age of eighteen years. Her Majesty, however, is not the senior ruler, for the Bey of Tunis and the King of Denmark are her seniors. The King of Spain is still the youngest sovereign in the list.

## SOVEREIGNS AND RULERS IN PRINCIPAL COUNTRIES, 1896.

Country.	Name.	Year of Birth.	Title.	Year of Accession or Assumption of Office.
Britain and Ireland	Victoria .....	1819	Queen of Great Britain and Ireland.	1837

\* Elected annually. † Present term. Was first elected in 1876.

## TREATIES.

60. The treaties made by the mother country are frequently referred to in Parliament and by the Government.

The following is a list of treaties made by our Sovereigns with those of other countries relating to Canada :—

GENERAL, BOUNDARY, &c.

61. 1629. *Treaty of Susa*.—Treaty of peace between Great Britain and France.

Article II. provides that no restitution should be made of anything taken during the war.

Article III. provides that anything taken within two months after the signing of the treaty should be restored.

62. 1632. *Treaty of St. Germain en Laye*.—Treaty of peace between Great Britain and France.

By Article III. Great Britain agreed to render and restore to France "all the places occupied in New France, Acadia and Canada by subjects of His Britannic Majesty, who should be made to retire from said places."

63. 1655. *Treaty of Westminster*.—Treaty of peace between Great Britain (under Cromwell) and France.

By Article XXV. the claim of France to Pentagoet, St. John, Port Royal and LaHave in Acadia was referred to a proposed commission. Under this article commissioners were appointed, at the instance of France, but nothing was effected.

64. 1667. *Treaty of Breda*.—Treaty of peace between Great Britain and France.

By Article X. Great Britain agreed to restore Acadia to France.

By Article XI. inhabitants of Acadia wishing to remain under the dominion of Great Britain were allowed a year to depart and dispose of their lands, slaves and goods.

65. 1697. *Treaty of Ryswick*.—Treaty of peace between Great Britain and France.

Article VII. provides for the restoration by both of all lands held by the other before the declaration of war.

Article VIII. provides for the appointment of commissioners on both sides to examine and determine the rights and pretensions of both countries to the places situated in Hudson Bay, but the possession of those places which were taken by the French during the peace that preceded the war and were retaken by the English during the war, is left to the French by virtue of Article VII.

66. 1713. *Treaty of Utrecht*.—Treaty of peace between Great Britain and France.

Article X. provides that France should restore to Great Britain the Bay and Straits of Hudson with all lands, seas, sea coasts and rivers situated on the said bay and straits.

Article XI. provides that France should compensate the Hudson's Bay Company.

Article XI. yielded Nova Scotia or Acadia, with its ancient boundary, and Port Royal or Annapolis to Great Britain, so "that French subjects should thereafter be excluded from all kinds of fishing."

Article XIII. provides as follows: "The island called Newfoundland, with the adjacent islands, shall, from this time forward, belong of right wholly to Britain, and to that end the town and fortress of Placentia, and whatever other places in the said islands are in the possession of the French, shall be yielded and given up \* \* \* to those who have a commission from the Queen of Great Britain for that purpose. Nor shall the most Christian King, his heirs and successors, or any of their subjects, at any time hereafter lay claim to any right to the said island and islands, or to any part of it or them. Moreover, it shall not be lawful for the subjects of France to fortify any place in the said Island of Newfoundland or to erect any buildings there, besides stages made of boards, and huts necessary and usual for drying of fish; or to resort to the said island beyond the time necessary for fishing and drying of fish. But it shall be allowed to the subjects of France to catch fish, and to dry them on land, in that part only, and in no other besides that, of the said Island of Newfoundland which stretches from the place called Cape Bonavista to the northern point of the said island, and from thence, running down by the western side, reaches as far as the place called Point Riche."

Article XIII. also provides that "the island called Cape Breton, as also all others both in the mouth of the River St. Lawrence and in the Gulf of the same name, shall hereafter belong of right to the French," with liberty of fortifying.

Article XIV. provides that French becoming British subjects should "enjoy the free exercise of their religion according to the usage of the Church of Rome, as far as the laws of Great Britain do allow the same."

67. 1748. *Treaty of Aix-la-Chapelle*.—Treaty of peace between Great Britain and France, &c.

Article IX. provides that "Isle Royal, called Cape Breton, shall be restored by Great Britain to France."

68. 1763. *Treaty of Paris*.—Treaty of peace between Great Britain and France and Spain.

Article IV. renounces all pretensions of France to Nova Scotia or Acadia.

Article IV. also provides as follows: "His most Christian Majesty cedes and guarantees to His Britannic Majesty in full right Canada with all its dependencies, as well as the Island of Cape Breton and all the other islands and coasts in the Gulf and River St. Lawrence, and in general everything that depends on the said countries. \* \* \* His Britannic Majesty on his side agrees to grant the liberty of the Catholic religion to the inhabitants of Canada; he will consequently give the most precise and effectual orders, that his new Roman Catholic subjects may profess the worship of their religion according to the rules of the Romish Church, as far as the laws of Great Britain permit."

Article V. provides that "The subjects of France shall have the liberty of fishing and drying on a part of the coasts of the Island of Newfoundland such as is specified in the XIIIth Article of the Treaty of Utrecht, which article is renewed and confirmed by the present treaty (except what relates to the Island of Cape Breton as well as to the other islands and coasts in the mouth and in the Gulf of St. Lawrence), and His Britannic Majesty consents to leave to the subjects of the most Christian King the liberty of fishing in the Gulf of St. Lawrence on condition that the subjects of France do not exercise the said fishery but at the distance of three leagues from all the coasts belonging to Great Britain as well as those of the continent and those of the islands situated in the said Gulf of St. Lawrence. And as to what relates to the fishery on the coasts of the Island of Cape Breton out of the said Gulf, the subjects of the most Christian King shall not be permitted to exercise the said fishery but at the distance of fifteen leagues from the coasts of the Island of Cape Breton, and the fishery on the coasts of Nova Scotia or Acadia and everywhere else out of the said Gulf shall remain on the footing of former treaties."

Article VI. provides that the King of Great Britain cedes the "Islands of St. Pierre and Miquelon in full right to his most Christian Majesty, to serve as a shelter to the French fishermen; and his said most Christian Majesty engages not to fortify the said islands; to erect no buildings on them, but merely for the convenience of the fishery, and to keep upon them a guard of fifty men only for the police."

Article VII. "In order to establish peace on solid and durable foundations, and to remove forever all subjects of dispute with regard to the limits of the British and French Territories on the Continent of America, it is agreed that for the future the confines between the dominions of His Britannic Majesty and those of his most Christian Majesty, in that part of the world, shall be fixed irrevocably by a line drawn along the middle of the River Mississippi, from its source to the River Iberville, and from thence by a line drawn along the middle of the river, and the Lakes Mauropas and Pont Chartran, to the sea; and for this purpose the most Christian King cedes in full right and guarantees to His Britannic Majesty the river and port of the Mobile, and everything which he possesses or ought to possess, on the left side of the River Mississippi, except the Town of New Orleans and the Island in which it is situated, which shall remain to France; provided that the navigation of the River Mississippi shall be equally free, as well to the subjects of Great Britain as to those of France, in its whole breadth and length, from its source to the sea, and expressly that part which is between the said Island of New Orleans and the right bank of that river, as well as the passage both in and out of its mouth. It is further stipulated that the vessels belonging to the subjects of either nation shall not be stopped, visited or subjected to the payment of any duty whatsoever. The stipulation inserted in the IVth article in favour of the inhabitants of Canada shall also take place with regard to the inhabitants of the countries ceded by this article."

Article XIX. Great Britain restores to Spain its conquests in Cuba.

Article XX. Spain cedes and guarantees to Great Britain "Florida with Fort St. Augustin and the Bay of Pensacola as well as all that Spain

possesses on the Continent of North America to the east or to the south-east of the River Mississippi."

Same stipulation for Roman Catholics as in Article IV.

69. 1783. *Treaty of Versailles*.—Treaty of peace between Great Britain and France.

Article IV. provides that the King of Great Britain is maintained in his right to the Island of Newfoundland, and to the adjacent islands, as the whole were assured to him by the XIIIth Article of the Treaty of Utrecht, excepting the Islands of St. Pierre and Miquelon, which are ceded in full right by the present treaty to his most Christian Majesty.

Article V. provides that "to prevent the quarrels which have hitherto arisen between the two nations of England and France" the right of fishing should be given up by France between Cape Bonaventure and Cape St. John, the right being extended to Cape Ray.

Article VI. provides that with regard to the fishery in the Gulf of St. Lawrence the French should continue to exercise it conformably to the fifth article of the Treaty of Paris.

In a declaration of the same date as the treaty, the British plenipotentiaries say: "In order that the fishermen of the two nations may not give cause for daily quarrels, His Britannic Majesty will take the most positive measures for preventing his subjects from interrupting in any manner, by their competition, the fishery of the French during the temporary exercise of it, which is granted to them upon coasts of the Island of Newfoundland; and he will for this purpose cause the fixed settlements, which shall be formed there, to be removed. His Britannic Majesty will give orders that the French fishermen be not incommoded in cutting the wood necessary for the repair of their scaffolds, huts and fishing vessels."

"The XIIIth Article of the Treaty of Utrecht, and the method of carrying on the fishery, which has at all times been acknowledged, shall be the plan upon which the fishing shall be carried on there; it shall not be deviated from by either party; the French fishermen building only their scaffolds, confining themselves to the repair of their fishing vessels, and not wintering there; the subjects of His Britannic Majesty, on their part, not molesting in any manner the French fishermen during their fishing, nor injuring their scaffolds during their absence."

"The King of Great Britain, in ceding the Islands of St. Pierre and Miquelon to France, regards them as ceded for the purpose of serving as a real shelter to the French fishermen, and in full confidence that these possessions will not become an object of jealousy between the two nations; and that the fishing between the said islands and that of Newfoundland shall be limited to the middle of the channel."

70. 1783. *Treaty of Paris*.—Definite treaty of peace between Great Britain and United States. (1)

Article I. recognizes the independence of the Thirteen States.

Article II. provides that the boundary should be generally as at present

(1) Sometimes quoted as the Treaty of Versailles, being of the same date, September 3rd. The Treaty with France signed at Versailles, but the Treaty with the United States at Paris.

in the north-west angle of the Lake of the Woods; thence west to the River Mississippi; thence along the middle of the Mississippi to the 31st degree of north latitude; thence east by that parallel to the River Apalachicola, by that river to its junction with the Flint River, and thence to the head of the St. Mary River and along it to the Atlantic Ocean.

Article III. continued right of United States to fish on banks of Newfoundland, in Gulf of St. Lawrence, &c.; also to fish on such part of Coast of Newfoundland as British fishermen shall use (but not to dry or cure fish on the island); also to fish on all the coasts, bays and creeks of the British dominions in America, and to dry and cure fish in any of the unsettled bays, harbours and creeks of Nova Scotia, Magdalen Islands and Labrador, but not after settlement.

Article VIII. provided for the free navigation by British subjects of the Mississippi, from its source to the ocean. (1)

71. 1794. *Jay's Treaty, London*.—Treaty of amity, commerce and navigation between Great Britain and United States. (Marten's, vol. 5, p. 644.)

Article III. runs as follows:—

"It is agreed that it shall at all times be free to His Majesty's subjects, and also to the Indians dwelling on either side of the said boundary line, freely to pass and repass by land or inland navigation into the respective territories and countries of the two parties, on the Continent of America (the country within the limits of the Hudson's Bay Company only accepted), and to navigate all the lakes, rivers and waters thereof, and freely to carry on trade and commerce with each other. But it is understood that this article does not extend to the admission of vessels of the United States in the seaports, harbours, bays or creeks of His Majesty's said territories; nor into such parts of the rivers in His Majesty's said territories as are between the mouth thereof and the highest port of entry from the sea, except in small vessels trading *bona fide* between Montreal and Quebec, under such regulations as shall be established to prevent the possibility of any frauds in this respect; nor to the admission of British vessels from the sea into the rivers of the United States beyond the highest ports of entry for foreign vessels from the sea. The River Mississippi (2) shall, however, according to

(1.) A note (page 1237) to the "Treaties and Conventions" published by the United States Secretary of State says:—

"After the conclusion of the Treaty of Ghent it was claimed by Great Britain that the rights which the Americans had enjoyed in the British fisheries before the war, under the Treaty of 1783, had been lost through the abrogation of the treaty in consequence of the war. John Quincy Adams, who was the United States Minister at London, at that time, contended that the Treaty of 1783 was not one of those which by the common understanding and usage of civilized nations is or can be considered as annulled by a subsequent war between the same parties." Lord Bathurst replied, "To a position of this novel nature Great Britain cannot accede. She knows of no exception to the rule that all treaties are put an end to by a subsequent war between the same parties." During the negotiations which followed Great Britain never abandoned that position, and the United States may be said to have acquiesced in it. By it they secured the exclusion of Great Britain from the Mississippi, the free and open navigation of which was granted to the subjects of Great Britain forever by the treaty which Lord Bathurst set aside. The political department of the Government of the United States assumed the same position during the Mexican war. President Polk, in his annual message to Congress in December, 1847, said: "A state of war obviates treaties previously existing between belligerents, and a treaty of peace puts an end to all claims for indemnity."

(2.) See note to Treaty of Paris, 1783.

the treaty of peace, be entirely open to both parties; and it is further agreed, that all the ports and places on the eastern side, to whichsoever of the parties belonging, may freely be resorted to and used by both parties in as ample a manner as any of the Atlantic ports or places of the United States, or any of the ports or places of His Majesty in Great Britain."

"All goods and merchandise whose importation into His Majesty's said territories in America shall not be entirely prohibited, may freely, for the purposes of commerce, be carried into the same in the manner aforesaid, by the citizens of the United States, and such goods and merchandise shall be subject to no higher or other duties than would be payable by His Majesty's subjects on the importation of the same from Europe into the said territories. And in like manner all goods and merchandise whose importation into the United States shall not be wholly prohibited, may freely, for the purposes of commerce, be carried into the same, in the manner aforesaid, by His Majesty's subjects, and such goods and merchandise shall be subject to no higher or other duty than would be payable by the citizens of the United States on the importation of the same in American vessels into the Atlantic ports of the said States. And all goods not prohibited to be exported from the said territories, respectively, may in like manner be carried out of the same by the two parties, respectively, paying duty as aforesaid."

"No duty of entry shall ever be levied by either party on peltries brought by land or inland navigation into the said territories respectively." Indians passing with their *bona fide* effects were also exempt from any impost or duty. Discriminating tolls or rates of ferriage were not to be allowed, nor duties on goods carried over portages or carrying places, if re-embarked and not sold or exchanged during their passage.

The concluding paragraph of the Article says:—

"As this article is intended to render in a great degree the local advantages of each party common to both, and thereby promote a disposition favourable to friendship and good neighbourhood, it is agreed that the respective governments will mutually promote this amicable intercourse, by causing speedy and impartial justice to be done, and necessary protection to be extended to all who may be concerned therein." (1)

Articles IV. and V. make arrangements for determining the boundaries at Lake of the Woods and Ste. Croix River.

Article IX. provides that the people of either country might hold and devise land in the other.

(1.) In the Convention of Commerce, 1815, Art. II. provided (*inter alia*) that "the intercourse between the United States and His Britannic Majesty's possessions in the West Indies and on the continent of North America shall not be affected by any of the provisions of this article, but each party shall remain in the complete possession of their rights with respect to such intercourse." This convention was binding for four years; in 1818 it was extended indefinitely, but terminable at one year's notice after 1828. In 1830, Congress passed an Act enabling the President, whenever he had evidence that Great Britain would open to United States vessels the ports of her possessions in the West Indies, South America, the Caicos, the Bahamas, and the Bermudas, to make a proclamation opening the ports of the United States to British vessels from those possessions and also from the islands, provinces or colonies of Great Britain on or near the North American continent and north or east of the United States. On October 5, 1830, the President made this proclamation, and on November 5, the British Government, by order in council, revoked previous orders excluding United States vessels and allowed them to import from the United States into the British possessions abroad goods the produce of those States and to export goods from the British possessions abroad to foreign countries. It is under this arrangement of 1830 that United States vessels are allowed entry into Canadian and West Indian ports, and reciprocally.

Article XII. ran as follows :— (1)

“ His Majesty consents that it shall and may be lawful, during the time hereinafter limited, for the citizens of the United States to convey to any of His Majesty's islands and ports in the West Indies from the United States, in their own vessels, not being above the burden of seventy tons, any goods or merchandise, being of the growth, manufacture or produce of the said States, which it is or may be lawful to carry to the said islands or ports from the said States in British vessels; and that the said American vessels shall be subject there to no other or higher tonnage duties or charges than shall be payable by British vessels in the ports of the United States, and that the cargoes of the said American vessels shall be subject there to no other or higher duties or charges than shall be payable on the article if imported there from the said States in British vessels. ”

“ And His Majesty also consents that it shall be lawful for the said American citizens to purchase, load and carry away in their said vessels to the United States, from the said islands and ports, all such articles being the growth, manufacture or produce of the said islands, as may now by law be carried from thence to the said States in British vessels, and subject only to the same duties and charges on exportation to which British vessels and their cargoes are or shall be subject in similar circumstances. ”

“ Provided always that the said American vessels do carry and land their cargoes in the United States only, it being expressly agreed and declared that, during the continuance of this article, the United States will prohibit and restrain the carrying of any molasses, sugar, coffee, cocoa or cotton in American vessels, either from His Majesty's islands or from the United States to any part of the world except the United States, reasonable sea stores excepted. Provided also that it shall and may be lawful, during the same period, for British vessels to import from the said islands into the United States, and to export from the United States to the said islands, all articles whatever, being of the growth, produce or manufacture of the said islands or of the United States respectively, which now may by the laws of the said States be so imported or exported. And the cargoes of the said British vessels shall be subject to no other or higher duties or charges than shall be payable on the said articles if so imported or exported in American vessels. ”

“ It is agreed that this article, and every matter and thing contained therein, shall continue to be in force during the continuance of the war in which His Majesty is now engaged; and also for two years from and after the date of the signature of the preliminary or other articles of peace, by which the same may be terminated. ”

“ And it is further agreed that at the expiration of the said term the two contracting parties will endeavour further to regulate their commerce in this respect, according to the situation in which His Majesty may then find himself with respect to the West Indies, and with a view to such arrange-

(1) This article was suspended by the following additional article, being an amendment by the United States Senate by its resolution advising ratification, and accepted by Great Britain :—

“ It is further agreed between the said contracting parties that the operation of so much of the 12th article of the said treaty as respects the trade which his said Majesty thereby consents may be carried on between the United States and his islands in the West Indies, in the manner and on the terms and conditions therein specified, shall be suspended. ”

ments as may best conduce to the mutual advantage and extension of commerce. And the said parties will then also renew their discussion, and endeavour to agree, whether in any and in what cases provisions and other articles, not generally contraband, may become so. But in the meantime their conduct towards each other in these respects shall be regulated by the articles hereinafter inserted on those subjects."

72. *1814. Treaty of Ghent.*—Treaty of peace between Great Britain and United States.

Article I. provides that all territory should be restored as before the war.

Articles IV., V., VI. and VII. provide for commission to determine possession of islands in Passamaquoddy Bay and Bay of Fundy, the boundary of New Brunswick, and the water boundary along the great lakes, and to Lake of the Woods.

73. *1815. Treaty of London.*—Convention to regulate commerce and navigation between Great Britain and United States.

Freedom of navigation and commerce arranged between the British territories in Europe and the United States, no discriminating duties being allowed. It was, however, stipulated that the intercourse between the United States and the British possessions in the West Indies or on the Continent of North America should not be affected by these provisions, but each party should remain in the complete possession of its rights with respect to such an intercourse. The convention was binding for four years.

74. *Correspondence of 1817.*—Arrangement between the United Kingdom and the United States as to the naval force to be respectively maintained on the American lakes.

"Washington, April, 1817.

"Mr. Charles Bagot, His Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary, in a note addressed to Mr. Rush, acting Secretary of State for the United States, on April 28, 1817, acceded on behalf of the Prince Regent to the proposition of the United States made on the second of August, 1816, that the naval force to be maintained on the American lakes by His Majesty and the Government of the United States should be confined to the following vessels on each side:—

"On Lake Ontario to one vessel not exceeding one hundred tons burthen and armed with one eighteen-pound cannon.

"On the upper lakes to two vessels not exceeding like burthen each and armed with like force.

"On the waters of Lake Champlain to one vessel not exceeding like force."

It was also agreed that all other armed vessels on those lakes should be forthwith dismantled and that no other vessels of war should be there built or armed.

It was further agreed that if either party should desire to annul this stipulation it should cease to be binding after six months from notice.

Mr. Richard Rush, acting Secretary of State, on April 29, 1817, acknowledged the receipt of this note, and on behalf of the United States Government repeated the above agreement in identical terms.

75. 1818. *Treaty of London*.—Convention respecting fisheries, boundaries, &c., between Great Britain and United States.

It was agreed that fishermen of the United States should have the liberty in common with British fishermen to catch any kind of fish on the coast of Newfoundland, from Cape Ray to the Rameau Islands, and from Cape to the Quirpon Islands on the shores of Magdalen Islands, and also on the coasts, &c., from Mount Joly on the southern coast of Labrador to and through the Straits of Belleisle, and thence northward indefinitely along the coast, "without prejudice, however, to any of the exclusive rights of the Hudson's Bay Company," and that United States fishermen should have the right to dry and cure fish on the unsettled parts of Labrador and the southern coast of Newfoundland. The United States renounced any liberty of their fishermen to take, dry and cure fish on or within three miles of the coast of British North America, but to have the right to enter bays or harbours for shelter, for wood and water or for repairs.

Article II. provides that the international boundary should be along the 49th parallel of north latitude from the north-western point of the Lake of the Woods (or a line drawn north or south from it) to the Stoney or Rocky Mountains.

Article III. provides that country west of the Rocky Mountains, claimed by either party, should be free and open to the people of both nations for 10 years.

The term of the convention of 1813 was extended for 10 years.

76. 1825. *Treaty of St. Petersburg*.—Convention between Great Britain and Russia.

Articles I. and II. provide that the subjects of both nations should not be molested in navigating or fishing in any part of the Pacific Ocean, or landing on unoccupied parts of the coasts to trade with the natives, but where either nation had an establishment, subjects of the other must obtain permission to land.

Articles III. and IV. define the boundary of Alaska (1) from the south end of Prince of Wales Island (left to Russia) up Portland Channel to 56 degrees north latitude, then along the mountains parallel to the coast (but not more than 10 leagues distant) to 141 degrees west longitude, and along that meridian to the Frozen Ocean.

Articles VI. provides that British subjects should have free navigation of all rivers and streams crossing the coast strip of Alaska.

This convention was confirmed and continued by the treaties of 1843 and 1859.

77. 1827. *Treaty of London*.—Convention between the United Kingdom and the United States relative to territory west of Rocky Mountains.

The provision of Article III of the Treaty of London, of 1818 (*see above*), was extended for an indefinite period with right to abrogate after a year's notice.

(1) Under these articles a convention providing for a joint or concurrent survey of the territory adjacent to this line was concluded at Washington on the 22nd, ratified by the Senate of the United States on the 25th and by the President of the United States on the 28th July, 1892. Her Majesty ratified it on the 5th August, 1892. (See paragraph 86.)

78. Convention between the United Kingdom and the United States relative to the boundaries.

79. Arrangements were made as to the cases and documents to be submitted to arbitration under the fifth article of the Treaty of Ghent. (*New Brunswick Boundary*).

80. *1842. Ashburton Treaty, Washington.*—Treaty to settle and define boundaries between the United Kingdom and the United States.

Article I. defines the boundary between New Brunswick and Maine, as now existing.

Article III. defines the boundary from Georgian Bay to the Rocky Mountains, as now existing.

Article III. gives free use of the river St. John to products of the forest and farm on the Maine tributaries of the river.

81. *1846. Oregon Boundary Treaty, Washington.*—Treaty between United Kingdom and the United States.

Article I. From the point on the 49th parallel of north latitude, where the boundary laid down in existing treaties and conventions between the United States and Great Britain terminates, the line of boundary between the territories of the United States and those of Her Britannic Majesty shall be continued westward along the said 49th parallel of north latitude to the middle of the channel which separates the continent from Vancouver Island; and thence southerly through the middle of the said channel and of Fuca Straits, to the Pacific Ocean; provided, however, that the navigation of the whole of the said channel and straits, south of the 49th parallel of north latitude, remain free and open to both parties.

Article II. From the point at which the 49th parallel of north latitude shall be found to intersect the great northern branch of Columbia river, the navigation of the said branch shall remain free and open to the Hudson's Bay Company, and to all British subjects trading with the same, to the point where the said branch meets the main stream of the Columbia, and thence down the main stream to the ocean with free access into and through the said river or rivers, it being understood that all the usual portages along the line thus described, shall, in like manner be free, and open. In navigating the said river or rivers British subjects with their goods and produce shall be treated on the same footing as citizens of the United States; it being, however, always understood that nothing in this article shall be construed as preventing or intended to prevent the government of the United States from making any regulations respecting the said river or rivers not inconsistent with the present treaty.

82. *1854. Reciprocity Treaty, Washington.*—Treaty between the United Kingdom and United States, as to the fisheries and commerce of North America.

Article I. gives fishermen of the United States the liberty to take fish of every kind, except shellfish, on the sea coast and shores and in the bays, &c., of Canada, New Brunswick, Nova Scotia and Prince Edward Island and adjacent islands, without being restricted to any distance from the shore,

and to land for the purpose of drying nets and curing fish. The salmon and shad fisheries were not made free.

Article II. gives British fishermen similar rights on the eastern coasts of the United States north of the 36th parallel.

Article III. admits reciprocally free of duty certain goods, the growth and produce of the colonies named above or of the United States. The list included the unmanufactured produce of the farm (including animals), the forest, the fisheries and the mine.

Article IV. makes free to the United States the navigation of the St. Lawrence and its canals, subject only to the same tolls, &c., as British subjects.

Article VI. extends these provisions to Newfoundland when accepted by that colony.

83. 1870. *Treaty of London*.—Treaty between the United Kingdom and the United States as to naturalization.

Reciprocal arrangements as to naturalization and renunciation of naturalization.

84. 1871. *Treaty of Washington*.—Treaty between the United Kingdom and the United States.

Article XII. provides for the reference to commissioners of all claims by individuals, or corporations of the two countries, arising out of acts committed against their persons or property, between April 13, 1861, and April 9, 1865.

Article XVIII. provides that United States fishermen, in addition to the liberty secured to them by the Convention of London, 1818, should, in common with British subjects, have the liberty, for ten years, with two years further after notice of abrogation, to take fish of every kind except shell-fish, on the sea coasts and shores, and in the bays, &c., of Quebec, Nova Scotia, New Brunswick and Prince Edward Island with adjacent islands, without being restricted to any distance from the shore, with permission to land, to dry nets and cure fish. The salmon and shad fisheries were not included.

Article XIX. provides for similar liberty to British fishermen on the eastern sea coasts and shores of the United States, north of 39 degrees north latitude.

Article XXI. provides for the reciprocal admission free of duty of fish oil and fish (except those of the inland lakes and their rivers, and except fish preserved in oil) the produce of the fisheries of Canada and the United States.

Article XXII. (1) &c., provides for the appointment of commissioners to determine the amount of compensation (if any) to be paid by the United States for the greater value of the privileges granted by Article XVIII. than of those granted by articles XIX. and XXI.

Article XXVI. provides for the free navigation, by the United States, of the St. Lawrence from 49 degrees north latitude to the sea, and also for the free navigation, by British subjects, of the Yukon, Porcupine and Stikine.

(1) Under Article XXII. the commissioners, after prolonged investigation and argument at Halifax, on November 22, 1877, awarded \$5,500,000 compensation, the award being signed by His Excellency Maurice Delfosse, Belgian Minister at Washington, nominated by the Emperor of Austria, and by Sir A. T. Galt, the British Commissioner, the Hon. E. H. Kellogg, the United States Commissioner, dissenting.

Article XXVII. engages the British Government "to urge upon the Canadian Government to secure the United States citizens the use of the Welland, St. Lawrence and other canals in the Dominion on the terms of equality with the inhabitants of the Dominion." On the other hand it engages the United States Government to allow British subjects the use of the St. Clair flats canal on terms of equality with United States citizens, and further, engages the United States Government "to urge upon the States Government to secure to the subjects of Her Britannic Majesty, the use of the several States canals connected with the navigation of the lakes or rivers traversed by or contiguous to the boundary line between the possessions of the high contracting parties, on terms of equality with the inhabitants of the United States."

Article XXVIII. provides for the free navigation, by British subjects, of Lake Michigan for ten years, and further for two years after notice of abrogation.

Article XXIX. provides for transit in bond of imported goods from United States ports to Canada, and from Canadian ports to the United States without payment of duties, for ten years, and further for two years after notice.

Article XXX. provides that British subjects might carry, duty free, in British vessels, goods from one place in the United States on St. Lawrence waters to another, provided that part of the transportation be through Canada by land carriage in bond; it also provides a reciprocal right for United States citizens. The United States might suspend the right in case Canada imposed duties on such goods or deprived United States citizens of equal use of the canals.

Article XXXI. provides for free passage for lumber or timber cut on the main tributaries of the river St. John.

Article XXXII. provides for the accession of Newfoundland to the treaty.

Article XXXIV. left for the arbitrament of the Emperor of Germany (1) the determination of the boundary between Vancouver Island and the United States.

85. *1892, Behring Sea Treaty, Washington.*—Treaty between the United Kingdom and the United States respecting arbitration as to Behring's Sea seal fishing.

Article I. provides for the appointment of seven arbitrators, two named by each power, and one by France, Italy, Sweden and Norway.

Article VI. provides that the arbitrators should give their decision (2) on the following five points:—

(1.) Under Article XXXIV. the German Emperor awarded that the boundary should be through the Haro Channel, leaving St. Juan Island to the United States.

(2.) The arbitrators held many sittings at Paris, and on 15th August, 1892, they made their award.

As to the five points in Article VI. the decision was in favour of the British and against the United States contention, allowing no jurisdiction in Behring's Sea outside the three-mile limit to Russia before the cession, nor to the United States after it.

As to the regulations under Article VIII. they forbade seal hunting within 90 geographical miles of the Pribiloff Islands, make a close season from 1st of May to 31st July in the Pacific north of 35 degrees north latitude, and east of 180 degrees longitude, and the boundary between Russia and Alaska; only sailing vessels and their boats, to be licensed to carry a distinguishing flag and keep full log-books; fire-arms not to be used in Behring's Sea, and vessels only to fit out men for purposes of sealing.

hat exclusive jurisdiction in the sea now known as the Behring's Sea; what exclusive rights in the seal fisheries therein did Russia assert or exercise prior and up to the time of the cession of Alaska to the United States?

How far were these claims of jurisdiction as to the seal fisheries conceded and conceded by Great Britain?

Was the body of water now known as the Behring's Sea included in the "Pacific Ocean" as used in the treaty of 1825, between Great Britain and Russia; and what rights, if any, in the Behring's Sea were exclusively exercised by Russia after said treaty?

Did not all the rights of Russia as to jurisdiction and as to the seal fisheries in Behring's Sea east of the water boundary in the treaty between the United States and Russia of the 30th March, 1867, pass unimpaired to the United States?

Has the United States any right, and if so what right, of protection or property in the fur seals frequenting the islands of the United States in Behring's Sea when such seals are found outside the ordinary three mile limit?

Article VII. provides that the arbitrators should determine the regulations necessary for the proper protection and preservation of the fur seal, and that the contracting powers should secure the co-operation of other powers.

Article VIII. provides for the determination by the arbitrators of questions of fact as to claims for damages, the question of liability to be the subject of future negotiation.

892. *Convention as to Boundaries, Washington.*—Convention between Great Britain and United Kingdom and United States as to Alaskan boundary and Passamaquoddy Bay.

Article I. provides for a coincident or joint survey by commissioners for the boundary line between Canada and Alaska.

Article II. provides for the appointment of commissioners to determine the method of more accurately marking the boundary line between the territories in the waters of Passamaquoddy Bay in front of and adjacent to the port in the State of Maine.

893. *Treaty with France, Paris.\**—Commercial agreement between Great Britain and United Kingdom (on behalf of Canada) and France.

Article I. provides that still wines less than 26 per cent alcohol shall be exempt from the surtax or *ad valorem* duty of 30 per cent. That the common and castile soaps shall be reduced one-half, and the duty on almonds, prunes and plums by one-third.

Article II. provides that tariff advantages granted by Canada to a third country shall be enjoyed by France, Algeria and French colonies.

Article III. provides that certain goods of Canadian origin shall be subject to the minimum duty in France, Algeria and French colonies, namely, condensed milk, fresh water fish, fresh lobsters and preserved in their natural forms, apples and pears, fresh or dried,

*Canada Gazette*, 19th October, 1895, for proclamation bringing this treaty into force and after the 14th October, 1895.

preserved fruit, building timber, wood pavement, staves, wood pulp, shaving extract, common paper, prepared skins, boots and shoes, common furniture, except chairs, flooring of soft wood and wooden ships.

Any tariff advantage to other powers is to be extended to Canada.

#### BRITISH TREATIES OF COMMERCE AFFECTING CANADA.

(Arranged Alphabetically.)

88. 1825. *Argentine Confederation*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

89. 1876. *Austria-Hungary*.—Reciprocal most-favoured stipulations. Applicable to British colonies and foreign possessions. Terminable one year after notice.

90. 1862. *Belgium*.—Reciprocal and most-favoured nation stipulations. Applicable to British colonies.

Article XV. provides that articles, the produce and manufacture of Belgium, shall not be subject in the British colonies to other or higher duties than those which are or may be imposed upon similar articles of British origin. Terminable one year after notice, but by Article XXV. the high contracting powers reserve to themselves the right to introduce into the treaty by common consent any modifications which may not be at variance with its spirit or principles, and the utility of which may be shown by experience.

91. 1840. *Bolivia*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

92. 1854. *Chili*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. Terminable one year after notice.

93. 1866. *Columbia*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. Terminable one year after notice.

94. 1883. *Corea*.—Article X. stipulates that the government, public officers and subjects shall participate in all privileges, immunities and advantages, especially in relation to import or export duties on goods and manufactures, which shall then have been granted or may hereafter be granted by His Majesty the King of Corea to the government, public officers or subjects of any other power. Applicable to British colonies unless excepted by notice. May be modified one year after notice.

95. 1849. *Costa Rica*.—Reciprocal most-favoured nation stipulations. Applicable to British territories and dominions. Terminable one year after notice.

96. 1860-61. *Denmark*.—Confirmed 1814. Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

97. 1869. *Dominican Republic*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. Terminable on notice.

98. *France*.—See special treaty. The general treaty of 1882 excepts colonial produce from most-favoured nation treatment.

99. 1865. *Germany*\* (*Zollverein*).—Reciprocal most-favoured nation stipulations.

Article VII. runs: "The stipulations of the preceding articles, I. to VI., shall also be applied to the colonies and foreign possessions of Her Britannic Majesty. In those colonies and possessions the produce of the states of the *Zollverein* shall not be subject to any higher or other import duties than the produce of the United Kingdom of Great Britain and Ireland, or of any other country of the like kind, nor shall the exportation from those colonies or possessions to the *Zollverein* be subject to any higher or other duties than the exportation to the United Kingdom of Great Britain and Ireland." Terminable one year after notice.

100. *Hawaii*.—See Sandwich Islands.

101. 1848. *Liberia*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

102. 1865 and 1883. *Madagascar*.—Special stipulations. Applicable to British dominions. No term fixed.

103. 1856. *Morocco*.—Most-favoured nation clause in favour of British subjects. Applicable to British dominions. No term fixed.

104. 1891. *Muscat*.—Most-favoured nation clause in favour of British subjects, and duties not to exceed 5 per cent. Applicable to British colonies and possessions. Canada was excepted but acceded by Order in Council, February 6th, 1893. May be revised and amended after twelve years, on one year's notice.

105. 1841 and 1857. *Persia*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

106. *Portugal*.

(Imperial Blue Book Com. No. 17, 1893, says that the treaties of 1842 and 1882 have expired, but British trade continues to enjoy most-favoured nation treatment in Portugal.)

107. 1859. *Russia*.—Reciprocal most-favoured nation stipulations, except Sweden and Norway. Applicable to British dominions. Terminable one year after notice.

108. 1851. *Sandwich Islands*.—Reciprocal most-favoured nation stipulations, with the following proviso: "Gratuitously if the concession in favour of the other state shall have gratuitous, or in return for a compensation as nearly as possible of proportionate value and effect, to be adjusted by mutual agreement if the concession shall have been conditional." (Article III.) Applicable to British dominions and territories. Terminable one year after notice.

\* Sir E. Gray stated in the Imperial House of Commons on 30th July, 1894, the general effect of these two treaties to be: (a) That they do not prevent differential treatment by the United Kingdom in favour of British colonies. (b) That they do not prevent differential treatment by British colonies in favour of each other. (c) That they do prevent differential treatment by British colonies in favour of the United Kingdom.

109. 1885. *Siam*.—Most-favoured nation clause in favour of any part of the British dominions for spirits, beer, wines, &c. Applicable to British dominions for spirits, beer, wines and spirituous liquors. Terminable after six months' notice.

110. 1884. *South Africa Republic*.—Reciprocal most-favoured nation stipulations with provisions as follows: "Those provisions do not preclude the consideration of special arrangements as to import duties and commercial relations between the South African Republic and any of Her Majesty's colonies or possessions." Applicable to British dominions, with proviso as above. No term fixed.

111. 1892. *Spain*.—By Royal Order of June 29, 1892, Spain ordained that so long as the United Kingdom granted the most-favoured nation treatment, British goods imported into Spain should enjoy the benefit of being subject to the duties of the second column of the tariff. By Royal Order of June 30, 1892, this provision was extended to Cuba and Porto Rico.

112. 1826. *Sweden and Norway*.—Reciprocal most-favoured nation stipulations. Applicable to British colonies. Terminable one year after notice.

113. 1855. *Swiss Confederation*.—Reciprocal most-favoured nation stipulations. Applicable to British territories. Terminable one year after notice.

114. 1875. *Tunis*.—Reciprocal most-favoured nation stipulations. Applicable to British colonies. May be revised by common consent.

115. 1885. *Uruguay*.—Reciprocal most-favoured nation stipulations. Applicable to British colonies and possessions with exceptions. Canada was excepted but acceded. Terminable one year after notice.

116. 1825 and 1834. *Venezuela*.—Reciprocal most-favoured nation stipulations. Applicable to British dominions. No term fixed.

117.—British treaties of commerce, from which Canada was excepted, unless by consent:—

Egypt, 1889. Canada declined to accede. Order in Council, September 7, 1891.

Ecuador, 1880. Canada declined to accede. Order in Council, November 10, 1882.

\*Greece, 1886. Canada declined to accede. Order in Council, March 25, 1888.

Italy, 1883. Canada declined to accede. Order in Council, September 15, 1883.

Mexico, 1888. Canada declined to accede. Order in Council, May 22, 1889.

Montenegro, 1882. Canada declined to accede. Order in Council, March 1, 1883.

- \*Muscat, 1802. Canada acceded. Order in Council, February 6, 1893.  
 Paraguay, 1884. Canada declined to accede. December 27, 1886.  
 Roumania, 1892. Canada declined to accede. Order in Council, May 8, 1893.  
 Salvador, 1886. Canada declined to accede. Order in Council, December 27, 1886.  
 Servia, 1893. Canada declined to accede. March 9, 1894.  
 \*Uruguay, 1885. Canada acceded. Order in Council, December 27, 1886.  
 †Zanzibar, 1886. Canada did not accede.

## EXTRADITION TREATIES.

118. Extradition proceedings in Canada are governed by "The Extradition Act," chapter 142, Revised Statutes of Canada, 1886.

This Act applies to any foreign state with which there is an extradition arrangement, but so as not to contravene such arrangement.

If the Imperial Extradition Act of 1870 is made subject to any limitation by such arrangement, this Act shall be subject to the same limitations.

Judges of the Superior and County Courts, and commissioners appointed for the purpose, have power to act.

A warrant being issued for the fugitive, the judge is to receive evidence as to the charges and as to whether the offence is not an extraditable crime or of a political character, for which he cannot be surrendered. After committal the fugitive may be surrendered after fifteen days.

In case of the extradition of a Canadian fugitive by a foreign state, he cannot be prosecuted or punished for any prior offence not of a nature included in the extradition arrangement with the state in question.

The extradition crimes contained in a schedule to the Act are: Murder, or attempts, and manslaughter; counterfeiting and forging, larceny, embezzlement, obtaining value under false pretenses, crimes against bankruptcy or insolvency law, criminal frauds by agents, trustees, &c.; rape, abduction, child-stealing, kidnapping, false imprisonment, burglary, arson, robbery, threats to extort, perjury and subordination; piracy, and various other crimes at sea. Criminal accessories are included.

The Imperial authorities, by Order in Council, exempt Canada from the operation of the Imperial Extradition Acts of 1870 and 1873, so long as the Canadian Extradition Act remains in force.

The following are the countries with which the United Kingdom has extradition arrangements which apply to Canada:—

Argentine Republic	May	22, 1889
Austria-Hungary	Dec.	3, 1873
Belgium	May	20, 1876
"	July	23, 1877
"	April	21, 1887
Brazil	Nov.	13, 1872
Colombia	Oct.	27, 1888
Denmark	March	31, 1873

\*Particulars of the treaties with Muscat and Uruguay, to which Canada has acceded, will be found in the list of Treaties of Commerce now applicable to Canada.

†No notification of the treaty with Zanzibar was, apparently, received from the Imperial authorities.

EXTRADITION TREATIES—*Continued.*

119. *1894. Treaty with Japan.*—This treaty has not yet been accepted by Canada, but a digest of its provisions is here given on account of its importance.

Treaty of commerce and navigation between Great Britain and Japan signed at London, July 16th, 1894.

Article I. gives the subjects of each power liberty to enter, travel or reside in the possessions of the other.

Article III. provides for reciprocal freedom of commerce and navigation.

Article V. No import duty to be imposed by either power on the produce of the other, higher than in the case of other powers.

Article VI. Similar stipulations as to export duties.

Article VII. provides for exemption from transit duties and equality of treatment with native subjects.

Article VIII. provides for reciprocally equal treatment of imports and exports in vessels of the two countries.

Article XI. excepts the coasting trade, left to the laws of the respective countries, but part of cargo may be landed at different ports. British vessels may continue to carry cargoes between the open ports of Japan.

Article XIX. excepts Canada (among other colonies) from the operation of the treaty, unless notice of acceding to it is given within two years of ratification.

Article XX. gives up the jurisdiction of British courts in Japan from the time the treaty comes into force.

Article XXI. provides that the treaty shall not take effect for at least five years, on a year's notice being given by Japan, not less than four years

\*Ratifications exchanged, February 19th, 1886.

†Tonga subjects escaping to British Territories only.

after the signature. The treaty is to remain in force for twelve years after going into operation. After a year's notice, given in not less than eleven years, it may be terminated by either party.

Article XXII. provides for the ratification of the treaty at Tokio, as soon as possible, and not later than six months after signature.

Annexed to the treaty is a tariff from five to fifteen per cent *ad valorem* to which British goods shall be subject in Japan a month after the ratification of the treaty, not being postponed, like the treaty itself, for five years.

This is the first treaty to recognize formally Japan's status as a member of the family of civilized nations.

#### INDIAN TREATIES.

120. The treaties of Canada with the Indians of the country are contained in "Treaties of Canada with the Indians of the North-west, 1880," by Hon. A. Morris, and in "Indian Treaties and Surrenders," Department of Indian Affairs.

121. Mr. Morris, in his introduction, says: "One of the gravest of the questions presented for solution by the Dominion of Canada, when the enormous region of country formerly known as the North-west Territories and Rupert's Land was entrusted by the Empire of Great Britain and Ireland to her rule, was the securing the alliance of the Indian tribes and maintaining friendly relations with them. The predecessors of Canada, the company of adventurers of England trading into Hudson Bay, popularly known as the Hudson's Bay Company, had for long years been eminently successful in securing the good will of the Indians, but on their sway coming to an end, the Indian mind was disturbed. The events that transpired in the Red River region in the years 1869-70, during the period when a provisional government was attempted to be established, had perplexed the Indians. They, moreover, had witnessed a sudden irruption into the country of whites from without. In the west American traders poured into the land, and, freighted with fire-water, purchased their peltries and their horses. In the east white men took possession of the soil and made for themselves homes, and as time went on steamboats were placed on the inland waters, surveyors passed through the territories and the 'speaking wires,' as the Indians call the telegraph, were erected. \* \* \* The Government of Canada, anticipating the probabilities of such a state of affairs, had wisely resolved that contemporaneously with the formal establishment of their rule there should be formal alliances with the Indians." The result is that within the decade, 1870-80, seven treaties were concluded with the Indian tribes of such an inclusive character that there remained no Indian nations in the North-west inside of the Fertile Belt who had not been dealt with.

122. Before that period there had been three treaties with the Indians of North-west Canada; one in 1817, one in 1850 and one in 1862.

Treaty of 1817, commonly known as the Selkirk Treaty, provides for the transfer by the chiefs and warriors of the Chippeway or Saulteaux nation and those of the Killistine or Cree nation, of all that tract of land adjacent

to Red River and Assiniboine River, beginning at the mouth of Red River and extending along the same as far as Great Forks at the mouth of Red Lake River, and along Assiniboine River as far as the Muskrat River, otherwise called Riviere des Champignons, and extending to the distance of six miles from Fort Douglas on every side, and likewise from Fort Doer and also from the Great Forks and other posts, extending in breadth to the distance of two English statute miles back from the banks of the river.

The consideration for the surrender was the payment of 100 pounds of good merchantable tobacco to each nation annually. The Honourable Thomas Earl of Selkirk acted for the King.

In this instance the Indians were made to comprehend the depth of the land they were surrendering by being told that it was the greatest distance at which a horse on the level prairie could be seen.

123. Treaty of 1850, commonly called the Robinson Superior Treaty, between Hon. William B. Robinson, on behalf of Her Majesty the Queen, and the principal men of the Ojibbewa Indians inhabiting the northern shore of Lake Superior, in the Province of Canada, from Batchewanaung Bay to Pigeon River, and inland to the height of land, provides for the surrender to Her Majesty of all the right and interest of the Indian tribe named in the whole of the territory described, consideration being: (a) £2,000 of good lawful money of Canada to them, in hand paid. (b) A perpetual annuity of £500. (c) Full and free privilege to hunt and fish over the territory, except such portions as may from time to time be sold or leased by the Provincial Government. (d) Three reservations of various areas reserved for the Indian tribe in common.

124. Treaty of 1852 (No. 2), commonly called the Robinson Huron Treaty, between the Hon. W. B. Robinson, on behalf of the Queen, and the principal men of the Ojibbewa Indians, claiming the eastern and northern shores of Lake Huron from Penetanguishene to Sault Ste. Marie, and thence to Batchewanaung Bay on the north shore of Lake Superior, and thence inland to the height of land, provides for the surrender to Her Majesty of all the right and interest of the Indian tribe named, in the whole of the territory described, consideration being: (a) £2,000 of good lawful money, in hand paid. (b) A perpetual annuity of £600. (c) Full and free privilege to fish and hunt over the territory, saving such portions as are sold or leased by the Provincial Government. (d) Seventeen reservations of land of various areas for the use of the chiefs and their tribes in common.

125. Treaty of 1862, commonly called the Manitoulin Island Treaty, between the Hon. William McDougall and William Spragge, on the part of the Crown, and the principal men of the Ottawa, Chippewa and other Indians occupying the Island of Manitoulin, provides for the surrender to Her Majesty of all the right and interest of the Indians named, to the Great Manitoulin Island and to the adjacent islands, consideration being: (a) A survey of the island by the Department of Crown Lands. (b) Grant of 100 acres to each resident Indian, being head of a family; of 50 acres to each single person, over 21 years, and of 50 acres to each single orphan child under 21 years; of 100 acres to each family of orphan

children under 21 years. Each Indian to make his own selection, provided : 1st. That the lots shall be contiguous to each other ; 2nd. That rival claims be referred to the resident superintendent ; 3rd. That selections for orphan children be made by their friends ; 4th. That mill sites be reserved from selection ; 5th. That the selections be made within a year. (c) Interest accruing from investments of sales of land to be paid to the Indians annually, every chief being entitled to two portions. (d) Salary of resident superintendent to become a charge upon the fund as soon as 100,000 acres of land are sold. (e) Conditions for protection of the Indians to be inserted in all deeds to patents for lands as selected by the Indians. (f) Indians and whites to have equal piscary rights.

126. The treaties in Manitoba, the North-west Territories and Keewatin :

Treaty No. 1, made 3rd August, 1871, between Her Most Gracious Majesty the Queen and the Chippewa and Swampy Cree Indians, provides for the surrender to the Queen of all the lands beginning at the International Boundary near the Lake of the Woods ; northward to White Mouth Lake by the river issuing therefrom to the mouth of the River Winnipeg ; westerly across Lake Winnipeg to the Drunken River and to and across Lake Manitoba to its western shore ; then in a straight line to the crossing of the rapids on the Assiniboine River ; thence due south to the International Boundary. The considerations being : (a) Reservations sufficient to give 160 acres for each family of five and proportionately for smaller or larger families. (b) A present of \$3 for each Indian man, woman and child belonging to the tribes surrendering their rights and interests. (c) School to be maintained on each of the three reserves. (d) Intoxicating liquors to be excluded from the reserves. (e) Annuity of \$15 to each Indian family of five, or in like proportion for larger and smaller families.

127. Treaty No. 2, made 21st August, 1871, between the Queen and the Chippewa Indians provides for the surrender to the Queen of all their right and interest in lands bounded as follows : Beginning at mouth of the Winnipeg River on the north line of the lands ceded by Treaty No. 1, along the eastern shore of Lake Winnipeg to the mouth of Beren's River ; then across Lake Winnipeg to the north bank of the Little Saskatchewan River ; then up stream and along the northern and western shores thereof and of St. Martin's Lake and along the north bank of the stream flowing into St. Martin's Lake to Lake Manitoba ; then by the eastern and northern shores of Lake Manitoba to the mouth of the Waterhen River ; then by the eastern and northern shores of said river up stream to the northern extremity of Waterhen Lake ; then in a line due west across Lake Winnipegosis ; then in a straight line to the source of Shell River ; then to a point west of the same two miles distant from the river measuring at right angles thereto ; then by a line parallel with Shell River to its mouth and then crossing the Assiniboine and running parallel thereto and two miles distant therefrom and to the westward to a point opposite Fort Ellice ; then in a south-westerly course to the north-western point of Moose Mountains ; then by a line due south to the International Boundary ; then eastward to the line of the land ceded by Treaty No. 1. Considerations : (a) From reserves in different localities of such area as shall give 160 acres for each family of

five, and in the same proportion for larger or smaller families. (b) Present of \$3 for each Indian man, woman and child. (c) A school maintained on each reserve whenever the Indians desire it. (d) Prohibition of sale or introduction of intoxicating liquors on the reserves. (e) Annuity of \$15 to each family of five, and in like proportion for larger and smaller families; such payment as in the case of Treaty No. 1 to be made in cash or in such articles as the Indians require of blankets, clothing, prints (assorted colours), twine or traps, at the current cash price in Montreal.

128. Treaty No. 3, commonly called the North-west Angle Treaty, made 3rd October, 1873, between Her Most Gracious Majesty the Queen and the Salteaux tribe of the Ojibbewa Indians, provides for the surrender to the Queen of all their rights and interests in lands, the boundaries of which are as follows: Commencing at the Pigeon River route, where the International Boundary intersects the height of land separating the waters flowing into Lake Superior from those flowing into Lake Winnipeg; thence northerly, westerly and easterly along the height of land, following the sinuosities to the point at which the height of land meets the summit of the water-shed from which the streams flow to Lake Nepigon; thence along the ridge separating the waters of the Nepigon and the Winnipeg to the height of land dividing the waters of the Albany and the Winnipeg; thence westerly and north-westerly along the height of land dividing the waters flowing to Hudson Bay by the Albany or other rivers from those running to English River and the Winnipeg to a point on the said height of land bearing north 45 degrees, and from Fort Alexander, at the mouth of the Winnipeg; thence south 45 degrees west to Fort Alexander: thence along the eastern bank of the Winnipeg to the mouth of White Mouth River; thence southerly by the eastern boundary of Treaty No. 1, and thence on a line having the general bearing of White Mouth River to the International Boundary; thence to the Lake of the Woods, and from thence by the International Boundary to the place of beginning, comprising an area of 55,000 square miles more or less. Considerations: (a) Reservation of lands not to exceed one square mile for each family of five, and in the same proportion for larger and smaller families. (b) Present of \$12 for each man, woman and child. (c) Maintenance of schools on the reserves, wherever the Indians desire it. (d) Hunting and fishing rights of Indians continued, except as limited by grants for settlement, mining and lumbering purposes made by the Queen. (e) An annuity of \$5 per head to each Indian person. (f) The expenditure of \$1,500 per annum for the purchase of ammunition and of twine for nets for the use of the Indians. (g) The supply of two hoes, one spade, one scythe for each family, one plough for every ten families, five harrows for every twenty families, and one axe, one cross-cut saw, one hand saw, one pit saw, the necessary files, one grindstone and one auger for each band, and also for each chief for the use of his band one chest of ordinary carpenters' tools; also for each band enough of wheat, barley, potatoes and oats to plant the land actually broken up for cultivation by each band, and also for each band one yoke of oxen, one bull and four cows, all the aforesaid articles to be given once for all for the encouragement of agriculture among the Indians. (h) The payment of an annual salary of \$25 to each duly recognized chief and of \$15 to each subordinate officer (not

exceeding three for each band); each chief and subordinate officer to receive once in every three years a suitable suit of clothing.

(Memo.—The chiefs and councillors of the Lac Seul Indians, on the 9th June, 1874, agreed to abide by the articles of Treaty No. 3).

129. Treaty No. 4, commonly called the Qu'Appelle Treaty, made on 15th September, 1874, between Her Most Gracious Majesty the Queen and the Cree, Saulteaux and other Indians, provides for the surrender to the Queen of the lands bounded as follows: Commencing at a point on the United States frontier due south of the north-western point of the Moose Mountains; thence due north to said point; thence in a north-easterly course to a point four miles due west of Fort Ellice; thence in a line parallel with, and two miles westward, from the Assiniboine River to the mouth of Shell River; thence parallel to the said river, and two miles distant therefrom to its source; thence in a straight line to a point on the western shore of Lake Winnipegosis due west from the most northern extremity of Waterhen Lake; thence east to the centre of Lake Winnipegosis; thence northwardly through the middle of the said lake (including Birch Island) to the mouth of Red Deer River; thence westerly and south-westerly along (and including) the said Red Deer River and its lakes, Red Deer and Etoimami, to the source of its western branch; thence in a straight line to the source of the northern branch of the Qu'Appelle; thence along and including said streams to the forks near Long Lake; thence along and including said river to the mouth of Maple Creek; thence southwardly along said creek to a point opposite the western extremity of the Cypress Hills; thence due south to the International Boundary; thence to the place of beginning. Considerations being: (a) Reserves of sufficient area to give one square mile for each family of five, and in the same proportion for larger and smaller families; provided among other things that the Indians shall not be entitled to sell, or otherwise alienate these lands. (b) A present for each chief of \$25 in cash, a coat and a Queen's silver medal for each headman (not exceeding four in number in each band) \$15 in cash and a coat; and for every other man, woman and child \$12 in cash and an immediate distribution to those present at the time, of some powder, shot blankets, calicoes and other articles. (c) An annuity in cash to each chief of \$25, each of four headmen \$15, and to every other Indian man, woman and child \$5 per head; each chief and each of four headmen to receive once in every three years a suitable suit of clothing, and an annual distribution to all the bands, of powder, shot, ball and twine to the value of \$750, and each chief to receive in recognition of the closing of the treaty a suitable flag. (d) For the encouragement of agriculture each band to receive two hoes, one spade, one scythe and one axe for each family; enough seed wheat, barley, oats and potatoes to plant such lands as they have broken up; also one plough and two harrows for every 10 families of cultivators, and to each chief for the use of his band one yoke of oxen, one bull, four cows, a chest of carpenters' tools, five hand saws, five augers, one cross-cut saw, one fret saw, the necessary files, and one grindstone; all these articles to be given once for all. (e) A school for each band and maintenance therefor on their settling on their reserves. (f) Prohibition of sale or introduction of intoxicating liquors within the reserves. (g) Rights of hunting, fishing and trapping. (h) Lands

required by Her Majesty's Government for public buildings or works to be paid for by the Government.

(Memo.—Fort Ellice Saulteaux Indians surrendered on the 21st September, 1874, their rights and interests in all lands for the same considerations as those mentioned in Treaty No. 4. The Saulteaux and Assiniboine Indians surrendered on 8th day September, 1873, their rights and interests in said lands and in all other lands. The Cree, Saulteaux and Assiniboine Indians did the same on 9th of September, 1875.)

130. On 30th April, 1875, in consideration of the very unsatisfactory state of affairs arising out of the so-called outside promises in connection with Treaties Nos. 1 and 2, an Order in Council provided (*a*) that the written memorandum attached to Treaty No. 1 should be part of it, and of No. 2, the annual payment to each Indian under Treaties Nos. 1 and 2 should be increased from \$3 to \$5; that each chief should receive in addition to the \$5, the sum of \$20 a year and a suit of clothing every three years; two head men in each band to receive a suit of clothing every three years, the express understanding being that each chief or other Indian receiving such increased sum shall abandon all claims against the Government in connection with the so-called outside promises, other than those contained in the memorandum attached to the treaty. The chiefs and headmen accepted the increase of annuities under the Order in Council, excepting that the number of braves and councillors for each chief should be four instead of two.

The outside promises were: (*a*) For each chief signing the treaty, a dress distinguishing him as chief. (*b*) For braves and councillors of each chief, a dress, it being understood that these shall number two for each chief. (*c*) For each chief (except Yellow Quill) one buggy. (*d*) For the braves and councillors of each chief (except Yellow Quill) one buggy. (*e*) In lieu of a yoke of oxen for each reserve, one bull for each, and a cow for each chief, a boar for each reserve and a sow for each chief, and a male and female of each kind of animal raised by farmers. (*f*) A plough and harrow for each cultivator of the ground. The animals to be the property of the Government; the buggies to be the property of the Indians to whom given.

These treaties, Nos. 1 and 2, with their "outside promises," gave the Government much bother, and were finally settled in 1876 by Lieutenant-Governor Morris.

131. Treaty No. 5, commonly known as the "Winnipeg Treaty," made 20th September, 1875, between Her Majesty and the Saulteaux and Swampy Cree tribes of Indians, provides for the surrender to the Queen of their rights and interests in the lands bounded as follows: Commencing at the north corner or junction of Treaties Nos. 1 and 2; thence easterly along the boundary of Treaty No. 3 to the height of land at the north-east corner of the said treaty limits, a point dividing the waters of the Albany and Winnipeg rivers; thence due north along the said height of land to a point intersected by the 53rd degree of north latitude, and thence north-westerly to Favourable Lake; thence following the east shore of said lake to its northern limit; thence north-westerly to the north end of Lake Winnipegosis; thence westerly to the height of land called Robinson's Portage; thence north-

westerly to the east end of Cross Lake; thence north-westerly crossing Fox's Lake; thence north-westerly to the north end of Split Lake; thence south-westerly to Pipe Stone Lake on Burnt Wood River; thence south-westerly to the north shore of Beaver Lake; thence south-westerly to the west end of Cumberland Lake; thence due south to the Saskatchewan River; thence due south to the north-west corner of the northern limits of Treaty No. 4, including all territory within the said limits, and all islands in all lakes within the said limits, it being also understood that in all cases where lakes form the treaty limits, ten miles from the shore of the lake should be included in the treaty. The considerations being: (a) Three reserves of 160 acres for each family of five, and similar proportions for larger and smaller families. (b) Maintenance of schools. (c) Prohibition of sale or introduction of intoxicating liquors in such reserves. (d) Hunting and fishing rights. (e) Payment to the Indians for any lands appropriated by the Government of Canada for public purposes, within the reserves. (f) Payment of an annuity of \$5 to each Indian person. (g) Expenditure of \$500 a year for the purchase of ammunition and twine for nets. (h) Agricultural implements, seed wheat, barley, potatoes, oats and farm animals, same as given in the other treaties, and given once for all. (i) Annual salary of \$25 to each chief, and to three subordinate officers in each band, of \$15; a suit of clothes once in three years to each chief, and subordinate officers to the number limited, and a flag and medal to each chief.

(Memo.—The Salteaux Indians residing at the mouth of the Saskatchewan River gave in their adhesion to the Treaty [No. 5], 27th September, 1875.)

In 1876, adhesion to this treaty was given in by the Indians of the Dog Head, Blood Vein River, Big Island and Jackfish Head bands on Lake Winnipeg, and of the Island and Grand Rapids of the Berens River band, and of the Pas, Cumberland and Moose Lake bands on the Saskatchewan River.

132. In addition to these treaties there are some 1,540 treaties, surrenders, provisional and confirmatory, under which lands have been transferred, in the several provinces of the Dominion, to the Crown, by the Indians.

Some of these treaties and surrenders are very old. Thus No. 239, being articles of submission and agreement made at Boston, in New England, bears date 15th December, 1725, and contains the acknowledgment of the submission of the Indians of Nova Scotia, or Acadia, and New England to King George II., in connection with the Treaty of Utrecht, 1713. "Signed, sealed and delivered in the presence of the Great and General Court or Assembly of the Province of Massachusetts Bay, and ratified at the Fort of Annapolis Royal, Nova Scotia," and bearing the traces of the fine work of Paul Mascarene.

Another is the Treaty of 1727—a treaty of alliance, offensive and defensive, between the English and the Indians, done at the Conference of Casco Bay, and signed on behalf of King George by Wm. Dummer, Lieutenant-Governor of the Massachusetts Bay, J. Wentworth, Lieutenant-Governor of New Hampshire, and P. Mascarene, Commissioner for the Government of Nova Scotia.

A third is the renunciation by the "Chippewas," through their representatives and chiefs, to King George III., of the Island of Michilimakinak, called by the Canadians "La Grosse Isle," the consideration money being "£5,000, New York currency," the Indians promising to preserve in our village a belt of wampum of seven feet in length, to perpetuate, secure, and be a lasting memorial of the said transactions to our nation for ever hereafter." The date is 12th May, 1781.

A fourth, dated 1790, conveys the area out of which have been cut the counties of Essex and Kent, and portions of Elgin and Middlesex and Lambton. The grantors are the principal village and war chiefs of the Ottawa, Chippewa, Pottowatamy and Huron Indian nations of Detroit. The conveyance is to King George III., payment of the consideration money, £1,200, Halifax currency, in valuable wares and merchandise, being made by Alexander McKee, Deputy Agent of Indian Affairs.

Among the valuable wares and merchandises given to the Indians were 840 pairs of blankets, ranging in price from 4/9 a pair to 12/; 35 pieces of strouds, @ 67/0; 140 yards of scarlet cloth, @ 8/; 12 pieces of cadies, 420 yards, @ 2/6; 26 pieces Embolton linen, 96 yards, @ 15 0½; 50 gross ribbons, @ 10/6; 100 pounds vermilion, @ 4/; 1 dozen black silk handkerchiefs; 40 nests of tin kettles; 60 guns, @ 20/6; 20 rifles, @ 50/; 1,000 pounds ball and shot, @ 21/ per 100 lbs.; 2,000 flints, @ 10/ per 1,000; 30 dozen looking glasses, @ 3/ per doz.; 10 pairs callemaneon, @ 21/; 1,000 fish hooks, 22/6; 39 gallons rum, @ 3/9; 400 pounds tobacco, @ 1/3; 24 laced hats, @ 20/; 11 gross pipes, @ 1/6; 600 pounds brass kettles, @ 1/3 per pound, &c.

Among the early documents is one from Louis XIV., dated 29th May, 1680, granting the land called Le Sault, near the St. Louis rapids, to the Jesuits, for the use of the Iroquois settled there. The grant "most expressly prohibits and forbids the French, who may live with or go among the said Iroquois and other Indian nations, who may settle on the said land called Le Sault, from having and keeping any cattle, and all persons from keeping any public house among the dwellings of the said Iroquois, which may be built on the said land."

## CHAPTER III.

Physical Features.—Area.—Climate.—Meteorological Tables, &c., &c.

133. A glance at the map of North America will show a vast body of water called Hudson Bay, the extreme southerly prolongation of which—James Bay—pierces the Dominion (the distance between it and Lake Superior being under 350 miles), and becomes a central point from which Canada stretches its huge extent in every direction. To the south and south-east lies the great *woodland region* comprising the Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario. In this region for a couple of centuries the forests have been attacked by armies of lumbermen hewing down the trees for export and for home uses or clearing the ground for agricultural pursuits.

To the east and north-east is the north-east *fur territory* whose vast dimensions are illustrated by the fact that Moose Fort on James Bay is as far from the most easterly point of the Labrador Coast as it is from South Carolina.

134. To the west and south-west lies the great *prairie region* comprising Manitoba and the four provisional districts of Alberta, Saskatchewan, Assiniboia and Athabasca.

135. To the north-west are Keewatin and the Peace and Mackenzie River districts—the land of furs and fish, while beyond the prairie region, still further west, is the *mountain region* of Canada, embracing the Rocky, the Selkirk and the Gold ranges of mountains.

136. From the 85th degree of longitude the country stretches west to the 130th, and east to the 42nd—45 degrees on the one side and 43 degrees on the other side.

North and south the country stretches from 51st degree of latitude, south to the 42nd, and north to the Frozen Sea.

Speaking generally, the country is divided into the basin of Hudson Bay and those of the Peace, the Mackenzie, the St. Lawrence and the St. John Rivers, and the two slopes of the Atlantic and Pacific Oceans.

The basin of Hudson Bay is the largest, being over 2,000,000 square miles in extent. One obtains an idea of this extent from the fact that all Europe outside of Russia could be put there with room enough left to pack away in it the States of Texas and New York.

The St. Lawrence Basin covers 530,000 square miles, of which 460,000 square miles are in Canada.

The Mackenzie Basin has an area of 550,000 square miles. The St. John Basin and the Atlantic Slope together have an area of 50,214 square miles, and the Pacific Slope one of 341,303 square miles, traversed by the Columbia, the Fraser and other large rivers.

137. The Dominion of Canada, with these great subdivisions, has an area of about 3,456,383 square miles, of which 3,315,647 are land surface and 140,736 water surface. It is about 3,500 miles from east to west and 1,400 miles from north to south. It comprises the whole of the northern half of North America with the exception, on the west, of Alaska, which belongs to the United States, and on the east, of Labrador, which is under the jurisdiction of Newfoundland. It is bounded on the north by the Arctic Ocean, on the west by the territory of Alaska and the Pacific Ocean, on the east by the Gulf of St. Lawrence and Labrador, and on the south by the Atlantic Ocean and the United States of America. This latter boundary, starting from the Atlantic sea board, commences at the mouth of the St. Croix River, which empties into the Bay of Fundy, then follows this river and Lake Chiputnecook and passes due north till it strikes the St. John River; thence by that river and one of its western branches it reaches the water-shed between the St. Lawrence and the Atlantic, which it follows by a tortuous south-westerly course to the 45th parallel of north latitude, in longitude  $71^{\circ} 30'$  west; thence by this parallel it passes westward to the St. Lawrence and along mid-channel of that river and of the Lakes Ontario, Erie, Huron and the main portion of Lake Superior to the mouth of Pigeon River; thence, by it and Rainy River, it gains the north-west angle of the Lake of the Woods; thence it follows the 49th parallel to the Gulf of Georgia, and thence passes by Haro Straits and the Straits of Fuca to the Pacific Ocean. The length of this frontier line from ocean to ocean is 3,000 geographical miles, 1,400 miles being a water line by river, lake and sea, and 1,600 miles a boundary by land. In addition to this boundary between Canada and the United States there is the boundary between Canada and Alaska (belonging to the United States by purchase from Russia in 1867). This line is in process of delimitation by joint commission.

138. It is difficult to convey an adequate conception of the vastness of the country. England, Scotland and Wales together form an area of 88,000 square miles. Forty such areas could be cut out of Canada. New South Wales contains 309,175 square miles and is larger by 162 square miles than France, Italy and Sicily. Canada would make eleven countries the size of New South Wales. In extent there are three British Indies in Canada and still enough left over to make a Queensland and a Victoria. The German Empire could be carved out of Canada and fifteen more countries of the same size, with still room enough to fill in corners with Belgium, Denmark, Greece, Servia and Switzerland. Ireland could then be accommodated and yet a patch left large enough for Delaware and Connecticut.

Canada is the largest of all the British possessions, being over 30 per cent of the area of the British Empire, which is officially stated to be 11,400,000 square miles, inclusive of protectorates. The Continent of Australia, with Tasmania and New Zealand added, is the next largest, being about 294,800 square miles less than Canada. The combined area of Canada and Australia, including British New Guiana, comprises nearly 70 per cent of the British Empire.

Mr. E. G. Ravenstein estimates the world's area at 51,250,800 square miles and the world's population at 1,467,920,000. Canada covers one-

fifteenth part of the area and contains under one three-hundredth part of the population.

139. The following are the areas of the several provinces and districts of the Dominion :—

PROVINCES AND DISTRICTS.	Land. — Square Miles.	Water. — Square Miles.	Total. — Square Miles.
Ontario.....	219,650	2,350	222,000
Quebec.....	227,500	1,400	228,900
New Scotia.....	20,550	50	20,600
New Brunswick.....	28,100	100	28,200
*Manitoba.....	64,066	9,890	73,956
British Columbia.....	382,300	1,000	383,300
Prince Edward Island.....	2,000	.....	2,000
District of Keewatin.....	267,000	15,000	282,000
"    Alberta.....	105,355	745	106,100
"    Assiniboia.....	88,534	1,001	89,535
"    Athabasca.....	103,300	1,200	104,500
"    Saskatchewan.....	101,092	6,000	107,092
North-west Territories.....	859,600	46,400	906,000
Territory east of Keewatin and south of Hudson Bay.....	194,300	2,500	196,800
Ungava.....	352,300	5,700	358,000
Franklin (islands in the Arctic Ocean and Hudson Bay).....	300,000	.....	300,000
Great lakes and River St. Lawrence, east to longitude 66°, not included in above areas.....	.....	47,400	47,400
Total.....	3,315,647	140,736	3,456,383

\*The area of the Province of Manitoba was originally 123,200 square miles, but a large portion was taken away and added to the district of Keewatin and to Ontario in 1883.

140. By Proclamation, 2nd Oct., 1895, the unorganized and unnamed Territories were divided into provisional districts for postal and other purposes, and four such districts were established, viz. :—

1. The District of Ungava, bounded on the north by Hudson Strait; on the west by the east coast of Hudson Bay and James Bay; on the south by the Province of Quebec, and on the east by the boundary between Canada and the dependency of Newfoundland on the Labrador Coast—all islands within a distance of 3 miles from the shores of Hudson Strait, Hudson Bay and James Bay to be included.

2. The District of Franklin, beginning at Cape Best, at the entrance to Hudson Strait from the Atlantic; thence westerly, through said strait, Fox Channel, Gulf of Boothia, Franklin Strait, Ross Strait, Simpson Strait, Victoria Strait, Dense Strait, Coronation Gulf and Dolphin and Union Strait to a point in the Arctic Seas in longitude about 125° 30' west and latitude about 71 degrees north; thence northerly, including Baring Land, Prince Patrick Island and the Polynia Islands; thence north-easterly to the "farthest of Commander Markham's and Lieut. Parr's sledge journey" in 1876, in longitude about 63½ degrees west and latitude about 83½ degrees north; thence southerly through Robeson's Channel, Kennedy Channel, Smith Sound, Baffin Bay and Davis Strait to the beginning.

3. The District of Yukon, to include the region marked off by the northern boundary of British Columbia, the eastern boundary of Alaska, the Arctic Ocean and a line drawn from the westerly mouth of the Mackenzie River, due south parallel to the Mackenzie River to the range of mountains, striking them at their intersection with the 136th Meridian; thence south along the range to the Liard River at the British Columbian boundary.

4. The District of Mackenzie including the territory south of the Arctic Ocean and north of British Columbia and Athabasca, as extended to the 110th Meridian, a line along which to the southern line of Franklin constitutes the eastern boundary.

The same report recommends that there be added to the District of Athabasca the region north of Saskatchewan to the 100th meridian; thence north along the 100th Meridian to the southern boundary of Mackenzie.

The District of Mackenzie has an area approximately of 538,000 square miles, the District of Yukon an approximate area of 225,000 square miles, and the extended District of Athabasca an area of 265,000.

141. For the purpose of comparison, the areas of other portions of the British Empire and foreign countries are here given.

For convenience, the population and density of population are also given.

Every race and every religion are represented in the British Empire. E. G. Ravenstein says: "Of Europeans there are about 50,000,000. There are 54,865,000 Christians; 83,283,000 Mohammedans; 232,646,000 Buddhists, Hindus and Confucians, and 31,570,000 heathen in the Empire." Ravenstein makes the population of the Empire over 402,000,000.

The figures in this table, with the exception of Canada, have been taken from the Statesman's Year-Book, 1896.

142. Prince Edward Island is the smallest of all the provinces, but is more than twice as thickly populated as any other province, the proportion being 54·5 persons to the square mile. Nova Scotia comes next in density of population with 22·0 persons. The following is the order in which the provinces stand, according to density of population, as ascertained by the census of 1891 :—

## DENSITY OF POPULATION IN CANADA.

Canada.....	15.		

143. Reference to the tables in paragraph 141 will show that the area of Great Britain and Ireland is 19,887 square miles less than the combined area of the inland water surface of Canada, as given in paragraph 140.

144. The principal physical features of Canada are the Rocky Mountains and the Laurentian Range, the plains of the North-west Territories and the great inland lakes.

145. The great inland lakes, five in number, and remarkable for their size, form a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,384 miles. Lake Superior is connected with Lake Huron by the Ste. Marie River and the United States and Canadian Sault Ste. Marie Canals. Lake Huron flows into Lake Ste. Claire by the Ste. Claire River, and Lake Ste. Claire into Lake Erie by the Detroit River. Lake Erie flows into Lake Ontario by the Niagara River, fourteen miles from the mouth of which are the renowned Niagara Falls, 160 feet in height. The two lakes are connected for the purpose of navigation by the Welland Canal. The St. Lawrence River, flowing out of Lake Ontario into the Gulf of St. Lawrence, forms the outlet of this system.

146. The other principal lakes are: In Ontario, the Lake of the Woods (1,500 square Miles), Lakes Nepigon, Nipissing and Simcoe, the Muskoka Lakes—Muskoka, Rosseau, Joseph and the Lake of Bays—and the lakes in Victoria, Peterboro' and Haliburton, famed summer resorts. In Quebec, Lake Temiscamingue, which is on the borders of Ontario and Quebec, Lake St. John, Grand Lake and Lake Mistassini; and in the Territories and Manitoba, Lake Great Bear, 11,200 square miles; Great Slave, 10,100 square miles; Athabaska, 4,400 square miles; Winnipeg, 260 miles long, 65 miles broad, 710 feet above the sea, and an area of 9,400 square miles; Winnipegosis, 130 miles long, 27 miles broad, 828 feet above the sea, and an area of 2,030 square miles, and Manitoba, length 122 miles, breadth 24 miles, elevation above sea 809 feet, and an area of 1,900 square miles.

147. The principal mountains are the Rocky Mountains in the west, which extend from the Arctic Ocean to the United States, and contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet; Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet, while there are several others of nearly the same height. The Canadian Pacific Railway crosses this range through the Kicking Horse Pass at an altitude of 5,300 feet above the sea. West of the Rocky Mountains, and between them and the Pacific Ocean, are the Cascade Mountains which run parallel to the coast from the Fraser River to Alaska, and in some places are as high as 10,000 feet. The other ranges of any size are: The Laurentian range, which extends from Labrador along the north of the St. Lawrence, and is upwards of 2,000 miles in length; the Notre Dame Mountains in Quebec, on the south shore of the St. Lawrence, and the North and South Mountains and the Cobequid Mountains in Nova Scotia.

148. The principal rivers are: In the Territories and Manitoba, the Mackenzie River, over 2,400 miles in length; the Copper Mine and Great Fish Rivers, which flow into the Arctic Ocean; the Saskatchewan River and Red River, with its tributary the Assiniboina, which flow into Lake Winnipeg, discharging thence through the Nelson River and the Churchill, Severn, Tyrrell and Albany Rivers, which flow into Hudson Bay. In Ontario and Quebec the St. Lawrence with its tributaries, the Ottawa, the St. Maurice, Richelieu and Saguenay. In New Brunswick the St. John, Restigouche and Miramichi Rivers; and, in British Columbia, the Fraser River, which flows into the Gulf of Georgia; the Peace River, which rises

in that province and flows into the Mackenzie River, and the Columbia River, over 1,200 miles in length, which flows through the United States into the Pacific Ocean.

149. The coast line of Canada may be divided into (1) the Atlantic, (2) the Hudson Bay, (3) the Arctic and (4) the Pacific Coasts.

From the mouth of the Ste. Croix River, latitude 45, longitude 67, to Cape Chudleigh, 60° 14' north latitude, 65° 25' west longitude, at the entrance of Hudson Strait, the Atlantic sea-board of Canada abounds in deep indentations forming magnificent harbours and sheltered bays, teeming with the finest descriptions of fishes and presenting a shore line of probably more than 10,000 miles in length.

150. The Bay of Fundy, 170 miles long and from 30 to 50 miles wide, with its prolongations, Chignecto Channel and the Basin of Minas, nearly separates the Provinces of New Brunswick and Nova Scotia, the connecting Isthmus of Chignecto being about 15 miles wide. The Bay of Fundy is characterized by its rushing tides causing a rise and fall of water from 20 to 70 feet. Its southern shore from Cape Blomidon to Brier Island is formed by the North Mountains, against whose precipitous slope of black basaltic rock, from 300 to 600 feet high, the tide strikes with great fury. The Digby Gut, a narrow passage barely 700 yards in width, affords ingress to the Annapolis Basin, on whose waters for nearly two centuries the ships of France and Great Britain warred for supremacy. On the north-west are the harbours of St. John and Lepreaux. At the east end is the harbour of Windsor. Along the ocean front, from St. Mary's Bay on the south-west to the Strait of Canso, the coast is a series of pockets, all excellent harbours, easy of access and well sheltered. At Halifax the Imperial Government have established the great naval base of the British Empire on the Atlantic Coast; and the Dominion authorities have constituted it the Atlantic winter port of Canada. The harbour is one of the finest on the Continent of America, and is capable of holding the 436 war vessels of all kinds, battle ships, port defence vessels, cruisers of the 1st, 2nd and 3rd classes and torpedo craft, which form the naval strength of the Empire.

To the south-west of Halifax are the harbours of Margaret's Bay, Chester Bay, Lunenburg, Liverpool, Shelburne and Yarmouth; and to the north-east are Torbay (where most of the cable lines between Europe and this continent are brought to land), Whitehaven, Canso, Chedabucto Bay, and many other good ship harbours. In the Island of Cape Breton are numerous fine harbours, among them Sydney and Louisbourg, the former the chief shipping port for the well-known coal mines, and the latter at one time the western stronghold of the great semicircle of forts which the military genius of France conceived and, to a considerable extent, executed in its magnificent effort to make a New France on this continent, including the country between the eastern side of Newfoundland and the western shore of the Gulf of Mexico, with the vast regions enclosed in the semicircumference embracing the great lakes and the St. Lawrence River.

In Cape Breton is the beautiful Bras d'Or, an almost tideless, salt water lake, penetrating, with numerous bays, channels and straits, upwards of 50

miles into the island. An island divides the entrance into two passages. The southern passage is 25 miles long and from a quarter of a mile to three miles wide, but is not navigable for large ships. The northern is about the same length and from two to three miles in breadth, with sixty fathoms of water. It is connected with St. Peter's Bay by a ship canal. Along the Gulf coast of Canada are Pictou and New Glasgow, the shipping ports for the Great Pictou coal basin; Shediac, one of the terminal points of the Intercolonial Railway; the Miramichi River noted, for its export of wood; the Baie des Chaleurs, 90 miles long, and from 15 to 20 miles wide, and everywhere deep and well sheltered; Gaspé Basin, and other well known ports.

On the Labrador Coast and about 250 miles from the Straits of Belleisle is the great indent called Hamilton inlet, which away back in the "forties," was brought to the notice of the British public as a possible convict establishment for the United Kingdom. The convicts, it was suggested, could be employed in building a transcontinental railway from Hamilton Inlet to Burrard Inlet on the Pacific Coast. Hamilton Inlet at its entrance is about 30 miles wide; about 50 miles from the sea it is reduced to a mile in width, after which it again expands, and 90 miles from the sea forms a magnificent salt water lake, upwards of 20 miles wide and 30 in length, open to navigation all the year round. Including two large arms, the surface covered by its waters is about 1,700 square miles.

Between Hamilton Inlet and Cape Chudleigh are numerous good harbours, on some of which Moravian Missionary settlements have been founded.

151. Hudson Bay is a large inland sea, sometimes termed "the Mediterranean of America." Its area, however, is only 350,000 square miles, or a little over one-third that of the Mediterranean Sea. It consists of the bay proper and two large arms, that of Fox Channel to the north, and that of James Bay to the south. Including its two arms, Hudson Bay has an extreme length north and south of about 1,300 miles and a width across the bay proper of about 600 miles.

Considerable information has been gathered respecting Hudson Bay, and among the sources of information may be mentioned Henry Yule Hinds' paper on Central British America, read before the Royal Statistical Society, 1864; the same explorer's evidence before the Canadian Committee on Immigration and Colonization, 1878; Col. Dennis' Navigation of Hudson Bay, 1878; the reports of the Geological Survey; Lieut. Gordon's reports of 1884, 1886 and 1886. (The first report is appendix 29 to the report of the Department of Marine for 1885. The others are Sessional papers, 11c of 1886, and 15b of 1887.) Mr. Hind's statement before the Parliamentary Committee contains a large amount of information garnered from statement of observers of an earlier date than the ones mentioned.

There are two entrances into Hudson Bay, Frobisher's Strait, the northern one, and Hudson Strait, the southerly—the Island of Meta Incognita forming the separating land. At Ungava Bay, an indent of Hudson Strait the tide rises and falls about 40 feet, and two large rivers empty into it. North of Hudson Strait is the Arctic Archipelago, which includes Grinnell and Ellesmere Lands, North Devon, the Percy Islands, Banks Land, Prince Albert Land, Victoria Land, King William's Land, Prince of

Wales' Land, North Somerset, Cumberland Island, Cockburn Island and Southampton Island. These were all transferred to Canada by Imperial Order in Council, 1880. Besides the rivers mentioned in paragraph 148, the following rivers fall into Hudson Bay, the Whale, the Koksoak (into Ungava Bay), the Dubaunt (into Chesterfield Inlet), the Seal, North, Nelson, Hayes, Weenisk, Trout, Equan, Attawapiskat (on the west shore), the Moose, Missinaibi, Oggotika, Mattagami, Abittibe (at the south end), the Harrikanaw, Notaway, Rupert, East Main, Big, Great Whale, Nastapauka, Langlands, &c., &c. The Tyrrell Expedition of 1893 discovered a river described to be as large as the Ottawa and 900 miles long, north of the Dubaunt. The Hudson's Bay Company have several stations on the bay and their ships have made annual visits to it for two hundred years.

152. The Arctic Coast is but little known. The North Polar Sea has been the aim and ultimate object of many explorations. The mainland of Canada, bordering on that sea, stretches from Fox Channel to the Alaskan boundary, a distance of 1,000 miles. The coast line follows the 70th parallel, with several peninsulas, like Boothia, protruding beyond.

The principal bays on the coast are Great Fish Bay, Boothia Gulf, McLaughlin, Coronation, Darnley, Franklin, Erskine Sound and Mackenzie Bay at the mouth of the Mackenzie River.

Near Franklin Bay and midway between Coppermine and Mackenzie Rivers is Cape Bathurst in latitude 70° 30' north. From that cape to Point Barron, the most northerly part of Alaska, there is open water for three months in the summer. This is the great whaling region of Canada, and in the valuable Canadian Arctic harbour in Herschel Island, west of the Mackenzie River, whalers winter so as to be ready in the early spring when the pack ice breaks up.

In the summer of 1893 the Eskimo at the mouth of Mackenzie River killed over fifty white whales. Two whalers captured over fifty, each yielding an average of 1,800 pounds of whalebone. Seven vessels wintered at Herschel Island in the winter of 1893-94.

153. The coast line of British Columbia is stated, in a sessional paper of 1880, to be 7,181 miles in length, some of the inlets penetrating upwards of fifty miles inland. From the southern boundary line the coast is broken into a maize of inlets, and fringed by countless islands of greater or less extent. Along the whole coast line a perfect labyrinth of islands exists giving innumerable sheltered roadsteads and channels teeming with fish.

In Esquimault, Victoria, Burrard Inlet, Nanaimo, and many other points are splendid harbours, Esquimault being to Great Britain on the Pacific Coast what Halifax is on the Atlantic—the second great naval basis of the Empire on this continent.

154. The largest islands in Canada are : On the west Queen Charlotte and Vancouver islands. The latter about 300 miles in length, with an area of 20,000 square miles, contains Victoria, the capital of British Columbia. On the east Prince Edward Island, which forms the province of that name ; Cape Breton, which is part of the Province of Nova Scotia, being separated from the mainland by the Strait of Canso ; and Anticosti, in the Gulf of St.

Lawrence, on which the Dominion Government have important signal and wrecking stations. A great network of islands, the limits of which have not been well defined, extends along the entire north coast of Canada. These islands form the Arctic Archipelago already referred to.

155. As the area of Canada is great, its general physical features and its soil and climate vary very much in character. The whole of the eastern part of Canada, from the Atlantic to the north-west boundaries of Ontario, was at one time a vast forest, still in many places very heavily wooded. Fuller particulars of the forest wealth of Canada are given in Chapter V.

156. Between the northern boundary of Ontario and the Rocky Mountains lie the Province of Manitoba and the southern part of the North-west Territories. This great tract of land is remarkable for its division, along lines running generally north-west and south-east, into three distinct prairie steppes, or plateaux. The first of these is known as the Red River Valley and Lake Winnipeg Plateau. The width at the boundary line is about 52 miles, and the average height about 800 feet above the sea; at the boundary line the height is about 1,000 feet. The first plateau lies entirely within the Province of Manitoba, and is estimated to contain about 7,000 square miles of the best wheat-growing land in the world. The second plateau or steppe has an average altitude of 1,600 feet having a width of about 250 miles on the International Boundary line; and an area of about 105,000 square miles of rich, undulating park-like country lies in this region. This section is specially favourable for settlement, and includes the Assiniboine and Qu'Appelle districts. The third plateau or steppe begins on the boundary line at the 104th meridian, with an elevation of about 2,000 feet, and extends west for 465 miles to the foot of the Rocky Mountains, where it has an altitude of about 4,200 feet, making an average height above the sea of about 3,000 feet. The three plateaux, though varying considerably in character, are all most favourably adapted for agricultural pursuits, including dairying and stock-raising. Numerous and prosperous homesteads and cattle ranches have been established.

157. The northern part of the centre of the Dominion, extending from the Rocky Mountains to Hudson Bay, is very extensively wooded, and has generally been considered for the most part unfit for settlement, and only useful as a preserve for fur-bearing animals. But during the session of Parliament of 1888 a committee of the Senate held an investigation into the capabilities of these regions, the result being that all previous ideas were upset. The area inquired into was about 1,260,000 square miles, and of these it was estimated 860,000 square miles were suitable, and about 400,000 square miles useless, for cultivation; 656,000 square miles were fitted for potatoes, 407,000 square miles for barley, and 316,000 square miles for wheat. There is a river navigation of about 2,750 miles, 1,390 miles being navigable with stern wheel steamers and 1,360 miles with light draught sea-going steamers. There are large deposits of gold, silver, iron, zinc, ochre, brick and pottery clay, mica gypsum, lime and sandstone, and the petroleum area is so extensive as to justify the belief that eventually supply the larger part of this continent." Peltry are at pre

sent the chief commercial products of this last great fur reserve of wild animals, and in view of the danger of the extinction of the animals whose furs are fashionable, the committee suggested that districts should be leased by the Government, and a limitation placed on the take of certain kinds of skins. The lakes and rivers abound in fish, especially whitefish and lake trout. The committee pointed out that the valuable whale fisheries of the northern coasts of Canada were in danger of speedy destruction from foreign whalers, and proposed that the Government should adopt measures for their protection. The climate of this region in some places resembles that of Western Ontario.

158. Subjoined is a list of the collections of furs sold by the Hudson's Bay Company in London. They are the largest collector throughout the country and this list shows the value of this region :—

STATEMENT OF THE NUMBER OF FURS AND SKINS SOLD BY THE HUDSONS' BAY COMPANY, LONDON, IN EACH YEAR FROM 1887 TO 1895, INCLUSIVE (COLLECTED IN CANADA IN EACH PREVIOUS YEAR).

159. The Province of British Columbia occupies the mountainous district extending to the Pacific Ocean from the western edge of the prairie country east of the Rocky Mountains. The general surface of the country is broken, consisting of short ranges, detached groups of mountains, elevated plateaux and many valleys of various extent. Timber, minerals of unknown value and apparently an inexhaustible supply of fish are the principal natural sources of its wealth, but as the climate is delightful and extremely favourable for rapid growth, agriculture is making great progress.

160. There is probably more misconception about the climate in Canada than about that of any other known country. —————certained by many

persons in Europe and elsewhere being that perpetual winter reigns. In reality the climate of Canada is dry, healthy and invigorating, and owing to the great area of the country, extending over 20 degrees of latitude, or from the latitude of Constantinople to the North Pole, has a wide range of temperature. The extreme dryness of the atmosphere, however, makes both cold and heat less acutely felt than the readings of the thermometer would lead people to expect. In the Maritime Provinces the climate somewhat resembles that of the British Isles; in Ontario, Quebec and Manitoba the summers are warm and the winters cold, but the cold is pleasant and bracing, and the snow is of the greatest benefit alike to the farmer, the lumberman and the merchant. In the North-west Territories cattle graze at large through the winter months, and on the Pacific slope, west of the Rocky Mountains, the climate is milder than in any other part of the Dominion.

161. The Dominion is so vast that one part may be charged with perpetual snow while the other is bathed in almost perennial heat and sunshine. One part receives the cold atmosphere of the "Frozen Sea"; another the humid air of the Atlantic; another the mild, genial breezes of the Pacific, and still a fourth has the surface of its soil baked by the heat of tropical waters. In the extreme northern parts vegetation is so stunted that the highest tree is not as tall as a two-year old child; in the southern parts vegetation is so luxuriant that fruits and flowers grow with as much vigour as in Italy or the south of France.

162. Instead of "six months' winter and six months' cold weather" being the normal condition, the fact is that the average winter is about four and a half months, and though the spring may begin two or three weeks later than in England, the conditions for rapid growth—warm sunshine and rain—are so favourable that the crops of the two countries are about equally advanced by the middle of July. As the country has become better known, it is beginning to be understood that the winters, though at times severe are healthy and enjoyable, while the summer weather is not surpassed in the most favoured parts of Europe. That the climate is superior to that of England is admitted by all who have had experience of both; and it is a well recognized fact that a sharp, cold winter, with plenty of snow, is by far the healthiest, as well as the most advantageous to business of every kind while a mild winter is detrimental alike to health and business. The marine currents are singularly favourable to Canada; along the Atlantic Coast the Gulf stream exerts an influence so beneficial that on Sable Island are troops of wild ponies, whose progenitors, two centuries ago, were shipwrecked and cast upon the island, where there successive generations, without shelter of any kind, have lived and multiplied. Along the Canadian shores of the Pacific Ocean the Japanese current produces the same effect on the climate as the Gulf stream does in England. Vancouver Island is like the south of England, except that it has a greater summer heat, with less humidity. In the vicinity of Victoria the highest temperature in the shade in July and August ranges from 80° to 90° Fabr., while in winter there are rarely less than ten degrees of frost.

163. The following table, giving the dates of closing and opening of navigation at Montreal and Toronto during the last twenty-two years affords the best evidence of the actual length of the winter in the central provinces.

CLOSING AND OPENING OF NAVIGATION AT MONTREAL AND TORONTO  
IN THE YEARS 1870 TO 1895, INCLUSIVE.

YEAR.	MONTREAL.		TORONTO.

1894-95.....	" 25....	" 27.....	" 9....	April 7.

These dates do not represent the actual length of the open season, since, both at the beginning and at the end of the season, time has to be allowed for vessels to arrive and take advantage of the "clear" channel in spring, and to depart for winter quarters in the autumn.

164. The following table obtained from the Director of the Meteorological Service, gives the latitude, longitude and elevation above the sea of places in the Dominion, and also the mean summer and winter temperature to 1895. The summer temperatures are taken from the months of July, August and September, and those of the winter from January, February and March :—

\* Any average rain or snow for British Columbia is misleading. The various parts of the province seem to have an amount of precipitation dependent on the position of the particular locality. As far as can be ascertained the following division may convey a somewhat definite idea.

168. The following table gives statistics of the temperature and precipitation at the principal cities of Canada for the calendar year 1894 :—

Statistics of the Temperature and Precipitation at the Principal Cities in Canada for the year 1894.

the seasons in the various parts of the Dominion ; with this object printed a few days after the close of the month and contains notes of leafing and flowering of trees and shrubs, the arrival of birds, state of &c. It is satisfactory, as a sign of the intellectual development of the people of Canada, to learn from the Director's Report that "much interest is taken in this map by the public in general and voluntary observations have been so stimulated to increased work that we are now receiving an accumulation of climatological and meteorological data as was never attainable of great value in the event of a work on the climatology of the Dominion being deemed advisable."

## CHAPTER IV.

Lands of Canada.—Dominion Lands.—Synopsis of Dominion Lands Regulations.—  
Provincial Lands.—Railway Lands.

173. There is a very large area of land throughout Canada available for settlement, either for agricultural or for mining purposes, the disposition of which is in the hands of the Dominion Government and of the several Provincial Governments, according to situation. These lands are known generally as "Crown Lands."

174. The Crown Lands of the Dominion, commonly called Dominion Lands, are situated in Manitoba, the Territories, and in what is known as the Railway Belt in British Columbia, and comprises some of the finest agricultural lands on the continent. In order to provide every facility for information to immigrants and settlers, the Commissioner of Dominion Lands has his office in Winnipeg, and a number of land agencies are situated at the most convenient points, where the fullest details can be obtained.

175. Under an Order in Council passed 25th November, 1885, a large tract of land, inclosing the Hot Mineral Springs at Banff, N.W.T., was reserved and set apart as a National Park, to be known as "Rocky Mountains Park." Under an Order in Council passed 10th October, 1886, certain other reservations in the Rocky Mountains were also made for park purposes. Since the reservation, a number of improvements have been made in the Rocky Mountains Park, roads having been made and bridges built, besides alterations at the Hot Springs for the convenience of visitors and bathers. Still further improvements and repairs were made in 1894, the sum of \$4,453 having been expended. The number of visitors during the years 1894 to the Cave and Basin was 2,632 as compared with 3,784 in 1893, the decrease being attributable to the interruption to railway travel caused by the floods which occurred during the months of June and July. Among those who registered their names at the springs were 1,474 Canadian, 680 persons from the United States, and 342 from the United Kingdom.

176. The following are the comparative figures for the last eight years of transactions in Dominion Lands. The pre-emption system was terminated on 1st January, 1890.

	1888.	1889.	1890.	1891.	1892.	1893.	Depart- mental Year, 1894.	Calen- dar Year, 1894.	10 mo's ending 28th Oct., '95.

181. The total net revenue for the year ended 30th June, 1895, in receipts from timber dues, grazing, hay, and mineral lands, was \$14 being a decrease as compared with 1894 of \$46,908.

182. The above figures relate to the fiscal year only, and the following figures give the total revenue for the departmental years ended 31st October 1889 to 1895 :—

—	1889.	1890.	1891.	1892.	1893.	1894.
	\$	\$	\$	\$	\$	\$
Gross revenue in cash .....	232,854	241,203	276,107	340,027	303,551	195,308

Total .....	551,410	508,966	433,655	465,230	392,325	239,200

183. The total receipts on account of Dominion Lands under the various heads, from 1st July, 1872, to 30th June, 1895, have been :—

Homestead fees .....	\$ 645,810
Pre-emption .....	206,741
Sales .....	5,838,490
Timber, grazing and mineral .....	1,653,509
Colonization .....	887,923
Miscellaneous .....	528,236
	<u>\$ 9,763,708</u>
Less—Refunds .....	202,757
	<u>\$ 9,560,951</u>

184. The total area set out for settlement in each year since 1874 is given below :—

#### AREA SET OUT FOR SETTLEMENT.

YEAR.	Acres.	No. of Acres
Previous to June, 1873 .....	4,792,392	
In 1874 .....	4,237,864	
1875 .....	665,000	
1876 .....	420,507	
1877 .....	231,691	
1878 .....	306,936	
1879 .....	1,130,482	
1880 .....	4,472,000	
1881 .....	8,147,000	
1882 .....	10,186,000	
1883 .....	27,234,000	
.....	6,435,000	
.....	391,680	
.....	1,379,010	

AREA SET OUT FOR SETTLEMENT—*Concluded.*

YEAR.	Acres.	Number of Farms of 160 acres each.
In 1887 .....	643,710	4,023
1888 .....	1,131,840	7,074
1889 .....	516,968	3,231
1890 .....	817,075	5,106
1891 .....	76,560	476
1892 .....	1,395,200	8,720
1893 .....	2,928,640	18,304
1894 .....	300,240	1,876
1895 .....	406,240	2,539
Total .....	78,245,935	489,033

At the rate of five to a homestead of 160 acres, these lands would sustain an agricultural population of 2,432,470 souls.

185. The returns of the land sales by the principal railway and land companies in Manitoba and the North-west afford a not untrustworthy indication of the progress of settlement; for, while a certain percentage of the purchases will always be found to be of a speculative nature, the larger proportion are for purposes of settlement and cultivation. In 1894 the quantity of land sold by the Canadian Pacific Railway Company was 43,155 acres, the amount realized having been \$131,628, being at the rate of \$3.05 per acre. The Hudson's Bay Company sold 4,427 acres for \$23,209, at \$5.24 per acre. This company also sold town lots to the value of \$37,324. The Calgary and Edmonton Land Company sold 13,072 acres in 1892 for \$44,998, an average of \$3.44 per acre. The three companies, therefore, sold a total of 114,164 acres for \$391,143, being an average price of \$3.43 per acre.

186. The number of homestead entries made during the first ten months of the year was 2,114, representing 6,147 souls and 338,240 acres of land. The entries were made by 909 Canadians, 529 from the United States (97 of whom were returned Canadians), 360 from the United Kingdom, 81 French, 44 German, 46 Austro-Hungarians, 67 Russians (other than Mennonites), 20 Swedes and 15 Icelanders. The net addition to the population of Manitoba and the North-west by the above entries was 6,147, but of course the number of souls, represented by the 382 entries made by persons from other parts of Canada, was no addition to the population of the Dominion. The various immigration agents report that the demand for farm servants and female help continues to increase, and that the present supply is inadequate to meet it. Government agents all over the Dominion report, more or less, to the same effect. Farm labourers, female domestics and farm servants may emigrate with confidence that they will find situations on arrival. Mechanics are not wanted, the local supply being in excess of the demand. The practice of granting assisted passages

to immigrants was discontinued in 1888. Money bonuses to settlers have also been abolished.

187. In the Session of 1894 an act was passed entitled the "North-west Irrigation Act." This act has been so framed as to provide for careful supervision by the Government of the first distribution, and the subsequent supervision of the available water supply in the arid region. Some of the provisions under which the control is to be exercised are departures from the methods heretofore adopted on this continent, but those best qualified to judge speak of the system adopted as calculated to establish irrigation enterprises upon a sound basis.

At the close of the season of 1895 there were 121 irrigation ditches and canals in operation in southern Alberta and western Assiniboia, while two incorporated companies had extensive systems under construction. The results which have followed have been most encouraging. There is now no reason to doubt that through irrigation a large portion of Assiniboia and Alberta will be rendered fruitful every year and the element of uncertainty caused by variations in the rainfall altogether eliminated from the calculations of those engaged in extensive agricultural operations.

188. The Provincial Crown Lands are situated within the limits of the several provinces, and are controlled by the respective governments, from whom particulars of transactions concerning them can always be obtained. Summaries of the regulations for the disposition of Dominion Lands, Provincial Crown Lands and the lands belonging to the principal Railway Companies who have received land subsidies in Manitoba and the North-west Territories are given below.

189. Under the Dominion Lands Regulations, all surveyed even-numbered sections (excepting 8 and 26) in Manitoba and the North-west Territories, which have not been homesteaded, reserved to provide wood lots for settlers, or otherwise disposed of or reserved, are to be held exclusively for homesteads.

1. Homestead Entry for one quarter-section (160 acres) of surveyed agricultural land, open to such entry, may be obtained by any person who is the sole head of a family, or by any male who has attained the age of eighteen years, on application to the local agent of Dominion Lands, and on payment of an office fee of \$10.

The homesteader must perfect his entry by beginning actual residence on his homestead, and cultivation of a reasonable portion thereof, within six months from the date of entry, unless entry shall have been made on or after the first day of September, in which case residence need not commence until the first day of June following, and continue to live upon and cultivate the land for at least six months out of every twelve months for three years from date of perfecting the homestead entry.

In the event of a homesteader desiring to secure his patent within a shorter period than the three years provided by law, he will be permitted to purchase his homestead at the Government price at the time of entry, on furnishing proof that he has resided on the land for at least twelve months from the date of his perfecting his homestead entry, and that he has brought at least thirty acres thereof under cultivation.

2. In connection with his homestead entry, the settler may also purchase, subject to the approval of the Minister of the Interior, the quarter-section of the same section, if available, adjoining his homestead, at the Government price, which is at the present time \$3 per acre; one-fourth of the purchase money to be in cash, and the balance in three equal annual instalments bearing interest at 6 per cent per annum.

3. The Government make no advances of money to settlers, but for the better encouragement of *bona fide* settlement, in cases where any person or company is desirous of assisting intending settlers, when the sanction of the Minister of the Interior to the advance has been obtained, the settler has power to create a charge upon his homestead for a sum not exceeding six hundred dollars, and interest not exceeding 8 per cent per annum, provided that particulars of how such an advance has been expended for his benefit be first furnished to and acknowledged by the settler and verified by the local agent, homestead inspector, or other agent appointed by the Minister of the Interior; or if the charge be made previous to the advance, then such charge shall only operate to the extent certified to by the local agent, homestead inspector or other agent, as having been actually advanced to or expended for the benefit of the settler. The advance may be devoted to paying the cost of the passage of the settler, paying for the homestead entry, providing for the subsistence of the settler and his family, to erecting and insuring buildings on the homestead, and to breaking land and providing horses, cattle, furniture, farm implements, seed grain, &c.

For the further protection of the settler it is provided that the time for payment of the first instalment of interest on any such advance shall not be earlier than the 1st November in any year, and shall not be within less than two years from the establishment of the settler upon the homestead, and also that the settler shall not be bound to pay the capital of such advance within a less period than four years from the date of his establishment on the homestead.

4. The odd-numbered sections are at present reserved for the purpose of being granted as land subsidies in aid of the construction of colonization railways in Manitoba and the North-west Territories, except in special cases otherwise ordered by the Minister of the Interior.

5. Payments for land may be made in cash or by such scrip as has been issued by the Department of the Interior for that purpose.

6. A homestead settler, whose land is destitute of timber, may, upon payment of an office fee of 25 cents, procure from the Crown Timber Agent a permit to cut the following quantities of timber free of dues: 30 cords of dry wood, 1,800 lineal feet of building timber, 2,000 poplar fence rails and 400 roof poles. Any settler may obtain a permit, on payment of the same fee, to cut burnt or fallen timber of a diameter up to 7 inches, inclusive, for fuel or fencing, for his own use.

In cases where there is timbered land in the vicinity available for the purpose, the homestead settler, whose land is without timber, may purchase a wood lot, not exceeding in area twenty acres, at the price of \$5 per acre cash.

7. Licenses or permits to cut timber on surveyed or unsurveyed lands are granted, after competition, to the highest tenderer.

8. The price per acre for Coal Lands is : for land containing lignite or bituminous coal, \$10, and for anthracite coal, \$20. The land may be sold by public competition or to the applicant.

When two or more parties apply to purchase the same land, tenders may be invited between the applicants, or it may be sold by public competition, by tender or auction, as may be deemed expedient, at the upset price of coal lands.

9. Leases of Grazing Lands in Manitoba and the North-west Territories and within the railway belt in British Columbia may be granted. Leases shall be for a period of not exceeding twenty-one years, and no single lease shall cover a greater area than 100,000 acres.

The lessee is obliged, within each of the three years from the date of granting the lease, to place upon his leasehold not less than one-third of the whole amount of Stock which is required to place upon the tract leased, namely, one head of Cattle for every twenty acres of land covered by the lease, and shall, during the rest of the term, maintain cattle thereon in that proportion.

After placing the prescribed number of Cattle upon his leasehold, the lessee may purchase land within the tract leased for a home, a farm or corral.

Any portion of the land forming a Grazing Tract authorized to be leased subsequent to the 12th January, 1886, unless otherwise provided in any lease thereof, is open for homestead or purchase from Government at the price obtaining in the class in which the lands are situated ; and in the event of such settlement or sale, the lease (if any) to be void in respect of such lands so entered or purchased.

10. Any person may explore vacant Dominion Lands not appropriated or reserved by the Government for other purposes, and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a Mining Location for the same, but no mining location shall be granted until the discovery of the vein, lode or deposit of mineral or metal within the limits of the location or claim.

On discovering a mineral deposit any person may obtain a mining location upon marking out his location on the ground, in accordance with the regulations in that behalf, and filing with the Agent of Dominion Lands for the district, within sixty days from discovery, an affidavit in form prescribed by mining regulations, and paying at the same time an office fee of \$5, which will entitle the person so recording his claim to enter on the land and work it for one year.

At any time before the expiration of five years from the date of recording his claim, the claimant may, upon filing proof with the local agent that he has expended \$500 in actual mining operations on the claim, and by paying to the local agent therefor \$5 per acre cash, and a further sum of \$50 to cover the cost of survey, obtain a patent for said claim, as provided in the said mining regulations. (*See also Chap. XI.*)

11. On the 3rd April, 1889, judgment was given by the Judicial Committee of the Privy Council, declaring that the right to administer the minerals within the railway belt in British Columbia was vested in the government of that province. In order to dispose of the anomalous condition of affairs that consequently arose, viz., that the jurisdiction over the

lands was vested in the Dominion Government, and the right to administer the minerals in that of the province, the following arrangement, ratified by Order in Council of 23th February, 1890, was agreed upon between the two governments :—

No disposition of lands containing minerals (except coal lands) shall be made by the Dominion Government, other than by patent in fee simple, thereby bringing the minerals at once under the administration of the provincial mining laws.

All lands containing minerals (except coal lands and Indian reserves) offered for sale by the Dominion Government, shall be open for purchase by the Provincial Government at the price of \$5 per acre.

Any lands sought to be acquired by the Provincial Government under the last clause shall be set apart from alienation by the Dominion, upon the Provincial Government making a written application for the same. Such lands to be surveyed (if not already done) by a Dominion Land surveyor, at the expense of the Provincial Government.

Nothing in the agreement shall apply to Coal Lands.

The agreement may be terminated at any time by either government.

All minerals, including gold and silver, within Indian reserves, shall be administered by the Department of Indian Affairs.

190. With respect to the lands of the Province of Ontario, any head of a family, whether male or sole female, having children under eighteen years of age, can obtain a grant of 200 acres; and a single man over eighteen years of age, or a married man having no children under eighteen residing with him, can obtain a grant of 100 acres. These lands are mostly covered with forest, and are situate in the northern and north-western parts of the province.

Such a person may also purchase an additional 100 acres at 50 cents per acre, cash. The settlement duties are: to have 15 acres on each grant cleared and under crop at the end of the first five years, of which at least 2 acres are to be cleared annually; to build a habitable house, at least 16 feet by 20 feet in size; and to reside on the land at least six months in each year.

In the Rainy River district to the west of Lake Superior, consisting of well-watered, uncleared land, free grants are made of 160 acres to a head of a family having children under eighteen years of age residing with him (or her), and 120 acres to a single man over eighteen, or to a married man not having children under eighteen residing with him; each person obtaining a free grant to have the privilege of purchasing 80 acres additional, at the rate of \$1 per acre, payable in four annual instalments. The settlement duties are the same as set out above excepting that only three years' residence is required. The soil of this district is a deep loam, and for an area of nearly a million acres is very fertile.

191. About 7,200,000 acres of land have been surveyed by the Government of Quebec for sale.

Lands purchased from the Government are to be paid for in the following manner: One-fifth of the purchase money is required to be paid the day of the sale, and the remainder in four equal yearly instalments, bearing

interest at 6 per cent. But the price at which the lands are sold is so low—from 20 cents to 60 cents per acre (15d. to 2s. 5½d. stg.)—that these conditions are not very burdensome.

The purchaser is required to take possession of the land sold within six months of the date of the sale, and to occupy it within two years. He must clear and have under crop, in the course of four years, ten acres for every hundred held by him, and erect a habitable house of the dimensions of at least 16 feet by 20 feet. The letters patent are issued free of charge.

The parts of the Province of Quebec now inviting colonization are the Lake St. John district, the valleys of the Saguenay, St. Maurice and the Ottawa rivers, the Eastern Townships, the Lower St. Lawrence, Lake Temiscamingue and Gaspé.

192. There are now in Nova Scotia about 1,500,000 acres of ungranted lands, a considerable quantity of which is barren and almost totally unfit for cultivation. Nearly all the best land has been sold or granted. The price of Crown Lands is \$40 (£8 stg.) per 100 acres.

193. The grants of land to the early settlers in this province contained no systematic reservation of minerals. In some instances gold, silver and precious stones only were reserved; in other cases the gold, silver, iron, copper, lead, &c., were retained for a source of revenue to the Crown. (For mining regulations *see* Chap. XI.)

The Act of Settlement releases to the owner of the soil all gypsum, limestones, fireclay, barytes, manganese, antimony, &c., and any of the reserved minerals whenever the reservation is not specified in the original grants.

194. It is estimated that there are about 7,000,000 acres of ungranted land in New Brunswick.

Crown Lands may be acquired for actual settlement as follows:—

1. Grants of 100 acres, by settlers over eighteen years of age, on conditions of improving the land to the extent of \$20 (£4) within three months; building a house 16 by 20 feet, and cultivating 2 acres within one year; and continuous residence and cultivation of 10 acres within three years.

2. One hundred acres are given to any settler over eighteen years of age who pays \$20 (£4) in cash, or does work on the public roads, &c., equal to \$10 (£2) per annum for three years. Within two years a house 16 by 20 feet must be built and 2 acres of land cleared. Continuous residence for three years from date of entry, and the cultivation of 10 acres in that time are required.

3. Single applications may be made for not more than 200 acres of Crown Lands without conditions of settlement. These are put up to public auction at an upset price of \$1 (4s. 2d.) per acre. Purchase money to be paid at once. Cost of survey to be paid by purchaser.

195. Any person being the head of a family, a widow or a single man over eighteen years of age, and a British subject, or an alien purposing to become a British subject, can pre-empt 160 acres of land belonging to British Columbia west of Cascade Mountains, or 320 acres east of these mountains, at \$1 per acre. Two months' leave of absence under the Land Act,

and an additional four months for sufficient cause, when applied for to the Chief Commissioner, can be had in each year till the Crown deed is obtained. A certificate of improvement showing that the claim has been improved to the extent of \$2.50 per acre is necessary before a Crown deed can be issued. Timber and hay lands may be leased from the Government. Timber lands pay a yearly rental of 10 cents per acre, and a royalty of 50 cents per 1,000 feet on all logs cut. Lease of land for other purposes may also be granted by the Lieutenant-Governor in Council.

196. There are about 45,000 acres of vacant Government land available in Prince Edward Island, consisting of forest lands of medium quality, and averaging in price about \$1 an acre. Intending settlers are allowed ten years to pay for their holdings, the purchase money bearing interest at 5 per cent, and being payable in ten annual instalments.

197. The Canadian Pacific Railway lands consist of the odd-numbered sections along the main line and branches, and in the Saskatchewan, Battle and Red Deer River districts. Lands in the province of Manitoba average in price from \$3 to \$6 an acre; in the district of Assiniboia, east of the 3rd meridian, \$3 to \$4 an acre, and west of the 3rd meridian, including most of the valuable lands in the Calgary district, \$3 an acre. Lands in the Saskatchewan, Battle and Red Deer River districts, \$3 an acre.

If paid for in full at time of purchase, a deed of conveyance of the land will be given; but the purchaser may pay one-tenth in cash and the balance in payments spread over nine years, with interest at 6 per cent per annum, payable at the end of the year with each instalment.

Liberal rates for settlers and their effects will be granted by the company over its railway.

198. The land grant of the Manitoba South-western Colonization Railway Company, only recently placed on the market, contains over 1,000,000 acres of land, well adapted for grain growing and mixed farming, in a belt 21 miles wide, immediately north of the international boundary, and from range 13 westward. The terms of purchase are the same as those of the Canadian Pacific Railway Company.

199. The Alberta Railway and Coal Company owns, in the district of Alberta in the North-west Territories, 300,000 acres of farming and grazing prairie lands. These are situated principally between the international boundary and Lethbridge, the site of the company's collieries.

The company have for sale blocks of land from 10,000 to 30,000 acres in extent, for grazing or colonization purposes. Full information and plans may be obtained from the company's offices at Lethbridge.

200. The Calgary and Edmonton Railway Company's land grant consists of about 1,900,000 acres of agricultural and ranching lands in Alberta, and a report on any section can be seen at the company's land office in Winnipeg.

The railway runs through the centre of the district in which the lands are situated, connecting with the Canadian Pacific Railway at Calgary.

At present the majority of the lands (within easy reach of the railway are offered at \$3.

Terms, one-tenth cash, and balance in nine equal yearly payments interest at 6 per cent.

201. The Qu'Appelle, Long Lake and Saskatchewan Railway Company's land grant consists of about 1,500,000 acres of good agricultural land in the Saskatchewan district, and a report on any section can be seen at the company's land office in Winnipeg.

The Qu'Appelle, Long Lake and Saskatchewan Railway runs through the district, connecting with the Canadian Pacific Railway at Regina.

At present the majority of the lands (within easy reach of the railway are offered at \$3 per acre. Terms, one-tenth cash, and balance in nine equal yearly payments, interest at 6 per cent.

## CHAPTER V.

Forest wealth.—Statistician's report.—Census of forest products.—Value of forest products.—Exports.—Wood pulp.—Industries using wood.—Timber leases in Crown Lands.—Cut on timber lands.—Receipts from licenses.—Areas of forest and wood land.—Forests of Europe.

302. The natural resources of Canada are her forests, her farms, her fisheries and her minerals.

303. The forest wealth of Canada has been made the subject of investigation, during the year 1893-94, by the Statistician of the Department of Agriculture, and a volume of over 300 pages has been published as an appendix to the Minister's report for 1894. (This report can be obtained from the Department of Agriculture or from the Queen's Printer, Ottawa.)

304. In his introductory remarks the Statistician says:—

"The influence of forests on climate, on agricultural operations, on river fisheries, on water communications, on the health of the people and on the general trade and industries of a country is so far reaching that an examination of the value of our forests branches out in many directions, all of immense importance.

"The important direct effects of forests are due to the products which they yield, the capital which they represent and the work which they provide.

"The mechanical effect of forests makes itself felt chiefly in regard to the distribution of the rain water; the preservation of the soil on sloping ground, the binding of moving sand, and the prevention of avalanches.

"In Canada, in the various industries depending for their existence upon the supply of wood, there is an invested capital not far from 100 million dollars and an annual wage list of over thirty (30) million dollars, with an output valued at over 110 million dollars.

"In addition there are the railways which are dependent on the wood supply for railway ties (1) and dimension timber, and in whose freights the lumber carried figures as nearly one-fifth of the total freight carried; the canals, of whose freights the products of the forest constitute two-fifths of the total freight carried; the mines, which require wood for shoring purposes;

(1.) Including sidings and double tracks we have about 18,590 miles of railway in Canada. As 3,000 ties to the mile the ties required number 55,770,000. Assuming the life of a tie to be seven (7) years the number needed every year is about eight (8) million for renewals, and allowing 200 miles for new roads every year a million more for this purpose or about nine (9) million ties a year. Supposing that 50 cubic feet of ties can be obtained from an acre of forest, it will be seen that 3,340,000 acres will be required to supply the consumption of young and thrifty trees needed for the 18,590 miles, and 530,000 acres for each year's demand.

the ships which, themselves made of wood, find in our exports (1) of the forest the materials for the full cargo, without which freight and rates on goods carried must be higher, nearly one-quarter of the exports of home production being products of the forest; the leather industry, which depends upon nature's supply of tannin secreted in the bark of trees; the lucifer match industries, those varied industries which depend in part upon wood, such as agricultural implements, edged tools, &c., and the practically new industry of pulp making, which within ten years has sprung up into an industry with nearly three million dollars of invested capital and over one million dollars of annual output.

205. "The value of forest products consumed per capita may be estimated approximately. The value of our forest products, calculated from the census returns of 1891, was \$80,071,415. For the fiscal year 1890-91 our imports of wood articles amounted to \$3,132,516, while for the same period our exports were \$27,707,547, leaving for consumption in Canada \$55,996,384, or a value of \$15.59 a head. With respect to the quantity used the census returns show an aggregate of 2,045,073,072 cubic feet as the total cut of the year. About 30 per cent of this is exported, leaving 1,431,551,150 cubic feet for the annual home consumption. This is equal to 296.2 cubic feet per head of the population. B. E. Fernow, chief of the Forestry division of the United States Department of Agriculture, estimates that the per capita consumption of the United States is about 350 cubic feet annually.

206. "Whether we consider the capital invested, the labour employed, and the varied uses to which wood is put in the enhancement of our comfort and convenience; or whether we consider the permanent interests of the timber trade, of the settlers in our new country, of the public revenue and of the country generally, we are forced to regard the forest as a precious heirloom to be deeply revered, properly used and, through careful maintenance, to be handed down to posterity improved and enriched.

"Looked at from the most enlarged point of view, the forests of Canada are her greatest heritage, because 'the nations or states in which food, fuel, metal and timber may be produced at the highest relative rates of wages and at the lowest money-cost per unit of product will thereby be enabled to apply labour saving machines to other branches of productive industry in the most effective manner.' The nation that would succeed in effecting this combination can do so only by maintaining its forests in their best possible condition, since, of the four factors described, the timber is the most easily exhausted. The nation which succeeds in this four-fold combination must be at the head of all nations in the long run.

"At the very outset of the enquiry great difficulties were encountered in the effort to secure trustworthy data. These difficulties were increased from the fact of the divided control and ownership.

207. "The ownership of Canadian forests is for the most part vested in the Provincial Governments, including the provinces of Ontario, Que-

(1.) Canada is the fourth largest exporter of products of the forest, being only exceeded by Sweden and Norway with a net export of \$37,135,000; by Austria with a net export of \$31,000,000 and by Russia with \$33,300,000. On a per head basis, Canada stands second, her net export in 1891 having been \$24,564,863, equal to \$5.08 per head against Sweden and Norway's \$5.50, Austria's 75 cents and Russia's 34 cents per head.

bec, New Brunswick and British Columbia, which grant licenses to the lumbermen.

"In the Province of Manitoba, in the Territories and in the Railway Belt of British Columbia (40 miles wide by 500 miles long) the Dominion Government, filling the place of the Provincial Governments, owns the Crown Lands and their forests."

"In Nova Scotia there is no system of timber licenses, the trees being sold with the land and not much timbered Crown Lands remaining. This is also the case with Prince Edward Island.

"In the settled portions of the provinces the woodlands are in the hands of private owners, but contain comparatively little that can be classed as forest, though the census returns indicate that about one-third of the occupied land is in woodland and pasture, possibly leaving one fourth for woodland.

"In the United States, notwithstanding the length of time during which attention has been directed to forestry, an exact census of forest area in existence has never been made. The area covered with wood growth is less than 500,000,000 acres. If all the land area, not known to be treeless or in farms, were under forest, the acreage would not exceed 850,000,000, but the lower figure is probably more nearly correct.

"The same statement may be made respecting Canada. From some persons there are affirmations that there is not more than ten years' supply. From others there are declarations that the supply in our forests is sufficient to last 100 years, possibly 200 years.

"The Assistant Commissioner of Crown Lands of Ontario points out that 'while the department could give the area of the unsold lands of the Crown, all of which are covered to a greater or less extent with various kinds of timber, as this is a wooded province, it is quite an impossibility to estimate the quantities of timber upon the ninety million acres representing that unsold area.'

"The data needed for a thorough examination of this subject are:—

"1st. A statement of the wooded area of the Dominion, divided into (a) that in the occupancy of private individuals, and (b) that in the control of the several governments.

"2nd. Reports on the condition of the forest growth of sold and unsold areas by experts such as the surveyors in the employ of the Provincial and Dominion Governments, forest rangers and other persons employed in that work by the various large lumber firms.

"In the absence of data of the kind mentioned, I have endeavoured to shape enquiries so as to answer in the best possible way four questions:—

"1. What have we, and what is it like, as to size and varieties?

"2. How fast is it going?

"3. What means are used to replenish?

"4. How long will the supply last?

"This means, simply put, an examination into our forest area; into the destructive, the reproductive and the protective forces at work, and into the needs of the present time for the purpose of weakening the destructive and strengthening the protective and regenerating forces."

208. The forest wealth of the country is very great. The forests formerly extended in an almost unbroken stretch from the Atlantic Ocean to the

head of Lake Superior, a distance of 2,000 miles. The great plains of the North-west have always, within the memory of man, been sparsely timbered, but on the Pacific slopes of the Rocky Mountains down to the shores of the ocean there are mammoth trees that can compare favourably with the growth of any region on the globe. From the earliest days of its occupation by the French, the forest wealth of the country washed by the St. Lawrence engaged the attention of the government of France, who saw therein vast resources available for their naval yards. They drew from these forests large numbers of masts and spars, and issued stringent regulations for the preservation of the standing oak. When the country was first ceded to Great Britain but little attention was paid at first to its vast timber supply, owing to the fact that almost the whole of the Baltic trade was carried in British bottoms and that the timber of northern Europe provided an unfailing and convenient return freight for the shipping thus engaged. When, however, the troubles of the Napoleonic era commenced, and especially when the continental blockade was enforced, the timber supplies of the Baltic becoming uncertain and insufficient, attention was directed to the North American colonies, with the result of increasing the quantity of timber which reached Great Britain from 2,600 tons in 1800 to 125,300 tons in 1810, and to 308,000 tons in 1820.

209. The following figures will show the development of the trade :—

1850	Exported to the United Kingdom	1,052,817 tons.
1859	"	1,248,069 "
1872	"	1,211,772 "
1881	"	1,301,301 "
1891	"	1,051,091 "
1892	"	1,406,350 "
1893	"	1,255,773 "
1894	"	1,381,816 "
1895	"	1,310,685 "

210. A noticeable feature in the returns is the steady decline in the quantity of square timber exported to England, and the increasing quantity of sawn or manufactured wood. The decrease in hewn timber sent from Canada in 1894 compared with 1893 was 39·3 per cent and the increase in sawn lumber for the same year was 4·3 per cent. This is in favour of the Canadian forests, as the square timber involves great waste, and the debris left in the forest increases danger from fires. However, in 1895 there was an increase in hewn timber to the extent of 24,590 tons or 20·8 per cent, and a decrease in sawn lumber of 7·6 per cent.

211. The census of 1891 shows the following forest products for the preceding year :—

TIMBER.	Ontario.	Quebec.	New Brunswick.	Nova Scotia.	P. E. Island.	Manitoba.	British Columbia.	Territories.	Total Canada.

212. The census returns of 1891 cannot be compared with those of previous decades on account of the addition of provinces, and also of extra columns for telegraph posts, railway ties, fence posts, pulpwood and home-made shingles in the last census. Taking the four old provinces, Ontario, Quebec, New Brunswick and Nova Scotia, a comparison of the principal items may be made as follows: Square pine, white and red, 1891 census, 10,232,052 cubic feet; 1881 census, 19,929,573 cubic feet; 1871 census, 26,191,193 cubic feet. Other square and sided timber, 1891 census, 29,898,410 cubic feet; 1881 census, 65,746,894 cubic feet; 1871 census, 39,478,678 cubic feet. Pine logs, 1891 census, 1,378,750,700 feet, B.M.; 1881 census, 2,150,112,800 feet, B.M.; 1871 census, 1,241,646,800 feet, B.M. Spruce and other logs, 1891 census, 3,183,121,600 feet, B.M.; 1881 census, 2,305,570,600 feet, B.M.; 1871 census, 931,455,700 feet, B.M. Spars and masts, 1891 census, 301,984 pieces; 1881 census, 191,078 pieces; 1871 census, 121,085 pieces. Staves, 1891 census, 91,307 thousand; 1881 census, 40,544 thousand; 1871 census, 34,706 thousand. Firewood, 1891 census, 9,892,646 cords; 1881 census, 10,493,155 cords; 1871 census, 8,713,083 cords. Lathwood, 1891 census, 291,347 cords; 1881 census, 91,165 cords; 1871 census, 25,657 cords. Tanbark, 1891 census, 327,817 cords; 1881 census, 398,239 cords; 1871 census, 162,521 cords.

213. Applying to the forest products of the Dominion, as given in the census of 1891, the values given in the Customs returns of exports, the total value is \$80,071,415. Taking the four provinces, Ontario, Quebec, New Brunswick and Nova Scotia, and omitting the articles in the additional columns, the value of the forest products in 1890-91 was \$67,264,258; in 1880-81, \$73,429,922, and in 1870-71, \$44,462,907, at the Customs valuation.

214. The products of the forest and manufactures from them supply a large proportion of the exports of Canada. In the following tables they are classified as "From the Forest," including square timber, logs, railway ties, firewood, &c.; "From the Factory," including all products upon which labour has placed by its exertions an increase in the value beyond the work of cutting and squaring, and "From the Shipyard," including all ships, new or old, sold abroad:—

FOREST WEALTH.

Total .....	5,517,342	19,982,766	172,563	25,672,671

216. The total amount of hewn wood imported by the United Kingdom in 1895 from all countries was 2,278,548 loads of 50 cubic feet, against 2,036,036 loads in 1894, 2,126,883 loads in 1893 and 2,469,139 loads in 1892. Of this quantity 142,738 loads were from Canada in 1895, 118,148 loads in 1894, 136,364 loads in 1893 and 194,654 loads in 1892. The total import of hewn wood by the United Kingdom was as follows: 1895, 5,065,798 loads; 1894, 5,446,265 loads; 1893, 4,761,717 loads; 1892, 5,090,798 loads; of which 1,167,947 loads in 1895, 1,263,668 loads in 1894, 1,119,409 loads in 1893 and 1,211,696 loads in 1892 were from Canada, or 23·0 per cent, 2 per cent, 23·5 per cent and 23·8 per cent respectively.

217. A marked feature of the export to the United States is the <sup>great</sup> increase in the number of pine saw-logs they take from us. This may be seen by taking periods of four years :—

PERIOD.	Feet B.M.	\$	Yearly Average.	\$
1882-85.....	4,335,000	37,943	1,083,750	9,433
1886-89.....	20,526,000	171,856	5,131,500	42,951
1890-93.....	269,868,000	2,282,802	67,467,000	570,700
1894.....			277,947,000	2,359,951
1895.....			212,231,000	1,860,725

218. The wood-pulp industry with a rapid growth has attained large proportions. By the census of 1891 the produce of pulp wood was 261,155 cords, but as it was then recorded for the first time there can be no comparison with the previous decades. Pulp mills did not appear in the census of 1871; by that of 1881 the invested capital amounted to \$92,000, the wages to \$15,720 and the product to \$63,300; by the census of 1891, the invested capital had increased to \$2,900,907, the wages to \$292,099 and the value of the product to \$1,057,810.

219. There has been a similar great increase in the exports of wood for pulp. The article did not appear in the Customs returns of 1889. In 1890 its export was valued at \$80,005, in 1891 at \$188,198, in 1892 at \$219,548, in 1893 at \$386,092, in 1894 at \$393,260 and in 1895 at \$468,009. The export of wood-pulp also made great strides, amounting in 1890 (its first appearance in the returns) to \$168,180, in 1891 to \$208,619, in 1892 to \$355,303, in 1893 to \$455,893, in 1894 to \$547,217 and in 1895 to \$590,874.

220. Three things are necessary to the successful development of the manufacture of pulp—suitable wood, extensive water power and cheap labour. All the elements indispensable to the success of pulp manufacture are to be found in Canada, besides particular additional advantages. Our immense forests of coniferous trees contain a practically inexhaustible supply of the different kinds of wood required in this line of manufacture. They are, moreover, of a superior quality and very much sought after by the manufacturers of the United States, as is seen in the yearly increasing demand. With regard to quality and quantity, Canada is as well situated as Norway and Sweden, if not better. If the price obtained in England is taken as a criterion, Canadian wood produces better pulp than that of Norway and Sweden, for in 1893 Canadian pulp was sold in England at an average of \$24.80 a ton, as against \$20.77 for the Scandinavian product.

221. The following is a statement of industries connected with the forest products of Canada, from the census of 1891 :—

## WOOD-WORKING INDUSTRIES IN CANADA.

NAME OF INDUSTRIES.	Invested Capital.	Wages.	Value of Product.
	\$	\$	\$

Total.....	99,637,522	30,680,281	120,415,516

\* The product in this instance is leather. In all the other cases the product remains wood.

222. The carriage of forest products forms a considerable proportion of the business of the railways and vessels engaged in inland navigation. It is estimated that the Canadian railways carried the following wood goods in the year 1895 : Lumber, of all kinds, and saw-logs, 3,576,415 tons, and

firewood, 904,056 tons, a total of 4,480,471 tons, or somewhat over one-fifth of the total weight carried.

223. The forest products paying toll on the canals in 1894 were as follows: Lumber, 900,487 tons; firewood, 177,980 tons, a total of 1,078,467 tons, or more than a third of the total freight.

224. Forests on the Crown Lands are leased to lumbermen by the provinces of Ontario, Quebec, New Brunswick and British Columbia. In Nova Scotia and Prince Edward Island the timber is sold with the land, there being no lumbering leases. In Manitoba, the Territories and the railway belt in British Columbia, the Dominion owns the Crown Lands, and timber leases are granted by the Department of the Interior. Some leases are also issued by the Department of Indian Affairs for Indian Lands in the various provinces.

225. The areas covered by these leases were as follows in 1894:—

PROVINCES.	Provincial	Dominion.	Indian.	Total.
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.
Ontario.....	21,574		983	22,557
Quebec.....	46,397		159	46,556
New Brunswick.....	6,301		17	6,318
Manitoba and Territories.....		2,707		2,707
British Columbia.....	820	421	8	1,249
Total.....	75,092	3,128	1,167	79,387

226. The timber cut under these licenses was as follows: Ontario, pine saw-logs, 633,828,900 feet, B.M.; other saw-logs, 6,502,411 feet, B.M.; square white pine, 1,263,414 cubic feet; other square timber, 11,953 cubic feet; boom and dimension timber, 19,039,593, B.M.; cedar, 49,190 linear feet; railway ties, 569,362, besides minor products. Quebec—pine saw-logs, 277,113,772 feet, B.M.; other saw-logs (mostly spruce), 215,620,771 feet, B.M.; square white pine, 172,690 cubic feet; square red pine, 2,131 cubic feet; other square timber, 12,032 cubic feet; boom timber, 2,559,785 feet, B.M.; flat and small timber, 256,208 linear feet; railway ties, 330,153 pieces, besides minor products. New Brunswick—pine and spruce saw-logs, 57,008,909 feet, B.M.; hemlock, cedar and hardwood saw-logs, 6,793,865 feet, B.M.; square hardwood, 4,156 cubic feet; boom-poles, 8,555 pieces; railway ties, 113,162 pieces, besides minor products. Manitoba and Territories—lumber not specified, 25,258,259 feet, B.M.; ties, 101,955 pieces, shingles, 4,651 M., besides minor products. British Columbia—lumber not specified, 82,155,540 feet, B.M., shingles, 2,560 M.

227. The receipts by the various governments from these licensed lands were as follows in 1893 :—

PROVINCES.	Timber dues.	Ground rents.	Bonus.	Trespass, Int., &c.	Totals.
	\$	\$	\$	\$	\$
Ontario . . . . .	734,885	64,721	75,292	17,605	892,503
Quebec . . . . .	597,673	147,204	11,766	15,713	772,356
New Brunswick . . . . .	65,401	29,396			94,797
British Columbia . . . . .	17,970	59,506			77,476
Canada, Interior Dept. . . . .	67,383	19,368	3,398	3,481	93,830
Canada, Indian Dept. . . . .	33,292	4,061	33,000	1,793	72,146
Total . . . . .	1,516,804	324,256	123,456	38,592	2,003,108

228. At the Ontario sale of limits in the autumn of 1892, the total bonus was \$2,315,000, of which \$1,227,666 was paid the same year, leaving \$1,087,334 to be paid.

229. There was a great increase in 1893 of New Brunswick timber receipts ; this was chiefly due to the extension of the term of the leases from 10 to 25 years, and the consequent advances on the upset price at the sales of that year, when there was also an increase in the number of berths sold. In 1894 the receipts fell below those of previous years.

230. The area of Forest and Woodland in Canada cannot be definitely stated, for want of adequate data at present. The following approximate estimate is based upon returns of the Provincial and Dominion Governments, reports of surveyors of the Crown Lands and other departments, the Geological Survey and other trustworthy sources :—

PROVINCES.	Total Area.	Forest and Woodland.	Wood-land.
	Sq. miles.	Sq. miles.	p. c.
Ontario . . . . .	219,650	192,118	46.49
Quebec . . . . .	227,500	116,521	51.22
New Brunswick . . . . .	28,100	14,766	52.55
Nova Scotia . . . . .	20,550	6,464	31.45
Prince Edward Island . . . . .	2,000	797	39.85
Manitoba . . . . .	64,066	25,626	40.00
British Columbia . . . . .	382,300	285,554	74.69
Territories . . . . .	2,371,481	696,952	29.39
Total . . . . .	2,315,647	1,248,798	53.76

It must not be supposed that this area is all forest, much, though wooded, being covered with small trees.

231. An estimate founded upon similar data to that of the forest area, gives 38,808 square miles as the area of pine in Ontario, and 31,468 square miles in Quebec. Assuming half a million feet, board measure, to the mile, the quantities would amount to 19,404,000,000 feet, B. M., and 15,734,000,000 feet, B. M., respectively, and the addition of 2,200,000,000 feet, B. M., as the estimated quantity for the Maritime Provinces, would give a total of 37,338,000,000 feet, B. M., of pine. Spruce far exceeds pine both in area and quantity, but not even an approximate estimate can be formed at present, and this is the case also with the Douglas fir and other trees peculiar to the Pacific coast.

232. The Ontario Government has made a reservation called the Algonquin Park on the water-shed between the Ottawa and Georgian Bay waters. It contains 1,466 square miles, of which 166 is water. Most of it is well timbered, but it is all subject to lumbering licenses, some allowing only the pine to be cut, and some unrestricted. The Canadian Government has reserved 260 square miles for the Rocky Mountain Park at Banff, much of it covered with timber, which is carefully protected. There are also four other of these Dominion parks, or reservations, in the Rocky Mountain chain, at Mount Stephen, Mount Sir Donald, the Eagle Pass and the summit of the Selkirk Mountains.

233. Canada not only possesses vast Forests, but they are composed of a great variety of trees. A carefully compiled list of Timber Trees makes them a little over a hundred, and probably a few more may be added hereafter, especially from the Pacific coast. Foremost, both for its value and commercial importance, is the white or Weymouth pine (*pinus strobus*), the main object of lumbering operations in Ontario and Quebec, where it forms great forests, especially in the Ottawa Valley, and there still remain large quantities, more scattered, in the Maritime Provinces. Next in importance are the spruces, which extend from the Atlantic coast, where they form a large article of export, to the Pacific coast, and they compose a marked element in the great northern forest and other woodlands of the Territories. British Columbia has its own coniferous trees of great size and value, headed by the Douglas fir, the giant cedar, the yellow cypress and the western spruce. Throughout Canada there is a great variety of valuable hardwoods which supply the domestic consumption and contribute largely to the exports.

234. For the sake of comparison, the forest areas of the European countries are given from the latest trustworthy authorities, in most cases from special returns obtained in 1893 from the British representatives in the respective countries, by the Imperial Foreign Secretary, Lord Roseberry, for the use of the Statistical Branch of this department :—

## FOREST AREAS OF THE EUROPEAN COUNTRIES.

Date.	COUNTRY.	Per cent Forest.	Forest area.	State or Crown Lands.	Municipal Institu- tions, &c.	Private.
			Acres.	Acres.	Acres.	Acres.
1880	Austria.....	32.58	24,172,360	2,347,868	3,524,264	18,300,228
1882	Hungary.....	23.52	18,777,771	2,923,555	6,481,739	9,372,477
1883	Belgium.....	17.08	1,243,507	61,945	403,197	778,365
1882	Bosnia, Herzegovina.....	45.00	6,699,456			
1888	Bulgaria.....	4.64	1,135,906			
1887	Denmark.....	4.80	469,490			
1892	France.....	17.92	23,407,161	2,657,850	4,712,481	16,036,830
1893	German Empire.....	25.70	34,367,651	11,341,325	6,829,854	16,496,472
1880	Greece.....	12.60	2,025,400	1,620,320		405,080
1891	Holland.....	6.93	861,456			
1892	Italy.....	14.31	10,131,235	425,835		9,705,400
1889	Norway.....	24.53	19,288,626	2,314,635	578,659	16,395,332
1892	Portugal.....	5.25	1,163,841	53,964		1,109,877
1893	Roumania.....	15.22	4,942,000	2,254,070		
1892	Russia, Europe.....	37.15	498,200,000	298,920,000		199,280,000
1891	Serbia.....	48.00	5,763,163			
1890	Spain.....	13.03	16,354,941	722,656	15,632,285	
1890	Sweden.....	40.65	44,480,000	14,300,000		30,180,000
1892	Switzerland.....	26.12	2,059,018	86,161	1,394,942	577,915
1892	Turkey, Europe.....	8.93	3,500,000			
1892	United Kingdom.....	4.00	2,695,000			
Total, Europe.....		30.26	721,437,982	340,030,184	39,257,421	318,637,976

The ownership for 23,512,401 acres is not specified. In Russia, Sweden, Italy, Spain, Portugal and Greece the lands of municipalities, &c., and of private owners are given together.

235. The area of forest per head of population is an important factor in considering the sufficiency of woodland for the home requirements of a country. The following are the areas per capita in some of the principal countries:—

COUNTRY.	Acres per head.	COUNTRY.	Acres per head.
Canada.....	136.00	Norway.....	9.64
Austria-Hungary.....	1.04	Roumania.....	.41
Belgium.....	.20	Russia (Europe).....	3.97
Denmark.....	.21	Spain.....	.95
France.....	.61	Sweden.....	9.30
Germany.....	.70	Switzerland.....	.70
Holland.....	.12	United Kingdom.....	.07
Italy.....	.34	United States.....	7.03

236. From these figures it may be deduced that a percentage of at least 25 per cent of forest carefully and scientifically cultivated is required to supply the local demand in countries with the dense population of Europe.

231. An estimate found gives 38,808 square miles in Quebec. Assuming the quantities would amount to 100 feet, B.M., respectively the estimated quantity 37,338,000,000 feet, and quantity, but not present, and this is peculiar to the Province.

232. The Ontario Queen Park on the It contains 1,000 timbered, but no pine to be cut reserved 260 it covered with other of the chain, at Montreal of the

233. The great variety them a after, common main a great quantity are to large elements British we have to

Germany and Austria-Hungary, France, with 18 per cent in period has to import timber largely, a third of its requirements for 10 per cent in forests, imports quantity of wood, but only a small Hungary, with 30 per cent in exporter of timber. In all diminished or even slightly countries, Norway, Sweden and drawing upon their resources by

the possibility of afforesting our prairies. In steppes, the prairies of that years made plantations amounting to millions of about three square miles

subjected to and perpetuated by the divisions of the forests in some

.....	25	75
.....	33	67
.....	33	67
.....	67	33
.....	40	60
.....	31	69

These statistics are difficult to obtain, but the most available figures for some of the countries of Australasia are as follows:

	Total Forest.	State or Crown.	Municipal and Private.
	Acres.	Acres.	Acres.
U.S.A.	450,000,000	.....	.....
Canada	5,700,000	.....	.....
U.S.A.	10,000,000	70,000,000	70,000,000
U.S.A.	15,000,000	.....	.....
U.S.A.	5,833,100	5,058,000	775,040
U.S.A.	224,000	.....	.....
U.S.A.	10,250,000	5,400,000	.....
U.S.A.	Not stated.	1,375,442	.....
U.S.A.	.....	705,324	.....

240. It may be seen from the above table that some of the colonies and dependencies of the British Empire have reserved state forests for the purpose of protecting and maintaining them in perpetuity. India has long had a strong staff of trained foresters, who treat the forests on the most approved systems of European forestry. Some of the colonies in Australasia and South Africa have also established state forests under trained foresters.

241. Before 6th October, 1890, the United States tariff on woods imported from Canada contained the following items:—

Timber hewn or used on wharf building or for spars.....	20 per cent.
Timber, sided or squared, per cubic foot.....	1 cent.
Sawed boards, planks, deals and other lumber of hemlock, whitewood, sycamore and basswood, per M. ft. B.M..	\$1 00
All other varieties of sawed lumber, per M. feet B.M.....	2 00

In 1890 hewn or sawed lumber was reduced to 10 per cent; sided or squared timber to  $\frac{1}{2}$  cent per foot, and pine lumber to \$1 per M. ft., B.M.

## UNITED STATES IMPORTS FROM CANADA.

YEAR.	Timber.	Boards, Deals, Planks and Sawed Lumber.	Boards, Deals, Planks and Sawed Lumber.	Timber.	YEARLY AVERAGE.	
					Boards, Deals, Planks and Sawed Lumber.	Boards, Deals, Planks and Sawed Lumber.
	\$	M. ft.	\$	\$	M. ft.	\$
1888.....	5,748	608,326	7,497,078	3,304	638,624	7,682,065
1889.....	3,108	747,842	7,804,163			
1890.....	1,147	659,703	7,744,954			
1891.....	37,652	757,149	8,498,046	57,811	639,982	7,297,160
1892.....	56,777	663,134	7,539,766			
1893.....	65,792	742,351	8,217,331			
1894.....	47,865	514,461	6,134,204			
1895.....	56,783	600,809	6,859,532			

The averages for the three years before and after the McKinley Act approximate closely in the case of sawed lumber. The intermediate year, partly under one tariff and partly under the other, ran higher than the average of either period, being, indeed, the highest year of the seven. The imports for 1895 were about the average.

No comparison can be made as to timber, for after 1890 items 1 and 2 were returned together, while previously timber sided and squared had apparently been included in unmanufactured.

242. On 28th August, 1894, timber hewn or sawed, square or sided and sawn lumber (except cabinet woods), were made free.

The following are the United States imports for the following months, compared with the corresponding periods in the previous year :—

MONTH.	Timber, Hewn or Sawed.			Boards, Deals, Planks and other Sawed Lumber.					
	1895-6.	1894-5.	1893-4.	1895-6.		1894-5.		1893-4.	
	\$	\$	\$	M. ft.	\$	M. ft.	\$	M. ft.	\$
September.	8,454	3,245	1,894	82,431	887,321	57,353	740,304	56,302	669,619
October....	3,431	1,977	5,384	87,142	973,211	77,615	919,454	69,088	863,186

February..	5,504	1,094	550	21,974	233,852	21,463	255,286	13,598	170,953
Total....	26,093	21,118	12,115	232,002	3,662,041	281,510	3,358,051	258,743	3,135,608

\* Estimated.

These figures include the total imports and not Canadian only.

243. Further reference to the other Natural Resources of Canada will be found in Chapter IX., dealing with Agriculture; Chapter X., dealing with Fisheries; and in Chapter XI., dealing with Minerals.

## CHAPTER VI.

History.—Population of Canada.—Population by electoral divisions.—Urban population.—Population by sexes.—Ages.—Religions.—Education.—Industrial establishments.—Grouping of industrial establishments.—Capital and labour in Canada.—Statistics in Canada and the United States.

Few countries have had their population counted so many times and so long a series of years as Canada. The first official census was in 1665, a little more than half a century after Champlain laid the foundation of Quebec.

The population of New France was found to be 538 families, comprising 2,000 souls. Montreal and its environs had a population of 625 persons, the largest aggregation of people in New France; Quebec came next with 47 persons, and Three Rivers third with 455. In and around Quebec, Montreal was the largest centre of population, Beauport having 533, Beauport 5, and the Isle of Orleans 452.

The Royal Troops, consisting of from 1,000 to 1,200 men, in 24 companies, were included.

In the total of 3,215 there were found in professions and trades 747, of whom 101 were servants.

The clergy comprised one bishop, 18 priests and ecclesiastics, and 31 monks and brethren. There were 18 Ursuline nuns, 23 nuns of the other order and four Filles Pieuses of the Congregation.

There were 1,019 married people, 42 widowed, 1,252 children under 15 years of age, and 902 unmarried persons, of whom 218 were under 21 years of age. There were 853 more males than females in the colony.

At that time the population of Acadia and Cape Breton was small, probably not more than 100 white families.

The Indian population in New France, in 1665, counted 2,340 warriors and 2,000 souls, divided as follows: Mohawks 400 warriors, Oneidas 140, Cayugas 300 warriors, Cayugas 300, Senecas 1,200 warriors.

Micmacs of Acadia and Cape Breton numbered about 2,500 persons. The total population in 1665 was, therefore, about 18,000.

During the remainder of the 17th century, eight censuses of New France and Acadia were taken.

Five censuses were taken in the 18th century. In the first quarter of the 18th century there was but one census taken, that of 1817, which was for Nova Scotia.

In 1824 a census of Upper Canada and one of New Brunswick was taken. Beginning with 1824, a yearly census of Upper Canada was taken to the period of 19 years.

The same period censuses were taken twice for Lower Canada, twice for Nova Scotia, thrice for New Brunswick, once for Prince Edward Island, and four times for Assiniboia.

There was a census of Lower Canada in 1844, and of Upper Canada in 1848.

In 1851-52 Upper and Lower Canada, Nova Scotia and New Brunswick took censuses, Prince Edward Island taking hers in 1855.

In 1860-61 all the provinces took censuses excepting British Columbia. In 1870-71 all the provinces took censuses simultaneously, excepting British Columbia and Manitoba, which took theirs in 1870.

In 1880-81 and 1890-91, the Census of Canada was taken as of the same day, throughout the whole Dominion.

The first census taken in the United States of America was in 1790. The population was found to be 3,929,214. At that date the population of the area comprised in the present Dominion of Canada was 220,000.

245. Taking the latest census (1890 and 1891) in each country, the population of the United States has increased 18 times, and that of Canada 22 times over the respective populations of 1790. It will thus be seen that Canada has increased in population faster than the United States.

The census of 1891, like that of 1881, was an Imperial Census—that is, Canada with all other portions of the British Empire adopted the 5th of April as the date. The date fixed is not perhaps the best for Canada, the difficulty of travelling in the spring being greater than it would be at a later date, thus entailing many hardships on the enumerators and other officers.

246. The Census of Canada was taken under the provisions of the Census Act.

This Act was first passed in 1870. It was revised in 1879 and again in 1886, the last Act being that under which the census of 1891 was taken. It provides that the census shall be taken so as to ascertain with the utmost possible accuracy in regard to the various territorial divisions of the country, their population and the classification thereof, as regards age, sex, social condition, religion, education, race, occupation and otherwise; the houses and other buildings therein and their classification as dwellings, inhabited, uninhabited, under construction and otherwise; the occupied land therein and the condition thereof, as town, village, country, cultivated, uncultivated and otherwise; the produce, state and resources of the agricultural, fishing, lumbering, mining, mechanical, manufacturing, trading and other industries thereof; the municipal, educational, charitable and other institutions thereof, and whatsoever other matters are specified in the forms and instructions issued under authority of the Governor in Council.

247. As under the constitution the electoral representation in the House of Commons is based upon population and is regulated by the number of persons living in the Province of Quebec, it is necessary first to ascertain with accuracy the population in each province, and second to follow in the enumeration of the people the electoral divisions provided by Parliament. As at the time of year in which the census is taken many purchasers of goods, &c., are in Montreal from all the other provinces, and as from a variety of causes there is considerable movement of population towards the

arger cities of trade and business, any enumeration *de facto* would result in an abnormal increase of the population in the cities at the expense of other places and in an abnormal increase of the population of Quebec Province at the expense of the other provinces, it was from the inception of the Federation deemed expedient to adopt the *de jure* system—that is, the legal population and not the actual is enumerated, by the legal population being understood the number of people whose ordinary domicile is in the locality; the actual population being the number of persons actually present on the census night in the domicile where they are enumerated.

Further reasons for the adoption of the *de jure* system are that in the month of April large numbers of the people of Canada are in the lumber camps getting out the cut of timber and logs, and could not be reached at all excepting through their families. In the same way fishermen are absent plying their vocation.

In the United States the *de jure* system has been adhered to from the first census; and the same reasons as those urged in Canada are operative to produce persistency in the *de jure* system.

Of course there are difficulties and disadvantages in connection with the *de jure* system requiring the adoption of many safeguards. The system adopted in Canada is unique; in the Empire of which Canada forms a part no other section adopting this plan. But so also is the system of government unique, no other part of the Empire having the federative principle as the basis of the political structure.

Care has to be taken to include all who have a domicile in Canada, even though, like seamen, and children being educated abroad, they are not in the country at the time of the census.

In the same way foreigners are excluded, inasmuch as they have no domicile in the country, not belonging to any family. The greatest difficulty is in the prevention of duplication, as for instance in the case of all the classes coming under the legal designation of servants. These may have their homes in one part of the province or in one province and may be engaged in their occupation in another part of the same province or in another province. Great care was taken in the census of 1891 to avoid this source of error.

The method followed in obtaining the staff and preparing them for their work may be briefly described.

248. In the absence of a permanent staff available for census purposes, an organization had to be improvised. It consisted of (1) a staff of 14 census officers. These gentlemen, selected by the government as men well acquainted with the divisions over which they were to have supervision, were called to Ottawa for instructions. They were supplied with specimen schedules and with manuals and set to work taking the census of each other or of imaginary individuals whose cases were specially prepared so as to bring out all the different points the experience of the permanent staff had brought to their notice in previous censuses. When the Census Chief Officers had become conversant with all the puzzles that were likely to be encountered, they were sent to their several divisions—four each to Ontario and Quebec, and one to each of the other provinces.

2. In their respective divisions, they found ready for them the second body of officers, the Census Commissioners, of whom there were 241. The

commissioners were appointed by the government, the chief recommendation, besides their general intelligence, being their knowledge of the census districts over which they were placed.

The interest taken in the census may be gathered from the fact that the present Lieutenant-Governor of Quebec, Hon. Mr. Chapleau, was an enumerator in the census of 1871, and the Hon. Mr. Taillon, Premier of the conservative government of Quebec, was a census chief officer in the census of 1891.

The commissioners of each division, on being called together by the census chief officers, were instructed by them just as they themselves were instructed by the permanent staff at Ottawa.

3. The third body of men are the Enumerators. Of these there were 4,366 in the census of 1891. They were instructed by the commissioners and were visited by the census chief officer during instruction, so that an estimate might be formed of the capacity both of the commissioners and enumerators, and changes made if necessary. The enumerators were drilled regularly till the census day came, on the morning of which each enumerator, with a portfolio containing the eight schedules under his arm, started forth for the solemn inquest of the nation. Each enumerator was provided with a manual as well as with specimen schedules. They visited each house and in most cases found a people prepared to receive them, means having been taken to explain through the newspapers (and in some instances through the pulpits) what was wanted from the people, the reason for wanting the information, and the importance of giving accurate information. In many cases the enumerators of 1891 had been enumerators in 1881, thus giving to the new enumerators sources of assistance from day to day. All the officers employed were under oath.

The number of enumerators was one-third greater than in 1881. But the mode of payment was different. The experiment resulted satisfactorily. The returns were made to the department, after examination by the commissioners, earlier than in 1881.

The work was, on the whole, well done, as is evidenced from the fact that in schedule 2 the causes of death were given in 93 cases out of every 100 against only 74 in the hundred in 1881, and against 95 in the 100 in the returns to the Registrar General of England, where the work is carried on continuously from year to year.

249. One of the greatest difficulties encountered in connection with the practical work of the census was the remapping of the electoral districts rendered necessary by the Redistribution Act of 1882.

The changes made, in consequence of the need existing that the several electoral districts shall contain as nearly as possible equal populations, have the effect, to a considerable extent, of preventing exact comparisons of the particulars of one census-taking with those of another except by the experts in the census division of the Department of Agriculture.

250. The largest census district in 1891 was that of New Westminster with an area of 204,050 square miles. When it is recollected that the area of the United Kingdom is 120,849 square miles, or less by nearly the number of miles in England, Wales and Scotland than this one district, it

is evident that the methods employed in smaller countries for taking a census cannot be used in Canada. In Ontario the largest census area is Algoma with 143,517 square miles, and in Quebec, Chicoutimi and Saguenay with 118,921 square miles.

To accomplish the task of counting the population in these immense areas, the enumerators had to take camps and camp furniture with them, be ready to travel on horseback, paddle a canoe and walk miles, all in one day. Fortunately no lives were lost, but one man, missing the path, had to kill and eat his horse to save his own life. The diaries of some of the enumerators read like passages taken from books of travel written for boys. Dangers threaten life and limb, impending starvation, narrow escapes by land and by water, encounters with suspicious Indians and with wild animals, to whom human flesh is a rare dainty to be secured with ravenous delight when the opportunity offers. In one instance, the enumerator and his band of assistants encountered an unexpected difficulty. He had forgotten to take with him the British flag. The Indians, with the traditional regard for the flag of the past, when all conferences between whites and Indians were held under the meteor flag of England, refused to recognize the enumerator. He had to send for the flag before they would give any information; when it arrived they willingly answered all questions. •

The first census of the Dominion of Canada was taken on the 2nd of July, 1871, and comprised the four provinces of Ontario, Quebec, Nova Scotia and New Brunswick. The Province of Manitoba had been admitted to the Confederation in the previous year, when a census of it was taken. It was not, therefore, included in the census of 1871. The total population of the four provinces was found to be 3,485,761.

A census of Prince Edward Island, then an independent province, was taken in the same year, giving a population of 94,021; and a census of British Columbia was taken in 1870, when the population was ascertained to be 36,247, including Indians. This province was also at that time independent.

The population of Manitoba at the taking of the census in 1870 was 15,000, including 6,767 Indians.

The population, therefore, of what at present constitutes the Dominion, exclusive of the North-west Territories, may be set down to have been in 1871, 3,635,024. The population of the Territories was at the same time ascertained to be 60,000.

The next census was taken on the 4th April, 1881, and comprised the whole of the present Dominion, the total population of which was then found to be 4,324,810.

The third census was taken on the 6th April, 1891, when the population was ascertained to be 4,833,239.

252. The following table gives the population of the several provinces according to the respective censuses :—

## POPULATION OF CANADA, 1871, 1881 AND 1891.

PROVINCES.	1871.	1881.	Increase Per cent.	1891.	Increase Per cent.
Ontario .....	1,620,851	1,926,922	18·6	2,114,321	9·73
Quebec .....	1,191,516	1,359,02	14·0	1,488,535	9·53
Nova Scotia .....	387,800	440,572	13·6	450,396	2·23
New Brunswick .....	285,594	321,233	12·4	321,263	0·00
Manitoba .....	18,995	*62,260	247·2	152,506	144·95
British Columbia .....	36,247	49,459	36·4	98,173	98·49
Prince Edward Island .....	94,021	108,891	15·8	109,078	0·17
The Territories .....		56,446		98,967	75·33
Total .....	3,635,024	4,324,810	18·97	4,833,239	11·76

\*65,954 originally ; 3,694 were taken off and added to Ontario, when the boundary was changed.

Former issues of the Year-Book contained the population by electoral districts as they existed in 1881 and 1891.

The following is a statement of the population of the several electoral districts in Canada under the Redistribution Acts of 1892 and 1893. The number of voters on the electoral lists of 1894 is also given.

Population of Canada by Electoral Districts as redistributed for purposes of representation in the House of Commons :—

## ONTARIO.

(The population in the 1881 column is what it would have been if the redistribution of 1892-93 had been in 1881.)

ELECTORAL DISTRICTS.	Number of Represen- tatives.	POPULATION.		Voters on lists of 1894.

Unorganized Territories..	.....		32,168	.....

254. In Census Bulletin No. 1, the urban population of Canada was divided into three groups: (1) cities and towns of population of 5,000 and upwards; (2) of 3,000 to 5,000; (3) of 1,500 to 3,000, for the purpose of showing the growth of the cities and towns and villages separately, so that those interested may at once ascertain the development of urban life in each of the three grades. In order to prevent confusion in making comparisons, it is necessary to point out that, in many cases, additions to population have been caused by the annexation of adjacent territory since 1881—notably in the cases of Montreal, Toronto, Ottawa, London and St. John. In each such instance the population of the annexed region as it was in 1881 has been added in the tables to the population of that year as given in the census volumes of 1881, so that the comparison of growth may be exact.

## POPULATION OF CITIES AND TOWNS IN CANADA OF 5,000 INHABITANTS AND UPWARDS, 1881 AND 1891.

CITIES AND TOWNS.	1881.	1891.	INCREASE OR DECREASE.	
			Number.	Per cent.

\* The population in the 1881 column includes the same boundaries as in the 18 and consequently differs in these cases where annexations have taken place since the population as given by 1881.

† The Imperial troops stationed in Halifax, and their families (when on the strength of the regiment), are not included in these figures.

255. The urban population of Canada in 1871 was 686,019, or 18.8 per cent of the total population; in 1881 it was 912,934, or 21.1 per cent, and in 1891 it was 1,390,910, or 28.77 per cent. The growth of the urban at the expense of the rural population is one of the features of the present age throughout the world, and it is evident, from the foregoing figures, that the movement prevails in Canada as well as elsewhere. The large increase between 1881 and 1891 is caused to a considerable extent by the growth of a number of small places which had not attained a population of 1,500 in 1881.

256. The proportions of the urban and rural populations respectively to the total population, in each of the census years, 1871, 1881 and 1891, are as follow:—

PROPORTION OF URBAN AND RURAL TO TOTAL POPULATION,  
1871, 1881, 1891.

PROVINCES.	1871.		1881.		1891.	
	Urban.	Rural.	Urban.	Rural.	Urban.	Rural.
Ontario.....	19.4	80.6	22.8	77.2	33.2	66.8
Quebec.....	19.5	80.5	22.8	77.2	29.2	70.8
Nova Scotia.....	14.0	86.0	13.6	86.4	21.2	78.8
New Brunswick.....	24.3	75.7	22.3	77.7	19.4	80.6
Manitoba.....	1.2	98.8	12.1	87.9	22.5	77.5
British Columbia.....	8.9	91.1	11.9	88.1	42.5	57.5
Prince Edward Island.....	11.5	88.5	14.1	85.9	13.0	87.0
The Territories.....					5.6	94.4
Canada.....	18.8	81.2	21.1	78.9	28.7	71.3

257. The increase in urban population in Ontario and Quebec must be, to a large extent, attributed to the reason given above. In Nova Scotia the increase is principally accounted for by the fact that in 1881 several places that really were towns could not be treated as such owing to their limits not having been defined. New Brunswick is remarkable for the steady decline in urban population during the last twenty years. In Manitoba and British Columbia, the increase has, of course, been considerable, especially in the latter province, where the growth of the city of Vancouver has been phenomenal, as it had no existence in 1881 and now forms 14 per cent of the population of the province.

258. The population of Canada in 1881 consisted of 2,188,778 males and 2,136,032 females, and in 1891 of 2,460,471 males and 2,372,768 females, and the following table gives comparative particulars of the proportions of the sexes in each province in 1881 and 1891:—

POPULATION OF CANADA BY SEXES, 1881 AND 1891.

PROVINCES.	1881.		1891.	
	Males.	Females.	Males.	Females.
Ontario.....	978,765	948,157	1,069,487	1,044,834
Quebec.....	678,109	680,918	744,141	744,394
Nova Scotia.....	220,538	220,034	227,093	223,303
New Brunswick.....	164,119	157,114	163,739	157,524
Manitoba.....	34,903	27,357	84,342	68,164
British Columbia.....	29,503	19,956	63,003	35,170
Prince Edward Island.....	54,728	54,163	54,881	54,197
The Territories.....	28,113	28,333	53,785	45,187
Canada.....	2,188,778	2,136,032	2,460,471	2,372,768

## PROPORTION OF THE SEXES PER 1,000 OF POPULATION, 1881 AND 1891.

PROVINCES.	1881.		1891.	
	Males.	Females.	Males.	Females.
Ontario.....	508	492	506	494
Quebec.....	499	501	500	500
Nova Scotia.....	500	500	504	496
New Brunswick.....	511	489	510	490
Manitoba.....	561	439	553	447
British Columbia.....	596	404	642	358
Prince Edward Island.....	503	497	503	497
The Territories.....	498	502	543	457
Canada.....	505	494	509	491

259. The preponderance of females which existed in 1881 in Quebec was not maintained in 1891, the proportion of sexes in that year being the same, while that in the Territories has been overcome, males, as was only to be expected, being largely in the majority. There was a decrease in the actual number of males in New Brunswick, and a consequent reduction in the proportion of sexes. There was an increase in the proportion of males in Canada in 1891, as compared with 1881, owing to the influx of male settlers into the Territories and British Columbia, but the proportion in the four older provinces remained about the same, viz., 504 males to 496 females.

260. In each census group of 10,000 persons there were as follows:—

	1891.	1881.
Males.....	5,091	5,080
Females.....	4,909	4,920
Infants.....	249	280
Children, 1 year to 5 years.....	1,000	1,060
Boys and girls, 5 to 15.....	2,350	2,452
Youths and maidens, 15 to 20.....	1,061	1,100

Taking all Canada the birth-places of the foreign-born are as follows:—

COUNTRIES.	1881.	1891.
England.....	169,504	219,688
Scotland.....	115,062	107,594
Ireland.....	185,526	149,184
Newfoundland.....	4,596	9,336
Other British possessions.....	3,547	4,450
Total, British possessions.....	478,235	490,252
France.....	4,389	5,381
Germany.....	25,328	27,752
Italy, Spain and Portugal.....	992	2,964
Russia and Poland.....	6,376	9,917
Scandinavia.....	2,076	7,827
United States.....	77,753	80,915
China.....	4,383	9,129
Other countries.....	9,786	13,225
Total, foreign countries.....	131,083	157,110
Grand total, foreign-born.....	609,318	647,362

263. From the preceding table it is found that the population of the several provinces had their birth-places in Canada, other British Possessions and Foreign Countries, in the following proportions, in 1881 and 1891:—

PROPORTION OF NATIVE AND FOREIGN-BORN IN CANADA,  
1881 AND 1891.

PROVINCES.	1881.			1891.		
	Born in Canada.	Born in British Possessions.	Born else- where.	Born in Canada.	Born in British Possessions.	Born else- where.
Ontario.....	77·6	18·4	4·0	80·8	15·5	3·7
Quebec.....	94·3	3·8	1·9	94·5	3·7	1·8
Nova Scotia.....	93·6	5·4	1·0	94·1	4·8	1·1
New Brunswick.....	90·2	7·8	2·0	93·1	5·2	1·7
Manitoba.....	73·5	13·2	13·3	70·8	18·5	10·7
British Columbia.....	70·7	12·1	17·2	57·9	21·5	20·6
Prince Edward Island.....	91·2	8·1	0·7	94·1	5·2	0·7
The Territories.....	95·5	0·5	4·0	80·9	13·0	6·1
Canada.....	85·9	11·1	3·0	86·6	10·1	3·3

264. The proportion of native-born has increased in the four older provinces and in Prince Edward Island, while it has decreased very considerably in the newer portions of the Dominion, showing that those portions are largely settled by immigration from outside the country. Manitoba has evidently received a very large proportion of her increased population from the other provinces.

265. In the United States the foreign-born were 14.77 per cent of the whole population in 1890, against 13.32 per cent in 1880, leaving the native-born 85.23 per cent in 1890, and 86.68 per cent in 1880. Canada has, therefore, a somewhat larger proportion of its inhabitants native-born, and has increased the proportion in the decade 1881-1891, while the United States decreased their proportion of native-born in the same decade. Including those born under the British flag in other parts of the Empire with the native-born, there is only 3.3 per cent of the population of Canada that is foreign-born.

266. The degree to which intermingling of the people has taken place is seen in the following :—

PROVINCES.	BORN			
	In the Province.	In other Provinces.	In other British Possessions.	In Foreign Countries.
British Columbia .....	36,701	20,150	21,109	20,213
Manitoba .....	50,648	57,369	28,294	16,195
New Brunswick .....	286,926	12,228	16,744	5,365
Nova Scotia .....	415,221	8,669	21,689	4,817
Ontario .....	1,640,131	68,571	320,037	76,582
Quebec .....	1,387,206	19,298	54,796	27,225
Prince Edward Island .....	99,386	3,266	6,703	723

267. Ontario contributed 11,658 of its sons and daughters to British Columbia, 46,620 to Manitoba, 344 to New Brunswick, 738 to Nova Scotia, 105 to Prince Edward Island, 15,541 to Quebec and 13,594 to the Territories; in all 88,600.

268. Quebec sent 2,567 to British Columbia, 7,555 to Manitoba, 3,602 to New Brunswick, 571 to Nova Scotia, 58,772 to Ontario, 191 to Prince Edward Island and 1,829 to the Territories; in all 75,087 persons.

269. Nova Scotia sent 18,475 persons of "light and leading" to the other provinces, 2,656 going to British Columbia, 1,402 to Manitoba, 5,527 to New Brunswick, 4,659 to Ontario, 1,950 to Prince Edward Island, 1,402 to Quebec and 879 to the Territories.

270. New Brunswick sent 13,695 persons to the other provinces, 1,767 going to British Columbia, 718 to Manitoba, 5,522 to Nova Scotia, 2,763 to Ontario, 1,008 to Prince Edward Island, 1,511 to Quebec and 406 to the Territories.

271. Prince Edward Island sent 6,717 persons to the other provinces, 535 finding lodgment in British Columbia, 234 in Manitoba, 2,718 in New Brunswick, 1,694 in Nova Scotia, 813 in Ontario, 497 in Quebec and 226 in the Territories.

272. There has thus been a very considerable movement of population between the provinces, the general trend being, of course, from the east to the west.

273. The religions of the people of Canada as ascertained by the census of 1891 are given in the following tables :—

## RELIGIONS OF THE PEOPLE, BY PROVINCES, 1891.

DENOMINATION.	Ontario.	Quebec.	Nova Scotia.	New Brunswick.	Manitoba.	British Columbia.	Prince Edward Island.	N. W. Territories.	Canada.
Roman Catholics.....	358,300	1,201,709	122,422	115,961	20,571	20,843	47,837	14,344	1,992,017

Baptists, Free Will.....	7,869	1,127	10,377	24,674	278	130	512	149	45,116
Tinkers.....	1,269	10	14	15	5	8	4	9	1,274
Brethren.....	9,343	1,129	242	234	389	166	.....	134	11,637
Lutherans.....	45,029	1,485	5,882	377	6,545	2,983	3	2,678	63,982
Congregational.....	16,879	4,296	3,112	1,036	1,815	775	11	233	28,157
Disciples.....	9,106	20	1,728	1,003	261	62	531	52	12,763
Adventists.....	447	3,364	1,651	715	32	109	22	14	6,354
Unitarians.....	776	554	115	147	74	79	10	22	1,777
Universalists.....	1,094	396	396	259	5	45	24	7	3,186
Protestants.....	2,938	2,342	47	22	1,874	286	9	4,735	12,253
Salvation Army.....	10,320	297	1,377	993	339	298	180	85	13,949
Quakers.....	4,350	38	41	17	124	38	8	34	4,650
Jews.....	2,501	2,703	31	73	743	277	1	85	6,414
Other denominations.....	23,934	710	482	376	448	597	620	589	33,756
Not specified.....	24,078	2,882	2,231	1,163	4,824	16,216	243	37,718	80,355
Totals.....	2,114,321	1,488,535	450,366	321,293	152,506	98,173	109,078	98,967	4,883,239

274. The religions of the people in the unorganized territory, as far as could be ascertained, were: Church of England, 1,800; Roman Catholic, 1,336; Methodists, 178; Presbyterians, 51; Lutherans, 2; Unitarians, 4; Protestants, 15, and not specified, 28,782.

275. The number of Pagans or Indians still adhering to the belief of their fathers, according to the report of the Department of Indian Affairs, 1893, was 16,427, distributed as follows:—

Ontario .....	1,258
Manitoba .....	3,083
British Columbia .....	4,869
The Territories .....	7,217
	<hr/> 16,427

The exact number cannot be definitely ascertained.

276. The following table is a comparative statement of the number of the leading denominations in 1881 and 1891, showing also the proportion each denomination bore to the whole population at each census:—

RELIGIONS.	1881.		1891.	
	Number.	Proportion to Total Population.	Number.	Proportion to Total Population.
Roman Catholics .....	1,791,982	41·43	1,992,017	41·21
Methodists .....	742,981	17·18	847,765	17·54
Presbyterians .....	676,165	15·63	755,326	15·63
Church of England .....	577,414	13·35	646,059	13·37
Episcopal .....	296,525	6·85	303,839	6·29
Lutherans .....	46,350	1·07	63,982	1·32
Congregationalists .....	26,900	·62	28,157	·58
Baptists .....	20,193	·47	12,763	·26
Brethren .....	8,831	·20	11,637	·24

## INDUSTRIAL ESTABLISHMENTS.

278. The census definition of an industrial establishment is "any place where one or several persons are engaged in manufacturing, altering, making up or changing from one shape into another, materials for sale, use, or consumption." This definition is the one which guided the enumerators in the census of 1891, and also in the census of 1881 and that of 1871.

The object aimed at in each of the three census-takings is the same, viz., to obtain full statistics of the small as well as the large industries of the country. The chief characteristics of the country's development during the decade 1881-91 appear, from the returns of the census, to be 1st, the springing of numerous small industries, and 2nd, the great increase in the large industries having an output of \$50,000 and upwards. With regard to the first, that was a characteristic of the country's growth in

1881, but not so marked a characteristic as was shown in 1891, ten years after. Fault has been found with the census of 1891 because so many industries employing one or two hands were taken. They were in the country. The enumerators had for their guidance the same definition as that placed in the hands of the enumerators of 1881 for their guidance. They would not have done their sworn duty if they had not taken these small industrial establishments.

The Statistical Branch of the Department of Agriculture exercised great care in compiling the returns of the enumerators, and cut out all very small industries where the output, though making a large sum in the aggregate, was in each individual case evidently an adjunct to a regular occupation, rather than the occupation by which a livelihood was obtained.

279. For the purpose of presenting the results of the census of 1891 in as compact a form as possible, the industrial establishments have been grouped together, not with scientific accuracy but with the design of bringing together in the groups such industries as are more or less allied to each other, so that comparison with similar groups, as obtained by the census of 1881, can be made.

These groups are arranged alphabetically for convenience, and give particulars of number of establishments, number of employees, annual amount of wages paid, and annual value of output.

#### 280.—ARMS AND AMMUNITION.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Cartridge-making .....	4	610,000	273	85,597	492,555
Dynamite works .....	2	4,000	3	1,500	9,500
Gunpowder mills .....	7	406,925	152	68,350	547,000
Gunsmithing .....	41	86,086	67	19,947	56,150
Census of 1891—Total .....	54	1,107,011	495	175,394	1,105,205
Census of 1881—Total .....	41	189,650	146	62,847	309,755

The chief change in the above is in cartridge-making, the Government having established a factory in Quebec in 1882.

## 281.—BOOKS AND STATIONERY.

INDUSTRY.	No. of Establishments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Bank-note engraving.....	1	200,000	100	60,000	140,000
Book-binding.....	81	810,460	1,323	407,164	1,170,623
Electro-stereotyping.....	1	15,000	40	20,000	45,000
Engraving and lithographing.....	47	744,585	646	265,747	782,770
Engravers' supplies.....	1	1,700	2	1,000	5,000
Printing and publishing.....	589	8,689,686	7,705	3,099,632	8,318,094
Stationery.....	3	79,000	90	22,000	92,000
Census of 1891—Total.....	723	10,540,431	9,906	3,875,543	10,553,487
Census of 1881—Total.....	489	5,619,810	6,975	2,256,055	6,792,830

The principal development of the above has been in printing and publishing, these industries having increased by 194.

## 282.—CARRIAGES, &amp;c.

INDUSTRY.	No. of Establishments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Carriage and waggon making....	3,336	8,029,621	9,056	2,999,572	9,744,416
Carriage top making.....	2	43,075	42	20,350	79,680
Hub and spoke making.....	8	106,895	82	30,010	105,400
Infant and baby chairs making..	4	51,300	139	43,400	145,500
Rolling stock.....	19	2,592,984	5,018	2,235,524	9,460,525
Ferret net works.....	1	13,858	5	2,400	13,600
Whip factories.....	14	80,552	120	38,690	162,460
Census of 1891—Total.....	3,384	10,918,285	14,462	5,369,946	19,711,581
Census of 1881—Total.....	3,168	5,443,893	11,939	3,583,327	10,588,847

In this group there has been general growth and considerable specialization of industries, 15 industrial establishments having been taken which did not appear in all the returns of 1881.

## 283.—CHEMICALS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Baking powder and flavouring extracts .....	24	321,550	216	98,925	671,150
Boiler compounds .....	1	2,000	1	500	1,200
Chemical establishments .....	135	1,950,406	907	339,711	2,008,100
Dyeing and scouring .....	72	355,186	292	80,890	345,504
Fertilizers .....	1	.....	30	5,000	20,000
Hair works .....	12	23,180	30	6,545	41,850
Ink making .....	3	26,700	19	7,538	55,560
Litharge works .....	1	1,600	2	800	3,000
Methylated spirits .....	1	8,500	3	2,400	80,000
Patent medicines .....	116	275,486	307	101,000	789,400
Photographers .....	327	575,069	708	228,738	849,126
Photographic supplies .....	4	16,775	19	7,500	22,150
Salt works .....	20	408,120	247	67,690	342,930
Superphosphates .....	14	163,450	108	30,801	244,469
Vaseline .....	1	10,000	5	3,000	30,000
Washing compounds .....	1	105	1	600	1,050
Census of 1891—Total .....	733	4,138,127	2,895	981,628	5,505,419
Census of 1881—Total .....	350	1,385,819	981	324,193	2,452,771

In this group, chemical establishments, photographic galleries and patent medicines show the chief increase; salt works diminished by 8.

## 284.—DRINKS AND STIMULANTS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Aerated waters .....	188	939,371	677	205,229	946,715
Brewers and malsters .....	150	8,533,164	1,885	906,681	5,955,253
Cider making .....	176	142,845	323	47,179	187,265
Cigar factories .....	112	1,073,238	3,220	976,230	3,367,204
Cocoa and chocolate making .....	2	34,500	17	6,000	58,000
Coffee and spice mills .....	31	532,641	168	74,033	1,119,010
Condensed milk .....	1	15,000	25	7,630	83,000
Distilleries .....	8	7,054,000	404	178,950	2,199,000
Sorghum syrups, &c. ....	15	26,290	37	7,292	56,892
Sugar refineries .....	8	5,924,400	1,927	709,811	17,127,100
Tobacco working .....	37	2,158,150	2,105	485,252	2,375,321
Wine making .....	41	396,475	150	37,956	254,489
Census of 1891—Total .....	769	27,430,074	10,938	3,642,242	35,729,826
Census of 1881—Total .....	538	19,231,321	7,294	2,054,832	20,078,306

In this group there has been great growth in the manufacture of aerated waters. Breweries have increased by 6. Tobacco and cigars show very considerable increase. Distilleries have decreased by 6. Wine-making establishments have increased by 31.

## 283.—FIBROUS MATERIAL.

INDUSTRY.	No. of Establishments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Asbestos work .....	3	32,250	23	7,850	32,500
Bag factories .....	2	141,090	52	18,350	265,800
Cardage, rope and twine .....	21	2,370,395	819	219,897	1,723,534
Fishing tackle .....	42	13,674	73	9,344	36,158
Flax and scutching mills .....	50	489,663	1,521	234,677	709,115
Net making .....	43	812	101	4,060	11,022
Sail .....	55	68,031	166	56,206	244,940
Tent and awnings .....	32	119,410	206	76,874	425,902
Census of 1891—Total .....	248	3,235,325	2,961	627,258	3,448,971
Census of 1881—Total .....	60	962,550	1,385	263,925	1,258,472

In this group there has been a great development. Tents and awnings have increased from 2 establishments in 1881 to 32 in 1891. Sail and net-making do not appear in the returns of 1881 as separate industries. They may be in the "Miscellaneous" of 1881, among the 284 industrial establishments, the details of which examination shows impossible to separate.

## 286.—FOODS—VEGETABLE.

INDUSTRY.	No. of Establishments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Bakeries .....	1,656	4,781,605	4,551	1,607,335	11,148,567
Chickory kilns .....	4	3,110	5	745	2,650
Confectionery .....	280	2,284,284	2,492	669,218	4,284,631
Dried fruits and vegetables .....	36	96,250	431	30,955	146,236
Flour and grist mills .....	2,550	23,039,041	6,317	2,366,931	52,423,286
Fruit and vegetable canning .....	52	553,800	2,241	165,494	891,542
Macaroni and vermicelli .....	1	5,000	20	2,500	9,000
Pickle making .....	17	94,773	89	20,090	119,700
Prepared cattle food .....	3	2,500	6	2,050	4,530
Preserved fruit and jellies .....	8	17,720	63	8,520	38,236
Preserved food .....	1	2,000	3	2,000	8,000
Vinegar works .....	27	440,385	302	109,480	685,550
Yeast making .....	3	22,300	53	17,235	45,000
Census of 1891—Total .....	4,638	31,342,768	16,573	5,002,553	69,806,988
Census of 1881—Total .....	3,950	17,777,022	19,111	3,810,662	54,282,140

The growth in this group has been general. Bakeries and confectioneries have increased by 756. Part of this increase is due to the specialization of the business, confectioners in 1881 having been bakers as well. Flour and grist mills show increase. Preserved articles of food in 1881 returned 339 establishments, but as some of these included animal foods as well as vegetable, some of them should be credited to the next class. It is impossible to separate them, the returns of 1881 not specifying in sufficient detail the nature of the raw material used. For general purposes of comparison, the classes of vegetable and animal food should be taken together. This has been done at the end of animal foods. It will be seen that the industries grouped under these two heads have attained large proportions. Notwithstanding the reduction in the price of flour, in the ten years, the value of the output of the flour mills in the census returns of 1891 is nearly \$11,000,000 more than in 1881. Fruit and vegetable canning and pickle making have developed at a great rate.

## 287.—FOODS—ANIMAL.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Cheese factories.....	1,565	2,586,599	3,013	753,067	9,784,288
Creameries.....	170	540,598	425	106,303	913,591
Fish canning.....	390	2,894,224	13,781	974,832	3,091,293
" curing.....	4,627	3,133,072	15,704	1,066,584	4,942,302
Meat canning.....	1	12,000	9	2,500	7,000
" curing.....	527	2,173,977	1,690	503,053	7,125,831
Census of 1891—Total.....	7,280	11,339,570	34,622	3,406,339	25,864,305
Census of 1881—Total.....	988	2,568,129	3,176	622,141	9,890,065
Total animal and vegetable foods, 1891.....	11,918	42,682,338	51,195	8,408,892	95,671,293
Total animal and vegetable foods, 1881.....	4,938	20,371,551	22,293	4,432,803	64,172,205

The great increase in cheese factories has been the most important change in this group, as may be seen from the following comparison with the census of 1881:—

	1881.	1891.
Number of factories.....	709	1,565
Capital invested.....	\$ 1,021,435	\$ 2,586,599
Persons employed.....	2,003	3,013
Wages paid.....	\$ 382,615	\$ 753,067
Value of raw material.....	4,264,798	6,804,611
Value of output.....	5,464,454	9,784,288

The increase in creameries, or butter factories, was also very great, the number rising from 46 to 170, and the output from \$341,478 to \$913,591. There has likewise been great development in all the canning industries, including meat and fish.

## 288.—FURNITURE AND HOUSES AND BUILDINGS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Cabinet and furniture.....	1,286	6,094,435	7,180	2,432,771	7,706,093
Cement mills.....	19	420,305	243	85,960	251,175
Elevator factories.....	6	88,475	79	33,875	117,600
House decorating.....	1	77,000	45	27,000	54,000
Lime kilns.....	1,184	1,405,104	2,575	465,974	1,444,453
Mastel and grate making.....	4	187,200	240	79,800	562,400
Mattress making.....	42	78,569	197	58,286	286,053
Paints and varnish making.....	72	1,462,275	537	213,320	1,933,825
Painting and glazing.....	405	606,362	1,408	500,537	1,517,470
Plaster and stucco.....	68	377,672	403	134,943	307,086
Quilting factory.....	1	7,000	3	1,000	10,000
Roofing material.....	16	221,100	360	142,930	784,160
Sash, doors and blinds.....	608	7,108,076	5,807	2,309,267	9,891,510
Spring bed making.....	26	79,582	106	29,093	127,536
Census of 1891—Total.....	3,738	18,213,155	19,183	6,514,756	24,993,361
Census of 1881—Total.....	3,095	7,492,908	12,809	3,423,150	13,777,335

There has been fair development in this group. The number of lime kilns was less by 90 in 1891 than in 1881. Sashes, doors and blinds were made by 332 more establishments in 1891 than in 1881. Cabinet and furniture show 117 more establishments.

## 289.—GOLD AND SILVER.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Electro-plating.....	10	386,775	239	101,615	458,400
Enamel working.....	1	13,500	5	1,500	16,000
Gold leaf making.....	1	13,200	8	3,000	18,400
Gold and silver smithing.....	23	31,925	44	25,025	71,210
Jewel case making.....	1	1,650	8	850	2,800
Watchmaking and jewellery....	655	2,540,081	1,619	648,342	2,523,691
Census of 1891—Total.....	691	2,987,131	1,923	780,332	3,090,501
Census of 1881—Total.....	359	668,616	948	304,942	1,175,591

In this class there is also an increase in specialized industries, and a large increase in the number of manufacturing watchmakers and jewellers.

## 290.—LEATHER, BOOTS AND SHOES, &amp;c.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Belt and hose.....	6	251,000	143	62,640	511,000
Boots and shoes.....	5,398	9,648,639	18,041	4,916,464	18,990,381
Harness and saddlery.....	1,553	2,546,583	3,069	1,001,629	3,988,001
Last and peg.....	11	67,000	94	28,630	72,500
Leather lace.....	2	20,400	44	9,000	35,000
Morocco leather.....	1	35,000	45	15,000	150,000
Tanneries.....	802	6,322,963	4,263	1,522,007	11,422,860
Census of 1891—Total.....	7,773	18,891,585	25,699	7,555,370	35,169,742
Census of 1881—Total.....	6,813	14,321,034	27,513	6,722,730	36,505,272

There is in the above class an increase in the total number of establishments, in the capital invested, and in the wages paid, but a decrease in the number of employees and in the total output. The quantity of these manufactures has doubtless greatly increased, but the value has diminished. Boots and shoes are much below the price in 1881, and No. 1 hides, which averaged at wholesale in Montreal, in 1881, \$9.70, averaged in 1891 only \$5.59 per 100 pounds. The chief decrease has been in tanneries, of which there were 1,012 establishments in 1881, and 802 in 1891, while their output had fallen from \$15,144,535 in 1881, to \$11,422,860 in 1891.

## 291.—LIGHTING.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Electric appliances.....	8	173,448	186	71,500	329,700
Electric light works.....	80	4,113,771	763	297,684	1,154,149
Electric supplies.....	15	1,389,365	241	96,500	535,132
Fish oil refineries.....	35	64,113	189	21,311	71,305
Gas works.....	49	13,119,119	1,164	496,661	2,796,697
Lamps and chandeliers.....	3	74,300	55	19,075	45,150
Lanterns.....	1	12,000	15	7,000	20,000
Match factories.....	12	336,650	1,039	143,064	434,953
Oil refineries.....	21	1,873,918	276	140,370	2,064,115
Patent fuel.....	1	2,630	6	1,800	14,500
Street lamps.....	1	176,000	8	1,000	20,000
Census of 1891—Total.....	226	21,335,314	3,942	1,295,965	7,485,721
Census of 1881—Total.....	108	7,882,037	2,169	611,769	5,843,616

In this group considerable changes have taken place during the ten years. Electricity has been given a commanding position, and though gas works

have increased from 36 in 1881 to 49 in 1891, and their continued value to the wage-earner is seen in the fact that 1,164 hands were employed in 1891, against 1,062 in 1881, yet against the 2 employees returned in 1881 as connected with electricity, there were 1,190 wage-earners in 1891.

## 292.—MACHINES, TOOLS AND IMPLEMENTS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Agricultural implements .....	221	8,624,803	4,543	1,812,050	7,493,624

Wax works .....	50	1,138,815	871	331,473	1,973,600
Census of 1891—Total. . . . .	12,631	55,598,434	49,422	17,815,445	62,016,178
Census of 1881—Total. . . . .	10,446	27,169,043	37,274	11,067,787	36,654,109

In this important group the great proportion of the establishments are blacksmiths' shops, of which there were 9,423 in 1891, against 7,986 in 1881, or 74.6 per cent of the total of the group in 1891, and 76.4 per cent in 1881. Agricultural implement making decreased the number of establishments in 1891 compared with 1881 by 33, but the employees increased by 887 and the output by \$3,088,227. The number of establishments reporting manufacture of sewing machines decreased by 5, and the output by \$257,407. Bicycle factories appear for the first time. Foundries and machine shops show considerable increase. Specialization of industries is shown by the increase in the number of industries in this group, there having been returned 45 separate industries in 1891 and 34 in 1881.

## 293.—MATTERS—ANIMAL.

INDUSTRY.	Number of Establishments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Beeswax refining .....	1	3,300	2	800	4,000
Bone crushing mills .....	5	5,686	7	1,625	15,360

Taxidermy .....	31	8,127	34	8,208	25,125
Wax candles .....	3	3,086	7	1,485	6,400
Wax working .....	12	3,248	20	3,558	7,732
Census of 1891—Total ...	256	1,630,737	1,516	524,836	3,379,381
Census of 1881—Total ...	192	1,446,423	1,552	398,912	2,904,274

In this group the brush and broom industry—a mixed industry, using both animal and vegetable matter—shows a decrease of 2 in the number of establishments, an increase of \$37,276 in capital invested, a decrease of 176 in the number of employees, but an increase of \$109,245 in the value of the output. These changes are probably due to increased efficiency of machinery. Glue factories show a decrease in number, in capital, in hands employed, in wages and in output.

## 294.—MATTERS—VEGETABLE.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Asheries .....	128	113,019	215	45,139	153,441

Trunk and box .....	62	659,805	824	253,863	1,042,733
Wall paper .....	4	366,656	139	56,600	355,000
Wood turning .....	127	469,510	758	204,265	621,096
Census of 1891—Total .....	14,781	78,554,531	83,328	21,404,809	84,638,612
Census of 1881—Total .....	11,102	34,145,436	60,316	11,989,290	53,535,613

Under the head of "Vegetable Matters" are grouped the important industries employing material of vegetable origin—the great industries connected with wood, with the manufacture of paper, and others.

Pot and pearl asheries show a decrease from 225 establishments in 1881 to 128 in 1891, and the output has shrunk in value from \$345,096 in 1881

to \$153,441 in 1891. The chief increases are in carpentering establishments (2,124), cooperages (94), planing and moulding (255), saw-mills (276), shingle-mills (76), wood-turning (102), pulp-mills (19), wind-mills (68), and rubber factories (11). Paper-mills show a decrease of 2 in number of establishments, but an increase in every other particular. Specialization is also apparent in this group, there being 10 more distinct industries in the group in 1891 than in it in 1881.

## 295.—MATHEMATICAL, &amp;c., INSTRUMENTS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Mathematical .....	3	2,700	8	2,485	5,875
Optical .....	3	5,740	9	4,250	13,500
Spectacles .....	1	5,040	2	800	1,800
Surgical .....	11	34,075	33	11,875	53,800
Census of 1891—Total .....	18	47,555	52	19,410	74,975
Census of 1881—Total .....	10	81,900	74	23,180	66,200

In this group there has been an increase in the number of establishments and in the output, but a decrease in other particulars. Mathematical instrument making employed in 1891 a capital of \$2,700 against \$27,500 in 1881; 8 hands against 22, and had an output of \$5,875 against an output of \$21,000 in 1881.

## 296.—MUSICAL INSTRUMENTS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Musical instruments .....	89	2,378,633	2,170	902,423	3,363,713
Piano actions .....	3	11,000	34	10,800	29,500
Census of 1891—Total .....	92	2,389,633	2,204	973,223	3,393,213
Census of 1881—Total .....	44	669,379	941	417,833	1,220,195

In this group the growth is not marked by any peculiarity beyond the tendency to specialization observable in all the groups and indicated in this group by the establishment of the manufacture of "piano actions," an industry not reported in the returns for 1891.

## 297.—SHIPS AND BOATS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Block making.....	30	31,035	77	19,795	73,865
Boat-building.....	478	421,395	832	179,692	477,522
Mast and spar making.....	14	58,065	45	15,620	59,800
Ship-yards.....	147	2,045,456	3,191	998,615	3,101,275
Census of 1891—Total.....	669	2,555,951	4,145	1,213,122	3,712,462
Census of 1881—Total.....	539	2,899,752	5,271	1,339,956	4,319,070

In this group the number of establishments has increased. Capital invested, number of employees, wages paid and value of output have decreased. The increase in establishments is due to increased boat-building, employing 262 more men in 1891 than in 1881. Ship-yards have decreased in number by 175, and in the value of their output by \$1,042,558. In boat-building Ontario had in 1891 an output of the value of \$222,164, and in 1881 of \$72,178. British Columbia in 1881 built boats valued at \$1,000, and in 1891 the boats built had a value of \$100,195.

## 298.—STONE, CLAY AND GLASS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Brick and tile.....	697	3,513,036	6,737	1,428,489	3,584,713
Ceramic decorating.....	2	24,500	31	5,900	37,000
Glass works.....	12	387,290	933	348,816	697,150
Marble and stone cutting.....	497	2,263,232	3,773	1,410,337	4,535,674
Facing material.....	5	829,800	237	48,800	227,850
Potteries.....	82	720,872	540	168,928	478,270
Stone masons.....	10	233,425	177	84,250	441,750
Stained glass works.....	5	12,800	50	22,600	67,800
Terra cotta.....	4	377,300	130	62,000	151,000
Census of 1891—Total.....	1,314	8,362,255	12,608	3,580,620	10,221,207
Census of 1881—Total.....	989	2,515,347	7,726	1,752,005	4,600,297

In this group establishments for the manufacture of bricks and tiles increased by 137, the employees by 2,610 hands, and the year's output by \$2,012,821. Establishments for marble and stone cutting increased by 188. Potteries show a decrease of 14 in establishments. Grindstone works and stoneware-pipe making were found in 1881 and not in 1891.

## 299.—TEXTILE FABRICS AND DRESS.

INDUSTRY.	No. of Establish- ments.	Capital.	No. of Employees.	Wages.	Value of Output.
		\$		\$	\$
Altar linen .....	3	160	6	568	2,750
Artificial flowers .....	6	445	7	910	1,942

Wool yarn .....	1	28,000	26	8,000	33,000
Census of 1891—Total .....	15,458	43,056,154	71,827	15,547,726	67,172,634
Census of 1881—Total .....	6,265	20,198,835	44,337	7,716,226	40,808,843

This group includes cotton mills, woollen mills, millinery, fur-dressing, hat and cap making, shirts and collars, clothing and the variety of manufactures needed to keep the men, women and children warm and well dressed. The increases in establishments are chiefly in dressmaking and millinery, and in tailoring and clothing, the returns showing an increase of 6,908 establishments. These returns have been severely criticised. They

have, therefore, been the most closely scrutinized in the Statistics Branch, without, however, much change being required. The seamstress, with her sewing machine, making a living and supporting others by her labour, is as much a wage-earner and a contributor to the sum total of the value of the industrial output of the country as the sewing girl in a factory. There was in some cases a tendency on the part of enumerators to place a value upon the room the seamstress occupied, as an industrial establishment, but such tendency was strictly suppressed. All her capital was her sewing machine, and that was capital invested just as much in the instance where there was but one sewing machine as in the instance where there were a dozen in use in one building. The same general directions were given in 1891 as in 1881 in this matter, and if more dressmaking and millinery establishments, big and little, were returned, the presumption is that they were in existence and were, therefore, rightly returned.

## 300.—MISCELLANEOUS.

INDUSTRY.	No. of Establishments.	Capital.	Number of Employees.	Wages.	Value of Output.
		\$		\$	\$
Artists' materials .....	3	240	4	735	1,370

Ventilators .....	1	600	1	500	850
Census of 1891—Total....	487	932,404	1,498	348,433	1,161,617
Census of 1881—Total....	297	959,781	1,839	385,583	1,706,067

301. In this group there is very little chance for comparison of 1891 with 1881, the "Miscellaneous" having been given in the lump, without detail in the compilation of 1881. A few details have been secured. The

returns for 1891 show 207 establishments for the manufacture of Indian wares against 94 such establishments in 1881.

There were 4 dentistry establishments reported in 1881 and 154 in 1891. Either there was a negligence in 1881 in recording these establishments, or there has been a great development in this home industry in ten years.

302. Summing up the groups, the returns show that in 1891 there were in all 75,968 industrial establishments having an invested capital of \$354,620,750, employing 370,256 hands, distributing to wage-earners \$100,663,650 a year, and producing articles whose total value was \$476,258,886.

Of the capital invested, \$31,466,324 was in land ; \$60,303,043 in buildings ; \$81,401,247 in machinery and tools, and \$181,450,136 was capital other than "fixed."

Of the employees, 273,424 were men, 70,280 women, 19,476 boys and 7,076 girls under 16 years.

303. The following table gives the above details by provinces :—

# RESULTS OF A CENSUS.

199

Provinces.	Number of Establish-ments.	FIXED CAPITAL.			Working Capital.	HANDS EMPLOYED.				Total Wages during the Year.	Total Value of Raw Material.	Total Value of Articles Produced.
		In Land.	In Buildings.	In Machinery and tools.		OVER 16 YEARS.		UNDER 16 YEARS.				
						Men.	Wo-men.	Boys.	Girls.			
British Columbia.....	770	2,153,106	1,830,650	3,256,906	7,157,732	9,615	1,331	404	157	3,586,897	5,119,258	11,999,928

Quebec .....	23,037	10,421,633	21,718,806	26,308,945	59,841,711	84,936	22,808	6,537	3,018	30,699,115	85,630,406	153,195,583
Territories .....	375	108,650	228,506	323,346	1,042,677	994	50	34	3	426,153	846,017	1,827,310
Canada .....	75,968	31,466,324	60,303,043	81,401,247	181,450,136	273,424	70,280	19,476	7,076	100,663,650	256,119,042	476,198,886

These figures differ somewhat from those given in the Census Bulletin No. 10. They are the result of a careful revision, industry by industry, of the industrial returns of 1891.

## INDUSTRIAL GROUPING, ON BASIS OF OUTPUT.

304. Taking, first, the 10-year period 1881-91, the census of 1881 and that of 1891 show the following results :—

	1881.	1891.	Increase.	Per cent
No. of establishments.....No.	49,731	75,968	26,237	52.6
Capital invested.....\$	164,957,423	354,620,750	189,663,327	115.0
No. of emplo. ees.....No.	254,894	370,256	115,362	45.2
Wages paid.....\$	59,401,702	100,663,650	41,261,948	69.4
Cost of raw material.....\$	179,329,193	256,119,042	76,789,849	42.8
Value of output.....\$	309,731,867	476,198,886	166,527,019	53.8

305. Divided into groups, the following results appear :—

## DEVELOPMENT OF MANUFACTURES.

(1) Number of industrial establishments having an output of \$50,000 and over :—			
1891.....	1,675		
1881.....	1,108		
Increase 1891 over 1881.....	567		
Increase per cent.....	51.1		
(2) Number of industrial establishments having an output of \$25,000 to \$50,000 :—			
1891.....	1,208		
1881.....	966		
Increase 1891 over 1881.....	242		
Increase per cent.....	24.9		
(3) Number of industrial establishments having an output of \$12,000 to \$25,000 :—			
1891.....	2,679		
1881.....	2,061		
Increase 1891 over 1881.....	618		
Increase per cent.....	30		
(4) Number of industrial establishments having an output of \$2,000 to \$12,000 :—			
1891.....	19,629		
1881.....	13,524		
Increase 1891 over 1881.....	6,105		
Increase per cent.....	45.3		
(5) Number of industrial establishments having an output of \$500 to \$2,000 :—			
1891.....	27,224		
1881.....	17,818		
Increase 1891 over 1881.....	9,406		
Increase per cent.....	52.9		
(6) Number of industrial establishments having an output under \$500 :—			
1891.....	23,553		
1881.....	14,253		
Increase 1891 over 1881.....	9,300		
Increase per cent.....	65.3		
Total industrial establishments :—			
1891.....	75,968		
1881.....	49,731		
Increase 1891 over 1881.....	26,237		
Increase per cent.....	52.8		

## 306.—DEVELOPMENT OF MANUFACTURES.

## CAPITAL INVESTED.

(1) Capital invested in factories having an output of \$50,000 and over :—

1891.....	\$ 207,147,467
1881.....	84,961,653
Increase 1891 over 1881.....	\$ 123,185,814
Increase per cent .....	143·8

(2) Capital invested in factories having an output of \$25,000 to \$50,000 :—

1891.....	\$ 30,152,282
1881.....	16,142,669
Increase 1891 over 1881.....	\$ 14,009,613
Increase per cent .....	86·8

(3) Capital invested in factories having an output of \$12,000 to \$25,000 :—

1891.....	\$ 31,596,006
1881.....	17,223,465
Increase 1891 over 1881.....	\$ 14,367,541
Increase per cent .....	83·4

(4) Capital invested in factories having an output of \$2,000 to \$12,000 :—

1891.....	\$ 60,178,387
1881.....	33,660,394
Increase 1891 over 1881.....	\$ 26,517,993
Increase per cent .....	78·8

(5) Capital invested in factories having an output of \$500 to \$2,000 :—

1891.....	\$ 20,645,997
1881.....	10,488,064
Increase 1891 over 1881.....	\$ 10,157,933
Increase per cent .....	96·8

(6) Capital invested in factories having an output under \$500 :—

1891.....	\$ 4,900,611
1881.....	2,476,178
Increase 1891 over 1881.....	\$ 2,424,433
Increase per cent .....	97·3

Total capital invested :—

1891.....	\$ 354,620,750
1881.....	164,957,423
Total Increase 1891 over 1881.....	\$ 189,663,327
“ Increase per cent.....	115·0

## 307.—DEVELOPMENT OF MANUFACTURES.

## NUMBER OF EMPLOYEES.

- (1) Number of employees in establishments having an output of \$50,000 and over

1891.....	139,080
1881.....	83,526
Increase 1891 over 1881.....	55,554
Increase per cent.....	66.8

- (2) Number of employees in establishments having an output of \$25,000 to \$50,000

1891.....	28,339
1881.....	22,386
Increase 1891 over 1881.....	5,953
Increase per cent.....	26.6

- (3) Number of employees in establishments having an output of \$12,000 to \$25,000

1891.....	36,118
1881.....	27,273
Increase 1891 over 1881.....	8,845
Increase per cent.....	32.4

- (4) Number of employees in establishments having an output of \$2,000 to \$12,000

1891.....	92,343
1881.....	68,208
Increase 1891 over 1881.....	24,135
Increase per cent.....	35.4

- (5) Number of employees in establishments having an output of \$500 to \$2,000 :

1891.....	45,446
1881.....	34,711
Increase 1891 over 1881.....	10,735
Increase per cent.....	30.9

- (6) Number of employees in establishments having an output under \$500 :—

1891.....	28,930
1881.....	18,790
Increase 1891 over 1881.....	10,140
Increase per cent.....	54.0

Total number of employees :—

1891.....	370,256
1881.....	254,894
Total Increase.....	115,362
" Increase per cent.....	45.2

## 308.—DEVELOPMENT OF MANUFACTURES.

## WAGES PAID.

## (1) Annual wage list of factories having an output of \$50,000 and over :—

1891.....	\$ 46,842,640
1881.....	23,964,796
Increase 1891 over 1881.....	\$ 22,877,844
Increase per cent.....	96·3

## (2) Annual wage list of factories having an output of \$25,000 to \$50,000 :—

1891.....	\$ 8,966,833
1881.....	5,942,881
Increase of 1891 over 1881.....	\$ 3,023,952
Increase per cent.....	50·9

## (3) Annual wage list of factories having an output of \$12,000 to \$25,000 :—

1891.....	\$ 10,352,514
1881.....	6,899,127
Increase of 1891 over 1881.....	\$ 3,953,387
Increase per cent.....	57·3

## (4) Annual wage list of factories having an output of \$2,000 to \$12,000 :—

1891.....	\$ 22,963,576
1881.....	15,211,140
Increase of 1891 over 1881.....	\$ 7,752,439
Increase per cent.....	51·0

## (5) Annual wage list of factories having an output of \$500 to \$2,000 :—

1891.....	\$ 8,971,506
1881.....	6,042,015
Increase of 1891 over 1881.....	\$ 2,929,491
Increase per cent.....	48·5

## (6) Annual wage list of factories having an output of under \$500 :—

1891.....	\$ 2,066,578
1881.....	1,341,743
Increase of 1891 over 1881.....	\$ 724,835
Increase per cent.....	54·0

## Total wages paid :—

1891.....	\$ 100,663,650
1881.....	59,401,702
Total Increase 1891 over 1881.....	\$ 41,261,948
" Increase per cent.....	69·4

## 309.—DEVELOPMENT OF MANUFACTURES.

## RAW MATERIAL.

- (1) Value of raw material used in factories having an output of \$50,000 and over

1891.....	\$ 155,460,492
1881.....	96,361,536
Increase 1891 over 1881.....	\$ 59,098,956
Increase per cent.....	61·3

- (2) Value of raw material used in factories having an output of \$25,000 to \$50,

1891.....	\$ 22,090,463
1881.....	19,885,835
Increase 1891 over 1881.....	\$ 2,204,628
Increase per cent.....	11·1

- (3) Value of raw material used in factories having an output of \$12,000 to \$25,

1891.....	\$ 23,925,078
1881.....	21,222,600
Increase 1891 over 1881.....	\$ 2,702,478
Increase per cent.....	12·7

- (4) Value of raw material used in factories having an output of \$2,000 to \$12,000

1891.....	\$ 43,572,071
1881.....	34,043,298
Increase 1891 over 1881.....	\$ 9,528,773
Increase per cent.....	28·0

- (5) Value of raw material used in factories having an output of \$500 to \$2,000

1891.....	\$ 9,434,414
1881.....	7,238,166
Increase 1891 over 1881.....	\$ 2,196,248
Increase per cent.....	30·3

- (6) Value of raw material used in factories having an output of under \$500:—

1891.....	\$ 1,636,524
1881.....	1,177,758
Increase 1891 over 1881.....	\$ 458,766
Increase per cent.....	39·0

Total value of raw material used:—

1891.....	\$ 256,119,042
1881.....	179,929,193
Total Increase 1891 over 1881.....	\$ 76,189,849
“ Increase per cent.....	53·8

## 310.—DEVELOPMENT OF MANUFACTURES.

## OUTPUT.

(1) Annual output of factories having an output of \$50,000 and over:—

1891.....	\$ 260,795,190
1881.....	153,767,771
Increase 1891 over 1881.....	\$ 107,027,419
Increase per cent.....	69.7

(2) Annual output of factories having an output of \$25,000 to \$50,000:—

1891.....	\$ 42,238,542
1881.....	33,482,170
Increase 1891 over 1881.....	\$ 8,756,372
Increase per cent.....	61.8

(3) Annual output of factories having an output of \$12,000 to \$25,000:—

1891.....	\$ 47,709,005
1881.....	36,808,242
Increase 1891 over 1881.....	\$ 10,900,763
Increase per cent.....	56.5

(4) Annual output of factories having an output of \$2,000 to \$12,000:—

1891.....	\$ 93,260,957
1881.....	64,939,604
Increase 1891 over 1881.....	\$ 28,321,353
Increase per cent.....	43.6

(5) Annual output of factories having an output of \$500 to \$2,000:—

1891.....	\$ 26,910,579
1881.....	17,520,397
Increase 1891 over 1881.....	\$ 9,390,182
Increase per cent.....	53.6

(6) Annual output of factories having an output under \$500:—

1891.....	5,284,613
1881.....	3,213,683
Increase 1891 over 1881.....	\$ 2,070,930
Increase per cent.....	64.5

Total annual output:—

1891.....	\$ 476,258,886
1881.....	309,731,867
Total increase 1891 over 1881.....	\$ 166,527,019
" increase per cent.....	53.8

311. The next step is to arrange these groups according to provinces. In connection with the redistribution is the fact that for the four original provinces of Ontario, Quebec, Nova Scotia and New Brunswick, there is in addition to the censuses of 1881 and 1891 the census of 1871.

312. In order to make such an analysis as would bring out the essential points of the census of the mechanical and manufacturing establishments of the country, and enable the government, the parliament and the people to gauge with accuracy the development of manufacturing in Canada, the 169,463 industries reported by the census enumerators of 1871, 1881 and 1891 were separated into groups, according to the value of the year's output in each of the census years.

These groups, five in number, are divided:—

Group 1.—Establishments having a yearly output of finished products of			
			under \$2,000.
" 2.	"	"	from \$2,000 to \$12,000.
" 3.	"	"	from \$12,000 to \$25,000.
" 4.	"	"	from \$25,000 to \$50,000.
" 5.	"	"	\$50,000 and over.

313. It was also deemed advisable to make a further analysis of group 1. Accordingly the 113,157 establishments in this group were sub-divided into the following:—

Sub-group A.—Establishments having a yearly output under \$200.			
" B.	"	"	from \$200 to \$500.
" C.	"	"	from \$500 to \$1,000.
" D.	"	"	from \$1,000 to \$2,000.

This analysis gives the means of comparing the figures for 20 years in the case of the four provinces, Ontario, Quebec, Nova Scotia and New Brunswick, which formed the original Confederation, and for 10 years in the case of the other provinces forming the Dominion of Canada as it existed in 1891.

The following table gives the grouping by provinces for the four provinces for the three censuses, and for the other provinces for two censuses.

		No. of Establishments.	Capital Invested.	No. of Employees.	Wages Paid.	Cost of Raw Material.	Value of Products.
GROUP 1.			\$		\$	\$	\$
British Columbia.	1881	196	148,335	228	54,564	49,247	147,842

314. Taking all the five groups together, the following are the returns by provinces :—

## PROVINCE OF ONTARIO.

—	1871.	1881.	1891.
Number of establishments . . . . .	20,961	23,070	32,151
Capital invested . . . . . \$	38,254,602	80,712,347	175,972,021
Number of employees . . . . .	89,937	118,277	166,326
Wages paid . . . . . \$	21,679,651	30,587,331	49,733,359
Cost of raw material . . . . .	65,780,827	91,174,756	128,142,371
Value of output . . . . .	115,649,747	158,045,669	239,781,926

## Increase in number of establishments—

20 years, 1871-91 . . . . .	53'4 p. c.
10 " 1871-81 . . . . .	10'0 "
10 " 1881-91 . . . . .	43'4 "

## Increase in capital invested—

20 years, 1871-91 . . . . .	360'0 "
10 " 1871-81 . . . . .	111'0 "
10 " 1881-91 . . . . .	249'0 "

## Increase in number of employees—

20 years, 1871-91 . . . . .	85'0 "
10 " 1871-81 . . . . .	31'4 "
10 " 1881-91 . . . . .	53'6 "

## Increase in wages paid—

20 years, 1871-91.....	129·2 p. c.
10 " 1871-81.....	41·1 "
10 " 1881-91.....	88·1 "

## Increase in raw material required—

20 years, 1871-91.....	94·8 "
10 " 1871-81.....	38·6 "
10 " 1881-91.....	56·2 "

## Increase in value of output—

20 years, 1871-91.....	107·3 "
10 " 1871-81.....	36·7 "
10 " 1881-91.....	70·6 "

315. Divided into groups, the returns for the province are :—

## ONTARIO.

## GROUP 1.

	1871.	1881.	1891.
Number of establishments.....	13,433	13,054	13,676
Capital invested..... \$	4,117,119	6,455,357	10,846,427
Number of employees.....	22,608	22,367	26,964
Wages paid..... \$	3,787,120	3,803,961	4,492,026
Cost of raw material..... "	3,630,457	3,938,913	4,722,677
Value of output..... "	9,780,230	10,166,278	14,137,328

## GROUP 2.

Number of establishments.....	5,804	7,746	10,454
Capital invested..... \$	10,992,222	19,550,634	31,167,224
Number of employees.....	28,790	37,623	45,529
Wages paid..... \$	6,930,482	9,262,445	12,327,018
Cost of raw material..... "	13,240,340	18,933,355	22,877,359
Value of output..... "	27,393,560	37,258,339	50,139,644

## GROUP 3.

Number of establishments.....	890	1,168	1,453
Capital invested..... \$	5,275,964	9,384,438	16,042,236
Number of employees.....	10,200	13,998	17,301
Wages paid..... \$	2,681,721	3,877,109	5,545,192
Cost of raw material..... "	9,264,185	12,395,475	13,242,574
Value of output..... "	15,639,679	20,784,727	25,825,342

## GROUP 4.

Number of establishments.....	436	534	652
Capital invested..... \$	5,064,153	8,066,828	14,761,508
Number of employees.....	7,614	10,182	12,764
Wages paid..... \$	2,202,766	2,991,659	4,321,842
Cost of raw material..... "	9,734,619	11,236,087	12,548,576
Value of output..... "	15,191,472	18,457,773	22,727,841

ONTARIO—*Concluded.*  
GROUP 5.

	1871.	1881.	1891.
Number of establishments.....	398	568	916
Capital invested..... \$	12,805,144	37,255,090	103,154,626
Number of employees.....	30,725	34,107	63,774
Wages paid..... \$	6,077,562	10,652,157	23,047,181
Cost of raw material.....	29,911,226	44,670,926	74,750,585
Value of output..... "	47,644,806	71,378,552	126,951,771

316. Eliminating the first group, being the group containing the industries of the province having under \$2,000 annual output, the Province of Ontario shows the following results :—

## ESTABLISHMENTS.

	1871.	1881.	1891.
Total number.....	20,961	23,070	32,151
Deduct Group 1.....	13,433	13,054	18,676
Groups 2-5.....	7,528	10,016	13,475

## CAPITAL INVESTED.

Total amount..... \$	38,254,602	80,712,347	175,972,021
Deduct Group 1..... "	4,117,119	6,455,357	10,846,427
Groups 2-5..... "	34,137,483	74,256,990	165,125,594

## NUMBER OF EMPLOYEES.

Total number.....	89,937	118,277	166,326
Deduct Group 1.....	22,608	22,367	26,964
Groups 2-5.....	67,329	95,910	139,362

## AMOUNT OF WAGES PAID.

Total amount..... \$	21,679,651	30,587,331	49,733,359
Deduct Group 1..... "	3,787,120	3,803,961	4,492,026
Groups 2-5..... "	17,892,531	26,783,370	45,241,333

## VALUE OF RAW MATERIAL USED.

Total value..... \$	65,780,827	91,174,756	128,142,371

Value of output.....	76,832,610	104,662,258	153,195,583

320. The above figures, being totals of the five groups for the Province of Quebec, give the following results :—

## Increase in number of establishments—

20 years, 1871-91.....	63.5 p. c.
10 " 1871-81.....	17.4 "
10 " 1881-91.....	46.1 "

## Increase in capital invested—

20 years, 1871-91.....	323.2 "
10 " 1871-81.....	111.5 "
10 " 1881-91.....	211.7 "

## Increase in number of employees—

20 years, 1871-91.....	76.2 "
10 " 1871-81.....	28.6 "
10 " 1881-91.....	47.6 "

## Increase in wages paid per employee—

20 years, 1871-91.....	148.1 "
10 " 1871-81.....	48.1 "
10 " 1881-91.....	100.0 "

## Increase in value of raw material used—

20 years, 1871-91.....	91.4 "
10 " 1871-81.....	40.0 "
10 " 1881-91.....	51.4 "

## Increase in value of output—

20 years, 1871-91.....	99.4 "
10 " 1871-81.....	36.2 "
10 " 1881-91.....	63.2 "

321. Divided into groups, the returns for the Province of Quebec are as under :—

## GROUP 1.

	1871.	1881.	1891.
Number of establishments.....	10,257	11,206	16,595
Capital invested..... \$	2,507,801	3,758,283	9,747,444
Number of employees.....	16,495	17,892	23,896
Wages paid..... \$	1,788,051	1,954,119	3,507,556
Cost of raw material.....	2,151,595	2,628,549	3,567,534
Value of output.....	5,434,773	6,276,837	9,796,703

PROVINCE OF QUEBEC—*Concluded.*

## GROUP 2.

	1871.	1881.	1891.
Number of establishments.....	2,826	3,400	5,012
Capital invested..... \$	5,284,016	8,488,034	16,714,569
Number of employees.....	12,163	15,681	21,779
Wages paid..... \$	2,231,139	3,080,559	5,270,473
Cost of raw material.....	7,879,404	9,469,356	11,944,956
Value of output.....	13,871,823	16,549,411	23,451,830

## GROUP 3.

Number of establishments.....	484	522	640
Capital invested..... \$	2,998,685	4,563,393	8,608,475
Number of employees.....	5,950	6,920	9,135
Wages paid..... \$	1,280,601	1,537,303	2,547,236
Cost of raw material.....	4,941,462	5,310,195	5,874,915
Value of output.....	8,300,728	9,369,190	11,526,217

## GROUP 4.

Number of establishments.....	237	258	311
Capital invested..... \$	3,040,778	5,242,006	8,568,506
Number of employees.....	5,983	6,354	8,240
Wages paid..... \$	1,439,191	1,530,782	2,432,013
Cost of raw material.....	4,580,908	5,375,627	5,433,235
Value of output.....	8,195,937	8,933,721	10,828,815

## GROUP 5.

Number of establishments.....	275	377	479
Capital invested..... \$	14,038,842	37,075,276	74,632,121
Number of employees.....	26,001	38,826	54,339
Wages paid..... \$	5,631,392	10,220,299	16,941,835
Cost of raw material.....	25,122,962	39,780,240	58,807,596
Value of output.....	41,029,349	63,533,099	97,592,018

322. Eliminating the first group, being the group containing the industries of the province having under \$2,000 annual output, the Province of Quebec shows the following results:—

## ESTABLISHMENTS.

	1871.	1881.	1891.

.....	6.3	18.2	13.1	13.2	49.2
.....	8.7	22.5	10.9	7.6	50.3

138. The next step is to take the other provinces and subject their *figures* to the same analysis, but only for the years 1881 and 1891.

339. Taking the grand totals of Canada for 1881 and 1891 and deducting from them the totals of the four original provinces, the following results appear:—

	1881.	1891.
Establishments—	No.	No.
Dominion	49,731	75,968
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	47,331	71,907
Newer provinces	2,400	4,871
Capital invested—	\$	\$
Dominion	164,957,423	351,629,750
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	158,447,681	329,906,977
Newer provinces	6,509,742	24,713,773
Employees—	No.	No.
Dominion	254,894	370,256
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	244,262	345,355
Newer provinces	10,632	24,901
Wages paid—	\$	\$
Dominion	59,401,702	100,663,650
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	56,894,749	93,643,899
Newer provinces	2,506,953	7,019,651
Raw material used—	\$	\$
Dominion	179,929,193	256,119,647
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	174,821,595	242,373,549
Newer provinces	4,107,598	13,746,098
Finished products—	\$	\$
Dominion	309,731,867	476,258,886
Four provinces, Ontario, Quebec, New Brunswick and Nova Scotia	289,795,911	447,930,556
Newer provinces	9,935,956	28,328,330

340. On the basis of number of establishments, the provinces of Prince Edward Island, Manitoba and British Columbia and the Territories increased during the ten years 1881-91 by 2,471 establishments—an increase of 100·3 per cent. They had 4·82 per cent of the establishments of the Dominion in 1881, and 6·41 per cent in 1891.

341. On the basis of capital invested, these provinces and the Territories increased in the ten years by \$18,204,031, an increase of 279·6 per cent, and had 3·95 per cent of the total capital invested in the Dominion in manufacturing in 1881 and 6·96 per cent in 1891.

342. On the basis of number of employees the newer provinces and the Territories increased the number by 14,269 employees, an increase of 134·6 per cent. They had 4·13 per cent of the total number in the whole Dominion in 1881, and 6·72 per cent in 1891.

343. On the basis of wages paid the newer provinces and the Territories increased in the ten years by \$4,512,698, an increase of 180 per cent. They had 4.22 per cent of the total wages paid in 1881, and 7 per cent in 1891.

344. On the basis of raw material used, the newer provinces and the Territories increased in the ten years by \$9,637,895, an increase of 235 per cent. They had 2.9 per cent of the total value of the raw material used in 1881, and 5.4 per cent in 1891.

345. On the basis of value of finished products turned out during the year, the newer provinces and the Territories increased by \$18,935,958 in 1891 compared with 1881, an increase of 185 per cent. They had 3.27 of the total output in 1881, and 5.95 per cent in 1891.

346. Thus the four newer provinces have made both absolute and relative advancement, and occupied a much more important position from a manufacturing point of view in 1891 than they did in 1881.

#### 347. PROVINCE OF PRINCE EDWARD ISLAND.

	1881.	1891.
Number of establishments.....	1,617	2,679
Capital invested..... \$	2,075,476	2,911,963
Number of employees.....	5,767	7,910
Wages paid..... \$	807,208	1,101,620

361. The following table gives particulars respecting the several parts showing the changes which have taken place :—

NEW YORK  
PUBLIC LIBRARY

ASTOR LENOX  
TILDEN FOUNDATIONS

increased by 45.2 per cent.

THE UNIVERSITY OF CHICAGO  
LIBRARY  
1000 W. 57th St.  
Chicago, Ill. 60637

362. Groups 1 and 5 are the most interesting for the student. Group 1 contains the germ of future large industries. That there has been an increase so marked in this group is proof that: 1st, the large industries have not crushed out the small ones; and 2nd, that the activity of the people in the direction of mechanical and manufacturing industries is on the increase. In other words, that it pays a constantly increasing number of persons, engaged in solving the problem of living, to turn to these pursuits. These are good signs of the healthiness of the body politic, and the diagnosis is confirmed by the fact that while in group 1, in 1881, the average output per establishment was \$646 a year, in 1891 it was \$635, an approximate so close as to show that nothing occurred during the ten years to prevent the development of these smaller industries.

Analysis of the largest group, No. 5, gives the following results:—

There were in 1891 in Canada 702 establishments having an annual output of from \$100,000 to \$500,000, and in 1881 there were 465. Of those with a yearly output from \$500,000 to \$1,000,000, there were 44 in 1891 and 26 in 1881. Those with an annual output of over \$1,000,000 numbered 20 in 1891 and 10 in 1881.

The following table gives the number and province, being analysis of group 5:—

PROVINCES.	1 Total Establishments with output of \$50,000 and over.		ANALYSIS OF COLUMN 1.			
	1881.	1891.	Establishments having output of \$50,000 to \$100,000.		Establishments having output of \$100,000 and over.	
			1881.	1891.	1881.	1891.
British Columbia.....	13	59	9	41	4	18
Manitoba.....	17	39	12	23	5	16
New Brunswick.....	82	87	50	49	32	38
Nova Scotia.....	47	83	30	52	17	31
Ontario.....	568	916	316	493	252	423
Prince Edward Island.....	4	5	4	4	.....	1
Quebec.....	377	479	187	233	190	246
North-west Territories.....	.....	7	.....	4	.....	3
Total.....	1,108	1,675	608	899	500	776

The increase in the total number of establishments of all sorts and sizes in 1891, compared with 1881, was 52·8 per cent.

The increase in the number of establishments with an output of \$50,000 a year and over was somewhat over 51 per cent.

Thus, the largest establishments approximated very closely to the average increase.

The capital invested in all the mechanical and manufacturing industries increased in 1891 over 1881 by 115·0 per cent.

The increase in group 5 was 143·8 per cent.

The number of hands employed in all the industries taken in the census increased by 45·2 per cent.

The increase in group 5 was 66·5 per cent.

The wages paid in all the industrial establishments increased 69·4 per cent.

The increase in group 5 was 95·5 per cent.

The output of all the industrial establishments increased by 53·8 per cent.

The increase in group 5 was 69·6 per cent.

It is submitted that these facts are incompatible with the abnormal increase of small establishments charged against the census of 1891.

#### PROVINCE OF ONTARIO.

363. An analysis of the Province of Ontario shows that Eastern Ontario (including in that designation Renfrew, Ottawa City, Prescott, Glengarry, Cornwall and Stormont, Russell, Carleton, Dundas, Grenville South, Leeds, Lanark, Frontenac, Brockville, Addington, Prince Edward, Lennox, Hastings, Kingston, Peterboro' and Northumberland) in 1881 had 37 establishments with an output of from \$100,000 to \$500,000, and 2 with an output from \$500,000 to \$1,000,000. In 1891 the same counties and cities had 70 establishments with an output of \$100,000 to \$500,000, 10 with an output from half a million to one million and one with an output of over a million dollars.

364. In Central Ontario, comprising Nipissing, Muskoka, Victoria, Durham, Ontario, Simcoe, York, Cardwell, Toronto and Peel, there were 75 establishments having an annual output of from \$100,000 to \$500,000 in 1881, and 152 establishments having an output of the same range in 1891. In 1881 there were 4 with an output of from half a million to one million dollars a year, and in 1891 the number was the same, 4; in 1881 there were no establishments having an output beyond the million dollar mark, and in 1891 there were two.

365. In Western Ontario, comprising all the remainder of the province, there were 128 establishments in 1881 and 170 in 1891 with an output from \$100,000 to \$500,000; 4 in 1881 and 12 in 1891 with an output from half a million to one million; 2 in 1881 and 2 in 1891 went beyond the million dollar mark.

Of those which in the Province of Ontario went beyond the one million dollar output, the aggregate was \$2,200,000 in 1881 and \$6,175,000 in 1891.

The number of establishments in the Province of Ontario having an output of from \$100,000 to \$500,000 increased by 152, which is 62·5 per cent of an increase. The increase in the number of establishments having an output from half a million to one million was 160 per cent and of those beyond the million dollar mark, 150 per cent.

#### PROVINCE OF QUEBEC.

366. In the Province of Quebec, Montreal and Hochelaga are the great centres of the large manufacturing establishments.

In 1881 there were in the whole province 171 establishments having an output of \$100,000 to \$500,000; 13 with an output from half a million to one million, and 6 with an output of one million and over.

In 1891 the 171 establishments had increased to 219, the 13 to 16 and 6 to 11.

In 1891, 92 of the establishments with an output of \$100,000 to \$500,000 were outside of Montreal and Hochelaga. In 1881 there were 69 of these outside of these two electoral districts. Thus 42 per cent of these establishments were outside of Montreal and Hochelaga in 1891, and 40 per cent in 1881. So that the outside districts have slightly gained on the manufacturing centre in respect to these establishments. Of industrial establishments with an output of half a million to one million, the outside districts had 31 per cent in 1891 against 39 per cent in 1881, and of industrial establishments with one million and over of an output, Montreal and Hochelaga had them all in 1891, while in 1881 one out of the six was outside of the two districts.

367. Taking the whole province, the increase in the number of establishments with an output of from \$100,000 to \$500,000 was 28 per cent. The increase in the number of those with an output of half a million dollars to one million dollars was 23 per cent and those having an output of a million dollars and over, 83 per cent. The increase of these three divisions in Montreal and Hochelaga was 24.5 per cent, 37 per cent and 120 per cent, respectively.

Of the establishments in the Province of Quebec which went beyond the one million dollar mark, the aggregate in 1881 was \$12,263,159, and in 1891 the aggregate was \$28,416,504.

Of the 19 establishments in Canada having in 1891 over a million dollars of an output, 11 are in the Province of Quebec and 5 in the Province of Ontario.

Of the 9 establishments in Canada which in 1881 had an output of over one million dollars, 6 were in the Province of Quebec and 2 in the Province of Ontario.

The total output of the 19 establishments in 1891 was \$38,769,004; the 9 establishments in 1881 had an output of \$17,290,159.

The proportion which the output of these establishments bore to the total output of all the industrial and mechanical establishments was in 1891, 8.1 per cent, and in 1881, 5.6 per cent.

368. The following tables give the industrial status of the cities, towns and villages, as collected for the census of 1891:—

## CITIES AND TOWNS HAVING MORE THAN 5,000 INHABITANTS.

369. The following table has been arranged to show the relative position of each city and town of Canada in 1891 and in 1881 in respect to population and manufactures.

The first and second columns show the value of the output of manufactures as given in the census returns. The third and fourth columns show the output per head of the population for 1891 and for 1881. The fifth and sixth columns show the growth or decrease of population and of manufactures by percentages.

In illustration, take Barrie. Column No. 1 shows the value of the products of manufactures in that town from the census of 1891, viz., \$789,307. Column 2 shows the same for 1881, viz., \$497,331. Column 3 shows that the value of the produced articles of manufactures in 1891 was \$142 per head of the population of 1891. Column 4 shows that this value was \$102 per head of the population of 1881. Column 5 shows that the population of 1891 was an increase of 14 per cent over that of 1881, and column 6 shows that the increase of the value of the manufactures of Barrie was 40 per cent in 1891 over that of 1881.

Reading the line off hand one would say—

Barrie had in 1891 an output from her manufactures and mechanical establishments of \$789,307, against an output in 1881 of \$497,331; this was \$142 per head of the population of 1891, against \$102 per head of the population of 1881. Further comparison shows that Barrie's manufacturing increased more rapidly than her population, the latter showing an increase of 14 per cent and the former showing that on a per head basis the increase was 40 per cent. Barrie's growth of manufactures outstripped the growth of population by 22.8 per cent on a per head basis.

Take Montreal. The value of her manufactures increased by \$20,880,356 in the ten years. But population increased so that the output per head was just the same in 1891 as in 1881, viz., \$338. Population and manufacturing, therefore, proceeded at an equal pace.

Take Toronto. The value of her manufactures increased by \$25,400, or more than Montreal by over \$4,500,000. Population, however, increased more rapidly than manufacturing and, therefore, though in 1891 the output was \$248 per head against \$203 in 1881, the population increased 88 cent, against an increase in manufactures of 22 per cent on a per basis.

MANUFACTURING development of the Cities, Towns and Villages of Canada  
CITIES AND TOWNS HAVING OVER 5,000 INHABITANTS.

*i* Stands for increase. *d* Stands for decrease.

NAME.	Total Output of Manufactured Products.		Output per head of Population.		Changes in Population.	Changes in output per head.	(p) Population increased faster than manufactures.

## CHAPTER VII.

Countries with which Canada deals.—Trade and Commerce.—Census Returns.—Education.

### No. 3.—THE EMPIRE OF JAPAN.

370. The Empire of Japan occupies its position in the North Pacific Ocean to the east of the Asiatic continent. It extends from  $24^{\circ} 6'$  north latitude to  $50^{\circ} 56'$  north latitude, and from  $122^{\circ} 45'$  east longitude to  $156^{\circ} 32'$  east longitude.

371. The empire, which consists of the four great islands and numerous smaller islands, is separated on the north-west by the sea of Japan from the Russian Manchuria and the Korean Peninsula. On the north it is separated from the Russian territory by Saghelien Island and the strait of Nicholievsk and on the north-east the group of the Kurile Islands extends to the Kam-tchata in the Russian Dominion. On the south-east the empire is bordered by the Pacific Ocean, the vast expanse of which separates Japan from the Dominion of Canada. On the south-west the empire includes the Riukin Islands and extends southward so as to include the Island of Formosa.

The extent of the empire from north-east to south-west is about 500 ri and its breadth varies from 30 to 60 ri. Ri = 2.44 miles.

Honshin, the largest of the four islands occupies the central position. Shikoku lies in the south; Kiu-siu in the west and Hokkaido in the north.

The provinces of the empire are divided, exclusive of those of the Kinsi into eight great circuits, seven of which are contained in Honshin, Kiu-siu and Shikoku. The remaining circuit comprises Hokkaido. Besides the four great islands, the chain of the Kuriles extends northward from the eastern coast of Hokkaido.

372. The following statement gives the area and population of the empire :—

Division.	Area, sq. ri.	Population.
Honshin .....	14,571	30,715,295
Shikoku .....	1,181	2,879,290
Kiu-siu .....	2,617	5,755,958
Hokkaido .....	5,062	
The Kuriles (32 islands) .....	1,033	293,714
Sado .....	56	111,633
Oki .....	22	33,932
Awaji .....	37	190,195
Iki .....	9	35,771
Ishushima .....	45	31,719
Riukiu group (55 islands) .....	156	405,031
Ogasawara group (17 islands) .....	4	1,043
	<hr/> 24,793	<hr/> 40,453,461

Sq. ri = 5.96 sq. miles.

every part of the empire is mountainous, there being several chains.

The highest mountains are Fujisan, height 12,370 shaku, Ahaishiyama 10,212 shaku, and Shuanesan 10,212 shaku. A shaku is equal to .994

A general feature of the country is its length north and south and breadth east and west. As one great chain of mountains runs through the middle, the rivers correspond in their course to the formation. The longer rivers running parallel to the mountain ranges, the greater are short. The current of the rivers emptying into the Pacific is comparatively slow owing to the gradual slope of the land. The discharging into the sea of Japan have a rapid descent. The longest is the Ishikarigawa with a length of 407 miles.

The coast line of the empire amounts to 15,300 nautical miles, of which the great islands have 8,177 miles.

The coast abounds in numerous harbours, the most important being Yokohama, Kobe, Osaka, Niigata, Nagasaki and Hakodate, which are the principal ports. Besides these there are ten ports which are special ports for foreign trade and twenty-two others without specially designated uses.

There are 36 cities having more than 30,000 inhabitants, Tokio, the largest, having 1,214,113 of a population.

Of the total population of 41,388,313 persons, 20,906,465 are males and 20,481,848 are females. Of the 41,388,313 persons, 18,611,702 are under 15 years of age, 15,908,538 are between 15 and 50 years of age, and 6,868,073 are over 50 years old.

The foreign population is small, numbering only 9,803, of which English 1,802, Americans 1,802, and others 6,199.

The religions are Shintoism, with 10 sects, and Buddhism with 12 sects and 40 creeds. The Shinto temples in 1892 numbered 193,476, and Buddhist temples 71,973.

Elementary education is compulsory. The number of schools of elementary education was 25,579. The teaching staff numbered 68,697, and students 1,300,016.

The number of periodicals, monthly, weekly and daily, published was 792, and 244,203,066 copies were issued during 1892.

The number of letters and printed documents received into and sent out of Japan in 1893 was 1,583,509, of which 24,792 were for and from

foreign countries. The total number of letters, post cards, newspapers, books, samples and parcels sent through the post offices of Japan in 1893-94 was 321,630,508, and 1,000,000 per inhabitant.

In the beginning of 1894, 9,053 miles of telegraph, with 1,000 miles of wire, besides 269 miles of submarine cable, and 403 miles of cable, with 4,356 miles of wire.

The number of telegrams sent and received was 6,444,463.

377. The total mileage of railway on Sept. 30th, 1894, was 2,039 miles. The passengers carried in the year numbered 32,404,772. The total receipts were 11,594,474 yen (dollars), and the total expenses 4,977,343 yen (dollars).

378. The public debt of Japan in 1894 was 283,519,624 yen, of which foreign debt at 7 per cent was 2,957,280 yen. The remainder is home debt and carries varying interest, from 4 to 7 per cent, excepting about 28 million yens.

The total paper money in circulation amounted to 148,483,906 yen. This consists of treasury notes, Kokuritsu Ginko notes, or notes of the National Bank and Nippon Ginko (or bank of Japan) notes exchangeable for silver on presentation.

The bank of Japan has a paid up capital of 10,000,000 yen, with a reserve of 6,888,000 yen, deposits amounting to 261,998,000 yen.

There are over 270 private banks with a capital of 25,000,000 yen.

Japan's foreign trade for 1894, according to the annual returns published by the Department of Finance, amounted to \$117,209,845, composed of:—

	Value.
Imports.....	\$ 59,680,833
Exports .....	57,529,012

These figures, which do not include foreign produce re-exported from, nor Japanese produce re-imported into, Japan, show, as compared with the corresponding ones for 1893, an increase of \$5,008,077 in imports, of \$1,964,294 in exports, and in the gross foreign trade of \$6,972,371. This large increase has been experienced in spite of the adverse circumstances created by the war with China, causing a withdrawal from trade for military transport of the entire mercantile fleet of the country, by which the coasting trade and also a considerable part of the foreign trade with China and British India are usually carried on. Railway and other land transport facilities will be also largely appropriated by the government.

By countries the trade is distributed as under:—

TOTAL FOREIGN TRADE OF JAPAN BY COUNTRIES, 1894.

	Exports.	Imports.	Total.
	\$	\$	\$
Great Britain.....	3,022,700	21,432,456	24,455,156

Above table the silver yen is taken as equivalent to 50·8 cents, its mean value during the year 1894.

Following table gives a synopsis of the export trade of Japan by the yen being taken as equal to one dollar :—

ARTICLES.	1885.	1890.	1893.	1894.

Total.....	36,108,357	70,060,706	89,712,865	113,246,086

Agricultural products formed 54 per cent of the exports of 1894, manufactures 28 per cent, mining products 11 per cent and marine and miscellaneous 7 per cent. The export of matches amounted to \$1,928,182.

The articles imported were: Animals, arms and munitions of war, atlases, beverages, boilers and engines, bones, books, boots and shoes, braces and suspenders, buttons, candles, canvas, carpets, carriages and carts, cement, chalk and clay, clocks, clothing and apparel, coal, coke, compasses, coral, cordage, corks, curtains, cutlery, cottons, satins, velvets, underwear, drugs and chemicals, dyes, paints and colours, fire engines, fish manure, flax, hemp and jute, yarn, fowling pieces, furs, glass, gloves, grindstones, grain, hair, handkerchiefs, hats and caps, hides and hoofs, agricultural implements, carpenters' tools, chemical, musical, surgical, &c., implements; India rubber, jewellery, lamps, lard and tallow, lead pencils, leather, linen, locomotives, machinery (mining, paper, printing, &c.), metals, iron and steel, &c.; microscopes, oils, castor, kerosene, &c.; paper, printing inks, provisions, pumps, railway carriages, rattans, silks, skins, soaps, stationery, sugar, textile fabrics, timber and wood, tobacco, steam vessels, paraffine wax, watches, wines and liquors, wool and wool goods, &c.

Among the larger items are raw cotton, \$9,704,793; cotton yarn, \$4,052,502; grey shirtings, \$1,490,997; beans, pease and pulse, \$1,512,720; rice, \$4,273,879; machinery for spinning, \$1,452,027; locomotives, \$802,779; iron and steel, and manufactures of, \$4,656,800; kerosene oil, \$2,608,750; provisions, \$893,000, of which flour was \$326,100; sugar, brown \$2,312,338, and white \$4,414,400; steam vessels, \$4,166,800; wool and woollen goods, \$4,326,000.

Of the total imports from the United States of America (\$5,579,139), raw cotton amounted to \$1,361,781, and kerosene \$2,072,310; provisions, \$614,188, of which flour was \$311,134.

The principal exports from Japan to the United States were silk and silk manufactures, \$15,643,572, of which raw silk has \$11,408,333; tea, \$3,188,000; matting, \$894,000; carpets, \$471,000; porcelain, \$235,000; rice, \$279,047.

According to Canadian tables of trade, Canada imported \$1,411,563 of goods from Japan and exported \$29,318.

Among the Canadian imports from Japan were rice, \$24,450; china and porcelain, \$9,911; fancy goods, \$4,448; oranges and lemons, \$4,398; silk and manufactures of, \$92,635; tea, \$1,224,496.

The Canadian exports were flour, \$372; butter, \$1,172; tobacco, \$11,735; planks and boards, \$11,293.

The merchant shipping entered at Japanese ports from foreign countries during 1894 numbered 2,517 vessels, of a tonnage of 2,689,781 tons. 974 of these carried the British flag, 376 the German, 113 the United States, 828 the Japanese, 26 the French, 63 the Russian, 95 the Norwegian, and 42 "all others." The return of coasting merchant vessels shows that 1,244 vessels, of 2,118,468 tons, entered Japanese ports; of these 643, with a tonnage of 1,293,816 were British, 98 German, 73 French and 49 United States.

Railway construction is making considerable progress. Of the 2,193 to the 29 railway companies in March, 1895, there were 1,543

opened for traffic. The total capital of the 29 companies was 89,643,000 yen, and that of the government lines (580 miles) 56,554,000 yen.

A sum of 25 million yen has been voted for the construction of a double line from Tokio to Kobe, 376 English miles, and passing through the industrial centres of Japan, viz., Yokohama, Kyoto, Osaka and Kobe.

#### No. 4.—NEWFOUNDLAND.

379. The following paragraphs are in continuation of the statements respecting Newfoundland which appeared in the Year-Book for 1893. Newfoundland's geographical position is unique and singularly important, and commanding. Anchored at no great distance off the North American continent, and stretching right across the entrance of the Gulf of St. Lawrence to which it affords access at both its northern and southern extremities, it might be regarded as a place of arms and defence; for the power which possesses it, holds the key of the St. Lawrence. Its south-western extremity is within 60 miles of Cape Breton, while its most eastern projection is but 1,640 miles distant from Ireland. Thus it is adapted by nature to serve the peaceful interests of commerce and to facilitate intercourse between the Old World and the New, being a stepping stone between them. (*Newfoundland Hand-book.*)

380. AREA.—Newfoundland has an area of 42,000 square miles, its greatest breadth is 316 miles, and its greatest length is also 316 miles. It is about twice the size of Nova Scotia, one third larger than New Brunswick, and one-sixth larger than Ireland.

381. MOUNTAINS.—The most important range of mountains is the Long Range which commences at Cape Ray and runs in a north-easterly direction for 200 miles; some of its summits reach a height of 2,000 feet. The Anguille Range runs from Cape Anguille to the highlands of Bay St. George with summits 1,900 feet high. The Blomidons extend along the south coast of the Humber Arms; some of the summits reach 2,085 feet. There are numerous other mountains and hill ranges.

382. RIVERS.—Large rivers are few but the numerous bays pierce the land in all directions. The three largest rivers are the Gander, the Exploits and the Humber. The Exploits has a length of 200 miles, and drains an area of between 3,000 and 4,000 square miles. At its mouth it is a mile wide. The Gander and its tributaries drains an area of nearly 4,000 miles, and is itself about 100 miles long. The Humber drains an area of 2,000 square miles. Numerous other rivers discharge their waters into the sea, after short and turbulent courses. The largest lake on the Island is Grand Lake, 56 miles in length, and 5 in breadth. Red Indian Lake is 37 miles in length; Gander Lake 33 miles.

383. The summer temperature ranges from 70 to 80 degrees. In the winter the thermometer rarely sinks below zero. The mean annual temperature for eight years was 41·2 degrees.

384. After being a mere fishing station for 250 years the idea of a railway entered the leading minds of the colony, and in 1878 Sir William Whiteway introduced resolutions for the construction of a railway. Newfoundland has a railway  $83\frac{1}{2}$  miles long between St. Johns and Placentia; another between Whitbourne and Exploits (200), and a third of 17 miles long. All are on the 3 feet 6 inches gauge.

385. According to the census of 1891 the I-land of Newfoundland\* had 197,934 of a population, of whom 100,775 were males and 97,159 females; children below 10 years of age numbered 28,984 males and 27,801 females, being 825 fewer males and 140 fewer females of that age period than in 1884. From 10 to 20 years old males numbered 22,776 and females 21,515, being 899 males and 1,337 females of that age period more than in 1884. Between the ages of 20 and 50 years there were in 1891, 37,302 males and 36,647 females, being 44 fewer males and 935 more females than in 1884. Over 50 years old there were 11,313 males and 11,196 females, being 1,018 more males and 1,247 more females than in 1884.

There were 31,983 married men and 33,098 married women, 2,973 widowers and 5,800 widows, being as compared with 1884 an increase of 1,846 married men and 2,927 married women, 670 widowers and 155 widows. In Canada the proportion of widowers to married men is 7.8 per cent, and widows to married women 16.3 per cent. In Newfoundland the widowers are 9.3 per cent of the married men and the widows are 17.5 per cent of the married women.

The native born number 193,353 of the total population of 197,934, or 98 per cent against Canada's 86.6 per cent. The foreign-born, *i. e.*, those born outside of the British Empire, numbered only 369, or 0.18 per cent. The population is, therefore, almost entirely British-born. There were 136 deaf and dumb and 187 blind, while 280 were of unsound mind—about 30 in every 10,000 of the population against 42 in every 10,000 in Canada.

386. According to religious belief, the population is divided as follows:—

	Number.	PROPORTION IN	
		Newfoundland	Canada
Church of England.....	68 562	34.6 p. c.	13.37 p. c.
Roman Catholics.....	72 342	36.5 "	41.21 "
Methodists.....	52 672	26.6 "	17.54 "
Presbyterians.....	1 477	0.7 "	15.63 "
Congregationalists.....	782	1.6 "	2.25 "
Salvation Army.....	2 092		
Baptists and others.....	37		

\* Labrador had a population of 4,106, making the total population equal to 202,040 against a population of 197,335 in 1884, an increase of 2.4 per cent.

Taking both Newfoundland and Labrador the Church of England lost 923 adherents in the interval between 1884 and 1891; the Church of Rome lost 2,912; the Presbyterians lost 52; the Methodists gained 3,903 adherents, and the Salvation Army do not appear to have had any soldiers in 1884, while in 1891 they numbered 2,092.

Of the population 73,150 could read and write, or about 40 per cent. This is considerably below the population in Canada, where over 80 per cent of the population are able to read and write.

Analyzed according to occupations, the population of Newfoundland and Labrador had 183 clergymen to look after their spiritual interests and 606 teachers to teach the young idea how to shoot. 43 lawyers looked after their legal rights and 62 doctors ministered to physical ailments. There were 1,547 farmers and 54,775 fishermen; of these latter 36,303 also cultivated the land. In lumbering there were 625 engaged; in mining 1,258, and in factories and workshops 1,058.

The industrial establishments enumerated included 53 sawmills, 3 tanneries, 2 breweries and distilleries, 2 iron foundries, 4 bakeries, 4 furniture factories and 24 other establishments. The value of the manufactured articles in the census year amounted to \$1,450,456. The number of lobster factories was 340, in which there were 4,807 persons employed. The improved lands amounted to 64,494 acres and lands in pasture 20,524 acres. The farm stock consisted of 6,138 horses, 10,863 milch cows, 12,959 other horned cattle, 60,840 sheep, 32,011 swine and 127,420 fowl.

The number of persons to a family averaged 5.4, or about the same as Nova Scotia.

The births of the census year were 200 to every 1,000 of the married women as compared with 152 to every 1,000 in Canada.

387. The export of copper ore and regulus in 1894 amounted to 28,824 tons, having a value of \$235,179. In addition, the export of iron pyrites amounted to 40,582 tons, value \$285,474, or a total value of mineral exports of \$520,653. The export of asbestos was \$1,200 and of lumber M 6,357, value \$82,742.

The export of dried codfish amounted to 1,107,696 quintals, value \$3,763,338. The value of the cod and cod liver oil exported was \$266,170. The value of the seal oil exported was \$274,924, and the value of the sealskins exported was \$227,248. The value of the herring export was \$244,789, and of the lobster export \$312,364. The total value of the fisheries in 1894 was \$5,466,911. Of late years there has been a decline in the Bank fishery. In 1884 the number of vessels employed in it was 38; the number of men, 785; the catch, 54,544 quintals; and the average catch per man, 69 quintals. The seal fishery of 1895 employed 20 large steam vessels, carrying 4,680 men, the seals taken being 270,058.

The total number of Newfoundlanders employed in the Labrador fishery in 1895 was 14,261, of which 2,000 were females. The resident population on Labrador numbers about 4,000, and from Nova Scotia and elsewhere a number of fishermen spend the fishing season there; so that the total number each season on Labrador exceeds 20,000.

The total value of the imports in 1894 was \$7,164,738; of the exports \$5,811,169. The revenue in 1894 was \$1,641,035, and the public funded debt at the close of the year was \$9,116,535. At the close

of 1894 the total amount on deposit in the Savings Bank was \$2,821,423; the total number of depositors, 6,401; the rate of interest, 3 per cent. The defunct banks, when they closed their doors, had about two millions of dollars on deposit. At the close of the year the total funded debt of the colony, including the late loan of  $2\frac{1}{2}$  millions, was about \$13,900,000. In this is included the municipal indebtedness of St. John's amounting to \$1,657,793, upon which the municipality pays the interest.

388. The number of steamers owned in Newfoundland was 35 of 6,178 tons. The number of sailing vessels from 20 to 60 tons, 1,421; and from 60 tons and up, 271. Tonnage 25,740 tons. Number of vessels built in 1890, 52, of a tonnage of 1812.

The registered shipping of Newfoundland amounts to 108,180 tons, in 2,339 vessels.

389. In 1832 representative government was granted to Newfoundland, followed by responsible government in 1855. There are 36 members in the House of Assembly elected by ballot from 18 electoral districts. The Legislative Council consists of 15 members nominated by the Crown with a life tenure.

390. Newfoundland has 3 daily newspapers, one bi-weekly, 4 weekly and 1 bi-monthly.

Its grant for education in 1894 was \$159,566. There were 33,596 scholars attending school. So that the cost to the government per scholar was 4.29 cents per annum.

St. John's, the capital, has a population of 29,007; Harbour Grace, 6,466; Carbonear, 4,127.

## CHAPTER VIII.

### EVENTS OF THE YEAR.

Minutes passed by Federal Parliament.—Orders in Council and Proclamation  
Arbitration of Public Accounts.

#### 391. INDEX TO STATUTES OF 1895.

#### 392. APPROPRIATION ACT, 1895 (No. 1.)

*Chap. 1, 22nd July, 1895,*

(Sec. 2.) that from the Consolidated Revenue Fund, there may be sums defraying the expenses of the public service for the year the sum of \$1,143,054. (Sec. 3.) That the amounts by the Act for the Saint John Canal, and for the Galops Canal shall be applicable until 1st January, 1895, and the amount granted for artesian boring in the North-west Territories till 31st December, 1895. (Sec. 4.) That \$20,000 granted for printing, &c., in connection with the Royal Commission on the subject of the public debt, shall be transferred from "Miscellaneous" to "Legislation," and shall be applicable until 31st December, 1895.

Under the Act provides for the following payments: Charges of the public service, \$81.67; civil government, \$10,287.83; administration of justice, \$718.01; legislation, \$57,884; arts, agriculture and statistics, \$311,000; railways and canals (chargeable to capital), \$66,430.07; public works and public buildings (chargeable to income), \$46,489.63; harbours and rivers, \$11,907.95; lighthouses and steamboat subventions, \$12,410.42; ocean and river service, \$335.00; lighthouse and coast service, \$32.90; scientific institutions, \$11,112.97; Indians, \$7,747.45; Geological Survey

department, \$17,000; North-west Mounted Police, \$15,000; miscellaneous, \$64,101.82; collection of revenue: customs, \$1,743.79; weights and measures, \$63.19; electric light inspection, \$1,359.46; railways and canals, \$4,161.29; post office, \$61,318.86; open account, purchase of seed grain, \$55,000; unprovided items, \$70,201.67.

### 393. APPROPRIATION ACT (No. 2.), 1895.

*Chap. 2, 22nd July, 1895,*

Provides (Sec. 2.) that from the Consolidated Revenue Fund there may be paid, towards defraying the expenses of the public service for the year 1895-96, the sum of \$20,605,459.80. (Sec. 3.) That the amounts granted for the Government of the North-west Territories shall not lapse if not expended within the year. (Sec. 4.) That, as the sum of \$14,762,652.20 of loans authorized by Parliament remains negotiable, this amount, or as much as may be required, may be raised by the Governor in Council.

The schedule to the Act provides for the following distribution of the \$20,605,459.80: Charges of management, \$164,150; civil government, \$992,280; contingencies (civil government), \$210,950; administration of justice, \$581,532.80; legislation, \$370,481.69; arts, agriculture and statistics, \$207,250.00; quarantine, \$70,000; immigration, \$130,000; pensions, \$31,669.90; superannuation, \$240; militia, \$1,099,284; railways and canals (chargeable to capital), \$2,527,420, (chargeable to income) \$103,157.33; public works (chargeable to capital), harbours and rivers, \$85,000; public works (chargeable to income) and public buildings, \$685,580.00; harbours and rivers, \$299,850.00; dredging, \$163,000; slides and booms, \$8,500; roads and bridges, \$38,800; telegraphs, \$4,500; miscellaneous, \$118,500; mail subsidies and steamship subventions, \$310,733.33; ocean and river service, \$166,400; lighthouse and coast service, \$457,800; scientific institutions and hydrographic surveys, \$85,150; marine hospitals, \$39,000; steamboat inspection, \$26,000; fisheries, 257,900; superintendence of insurance, \$8,000; Geological Survey, \$45,000.00; Department of Indian Affairs, \$891,588; North-west Mounted Police, \$500,000; government of the North-west Territories, \$313,009; miscellaneous, \$141,600; collection of revenue: customs, \$874,285; excise, \$472,953.75; culling timber, \$17,700; weights, measures, gas and electric light inspection, \$99,800; inspection of staples, \$3,000; adulteration of food and fertilizers, \$25,000; minor revenues, \$2,506; railways and canal: railways, \$3,470,000—canals, \$591,413; public works, \$174,630; post office, \$3,525,635; Department of Trade and Commerce, \$19,100; Dominion lands (chargeable to income), \$117,022, (chargeable to capital), \$75,000.

### 394. COMMERCIAL TREATIES AFFECTING CANADA.

*Chap. 3, 22nd July, 1895,*

Provides (Sec. 1.) that so soon as the French Treaty Act, 1894, is brought into force, the advantages granted to France shall extend to other foreign powers having like privileges under treaties with Great Britain. (Sec. 2.)

Laws inconsistent with the enjoyment of such privileges shall be suspended to the extent required. (Sec. 3.) Advantages granted to France shall extend to Great Britain and the several colonies of the Empire.

## 395. RAILWAY BELT LANDS ACT.

*Chap. 4, 22nd July, 1895,*

Provides (Sec. 1.) that Governor in Council may enter into agreement with Government of British Columbia to define and settle the boundaries of the Railway Belt. (Sec. 2.) That agreement must provide that the province shall register titles. (Sec. 3.) That agreements may include provision for settlement of claims arising out of grants of land by the Government of British Columbia within the railway belt since the line of railway was finally located.

## 396. MARKLAND MORTGAGE.

*Chap. 5, 22nd July, 1895,*

Provides (Sec. 1.) the Minister of Finance with requisite authority to discharge a mortgage and convey the properties to the persons entitled to them, so far as Her Majesty can convey them.

## 397. BOUNTY ON BEET-ROOT SUGAR.

*Chap. 6, 22nd July, 1895,*

Provides (Sec. 1.) for the payment, under regulations and restrictions made by Order in Council, to the producers of raw beet-root sugar produced in Canada from beets grown in Canada a bounty of 75 cents per one hundred pounds, and in addition thereto, one cent per 100  $^{\circ}$  for each degree or fraction of a degree over 70 degrees shown by polariscope test. Such bounty not to exceed in the aggregate one dollar per 100 lbs., and not to continue in force after the 1st day of July, 1897. (Sec. 2.) Cost of customs, supervision, &c., to be paid by the producer of the sugar.

## 398. SILVER-LEAD SMELTING.

*Chap. 7, 22nd July, 1895,*

Provides (Sec. 1.) for the payment of a bounty not exceeding 50 cents per ton of 2,000 lbs., and not exceeding \$150,000 in all, on Canadian silver-ore and other ores of silver and gold smelted in Canada between 1st July 1895, and 1st July, 1900. (Sec. 2.) That the bounty shall not exceed 6,000 per annum. Any amount not expended to be carried forward to the next year and added to the \$30,000. (Sec. 3.) That the bounty per ton shall be reduced proportionately in the event of the quantity smelted being greater than 60,000 tons a year. (Sec. 4.) That participating works must be established and in operation before 1st January, 1897. (Sec. 5.) That

the Minister of Trade and Commerce shall administer the bounty fund under (Sec. 6.) regulations prepared by the Governor in Council—which regulations (Sec. 7.) are to be laid before parliament at the beginning of each session with full particulars as to payments made.

### 399. WINNIPEG GREAT NORTHERN RAILWAY.

*Chap. 8, 22nd July, 1895.*

Provides (Sec. 1.) for the repeal of Section 1 of the Aid Act (1891, Chap. 81) and the substitution thereof of authority given to the Governor in Council to enter into a contract with the company for the transport of men, supplies, materials and mails for 20 years, payment for such services to be \$80,000 per annum, one-half to be paid annually, when the company has completed one-half their line between Winnipeg and the Saskatchewan River, and the other half when the remaining half of the line between same points, shall have been finished. The proviso being that such sums shall be paid in half yearly instalments and that the company may sell or assign these half-yearly grants for bonds or other securities issued by them on account of the undertaking. (Sec. 2.) That the Governor in Council is authorized to modify the original contract in accordance with Section 1. (Sec. 3.) That in the event of failure to enter into the modified contract the Government may transfer the amount applicable to the first half of the company's railway, viz., \$40,000 per annum for 20 years, to a company authorized to build a railway from Portage la Prairie or Gladstone to Lake Dauphin.

### 400. THE SENATE AND COMMONS.

*Chap. 9, 22nd July, 1895,*

Provides that for the session of 1895, the deduction of \$8 a day shall not be made for 12 days in case a member has been absent during such number of days.

### 401. COMMONS—RE-ADJUSTMENT OF REPRESENTATION.

*Chap. 10, 22nd July, 1895,*

Amends Act of 1892, Chap. 11, by defining the Electoral District of Berthier and that of Joliette.

### 402. NORTH-WEST TERRITORIES REPRESENTATION ACT.

*Chap. 11, 22nd July, 1895,*

Amends Act Revised Statutes, Chap. 7, by providing (a) that every male person shall be qualified to vote at the election of a member for the House of Commons, who, not being an Indian, is a British subject, 21 years old, and a resident in the North-west Territories, for 12 months and in the

electoral district for three months immediately preceding the issue of the writ. (b) That any elector may apply to have his name put on the electoral lists not later than two days before polling day. (c) That the oaths to be administered are to be changed to suit the changed conditions.

#### 403. ELECTORAL FRANCHISE ACT.

*Chap. 12, 22nd July, 1895,*

Provides (Sec. 1.) that the voters' lists in force need not be revised for 1895, but shall continue in force until 1896, in accordance with the provisions of the Electoral Franchise Act. (Sec. 2.) That the lists of voters prepared for the year 1894 shall be valid, notwithstanding that a revising officer has not complied with the provisions of Section 23.

#### 404. DOMINION ELECTIONS ACT.

*Chap. 13, 22nd July, 1895,*

Amends Dominion Elections Act, R.S.C., Chap. 8, and Act 1894, Chap. 13, and provides (a) for one and the same day for nomination of candidates for general elections in all electoral districts, excepting Algoma and Nipissing, in Ontario, and Gaspé, Chicoutimi and Saguenay, in Quebec. (b) That in Gaspé, Chicoutimi and Saguenay, the returning officer shall fix nomination and polling days, nominations to take place not less than fifteen days nor more than thirty days after the proclamation has been posted, and elections not less than fifteen days nor more than thirty days after nomination day. (c) That within ten days after the reception of the writ in Algoma and Nipissing, and within twenty days in Gaspé, Chicoutimi and Saguenay, and within eight days after such reception in the other electoral districts of Canada, the returning officer shall, in every electoral district in Canada, by proclamation, indicate the place and time fixed for nomination and for polling, the several polling stations, with their territorial limits, and the time and place for counting the votes thrown. (d) The way the elector is to proceed to mark the ballot and deposit it. This Act takes effect on the dissolution of the 8th Parliament.

#### 405. CIVIL SERVICE ACT.

*Chap. 14, 22nd July, 1895,*

Amends Civil Service Act, R.S.C., Chap. 17 and Chap. 12, Acts of 1888, by providing for inquiries into irregularities at examinations and punishment of persons refusing to obey summons to attend as witnesses.

#### 406. CIVIL SERVICE ACT.

*Chap. 15, 22nd July, 1895,*

Amends Civil Service Act, R.S.C., Chap. 17, and provides (a) That no persons shall be appointed in the inside service other than a deputy head,

on probation or otherwise, if his age exceeds thirty-five years or is under eighteen years, except in the case of porter, messenger or sorter, who may be appointed at the age of fifteen years. (b) For the repeal of Sections 21, 22 and 23 of Chap. 17, R.S.C., as to future action. (c) That the salary of a clerk on appointment or promotion to any class shall be at the minimum of such class. (d) For the amendment of Section 29, so that temporary copyists are excluded from the first or qualifying examination, and second class clerks are only eligible on passing the qualifying examination. (e) For the repeal of Sub-section 3 of Section 37. (f) For the repeal of Section 47 and the substitution therefor of a clause regulating the employment of assistance in cases of temporary pressure of work. Sections 8 and 9 authorize continued employment of temporary clerks employed at the time of the passing of the Act. Section 10 and 11 provide for remuneration after temporary assistance. Section 12 strikes third-class clerks, and messengers, packers and sorters out of the inside Departmental Service. Section 13 provides for appointments without examination, and Section 14 suspends the operation of the Act till 1st January, 1896.

#### 407. DOMINION NOTES ACT.

*Chap. 16, 28th June, 1895,*

Provides (Sec. 1.) for the repeal of Chap. 21, Act 1894, and for the reviving of Sec. 3, Chap. 31, R.S.C. (Sec. 2.) That the issue of Dominion notes may exceed \$20,000,000, the additional amount of gold to be held by the Finance Minister to equal the excess of \$20,000,000.

#### 408. INCORPORATION OF BOARDS OF TRADE.

*Chap. 17, 22nd July, 1895,*

Provides (Sec. 1.) for repeal of paragraph a of Section 1 of Chap. 130, R.S.C., as amended by Section 1, Chap. 23, Acts of 1894, and the substitution of a definition of "district." (Sec. 2.) For amendment of Sec. 1, Chap. 30, R.S.C., paragraph c, by adding definition of "judicial district."

#### 409. WINDING-UP ACT.

*Chap. 18, 22nd July, 1895,*

Provides (Sec. 1.) for the repeal of Sec. 78 of Chap. 129, R.S.C., and the substitution of a section providing that all orders of the court or judge for the payment of money, costs, charges or expenses, made under the Act, are to be deemed a judgment of the court and may be enforced against the person or property of the person ordered to pay. (Sec. 2.) For the application of the practice in force in Superior Courts for discovery of assets, to discovery of assets under this Act.

## 410. TREASURY BOARD AND INSURANCE ACT.

*Chap. 19, 22nd July, 1895,*

Provides that Treasury Board may exempt certain societies from operation of Section 43 of Insurance Act, R.S.C.

## 411. INSURANCE ACT.

*Chap. 20, 22nd July, 1895,*

Provides for the amendment of the Insurance Act, Chap. 124, R.S.C., by substituting for sub-sections one and seven of Section 8 of Chap. 20, Statutes of 1894, a sub-section requiring Insurance Companies legally formed outside of, but licensed to do business in, Canada to make annual statements of their condition and affairs as to Canadian business, on forms supplied by the superintendent of insurance, and as to outside business in such form as is required by the law in the country of head office, the 1st of January of each year as to Canadian business, and not later than 30th June as to general business. (Sec. 3.) Confirms renewals of licenses for 1895. (Sec. 4.) That Sub-section 2, Sec. 20, of the Insurance Act shall apply to companies legally formed in Canada to do business of Life Insurance on the assessment plan. (Sec. 5.) Requires the Minister to satisfy himself that the corporate name selected by a company is not liable to be confounded with that of any other company.

## 412. COMPANIES ACT.

*Chap. 21, 22nd July, 1895,*

Provides (Sec. 1.) for the repeal of Sec. 94, Chap. 119, R.S.C., and the substitution (a) of a section empowering companies to hold real estate necessary for business; (b) requiring the company to sell any real estate acquired in satisfaction of any debt within 7 years after it has been so acquired, unless there is in force in the province or territory in which such real estate is situate an Act of such province or territory respecting the sale or disposition of lands so acquired; (c) providing for the reversion to the previous owner or his heirs or assigns of property not sold within 7 years.

## 413. CUSTOMS ACT.

*Chap. 22, 22nd July, 1895,*

Provides (Sec. 2.) for the repeal of Sec. 3 of Chap. 14, Acts 1888, and the substitution of a section constituting a Board of Customs, and establishing the quorum competent to transact the business of the board.

## 414. CUSTOMS TARIFF AMENDMENT.

*Chap. 23, 22nd July, 1895,*

As the Customs Tariff of 1894, by the following increases: (a) The Ethyl Alcohol, on Spirits, on Alcoholic Perfumes, and on

Nitrous Ether, Sweet Spirits of Nitre and Aromatic Spirits of Ammonia by  $12\frac{1}{2}$  cents per gallon, and on Vermouth and Ginger Wine by 5 cents and  $12\frac{1}{2}$  cents, according to percentages of alcohol. (b) The duty on Sweetened Biscuits of all kinds from 25 per cent to  $27\frac{1}{2}$  per cent. (c) The duty on Condensed Milk from 3 cents to  $3\frac{1}{4}$  cents per pound. (d) The duty on Fruits in air tight cans or other packages from 2 cents per pound to  $2\frac{1}{4}$  cents. (e) The duty on Fruits preserved in spirits from \$1.90 to \$2.00 per gallon. (f) The duty on Jams, Jellies and Preserves from 3 cents to  $3\frac{1}{4}$  cents per pound. (g) The duty on Paints and Colours ground in spirit, and all Spirit Varnishes and Lacquers from \$1.00 to  $\$1.12\frac{1}{2}$  per gallon. (h) The duty on all Sugar above No. 16 Dutch Standard and all refined sugars from  $\frac{64}{100}$  of a cent per pound to  $1\frac{14}{100}$  cents, sugar (N.E.S.) not above No. 16 Dutch Standard, sugar drainings or pumpings drained in transit, Melado or Concentrated Melado, tank bottoms and sugar concrete, (removed from the free list) to be one half cent per pound, packages free. (i) The duty on Glucose or Grape Syrup, Glucose Syrup and Corn Syrup, or any syrups containing any admixture thereof, from 1 cent per pound to  $1\frac{1}{4}$  cent. (k) The duty on Sugar Candy, brown or white, and Confectionery including Sweetened Gums, Candied Peel and Pop Corn, from 35 per cent *ad val.* to  $\frac{1}{2}$  cent per pound, and 35 per cent. (l) The duty on Syrups and Molasses of all kinds (N.O.P.), the product of the Sugar Cane or Beet Root (N.E.S.), and all imitations and substitutes from  $\frac{9}{10}$  cent to  $\frac{3}{4}$  cent per pound. (m) The duty on Molasses produced in the manufacture of Cane Sugar, when imported in original packages from  $1\frac{1}{2}$  cents to  $1\frac{3}{4}$  cents per gallon when polariscope test shows 40 degrees or over, and from  $1\frac{1}{2}$  cents to  $1\frac{3}{4}$  cents and one cent per gallon for each degree or fraction of a degree less than 40 degrees, and not less than 35 degrees. (n) Fresh Salmon (N.E.S.), to be  $\frac{1}{2}$  cent per pound, provided that it may be imported free of duty on proclamation when the United States reciprocate. (o) Sawed Boards, Planks and Deals planed or dressed on one or both sides, when the edges are jointed or tongued and grooved, 25 per cent *ad val.*, provided that they may be made free on proclamation that the United States have reciprocated.

#### 415. GENERAL INSPECTION, ACT.

*Chap. 24, 22nd July 1895,*

Provides (Sec. 11.) for the repeal of Sub-section 3 of Section 99, R.S.C. and the substitution of a sub-section empowering the Governor in Council to make regulations for reducing and amending the tariff of fees and providing for the disposal of the same. (Sec. 2.) For the examination of elevators' books by the Department of Inland Revenue.

#### 416. INLAND REVENUE ACT.

*Chap. 25, 22nd July, 1895,*

Provides (Sec. 1.) for the repeal of Sec. 4 of Chap. 46, Acts of 1891, and the substitution of a section imposing an increase of duty on distilled spirit made from grain, from \$1.50 to \$1.70 per gallon; on spirits made from malted barley, from \$1.52 to \$1.72 per gallon; on spirits made from molasses syrup, sugar or other saccharine matter, from \$1.53 to \$1.73.

## 417. HARBOUR COMMISSIONERS OF THREE RIVERS.

*Chap. 26, 22nd July, 1895,*

Provides (Sec. 1.) for repeal of Sec. 6, Chap. 10, Statutes of 1892, and substitution of clause providing that no money shall be raised on said harbour till the Commissioners have paid \$15,000 to the Government of Canada.

## 418. FISHERIES ACT.

*Chap. 27, 22nd July, 1895,*

Provides (Sec. 1.) for the extension of the time in which the Act of 1894 should be operative as respects pollution of waters by sawdust, &c., to the 30th June, 1897. (Sec. 2.) For remission of penalties where such have been incurred.

## 419. LOBSTER FISHERIES.

*Chap. 28, 22nd July, 1895,*

Provides (Sec. 1.) for the substitution of a section for Section 3 of the Acts of 1894, requiring (a) a fee, for license to can or cure lobsters, of \$10 till 1st January, 1896, after which date the fee is at the rate of \$2 for each one hundred cases or packages or fractions thereof, each case to contain the prescribed quantity of 48 one-pound cans or 96 half-pound cans; (b) cases to be labelled or stamped (c) on penalty of \$20 on seizure and confiscation; (d) imported cases to be labelled or stamped under penalty for non-compliance not exceeding \$40 and costs; (e) the owners or managers of lobster factories to send to the Minister of Marine and Fisheries not later than 1st September, every year, a true return of number of fishermen employed, of lobster traps, of persons employed within the factory (by sexes) and of number of cases packed during the season; (f) the obliteration of labels or stamps on empty cases or packages within 7 days after the commencement of the close season; (g) the production on demand of any fishery officer, of the license by the owner or manager, under penalty not exceeding \$100 and costs; (h) the manager or owner, on request of duly authorized officer (and under penalty not exceeding \$5 and costs for each refusal) to take all eggs attached to lobsters brought to the factory and deliver them to the officer; (i) that penalty for counterfeiting or altering the official labels is to be \$40 and costs. (Sec. 2.) Repeals Section 11 of Chap. 51 of Acts of 1894.

## 420. DEVELOPMENT OF SEA FISHERIES AND FISHING VESSELS.

*Chap. 29, 22nd July, 1895,*

Provides for the amendment of Chap. 96, R.S.C., as amended by Chap. 62, Acts of 1891, and by Chap. 18, Acts of 1892, by adding a sub-section to Section 5, R.S.C., authorizing the Minister of Marine and Fisheries to direct any fishery officer to make inquiries into any matter connected with the bounty, and giving the officer all the powers of a commissioner appointed under the provisions of the Act respecting the making of certain investigations under oath, Chap. 115, R.S.C.

## 421. ROADS AND ROAD ALLOWANCES IN MANITOBA.

*Chap. 30, 22nd July, 1895,*

Provides (Sec. 1.) for the repeal of Sec. 1, Chap. 49, R.S.C., and substitution of a section providing that all road allowances in townships surveyed and subdivided and all road allowances set out on block lines surveyed shall vest in the Crown in right of the province, with retroactive effect upon all road allowances heretofore set out on block lines. (Sec. 2.) That the Governor in Council, on report of the Minister of the Interior, may transfer to the Crown in right of the province the several roads mentioned, all road allowances around park lots or portions of sections within the outer two miles of any parish in Manitoba, and all road allowance between lots in the inner two miles of any parish. (Sec. 3.) For the vesting in the Crown in the right of the province of unpatented land forming part of any road transferred to the province. (Sec. 4.) For the transfer to the province of all roads, trails, road allowances, highways or great highways of the class referred to in Chap. 49, R.S.C., which are shown on any sectional plan of the city of Winnipeg, which has been prepared and confirmed by the Lieutenant-Governor in Council, under Chap. 141, R.S.M., and that (Sec. 5.) such transfer may be made by the Governor in Council, on report of the Minister of the Interior. (Sec. 6.) That these properties being transferred, all roads, &c., shall be closed, except those shown on the sectional plans. (Sec. 7.) That the Lieutenant-Governor in Council, with the consent of the Governor in Council, may direct colonization roads to be opened through the unpatented lands, the title to such roads to be transferred to the province. (Sec. 8.) That the Attorney General of the province may take such proceedings as are necessary to keep open any road heretofore opened or used in the interim, before survey and transfer to the province. (Sec. 9.) That this Act shall not be retroactive in its operation in respect to rights claimed before the courts.

## 422. NORTH-WEST TERRITORIES ACT.

*Chap. 31, 22nd July, 1895,*

Provides (Sec. 1.) for repeal of Section 6 of Chap. 22, Acts of 1891, substituted for paragraph 5 of Sub-section 1, Sec. 13, Chap. 50, R.S.C., and the substitution of section adding to the powers of the Legislative Assembly, under the head of municipal institutions, the right to incorporate associations of land owners and others in any district or tract of land for the purpose of constructing and operating irrigation works for the benefit of their lands. (Sec. 2.) For the withdrawal of tramway and street railway companies from the authority of the Legislative Assembly. (Sec. 3.) For the ratification and confirmation of No. 6 of the Ordinances of 1894 from the 7th Sept., 1894. (Sec. 3.) That until the Legislative Assembly otherwise provides, any member may resign his seat in Assembly (a) by giving, in his place, notice; (b) by delivering to the Speaker a signed, sealed and witnessed declaration to that effect; (c) by delivering such declaration to the Lieutenant-Governor, in the absence of the Speaker.

## 423. NORTH-WEST TERRITORIES REVENUE FUND.

*Chap. 32, 22nd July, 1895,*

Provides (Sec. 1.) for the legalization of any payment heretofore made to the General Revenue Fund of the North-west Territories; of any fine, penalty or forfeiture which belonged to Her Majesty for public purposes of Canada. Said sums to be expended for the purposes of the general revenue fund of the North-west Territories.

## 424. NORTH-WEST IRRIGATION ACT.

*Chap. 33, 22nd July, 1895,*

Provides (Sec. 1.) for the amendment of Chap. 30, Acts of 1894, by defining the terms "Agent" and "Company." (Sec. 2.) For the dropping of the words "until the company is moved," and the addition of the words "unless and until and except only so far as some right therein or to the use thereof, inconsistent with the right of the Crown and which is not a public right or a right common to the public is established" with retroactive effect. (Sec. 3) Exempts persons obtaining water for domestic purposes. (Sec. 4) For dropping the words "except as hereinafter provided for." (Sec. 5.) (a) That memorials and maps or plans shall first be submitted for correction and approval to a duly qualified official; (b) That applicant for license where ditch is of small capacity shall not be required to furnish memorial and maps, but only a written statement of the source of the water supply, the point of diversion, &c., attaching to the statement a general plan showing these points and also plans of bridges or culverts, flumes, &c. Public notice of filing to be given for thirty days, within which time all protests are to be forwarded to the Minister, who may authorize the construction of the works. (Sec. 6.) That no work unless of a minor character shall be commenced until after approval by the Governor in Council signified by public advertisement. (Sec. 7.) That Section 22 of the Act is repealed and a section substituted requiring that all maps, plans and books of reference showing the lands must be signed and certified correct by a Dominion land surveyor and forwarded in duplicate to the Department of the Interior. (Sec. 8.) For the exemption of any irrigation company incorporated under an Ordinance of the North-west Territories from Sections 35, 42 and 43 of the Act of 1894.

## 425. DOMINION LANDS ACT.

*Chap. 34, 22nd July, 1895,*

Provides (Sec. 1.) that the Minister of the Interior, under direction of the Governor in Council, may grant (notwithstanding that the lands are school lands) certain specified parcels of land to certain individuals named. (Sec. 2.) That the Minister may select an equal area of unreserved Dominion

lands for the purpose of school endowment, in lieu of the lands granted to individuals named. (Sec. 3.) That the Governor in Council may substitute lands of equal extent and value for school lands to be sold to the Cochrane Ranch Co. (Sec. 4.) For the repeal of Chap. 27, Acts of 1889. (Sec. 5.) (a) That transfers heretofore made may be declared void, such declaration to be without effect in any case (not fraudulent or an error) in which a patent has previously issued; (b) that pending or settled cases are not to be affected.

## 426. INDIAN ACT.

*Chap. 35, 22nd July, 1895,*

Provides for the amendment of previous Acts by declaring that: (Sec. 1.) There shall be no reserve or portion thereof sold, alienated or leased until surrendered to the Crown. The Superintendent General having, however, the power to lease for the benefit of any Indian the land to which he is entitled, without requiring release or surrender. (Sec. 2.) That the Governor in Council (a) may direct how and by whom surplus moneys arising from disposal of Indian lands or other property held in trust shall be invested and how the payments or assistance granted to Indians shall be effected; (b) may provide for general management of such moneys; (c) direct what percentage shall be set apart to cover cost of management; (d) authorize expenditure for roads and bridges, ditches and reserves, (e) and authorize expenditure for school houses and by way of contribution to schools. (Sec. 3.) That the repeal of Sec. 75, Indian Act, brings into force a substitute providing for the election of chiefs or headmen, specifying the number of chiefs; the procedure in setting aside the election and in deposing a chief. (Sec. 4.) Provides that on proof of good behaviour and capacity any Indian may receive (by order of Governor in Council) his share of the capital funds at the credit of the band, or of the principal annuities of the band; if a married man, he shall be paid also his wife's and minor unmarried childrens' share, and if a widow, *her* minor unmarried childrens' share. With similar qualifications and restrictions the shares of unmarried children of full age shall be paid to said children, all such Indians and their unmarried minor children on receiving their shares shall become enfranchised and be no longer under the provisions of the Acts relating to Indians. (Sec. 5.) Makes provisions for the enfranchisement of Indians by bands. (Sec. 6.) Provides for punishment of Indians celebrating certain festivals, dances or ceremonials whereat presents are made, or human or other animal bodies are mutilated. (Sec. 7.) Gives Indian agents jurisdiction in certain cases as justices of the peace within territorial limits of their specific jurisdiction, in the case of all the provinces, excepting Manitoba, British Columbia and the North-west Territories, in which the agent is justice of the peace without territorial limitations. (Sec. 8.) Provides for the transfer of any Indian and his share in land and money from one tribe to another; for the reduction by the Governor in Council of the purchase money or to become due on sales of Indian lands; for the reduction or remission of interest or rent confirming all previous reductions; for a return setting forth these reductions and remissions to be submitted to parliament.

## 427. PUBLIC WORKS ACT.

*Chap. 36, 22nd July, 1895,*

Provides for sale or lease of any public work by tender or at auction (unless otherwise authorized by O.C.) not required for public purposes.

## 428. COPYRIGHT ACT.

*Chap. 37, 22nd July, 1895,*

Provides for the amendment of the Copyright Act, Chap. 62, R.S.C., by (Sec. 1.) requiring deposit of three copies (instead of two) in the Dept. Agriculture. (Sec. 2.) Requiring one copy to be sent to the British Museum. (Sec. 3) Amends sub-section 1 of Section 3, Chap. 29, Acts of 1889, and provides that on failure of any person entitled to copyright to take advantage of the provisions of the Act, or having obtained copyright, fails to print and publish the work in sufficient numbers to meet the demand in Canada; any one domiciled in Canada may secure a license or copyright to print and publish, but not exclusive right. (Sec. 4) Prohibits importation from foreign countries under certain circumstances, and empowers the Governor in Council to revoke license, certain conditions arising.

## 429. JUDGES OF PROVINCIAL COURTS.

*Chap. 38, 22nd July, 1895,*

Provides (Sec. 1.) for salaries of two judges of Circuit Court of the district of Montreal, each \$3,000 a year. (Sec. 2.) Salaries of five county court judges, each \$2,000 a year, and after three years' service \$2,400. (Sec. 3.) Salary of the local judge of the district of British Columbia to be \$1,000 instead of \$600 as before.

## 430. SUPERANNUATION OF PROVINCIAL COURT JUDGES.

*Chap. 39, 22nd July, 1895,*

Provides for repeal of Sec. 14, Chap. 138, R.S.C., and substitution of clause permitting any judge of a Superior Court in Canada or any province, who has been such official for 15 years or upwards, or who becomes afflicted with permanent infirmity, on resigning his office, to receive an annuity equal to two-thirds his salary. Courts of Vice-Admiralty and the Maritime Court of Ontario, being deemed Superior Courts, and local judges in admiralty of the Exchequer Court, and stipendiary magistrates in the North-west Territories being deemed Superior Court Judges.

## INDEX.—ORDERS IN COUNCIL AND PROCLAMATIONS.

Breach of Foreign Enlistment Act (Imperial Despatch), 460. Cattle, Spaces for on Ship-board (O.C.), 437. Coal Lands in Manitoba, British Columbia and North-west Territories (Report), 458. Coins of Bronze or Mixed Metal, Proclamation concerning, 436. Classification of Wheat, &c., 447. Dorchester Penitentiary and Imperial Army Act (Proc.), 443. Eel Band Indian Regulations (O.C.), 459. Electric Light Inspection (O.C.), 441. French Colonies in Manitoba (Report), 462. Fresh Salmon Free of Duty from United States (Proc.), 444. Fisheries Regulations, Ontario (O.C.), 438. France, Treaty with, in force (Proc.), 455. Grazing on School Lands, Manitoba, 440. Homestead Entry Regulations (O.C.), 445. Manitoba School Lands (Report), 440. Manitoba Swamp Lands Apportioned (Report), 457. Merchant Vessels of United States, Tonnage of (Imperial O.C.), 461. Militia General Orders. General Herbert's Farewell, 450. Militia General Orders. Major-General Gascoigne, 453. Montreal Port Warden (O.C.), 442. New Westminster Land District (O.C.), 439. Provisional Districts Established (O.C.), 456. Salmon, fresh, from United States, free (Proc.), 444. Saugeen Indians, Regulations, (Memo.), 463. School Lands for Grazing Purposes (Report), 440. Seal Fisheries Act, 1895 (Imperial Despatch), 451. Seal Fishing, Prohibition of (Imperial Despatch), 454. Section 44, General Inspection Act (O.C.), 449. Speaker of Senate Act (Proc.), 452. Timber Licenses in B. C. Ry. Belt (Report), 446. Treaty with France, in force (Proc.), 455. Weights and Measures, Form of Measures of Capacity (O.C.), 464. Weights and Measures, Regulations for Weights (O.C.), 465.

## ORDERS IN COUNCIL AND PROCLAMATIONS.

436. June 1st, 1895.—Queen's proclamation ordering that certain coins of bronze or mixed metal made at the mint shall be current and lawful money of the United Kingdom of Great Britain and Ireland.

437. June 10th.—Order in Council declaring rule No. 2, adopted by the Order in Council of the 9th June, 1894, to regulate the spaces for cattle during transportation from Canada to ports in Europe, be revived and in force.

438. July 8th.—Order in Council rescinds Orders in Council of 21st March, 1894, amending the General Fisheries Regulations for the Province of Ontario and substitutes other regulations.

439. July 11th.—Order in Council authorizing the application of chapter 56, Revised Statutes of Canada, to the agricultural lands in the New Westminster land district.

440. July 27th.—Report advising that Minister of Interior be authorized to issue leases, for grazing purposes, of School Lands in the Province of Manitoba.

441. July 27th.—Order in Council ordering additional regulations to be established respecting the Inspection of Electric Light.

442. Aug. 10th.—Order in Council approving of revised rules and by-laws of the office of Port Warden of the harbour of Montreal, sanctioned by the council of the Board of Trade, May, 1895, under Act 45 Vic., Chap. 45, Sec. 2.

443. Aug. 17th.—Proclamation declaring the Dorchester Penitentiary to be, under the provisions and for the purpose of the Imperial Army Act, a prison in which military prisoners may be confined.

444. Proclamation declaring that as fresh salmon from Canada may be imported into the United States free of duty, fresh salmon may be imported into Canada free of duty.

445. Order in Council regulating conditions under which homestead entry may be obtained under the Dominion Lands Act.

446. Report of Minister of Interior recommending that timber licensees in the railway belt in British Columbia be permitted to pay dues at the rate of 50 cents per 1,000 feet on logs cut on their berths and be entitled to a rebate of 40 cents per 1,000 feet on manufactured logs exported outside of the Dominion.

447. Aug. 31st.—Order in Council ordering the amendment of the previous order of 8th August, respecting the classification of wheat and other grains by striking out the second paragraph under the head of provisions as to grains, cancelled and another substituted 14th October, 1895.

Order in Council appointing Board for choosing samples of wheat and other grains grown east of Port Royal to be standards by which inspectors may be aided in the work of inspection.

448. Sept. 7th.—Announcement of appointment of the Honourable James C. Patterson to be Lieut.-Governor of Manitoba from 2nd September, 1895.

449. Sept. 14th.—Order in Council ordering that Section 44 of the General Inspection Act, Chap. 99, Revised Statutes of Canada, and amendment, be cancelled and another (details given) substituted.

450. Sept. 21st.—Militia General Orders, containing Valedictory of Major General Herbert, Major General commanding the Canadian Militia.

451. Sept. 28th.—Despatch from Right Honourable Joseph Chamberlain, Secretary of State for the Colonies, transmitting copies of the Seal Fisheries (North Pacific) Act, 1895.

452. Oct. 5th.—Proclamation bringing into effect (28th Sept.) Act respecting the Speaker of the Senate.

453. Militia General Order announcing that Major-General William Julius Gascoigne, of Her Majesty's Regular Army, assumed, from 1st October, command of the Canadian Militia, with the rank of Major-General in the Militia.

454. Oct. 12th.—Despatch from the Imperial Government prohibiting the catching of seals by British vessels in Russian waters.

455. Proclamation announcing that the Act respecting the Treaty with France shall be in force from the 14th October, 1895.

456. Order in Council establishing four provisional districts in the unorganized and unnamed Territories, viz., (1) Ungava, (2) Franklin, (3) Yukon, (4) McKenzie. (For full descriptions of boundaries, *see* paragraph 140.)

457. Report submitted to Governor in Council showing that the commissioners appointed to select swamp lands available to be granted to the Province of Manitoba, under Chap. 47, Section 4, R.S.C., have selected 50,602 acres out of a total of 85,940 acres examined, the other 35,338 acres examined having been otherwise disposed of by the Government of Canada.

458. November 30th.—Report, Minister of Interior, respecting coal lands, the property of the Government of Canada, in Manitoba, the North-west Territories and British Columbia, recommending that he be authorized to issue yearly permits to settlers to mine a certain quantity of coal for domestic purposes only, upon payment, in advance, of a royalty of 20 cents per ton for anthracite coal, 15 cents per ton for bituminous coal, and ten cents per ton for lignite coal.

459. Order in Council approving of the regulations made by the Chief of the Eel Ground Band of Indians of New Brunswick, under the 76th section of the Indian Act, Chap. 43, Revised Statutes of Canada.

460. December 7th.—Despatch from the Right Honourable Joseph Chamberlain to His Excellency the Governor General deciding that in cases of an apprehended breach of the Foreign Enlistment Act within the waters of a British colony, it is, as a rule, necessary for the civil authorities to take action by moving the naval authority by written request, but, that in cases of extreme urgency, where it is desirable, that naval officers should have discretion to act without waiting for the requisition of the civil authorities; and, accordingly, amendments have been made in the Queen's Regulations and Admiralty Instructions.

461. December 14th.—Imperial Order in Council decreeing that, as the tonnage regulations of the Merchants' Shipping Act, 1894, have been adopted by the United States of America, merchant vessels of the United States, the measurement of which is denoted in the registers of such ships, shall be deemed to be of the tonnage denoted in their certificates in the same manner, to the same extent, and for the same purposes as in cases of British ships.

462. December 21st.—Report recommending that, as two French colonies have been established in Manitoba by the efforts of three gentlemen of France, these three have had granted them their homesteads at the minimum price of \$1.00 per acre.

463. Memorandum setting forth, for approval of His Excellency, the regulations passed by the Council of the Saugeen Band of Indians.

464. Order in Council amending Section 19 of the regulations respecting weights and measures, established by the Order in Council of the 9th January, 1889, Chap. 42, of Consolidated Orders in Council of Canada, and substituting for the last line thereof the following: The form of all measures of capacity must be cylindrical or conical; when of the latter form, they shall not be verified unless they are capable of containing, when filled to the narrowed part of the neck, the respective weights of distilled water set forth as below:—

For every gallon,	10	lbs. avoirdupois.	For every $\frac{1}{2}$ pint,	437	grains troy.
" " $\frac{1}{2}$ "	5	" "	" " gill,	219	" "
" " quart,	2 $\frac{1}{2}$	" "	" " $\frac{1}{2}$ "	109	" "
" " pint,	1 $\frac{1}{4}$	" "			

465. Order in Council prescribing regulations for governance of Official Weighers appointed under Act 54-55 Vic., Chap. 47.

### ARBITRATION OF PUBLIC ACCOUNTS.

466. The Confederation Act, 1867, provided for an arbitration to adjust the accounts between the Dominion and the Provinces of Ontario and Quebec, as forming the old Province of Canada. The arbitrators appointed were Sir David Macpherson on behalf of Ontario, Judge Day on behalf of Quebec, and Hon. Mr. Gray for the Dominion.

The majority of the arbitrators rendered an interlocutory judgment, as follows:—

1. "That the Union Act did not create, in fact or in law, any partnership between Upper and Lower Canada.

2. "That the arbitrators have no power to enter into the debts or credits of the two provinces at the time of their union in 1841.

3. "That division and adjustment between Ontario and Quebec of the surplus debt beyond \$62,500,000, for which, under Sec. 112 of the British North America Act, 1867, Ontario and Quebec are conjointly liable to Canada, should be based upon the origin of the several items of the debts incurred by the creation of the assets mentioned in the 4th schedule to that Act, and shall be apportioned and borne separately by Ontario and Quebec, as the same may be adjudged to have originated for the local benefit of either, and where the debt has been incurred by the creation of an asset for the common benefit of both provinces, and shall be so adjudged, such debt shall be divided and borne equally by both.

4. "That in cases in which the debt shall not come within the purview of the 4th schedule, reference shall be had as to its origin.

5. "That the assets enumerated in the 4th schedule to be the property of Ontario and Quebec conjointly, shall be divided or allowed on the same basis.

6. "That the expenditure made in the creation of the said assets shall be taken as the value thereof, and, where no asset has been left, the amount paid shall be taken as the debt incurred." Judge Day, for the Province of Quebec, dissented and resigned.

The two arbitrators deemed their duty to be to continue the work notwithstanding the resignation of their colleague.

In September, 1871, they rendered an award. The contention was then set up that the award was invalid, as made by two, and not by the three arbitrators.

After some years a case was admitted to the Privy Council of England, and in 1878 a decision was given that the award was valid. But during fifteen years no settlements under the award were affected. In 1892 arbitrators were appointed and the questions in dispute discussed.

(1.) On the 2nd November, 1893, the arbitrators made the following award respecting what was called "The Question of Interest," to wit:—

TO ALL TO WHOM THESE PRESENTS SHALL COME :

The Honourable John Alexander Boyd, of the City of Toronto and Province of Ontario, Chancellor of said province ; the Honourable George Wheelock Burbidge, of the City of Ottawa, in the said province, Judge of the Exchequer Court of Canada, and the Honourable Louis Napoleon Casault, of the City of Quebec, in the Province of Quebec, Judge of the Superior Court of the said Province of Quebec, send greeting.

Whereas, it was in and by the Act of the Parliament of Canada, 54-55 Victoria, chapter 6, and in and by an Act of the Legislative Assembly of Ontario, 54 Victoria, chapter 2, and in and by an Act of the Legislature of Quebec, chapter 4, among other things provided that for the final and conclusive determination of certain accounts which had arisen or which might arise in the settlement of accounts between the Dominion of Canada and the Provinces of Ontario and Quebec, both jointly and severally, and between the two Provinces concerning which no agreement had heretofore been arrived at, the Governor General in Council might unite with the Governments of the Provinces of Ontario and Quebec in the appointment of three arbitrators, being judges to whom should be referred such questions as the Governor General and Lieutenant-Governor of the provinces should agree to submit ;

And whereas, we the undersigned, John Alexander Boyd, George Wheelock Burbidge, and Louis Napoleon Casault, have been duly appointed under the said Acts and have taken upon ourselves the burden thereof :

And whereas, it was provided in and by the said Act that such arbitrators or any two of them should have power to make one or more awards and to do so from time to time :

And whereas, certain questions respecting the allowance of interest and other matters incident to the taking of such accounts have been submitted to such arbitrators and they have heard the parties thereto :

Now therefore, the said arbitrators, exercising their authority to make a partial award at this time respecting the same, do award, order and adjudge in and upon the premises as follows. That is to say :—

1. That from the 1st of July, 1867, to the passing of the Act of the Parliament of Canada, 36th Victoria, chapter 30, the Provinces of Ontario and Quebec shall be credited with the subsidy half-yearly in advance, deducting therefrom at the end of each half-year their respective shares of interest as determined by the award of 3rd September, 1870, at the rate of 5 per cent per annum on the excess of debt of the Province of Canada over \$62,500,000 as actually ascertained in amount at each period, the first of such deductions to be made on the 1st of January, 1868, and the others on the 1st days of July and January thereafter, down to and including the 1st day of January, 1873.

2. That in the Province of Canada account there shall be credited on the 23rd day of May, 1873, the sum of \$10,506,088.84 related by the said Act, and thereafter the subsidy shall be credited in the separate accounts of Ontario and Quebec without any such deduction.

3. That on and from the 1st July, 1884, the Provinces of Ontario and Quebec shall be credited with the additional subsidy granted by the Act 47 Victoria, chapter 4, in the proportion determined for the excess of debt by the award hereinbefore mentioned.

4. That each province shall be credited as of the 1st of July, 1867, with its share of \$200,000 representing the purchase money of the library and other personal property mentioned in the 14th paragraph of the said award.

5. That the "trust funds" shall be treated as intact and unimpaired and interest thereon at the rate of 5 per cent per annum carried half yearly into the separate accounts of Ontario and Quebec.

6. That the Province of Canada account shall be made up at simple interest at the rate of 5 per cent per annum, as has been agreed upon between the parties.

7. That in the separate accounts of Ontario and Quebec the said provinces shall respectively be allowed simple interest on any balances from time to time existing in their favour and at the rate of 5 per centum per annum, except where other rate has been expressly agreed to.

8. That the question as to whether or not the Dominion shall be allowed simple interest at the rate of 5 per centum per annum on any balances that may from time to time be found to exist in its favour in the separate accounts of Ontario and Quebec be reserved for further argument.

In respect of the matters mentioned in paragraphs 1, 2 and 3, we have proceeded upon our view of a disputed question of law.

In witness whereof, &c.

(Signed) J. A. BOYD,  
G. W. BURBIDGE.  
L. N. CASAUULT.

November, 2, 1893.

467. An appeal was taken to the Supreme Court of Canada by the Dominion Government to so much of the said award of the 2nd November, 1893, as determines and decides that interest on the excess of debt of the Province of Canada is to be deducted from the half-yearly subsidies only at the end of each half-year, instead of at the times when such half-yearly payments of subsidies are by the British North America Act directed to be credited to the Provinces; also to so much of the award as determines that the Dominion is not entitled in its accounts with the province to make twelve half-yearly deductions of interest on the said excess of debt existing at the time of the union; the first of such deductions on the 1st of July, 1867, and the subsequent deductions at the beginning of each half year thereafter down to the 1st January, 1873, inclusive; and also to so much of the award as determines and decides that the deduction of interest on the said excess of debt from the half-yearly subsidies is to be based upon such excess of debt over \$62,500,000 as is actually ascertained in amount at each period of deduction, instead of being based on the excess of debt as actually ascertained at the time of the passing of the Act, 36 Vic., Chap. 30, or as actually existing at the time of the union.

This appeal to the Supreme Court of Canada was, on the 6th day of May, 1895, dismissed, and the said award affirmed.

#### 2ND AWARD—31ST AUGUST, 1894.

*To all to whom these presents may come:*

The Honourable John Alexander Boyd, of the City of Toronto and Province of Ontario, Chancellor of the said Province; the Honourable George Wheelock Burbidge, of the City of Ottawa, in the said Province, Judge of the Exchequer Court of Canada, and the Honourable Sir Louis Napoleon Casault, of the City of Quebec, in the Province of Quebec, Judge of the Superior Court of the said Province of Quebec, send greeting:

Whereas, it was in and by the Act of the Parliament of Canada, 54-55 Vic., Chap. 6; and in and by an Act of the Legislative Assembly of Ontario, 54 Vic., Chap. 2; and in and by an Act of the Legislature of Quebec, 54 Vic., Chap. 4, among other things provided that for the final and conclusive determination of certain questions and accounts which had arisen, or which might arise in the settlement of accounts between the Dominion of Canada and the Provinces of Ontario and Quebec, both jointly and severally and between the two Provinces, concerning which no agreement had heretofore been arrived at, the Governor General in Council might unite with the Governments of the Provinces of Ontario and Quebec in the appointment

of three arbitrators, being judges, to whom should be referred such questions as the Governor General and Lieutenant-Governors of the Provinces should agree to submit;

And whereas, we, the undersigned, John Alexander Boyd, George Wheelock Burbidge and Sir Louis Napoleon Casault, have been duly appointed under the said Acts and have taken upon ourselves the burdens thereof;

And whereas, it was provided in and by the said Act that such arbitrators or any two of them should have power to make one or more awards, and to do so from time to time;

And whereas, certain questions respecting the allowance of interests to the Dominion, and the accounts relating to the Montreal Turnpike Trust and Debentures have been submitted to such arbitrators, and they have heard the parties thereto;

Now therefore, the said arbitrators exercising their authority to make a separate award at this time respecting the said matters do award, order and adjudge in and upon the premises as follows, that is to say:

1. That in respect of the separate accounts of both provinces, the Dominion be allowed interest at five per centum on all sums included in any balances in its favour that represent transfers from the Province of Canada account, or payments made by the Dominion under any liability of the Province of Canada to which it succeeded.

2. That in respect to the Quebec account, the Dominion be allowed interest at the rate of five per centum per annum on the two advances of \$500,000 and \$125,000, whenever it happens that there is a balance in favour of the Dominion of \$625,000 or more, and whenever such balance is less than \$625,000, then on such balance.

3. That in respect to the Ontario account, the Dominion be allowed interest at the rate of five per centum per annum on the \$936,729.33 transferred to the Common School Fund, and at the rate of four per centum on the \$500,000 advanced in four per cent Dominion stock whenever it happens that there is a balance in favour of the Dominion of \$1,436,729.33 or more, and whenever such balance is less than \$1,436,729.33 then interest shall be allowed to the Dominion at the rate of four per centum per annum on such balance to the amount of \$500,000 and at the rate of five per centum per annum on any sum in excess of the amount of \$500,000.

4. That all charges made in the accounts of the Dominion against the Province of Quebec for principal or interest on the Montreal Turnpike Trust Debentures be eliminated from the same.

In witness whereof, we, the said John Alexander Boyd, George Wheelock Burbidge and Sir Louis Napoléon Casault, have hereunto set our hands this thirty-first day of August, A.D. 1894.

(Signed)

J. A. BOYD,  
GEO. W. BURBIDGE,  
L. N. CASALT,

In so far as concerns \$792,750, part of the above mentioned sum of \$936,729.33, I dissent from the above award, as I think no interest should be charged against Ontario in respect thereof.

(Signed)

J. A. BOYD,

468. 3RD AWARD—13TH FEBRUARY, 1895.

*To all to whom these presents shall come :*

The Honourable John Alexander Boyd, of the City of Toronto, and Province of Ontario, Chancellor of the said Province; the Honourable Sir Louis Napoléon Casault, of the City of Quebec, in the Province of Quebec, Chief Justice of the Superior Court of the said Province of Quebec, and the Honourable George Wheelock Burbidge, of the City of Ottawa, in the said Province, Judge of the Exchequer Court of Canada, send greeting :

Whereas, it was in and by the Act of the Parliament of Canada, 54-55 Vict., Chap. 6, and in and by an Act of the Legislative Assembly of Ontario, 54 Vict., Chap. 2, and in and by an Act of the Legislature of Quebec, 54 Vict., Chap. 4, among other things provided that for the final and conclusive determination of certain questions and accounts which had arisen or which might arise in the settlement of accounts between the Dominion of Canada and the Provinces of Ontario and Quebec, both jointly and severally, and between the two Provinces concerning which no agreement had heretofore been arrived at, the Governor General-in-Council might unite with the Governments of the Provinces of Ontario and Quebec in the appointment of three arbitrators, being judges, to whom should be referred such questions as the Governor General and Lieutenant Governors of the Provinces should agree to submit ;

And whereas, we, the undersigned, John Alexander Boyd, Sir Louis Napoléon Casault and George Wheelock Burbidge, have been duly appointed under the said Acts and have taken upon ourselves the burdens thereof ;

And whereas, it was provided in and by the said Acts that such arbitrators or any two of them should have power to make one or more awards, and to do so from time to time ;

And whereas, certain questions respecting a claim made by the Dominion of Canada against the Provinces of Ontario and Quebec in respect of Indian claims arising out of the Robinson Treaties, and respecting a certain other claim made by the Dominion of Canada against the Province of Ontario for certain immigration expenditure, and a certain other claim made by the Province of Ontario against the Dominion of Canada in the first instance, and by notice to the Province of Quebec against that Province for the recovery of a balance of the Upper Canada Municipalities Fund, have been submitted to such arbitrators and they have heard the parties thereto ;

Now, therefore, the said arbitrators, exercising their authority to make a separate award at this time respecting the said matters, do award, order and adjudge in and upon the premises as follows, that is to say :—

I. In respect of the claim made by the Dominion of Canada against the provinces of Ontario and Quebec in reference to the Indian claims arising under the Robinson Treaties :—

1. That if in any year since the treaties in question were entered into the territory thereby ceded produced an amount which would have enabled the Government, without incurring loss, to pay the increased annuities thereby

secured to the Indian tribes mentioned therein, then such tribes were entitled to such increase not exceeding \$4 for each individual.

2. That the total amount of annuities to be paid under each treaty is, in such case, to be ascertained by reference to the number of Indians from time to time belonging to the tribes entitled to the benefit of the treaties. That is, that in case of an increase in the number of Indians beyond the numbers named in such treaties, the annuities, if the revenue derived from the ceded territory permitted, without incurring loss, were to be equal to a sum that would provide \$4 for each Indian of the tribes entitled.

3. That any excess of revenue in any given year may not be used to give the increased annuity in a former year in which an increased annuity could not have been paid without loss; but, that any such excess or balance of revenue over expenditure in hand at the commencement of any given year should be carried forward into the account of that year.

4. That any liability to pay the increased annuity in any year before the union was a debt or liability which devolved upon Canada under the 111th section of the British North America Act, 1867, and that this is one of the matters to be taken into account in ascertaining the excess of debt for which Ontario and Quebec are conjointly liable to Canada under the 112th section of the Act; and that Ontario and Quebec have not, in respect of any such liability, been discharged by reason of the capitalization of the fixed annuities, or because of anything in the Act of 1873, 36 Vic., Chap. 30.

5. That interest is not recoverable upon any arrears of such annuities.

6. That the ceded territory mentioned became the property of Ontario under the 109th section of the British North America Act, 1867, subject to a trust to pay the increased annuities on the happening, after the union, of the event on which such payment depended, and to the interest of the Indians therein to be so paid. That the ultimate burden of making provision for the payment of the increased annuities in question in such an event falls upon the province of Ontario; and that this burden has not been in any way affected or discharged.

7. That interest is not recoverable on the arrears of such annuities accruing after the union, and not paid by the Dominion to the tribes or Indians entitled.

8. That in respect of the matters hereinbefore dealt with the arbitrators have proceeded upon their view of disputed questions of law.

9. That as respects the increased annuities which have been paid by the Dominion to the Indians since the union any payments properly made are to be charged against the Province of Ontario, in the Province of Ontario account, as of the date of payment by the Dominion to the Indians, and so fall within and be affected by our previous ruling as to interest on that account.

That Mr. Chancellor Boyd dissents from so much of the proposition contained in this paragraph, as relates to the date at which such payment should be charged.

II. With respect to the claim made by the Dominion of Canada against the Province of Ontario for certain immigration expenditure:—

1. That the Government of Canada recover against the Province of Ontario the amount claimed for the year 1878, but that in reference to

claim made in respect of the years 1879 and 1880 the Province of Ontario be discharged, and this award is without prejudice to any question as to whether or not the province has paid more than was actually due in any year.

III. With respect to the claim made by the Province of Ontario against the Dominion of Canada, and by notice against the Province of Quebec for the recovery of a balance on the Upper Canada Municipalities Fund:—

1. That the province do recover against the Dominion \$15,732.76, parcel of the sum of \$21,488.74 claimed, which said sum of \$15,732.76 is to be credited to the Province of Ontario, in the Province of Ontario account, as of the date of the 1st July, 1872; and that as to the balance of the said claim amounting to \$5,755.98 the Dominion be discharged, and that the Province of Quebec be discharged in respect of the whole claim.

In witness whereof, we, the said John Alexander Boyd, Sir Louis Napoleon Casault and George Wheelock Burbidge, have hereto set our hands and seals this thirteenth day of February, A.D., 1895.

L. A. AUDETTE.

469. 4TH AWARD—26TH MARCH, 1895.

*To all to whom these presents shall come :*

The Honourable John Alexander Boyd, of the City of Toronto and Province of Ontario, Chancellor of the said province, the Honourable Sir Louis Napoleon Casault, of the City of Quebec, Chief Justice of the Superior Court of the said Province of Quebec, and the Honourable George Wheelock Burbidge, of the City of Ottawa, in the said Province of Ontario, Judge of the Exchequer Court of Canada, send greeting:—

Whereas, it was in and by the Act of the Parliament of Canada, 54-55 Vic., Chap. 6, and in and by an Act of the Legislative Assembly of Ontario, 54 Vic., Chap. 2, and in by an Act of the Legislature of Quebec, 54 Vic., Chap. 4, among other things provided that for the final and conclusive determination of certain questions and accounts which had arisen or which might arise in the settlement of accounts between the Dominion of Canada and the Provinces of Ontario and Quebec, both jointly and severally, and between the two provinces concerning which no agreement had heretofore been arrived at, the Governor General in Council might unite with the governments of the Provinces of Ontario and Quebec in the appointment of three arbitrators, being judges, to whom should be referred such questions as the Governor General and Lieutenant-Governors of the said Provinces should agree to submit;

And whereas, we, the undersigned, John Alexander Boyd, Sir Louis Napoleon Casault and George Wheelock Burbidge, have been duly appointed under the said Acts, and have taken upon ourselves the burdens thereof;

And whereas, it was provided in and by the said Acts that such arbitrators or any two of them should have power to make one or more awards, and to do so from time to time ;

And whereas, certain questions relative to a claim made by the Dominion of Canada against the Province of Ontario in respect of certain coupons on bonds issued by the City of Hamilton, as mentioned in the statement of claim and answer thereto filed herein, have been submitted to such arbitrators, and they have heard the parties thereto, and also what was alleged in respect thereof by the counsel for the Province of Quebec ;

Now, therefore, the said arbitrators, exercising their authority to make a separate award at this time respecting the said matter, do award, order and adjudge in and upon the premises as follows, that is to say :—

That the Dominion of Canada do, in respect of such claim, recover against the Province of Ontario the sum of sixteen thousand seven hundred and eighty-one dollars and thirty-five cents (\$16,781.35), and that the said amount be charged against the Province of Ontario and credited to the Dominion of Canada in the Province of Ontario account, as of the thirty-first of December, one thousand eight hundred and ninety-two.

In witness whereof, we, the said John Alexander Boyd, Sir Louis Napoleon Casault and George Wheelock Burbidge, have hereunto set our hands and seals this twenty-sixth day of March, A.D., 1895.

#### 470. 5TH AWARD—13TH NOVEMBER, 1895.

*To all to whom these presents shall come :*

The Honourable John Alexander Boyd, of the City of Toronto, and Province of Ontario, Chancellor of the said province, the Honourable Sir Louis Napoleon Casault, of the City of Quebec, in the Province of Quebec, Chief Justice of the Superior Court of the said Province of Quebec, and the Honourable George Wheelock Burbidge, of the City of Ottawa, in the said Province of Ontario, Judge of the Exchequer Court of Canada, Send greeting :

Whereas, it was in and by the Act of Parliament of Canada, 54-55 Vic., Chap. 6, and in and by an Act of the Legislative Assembly of Ontario, 54 Vic., Chap. 2, and in and by an Act of the Legislature of Quebec, 54 Vic., Chap. 4, among other things provided that for the final and conclusive determination of certain questions and accounts which had arisen or which might arise in the settlement of accounts between the Dominion of Canada and the Provinces of Ontario and Quebec, both conjointly and severally, and between the two provinces, concerning which no agreement had theretofore been arrived at, the Governor General in Council might unite with the governments of the Provinces of Ontario and Quebec in the appointment of three arbitrators, being judges, to whom should be

referred such questions as the Governor General and Lieutenant-Governors of the said Provinces should agree to submit ;

And whereas, we, the undersigned, John Alexander Boyd, Sir Louis Napoleon Casault, and George Wheelock Burbidge have been duly appointed under the said Acts, and have taken upon ourselves the burdens thereof ;

And whereas, it was provided in and by the said Acts that such arbitrators or any two of them should have power to make one or more awards, and to do so from time to time ;

And whereas, certain questions relative to certain claims have been submitted to such arbitrators, that is to say : (First.) The claim made by the Dominion of Canada against the Provinces of Ontario and Quebec, in respect of the alleged liability of the Province of Canada to the Mississagua Indians of the Credit. (Second.) A counter-claim by the Province of Ontario against the Dominion of Canada, for the sum of five thousand five hundred and eighty-two dollars and thirty-six cents (\$5,582.36), charged by the Dominion of Canada against the Widows' Pensions and Uncommuted Stipends Fund, and credited to the Mississagua Indians of the Credit aforesaid. (Thirdly.) A claim made by the Dominion of Canada against the Provinces of Ontario and Quebec on behalf of the Delaware Indians ;

And whereas, the said claims have been proceeded with before the said arbitrators, and they have heard the parties thereto, and what has been alleged on their behalf by counsel ;

Now, therefore, the said arbitrators, exercising their authority to make a separate award at this time respecting the said matters, do award, order and adjudge in and upon the premises as follows, that is to say :—

(Firstly.) That the claim made by the Dominion of Canada against the Provinces of Ontario and Quebec, in respect of the alleged liability of the Province of Canada to the Mississagua Indians of the Credit, be, and the same is hereby dismissed.

(Secondly.) That in respect of the counter-claim made by the Province of Ontario against the Dominion of Canada for the sum of five thousand five hundred and eighty-two dollars and thirty-six cents (\$5,582.36), charged by the Dominion of Canada against the Widows' Pensions and Uncommuted Stipends Fund, and credited to the Mississagua Indians of the Credit aforesaid, that the said Province of Ontario is entitled to be credited as of the first of January one thousand eight hundred and sixty-nine, or such other date as may be agreed upon, with the amount of two thousand four hundred dollars and eighty-six cents (\$2,400.86) charged to the Widows' Pensions and Uncommuted Stipends Fund, in respect of the Crown Reserves ; the arbitrators being of opinion and finding that the charges against that fund in respect of the Clergy Reserves have been rightfully and properly made.

(Thirdly.) That the claim of the Dominion against the Provinces of Ontario and Quebec on behalf of the Delaware Indians, be, and the same is hereby dismissed.

In witness whereof, we, the said John Alexander Boyd, Sir Louis Napoleon Casault, and George Wheelock Burbidge have hereunto set our hands and seals this thirteenth day of November, A.D., 1895.

A. AUDETTE.

## BOUNDARY LINE BETWEEN CANADA AND THE UNITED STATES.

471. Mr. W. F. King, Chief Astronomer of the Canadian Department of the Interior, and Dr. T. C. Mendenhall, Commissioner for the United States, have been engaged for two years in surveying the territory adjacent to the boundary line between British Columbia and Alaska. The Canadian commissioner reports that as a result of the three seasons' work the whole coast line from Behm's Canal to Cape Fairweather has been covered by a connected photo-topographical survey.

He states that but little further work is required in order to obtain all necessary information with regard to the coast between Cape Fairweather and Yakutat Bay, a distance of 70 miles, and to supplement the information obtained by the United States party in the vicinity of Mount St. Elias and the 141st meridian, which is the westerly terminus of the work of the Commission.

The marking of the boundary line between New Brunswick and the State of Maine in Passamaquoddy Bay, under the second article of the Convention in 1892, is in the hands of the same two commissioners.

The history of the Commission is briefly: The Treaty of St. Petersburg (1825) between Great Britain and Russia contains the following articles:—

III. "The line of demarcation between the possessions of the high contracting parties upon the coast of the continent and the islands of America to the north-west shall be drawn in the manner following:—

"Commencing from the southernmost point of the island called Prince of Wales Island, which point lies in the parallel of 54 degrees 40 minutes north latitude, and between the 131st and 133rd degree of west longitude (meridian of Greenwich), the said line shall ascend to the north along the channel called Portland Channel as far as the point of the continent where it strikes the 56th degree of north latitude; from this last mentioned point the line of demarcation shall follow the summit of the mountains situated parallel to the coast as far as the point of intersection of the 141st degree of west longitude (of the same meridian) and, finally, from the said point of intersection, the said meridian line of the 141st degree of its prolongation, as far as the frozen ocean, shall form the limit between the Russian and British possessions on the Continent of America to the north-west."

IV. "With reference to the line laid down in the preceding article, it is understood:—

1st. "That the island called Prince of Wales Island shall belong wholly to Russia."

2nd. "That wherever the summit of the mountains which extend in a direction parallel to the coast, from the 56th degree of north latitude to the point of intersection of the 141st degree of west longitude, shall prove to be at the distance of ten marine leagues from the ocean, the limit between the British possessions and the line of coast which is to belong to Russia, as above mentioned, shall be formed by a line parallel to the windings of the coast, and shall never exceed the distance of ten marine leagues therefrom."

The United States purchased Alaska from Russia in 1867.

The Canadian Ministers visited Washington in 1891 with a view to provide for the removal of all causes of difference in respect of such portions of the boundary as might not have been permanently marked by virtue of treaties before that date made, and as a result a Convention was ratified by Her Majesty and the President of the United States.

The Treaty concluded at Washington consists of two articles, which are as follows :—

"Article I. The high contracting parties agree that a coincident or joint survey (as may be found in practice most convenient) shall be made of the territory adjacent to that part of the boundary line of the United States of America and the Dominion of Canada dividing the territory of Alaska from the Province of British Columbia and the North-west Territory of Canada, from the latitude of 54 degrees 40 minutes north to the point where the said boundary line encounters the 141st degree of longitude westward from the meridian of Greenwich, by commissions to be appointed severally by the high contracting parties, with a view to ascertainment of the facts and data necessary to the permanent delimitation of said boundary line in accordance with the spirit and intent of the existing treaties in regard to it between Great Britain and Russia, and between the United States and Russia.

"Application will be made without delay to the respective legislative bodies for the appropriations necessary for the prosecution of the survey, and the commissions to be appointed by the two governments shall meet at Ottawa within two months after said appropriation shall have been made, and shall proceed as soon as practicable thereafter to the active discharge of their duties.

"The respective commissions shall complete the survey and submit their final reports thereof within two years from their first meeting.

"The commission shall, so far as they may be able to agree, make a joint report to each of the two governments, and they shall also report, either jointly or severally, to each government on any point upon which they may be unable to agree.

"Each government shall pay the expenses of the commission appointed by it.

"Each government engages to facilitate in every possible way any operations which, in pursuance of the plan to be agreed upon by the commission, may be conducted within its territory by the commission of the other.

"The high contracting parties agree that, as soon as practicable after the report or reports of the commissions shall have been received, they will proceed to consider and establish the boundary line in question.

"Article II. The high contracting parties agree that the governments of the United States and Her Britannic Majesty in behalf of the Dominion of Canada shall, with as little delay as possible, appoint two commissioners, one to be named by each party, to determine upon a method of more accurately marking the boundary line between the two countries in the waters of Passamaquoddy Bay in front of and adjacent to Eastport, in the State of Maine, and to place buoys or fix such other boundary marks as they may determine to be necessary.

"Each government shall pay the expenses of its own commissioner, and cost of marking the boundary in such manner as shall be determined upon shall be defrayed by the high contracting parties in equal moieties."

With respect to Article II the following explanation is given :—

The sovereignty of the Islands in the Bay of Fundy was settled by commissioners appointed under Treaty of Ghent (1814). The commissioners, however, while awarding certain islands to Great Britain, did not distinctly define any boundary between the possessions of Great Britain and the United States. Some fishermen of the United States have erected weirs which are believed to be on Canadian territory, and it has become desirable to settle definitely and mark upon the ground where the boundary is. The commissioners under the convention of 1892, on the 31st December, 1895, signed their joint report which has been transmitted to the governments of Canada and the United States. This report is to the effect that the commissioners, in pursuance of their duties under the convention, have made a joint survey of the territory adjacent to the international boundary line, from the southernmost point of Prince of Wales Island to the 141st degree of west latitude ; and they submit with the report detailed topographical maps. This report which has reference to Article I is signed by Mr. W. F. King, Her Majesty's commissioner, and by General W. W. Duffield, the commissioner for the United States.

An agreement between the commissioners, under Article II of the convention concerning the marking of the boundary line in Passamaquoddy Bay, had not been reached at that date.

### UNION OF NEWFOUNDLAND AND CANADA.

472. A conference between representatives of the Government of Canada and representatives of Newfoundland took place on the 4th April, 1895, in Ottawa.

Hon. Sir Mackenzie Bowell, K.C.M.G., Hon. Sir Adolphe Caron, K.C.M.G., Hon. George E. Foster and Hon. John Haggart represented the Canadian Government, and Honourables R. Bond, E. P. Morris, G. H. Emerson and W. H. Horwood represented Newfoundland.

The following were the terms proposed by the Canadian Government after several meetings between the 4th and the 16th April :—

- (1.) Canada to assume the present debt of Newfoundland ..... \$8,350,000  
Canada to assume an excess of debt over that sum to ..... 2,000,000

Total ..... \$10,350,000

This is equal to \$50 per head of Newfoundland's population of 207,000.

On this excess of \$2,000,000 Canada to pay interest at 5 per cent per annum.

- (2.) Canada to pay as a yearly allowance to Newfoundland the following sums :—

(a) Allowance for legislation. .... \$ 50,000

(b) Subsidy of 80c. per head of Newfoundland's population up to 400,000 ; present population is 207,000 which, at 80c. equals ..... 165,600

The payments to be adjusted after each decennial census.

(c) Allowance for crown lands and rights of minerals and metals and time thereon ..... 150,000

(d) Interest at 5 per cent on \$2,000,000 excess of debt. .... 100,000

Total ..... \$465,600

(3.) Canada to maintain all that class of services in Newfoundland which falls under the head of Dominion or general services:—

Governor's salary.	Marine and Light Houses.
Customs.	Fisheries.
Excise.	Penitentiaries.
Savings Banks.	Weights and Measures.
Public Works of a Dominion character.	Gas Inspection.
Crown Lands.	Arts, Agriculture and Statistics.
Administration of Justice.	Quarantine and Immigration.
Post Office.	Insurance Inspection.
Steamship Services.	Geological Survey.

(4.) Canada to maintain in regard to steamship services, passenger and mail communication in at least as efficient a manner as at present, as follows:—

Between the mainland and Newfoundland.
" Newfoundland and Great Britain.
" " Labrador.

The coastal steam services east and west.

(5.) In lieu of expenditure on Militia in Newfoundland until such time as Parliament may deem it necessary to introduce a more general militia system, Canada to grant \$40,000 annually towards the maintenance of a police constabulary, the force to be at the disposal of the Dominion Government for use anywhere in Canada in cases of general and serious emergency.

(6.) The fishermen of Newfoundland to participate on equal terms in any bounties to fishermen granted by the Dominion Government.

(7.) Canada to take over at a valuation the SS. *Fionia* now in use for fishery service.

(8.) Newfoundland to be represented in the Senate of Canada by 4 senators and in the House of Commons by 10 representatives.

The Premier of Newfoundland took issue with the financial terms, desiring that the whole of the public debt of the province should be assumed by the Dominion; that the Port aux Basques Railway should be completed, and that the sum of \$650,000 should be allowed for annual expenses of local government.

The total debt of the Province was \$9,116,535, with \$1,456,000 under loan and \$675,000 floating debt. The amount required to complete railway to Port aux Basques is given in the Newfoundland memoranda at \$3,620,000.

The papers laid before Parliament conclude with a cable from Sir Mackenzie Bowell to Sir William Whiteway stating that if Newfoundland adopts Lord Ripon's proposal, terms may be modified by aid from Home Government. If not, Canada can only supplement proposal made to the delegates by agreeing, in addition, to aid in construction of Newfoundland railway from River Exploits to Port aux Basques by a subsidy of \$6,000 a mile and to add \$35,000 additional to yearly allowance.

#### 473. RAILWAY RATES COMMISSION.

The Minister of Railways and Canals appointed a Commission to take evidence in the matter of complaints of "exorbitant and unreasonable passenger and freight rates and of discrimination in both in the Province of Manitoba and the North-west Territories," preferred by the Legislative Assembly of the North-west Territories, the Central Farmers' Institute and others.

A thorough investigation was held by the Commissioners in the winter of 1894-5, the date of the sittings being made public and witnesses invited to

attend by notices in the local newspapers and by circulars. An adjournment was made to a date to suit the convenience of the Hon. J. D. Cameron, Provincial Secretary for Manitoba, Premier Haultain of the North-west Territories, and Mr. J. H. Ashdown, appointed by the Winnipeg Board of Trade to represent them. These gentlemen, with Mr. J. Eldor, president, and R. E. Leach, secretary, for the Manitoba Central Farmers' Institute, and the Hon. C. A. Boulton, president, for the Russell Lodge of Patrons of Industry, besides many private individuals, presented statements and gave evidence in support of the complaint. Sittings were held at Winnipeg, Morris, Morden, Pilot Mound, Boissevain, Melita, Glenboro', Carberry, Brandon, Virden, Portage la Prairie, Wawanese, Neepawa, Prince Albert, Edmonton, Calgary, Moosomin and Regina. Offers to hold sittings at Birtle, Grenfell, Hamiota, Indian Head, Lethbridge, Macleod, Moose Jaw, Red Deer and Wetaskawin were not accepted by those places, it being apparently considered that the case for the complaint had been fully covered by the Manitoba Government, the Winnipeg Board of Trade and other witnesses. Evidence as to the company's rates and other matters was given by Vice-President Shaughnessy and Mr. Kerr, General Freight and Passenger Agent at Winnipeg, on behalf of the Canadian Pacific Railway.

The Commissioners, rejecting some comparisons of freight rates offered on either side as unsuitable through differences of circumstances, compared the grain freight rates of the Canadian Pacific Railway to the lake port Port William and to the Atlantic port Montreal with the rates of the Great Northern and the Northern Pacific Railway to the lake port Duluth, and to the Atlantic port New York, from corresponding localities in North Dakota, finding in every case that the rates of the Canadian Pacific Railway were lower. They also found that the Canadian Pacific Railway rates for grain were lower than the schedule of mileage rates for grain fixed by the Minnesota Railway Commissioners, which was being resisted in the courts by the railways. A similar comparison of the freight rates of the Canadian Pacific Railway for live stock to Montreal with those of the Great Northern and Northern Pacific Railways to New York showed the rates of the Canadian Pacific Railway to be considerably lower. The coal freight rates of the Canadian Pacific Railway were found to be very much lower than those of the Great Northern and Northern Pacific Railway, both for imported and domestic coal, except in the case of short hauls eastward from Anthracite. The local coal freight rates of the Canadian Pacific Railway in Manitoba and the North-west were also found to average lower than the rates of the Reading, the Lehigh Valley and the Jersey Central Railway. The freight rates on lumber of the Canadian Pacific Railway from Rat Portage were found to be lower than those of the Northern Pacific from Duluth or of the Great Northern from Minneapolis. Agricultural implements shipped by the Canadian Pacific Railway from Toronto were subject to a higher actual rate, but a lower mileage rate than those shipped by the Great Northern or Northern Pacific from Chicago. The freight rates on merchandise were slightly higher for all rail and slightly lower for lake and rail by the Canadian Pacific Railway from Montreal than by the Great Northern or Northern Pacific from New York or Boston. As regards dairy products the rates of the Canadian Pacific Railway were slightly higher on butter, dressed poultry and eggs, and considerably lower on cheese than those of the Northern Pacific and Great Northern. A refrigerator car service

with favourable rates had been provided to convey dairy products from Manitoba and the North-west to British Columbia. For these articles, composing the bulk of the freight carried, the Commission came to the conclusion that the rates in Manitoba and the North-west were neither exorbitant nor excessive, but were exceedingly favourable as compared with the rates on United States roads in contiguous territory, and were little in excess of average rates charged on corresponding traffic in the eastern provinces, considering that the great bulk of the traffic in grain, live stock and coal in the west entailed the hauling of about 75 per cent of the cars empty one way.

The rates for cord wood were rather higher than those of the Grand Trunk Railway, and rather higher than those of the Intercolonial Railway, but could not be considered unreasonable. They were slightly higher than those of the Northern Pacific Railway in Minnesota and Dakota, which were granted in the early history of the railway as an inducement to settlement. Local rates, both freight and passenger, were high, compared with those in the Eastern Provinces, but not in excess of those charged by the Great Northern and Northern Pacific in contiguous territory. Complaints were made of the rates on the leased branches to Edmonton and Prince Albert, but it appeared that the net earnings were very small. Breeding stock, shipped between local points, was subject to a heavy rate, but a whole car might be required for a single animal. Seed grain had been shipped at half or one-third rates, and even free when needed.

Discrimination in rates as between individuals was disproved. As regards live stock, small shippers were allowed the same train-load rate as large shippers by clubbing together and making up a train load collected from a dozen or more places to a central point, no local rate being charged for this gathering, but only the through rate from the original point of shipment. As to the supposition of discrimination in favour of Messrs. Ogilvie & Co., it arose from a misunderstanding of the milling-in-transit rate. In regard to complaints of lumber and shingles being carried from British Columbia at a lower rate to Ontario than to Manitoba, it appeared that the rates from the coast to Manitoba and North-west points were very low, while to Ontario they were still lower as to mileage, but actually 50 to 100 per cent higher.

There were no complaints from the largest shippers of grain and cattle, who were satisfied with their treatment by the Canadian Pacific Railway. The company, both as railway carriers and owners of large tracts of land, must observe a policy favourable to settlers, and appeared to desire to give facilities to anything that would add to the business of the country and the traffic of the road. Any anomalies when pointed out to them were explained or redressed.

## GEOLOGICAL SURVEY.

### A NEW RIVER.

174. Professor R. Bell, of the Geological Survey, in 1895 made an exploration and survey in almost a direct course from Ottawa city to James Bay, which resulted in some important geographical, as well as geological, *veries*. Heretofore all our maps have shown a large unexplored region

lying to the south-east of James Bay with some imaginary rivers dotted upon it. Dr. Bell has proved that nearly the whole region is drained by one stream which discharges into Rupert Bay, where it is called the Noddawai River, but nothing was hitherto known of its course inland. Our first definite knowledge of its main branch was obtained by Dr. Bell in 1887 through one of his assistants, Mr. A. S. Cochrane, whom he sent from Grand Lake to explore its upper waters. The "height of land" was found to pass quite close to the northern extremity of this lake, or much further south than had been represented on the sketch-maps. The new river began on the north side of the water-shed in the geographical depression in which the long northern arm of Grand Lake lies. The "divide" here consists of a shallow deposit of sand which blocks up this ancient river-course and turns the waters of the Upper Ottawa westward down their present channel; but at a comparatively recent date, geologically, these waters appear to have flowed northward by the new river which Dr. Bell followed to James Bay. The drainage basin of the latter stream lies immediately north of the sources of the Ottawa and between Lake Mistassini on the east and Abitibi River on the west. The outline of the border of the basin has a rounded figure when mapped and it measures about 300 miles in diameter, but one of its branches makes a long curve from its source and it bends about in such a way as to give the river a detailed course of nearly 500 miles. This hydrographic basin, lying south-east of the head of James Bay, is the counterpart of the basin of Moose River, which lies to the south-west of it, and has almost the same area. The stream followed proved to be the central or trunk river of the system and many large branches fell into it from both sides, all the way to Mattagami Lake, at the head of the Noddawai River.

Although such a large stream, it has hitherto received no name, and the *Scottish Geographical Magazine*, as well as the press both in Canada and the United States, have called it Bell River, after the person who first surveyed it and made it known to geography. It often happens that the Indians have no distinctive name for a leading topographical feature, as in this case. They have no idea of a permanent or general geography. Different names for the same places or the same lakes and rivers prevail at different times, as was noted by the earlier discoverers in Canada. In any generation each band or each isolated family will have its own set of names for its limited world. The largest river or lake of this region does not require in their view any special designation, but may be called "the lake" or "the big lake" or "river." James Bay is "the great salt lake"; Hannah Bay is "the bay," &c., but all the smaller features bear temporary names.

It may be asked how it happened that this important region was not sooner explored. There may be several reasons. One is the difficulties in the way of getting there, and another the fact that it produces nothing which would pay to exploit, without better means of communication. The main river has never been a travelled route even of the Hudson's Bay Company. There is a post of the company on the Waswanipi River, a large tributary from the east which falls into Mattigami Lake, already mentioned. The waters which unite in this lake discharge a very large stream 100 miles long and identical with what has been called the Noddawai at its mouth. In the lower half of this distance the country descends with a more p

ceptible grade, and the river is almost continuously rapid all the way to Rupert Bay. But above this the character of the drainage area of this great river may be described as a generally level or slightly undulating plateau, 500 to 1,000 feet above the sea, broken at intervals by hills and ridges. The soil is usually of a clayey nature, and this imparts a muddy quality to the water of most of the branches.

The hydrographic basin explored by Dr. Bell is as large as the inhabited parts of Ontario, Quebec or the State of New York. It has an area of 70,000 square miles or more, and is, therefore, considerably greater than England; and, as Dr. Bell thinks that most of it is fit for cultivation, it is evident we have here a very important addition to the more valuable portion of the Dominion. In a general way this region lies south of England in latitude, and its climate appears to be fully as good as that of the shores of the lower St. Lawrence. Wheat has been found to ripen on the Mississibi and Abitibi Rivers to the west, and at Lake St. John to the east of the centre of this area, so that it may be assumed that it will also ripen in the intervening tract, while barley ripens at Rupert House and Moose Factory, both of which lie to the northward of the district in question.

The whole country is well wooded, the district having fortunately escaped the fires which have been so prevalent in most of our northern forests. White and red pine are found in the southern parts, but the staple trees of the region are white and black spruces and the tamarack. White birch and Banksian pine, both of fine quality, are also very abundant and there is a mixture of balsam-fir, cedar, balsam-poplar, aspen and a few other trees. When this region is opened for settlement by the construction of railways, it will afford an almost inexhaustible supply of the finest pulp wood—to say nothing of good spruce and tamarack timber.

As to economic minerals, Dr. Bell reports the prospect as excellent. The Huronian rocks underlie a large area; and they are as likely to abound in the ores of various useful metals here as elsewhere.

Game was unaccountably scarce throughout the whole region, but fish was tolerably plentiful. Except near the "Height of Land" no Indians inhabit the country, and this fact may help to account for the general ignorance which has prevailed in reference to the existence of this large river. Dr. Bell secured the services of the only Indian who knew the main stream as far as Mattagami Lake, but this man could not tell even from hearsay where the river discharged into the sea. But supposing the stream to have been known to the Aborigines, Dr. Bell's results are to be regarded as a discovery, since it is through them that this great river and its connections have been made known to geography.

#### A NEW REGION.

475. Mr. Henry O'Sullivan, Inspector of Surveys to the Province of Quebec, makes a report to the Hon. E. J. Flynn, Commissioner of Crown Lands, dated 15th May, 1895, giving details of his explorations in the region beyond the sources of the Ottawa River not far from the territory in which Bell has been at work.

Mr. O'Sullivan says "there is very little doubt that there exists beyond the sources of the Ottawa a fertile region, several thousand miles in extent, where there is an abundance of merchantable timber, principally tamarack, of which there is a sufficient quantity to supply sleepers for all the railways in the Dominion. A glance at the latest official map of the Province of Quebec will show a vast extent of country, bounded on the north by the Rupert River and James Bay, on the east by Lake Mistassini and the head waters of the Ashuapmouchouan and St. Maurice Rivers, on the south by the height of land dividing the St. Lawrence from the Hudson Bay waters, and on the west by the Province of Ontario, that up to last year was as little known as it was in the days of Jacques Cartier. Roughly speaking this vast region extends over about three degrees of latitude and five degrees of longitude, containing about 50,000 square miles or 32 million acres, equal in area to England, and one third larger than Ireland." The general impression was that all that northern region is a cold rocky waste. But says Mr. O'Sullivan, "Father Gueguin, in relating to me some of his experiences among the Indians, mentioned having seen some good land and large timber in the neighbourhood of Lake Waswanipi and advised me to explore it." He followed the advice, and from his explorations concludes "that there is no doubt, that instead of a barren mountainous region there exists a fertile slope gently falling towards James Bay." Of course there are barren wastes of burnt country, but these do not materially affect Mr. O'Sullivan's conclusions, which are, that a large extent of the newly explored region is well adapted for agriculture, that its timber is capable of being turned to good account, and that from the quartz veins which he saw he thinks it possible that further explorations may result in the discovery of gold. Mr. O'Sullivan maintains that there is every reason to believe that the climate of this region compares favourably with that of the country along the St. Lawrence between Quebec and Montreal. Father Albanel, who wrote an account of his journey via the Saguenay and Rupert Rivers to Hudson Bay, in 1671-72, records that on June 15th he saw "wild roses blooming as lovely and smelling as sweetly as any around Quebec," and this must have been 60 miles further north than the furthest point reached by Mr. O'Sullivan. At Waswanipi post, latitude  $49^{\circ} 39' 55''$ , Mr. O'Sullivan saw, on the 20th September, the potato tops as green as in midsummer. He says, of course, near the height of land it would naturally be colder and more subject to frost; and in the neighbourhood of Hudson Bay the low temperature of that immense body of water must have a cooling effect on the climate, but a certain distance from these extremes I believe that a mild, genial climate favours the greater part of the land."

The most northerly point reached by him is a little south of the parallel of the City of Winnipeg. Taking into account the increasing altitude going westward, he is of opinion that as regards climate the region he partially explored compares favourably with Manitoba and the North-west. There is an abundance of water, with numerous cascades, and unlimited quantities of timber and stone for railway purposes.

Dealing with the accessibility of this region Mr. O'Sullivan says there is certainly no obstacle to the building of a railway from any part of the Province of Quebec into the heart of this region.

These two accounts, Dr. Bell's and Mr. O'Sullivan's, make it plain that Canada possesses extensive regions in the North-east Territories which so far have been untouched but which are quite as capable of being turned to practical account as much of the area already settled. What function these regions can perform in the general economy of the Dominion and of the Empire will doubtless be discovered within the next few years.

## THE ABSTRACT

## CHAPTER IX.

Census Returns.—Ontario Returns.—Manitoba.—Value of farm property in Ontario and the United States.—Agriculture in England and other Countries.—Great Britain's Imports of Foods.—Wheat exporting and importing Countries.—Decreased area.—Tables, Imports and Exports of Agricultural products.—Beet-root sugar in Canada.—Viticulture in Canada.—Tobacco raising in Canada.—Farm Stock.—Quarantine.—Experimental Farms.—Dairying.

476. Looked at with respect to the number of persons directly dependent upon the land for a living, agriculture is the chief industry in Canada. In 45 per cent of the population find their means of subsistence and their opportunities for the accumulation of wealth. Agriculture is, therefore, in Canada a branch of industry of paramount importance. Whatever affects it, prejudicially or beneficially, affects directly all other employments. Its products constitute one-fourth of the freightage of our railways, and one-third of that of our canals. Our mercantile marine depends largely upon the products of agriculture for freights, more than one-half of which are products of the farm.

According to the Census of 1891, the area of improved lands in Canada is 28,537,242 acres, of which 19,904,826 acres were under crop. There are 464,462 acres in gardens and orchards and 15,284,788 acres in pasture. The increase in lands under crop in 1891 compared with 1881 was 4,792,542 acres, or over 30 per cent. Relatively to the whole area of Canada the area under crop and in pasture was about 10 per cent.

There are, therefore, great possibilities of expansion in the future even in the older provinces, while in Manitoba and the organized districts of the Northwest, Alberta and Saskatchewan there are nearly 239,000,000 acres, which have been brought to the uses of the farmer and the ranchers to the extent of 7,832,200 acres. Included in this statement are the ranching lands, which, in 1895, covered 904,187 acres, distributed among 185 ranches.

77. The Census returns of 1891 give the following information for the Dominion. A comparison with the Census of 1881 is also given.

	1891.	1881.
Wheat.....	bush. 42,144,779	32,350,269
Barley.....	" 17,148,198	16,844,868
Oats.....	" 82,515,413	70,493,131
Rye.....	" 1,328,322	2,097,180
Pease and beans.....	" 15,514,836	13,749,662
Buckwheat.....	" 4,886,122	4,901,147
Corn.....	" 10,675,886	9,025,142
Potatoes.....	" 52,653,704	55,268,227
Turnips and other roots.....	" 49,555,902	48,251,414
Grass and clover.....	" 340,650	324,317
Fruits, grapes, &c.....	lbs. 68,864,181	45,957,458
Tobacco.....	" 4,277,936	2,527,962
Hops.....	" 1,126,230	905,207
Flax seed.....	bush. 137,015	108,694

There was an increase in all these articles with the exception of rye and buckwheat. Of course the Census returns, being taken only once in ten years, are an uncertain index of the development of the agriculture of the country, since the years of comparison may be, the one a good year, and the other a poor year.

478. The Province of Ontario has yearly Agricultural returns, the Legislature of that province having wisely provided for such returns since 1882.

According to these returns the crops of that province have resulted under :—

		1895.	1894.	1882-95.
Fall wheat .....	bush.	14,155,282	16,512,106	17,806,963
Yield per acre.....	"	19.0	21.2	20.1
Spring wheat.....	"	3,472,543	3,367,854	7,724,774
Yield per acre.....	"	15.5	14.6	15.2
Barley.....	"	12,090,507	10,980,404	17,046,059
Yield per acre.....	"	25.3	22.6	25.5
Oats.....	"	84,697,566	70,172,516	61,594,192
Yield per acre.....	"	35.7	30.0	34.3
Rye.....	"	1,900,117	1,386,606	1,589,008
Yield per acre.....	"	15.8	15.4	16.0
Pease.....	"	15,568,103	14,022,888	14,095,782
Yield per acre.....	"	19.5	17.9	20.2
Buckwheat.....	"	2,791,749	2,534,335	1,740,483
Yield per acre.....	"	20.6	17.4	19.8
Beans.....	"	1,494,179	827,514	586,847
Yield per acre.....	"	20.5	14.0	17.3
Potatoes.....	"	29,390,884	17,163,130	18,582,991
Yield per acre.....	"	159.2	102.6	118.5
Mangel-Wurzels.....	"	15,961,502	11,532,127	9,414,830
Yield per acre.....	"	464	417	438
Carrots.....	"	4,581,373	3,716,140	3,692,128
Yield per acre.....	"	352	332	350
Turnips.....	"	63,496,702	61,694,487	48,251,499
Yield per acre.....	"	418	418	418
Corn for husking.....	"	24,819,899	16,275,352	16,599,428
Yield per acre.....	"	81.9	60.9	68.5
Corn for silo and fodder.....	tons.	1,775,654	1,049,765	1,205,963
Yield per acre.....	"	11.84	9.43	10.75
Hay and clover.....	"	1,849,914	3,575,300	3,271,488
Yield per acre.....	"	73	139	138

479. The Province of Manitoba has also made provision for the annual collection of crop statistics.

The following figures, published by the Manitoba Government, give the area and yield of the principal crops of the province in 1892, 1893, 1894 and 1895, and the average per acre :—

AREA UNDER CULTIVATION OF PRINCIPAL CROPS IN MANITOBA.  
1892, 1893, 1894 AND 1895.

Crops.	1892.	1893.	1894.	1895.
	Acres.	Acres.	Acres.	Acres.
Wheat.....	875,990	1,003,640	1,010,186	1,140,2
Oats.....	332,974	388,529	413,686	482,6
Barley.....	97,644	114,762	119,528	153,8
Potatoes.....	10,003	12,387	13,300	16,7

CROPS IN MANITOBA, 1892, 1893, 1894 AND 1895.

CROPS.	1892.	1893.	Average yield per acre, 1893.	1894.	Average yield.	1895.	Average yield.
	Bush.	Bush.		Bush.		Bush.	
Wheat.....	14,453,835	15,615,923	15·6	17,172,883	17·0	31,775,036	27·8
Oats.....	11,654,090	9,823,935	25·3	11,907,854	28·8	22,556,733	46·7
Barley.....	2,831,676	2,547,653	22·1	2,981,716	24·2	5,645,036	36·7
Potatoes.....	2,000,600	1,649,384	133·0	2,035,336	153·0	4,042,562	243·5

In 1895 the total yield of pease was 28,229 bushels; of flax, 1,281,354 bushels from 82,668 acres, showing an average yield of 15·5 bushels; of rye, 81,082 bushels, and of roots other than potatoes, 2,285,283 bushels.

480. The Government of the Province of Ontario supplies statistics relating to the value of farm property in the province.

The following is a comparative statement of the results:—

VALUE OF FARM PROPERTY.

	1884.	1894.
Farm land.....	\$625,478,706	\$587,246,117
" buildings.....	173,386,925	204,071,566
" implements.....	47,830,710	51,530,172
" live stock.....	103,106,829	111,547,652
Total.....	\$949,803,170	\$954,395,507

It appears that the real property (lands and buildings) connected with farming was worth \$798,865,631 in 1884, and \$791,317,683 in 1894. The reduction in value, consequent upon the opening up of Manitoba and the North-west and the decrease in the price of agricultural produce, has amounted, in the ten years, to \$7,547,948. The percentage of decrease is 0·9 per cent.

481. Subject to similar influences are the North Atlantic States of the United States.

During the ten years 1880-1890, according to the Census of the United States, the decrease in values of farm lands and buildings was 9·4 per cent, as the following statement shows :—

## VALUE OF FARMS AND BUILDINGS.

STATES.	1880.	1890.	DECREASE.	
			Amount.	Per Cent.
	\$	\$	\$	
Maine.....	102,357,615	98,567,730	3,789,885	3·7
New Hampshire.....	75,834,389	56,162,600	9,671,789	12·7
Vermont.....	109,346,010	80,427,490	28,918,520	26·5
Massachusetts.....	146,197,415	127,538,284	18,659,131	12·8
Rhode Island.....	25,882,079	21,873,479	4,008,600	15·5
Connecticut.....	121,063,910	95,000,595	26,063,315	21·5
New York.....	1,066,176,741	968,127,286	88,049,455	8·3
New Jersey.....	190,895,833	159,262,840	31,632,993	16·6
Pennsylvania.....	975,689,410	922,240,233	53,449,177	5·5
Total.....	2,803,443,402	2,530,200,537	264,242,865	9·4
Ontario.....	817,823,700	802,834,249	14,969,451	1·83

It will be seen that the Province of Ontario suffered less diminution in the value of its farm property than any of the states mentioned, to which, in order to include the states lying within the same lines of longitude, may be added the State of Ohio, which, in 1880, had a valuation for farm property of \$1,127,497,353, and, in 1890, \$1,050,031,828—a decrease of \$77,465,525, or 6·8 per cent.

482. Taking the values in implements and machinery, we have the following table, the increase and the per cent of that increase being added :—

## VALUE OF FARM IMPLEMENTS AND MACHINERY.

STATES.	1880.	1890.	INCREASE OR DECREASE	
			Numerical.	Per Cent.
	\$	\$	\$	
Maine.....	4,948,048	5,499,413	+ 551,365	+ 11·1
New Hampshire.....	3,069,240	3,594,850	+ 525,610	+ 17·1
Vermont.....	4,879,285	4,733,560	- 145,725	- 2·9
Massachusetts.....	5,134,537	5,938,940	+ 804,403	+ 15·6
Rhode Island.....	902,825	941,030	+ 38,205	+ 4·2
Connecticut.....	3,162,628	3,075,495	- 87,133	- 2·7
New York.....	42,592,741	46,959,465	+ 4,066,724	+ 9·5
New Jersey.....	6,921,085	7,378,644	+ 457,559	+ 6·6
Pennsylvania.....	35,473,037	39,046,855	+ 3,573,818	+ 10·1
Ohio.....	30,521,180	29,475,346	- 1,045,834	- 3·4
Total.....	137,604,606	146,343,598	+ 8,738,992	+ 6·3
Ontario.....	43,522,495	51,435,919	+ 7,913,424	+ 18·1

first eight states there has been an increase of 8·7 per cent. In the increase was 18·1 per cent. In Ohio the figures are, 1880, \$30,180; 1890, \$29,475,346, showing a decrease of \$1,045,834 or 3·4

Taking the nine states (Ohio added) the increase in the value of land and farm implements was 6·3 per cent against Ontario's increase of 6 per cent.

In making increase of live stock we have the following table:—

VALUE OF LIVE STOCK ACCORDING TO CENSUS RETURNS.

STATES.	1880.	1890.	INCREASE OR DECREASE.	
			Numerical.	P. Cent.
	\$	\$	\$	
Albany .....	16,499,376	18,280,140	+ 1,780,764	+ 10·8
Chire .....	9,812,064	10,450,125	+ 638,061	+ 6·5
.....	16,586,195	16,644,320	+ 58,125	+ 0·3
.....	12,957,004	14,200,178	+ 1,243,174	+ 9·6
d .....	2,254,142	2,364,970	+ 110,828	+ 5·0
.....	10,959,296	9,974,618	- 984,678	- 9·0
.....	117,868,283	124,523,965	+ 6,655,682	+ 5·6
.....	14,861,412	15,811,430	+ 950,018	+ 6·4
.....	84,242,877	101,652,758	+ 17,409,881	+ 20·6
al .....	286,040,649	313,902,504	+ 27,861,855	+ 9·7
.....	103,707,730	116,181,690	+ 12,473,960	+ 12·0
.....	99,882,265	116,070,902	+ 16,188,637	+ 16·2

In case in value of live stock the province has been excelled by only nine states.

Increase in the eight states was 9·7 per cent and in the province 6 per cent.

As connected with the general question of the depressed state of the following table, being the synopsis of the evidence of the examination by the Royal Commission on Agriculture in Great Britain taken from the Journal of the Royal Agricultural Society:—

REDUCTION OF RENT—ENGLAND.

COUNTY.	Reduction per cent.	COUNTY.	Reduction per cent.
land .....	20 to 25 (average)	Hereford .....	20 to 30
.....	30 to 40	Somerset .....	20 to 40
.....	10 to 50	Oxford .....	25 to 50
.....	5 to 30	Berks .....	90 (one estate)
.....	10 to 25	Suffolk .....	Up to 70
.....	40 (average)	Essex .....	25 to 100
.....	14 to 50	Kent .....	15 to 100
.....	25 to 60	Sussex .....	42½ (one estate)
n .....	50 (one estate)	Hants .....	25 to 100
.....	70 to 53 (average)	Wilts .....	10
.....	14 to 25	Devon .....	1
.....	50 (one estate)	Cornwall .....	1

100 per cent is mentioned it refers to farms now paying only the rates and equivalent of the tithe rent

The *Quarterly Review* for March, 1895, gives the following summary account :—

Produce sold on farms, &c., in 1874.....	£265,302,900
"          "          1894.....	179,323,145
Difference .....	£86,069,755
Extra cost of imports for producing meat and milk ..	1,640,970
Losses in food produced on and sold off the land.....	87,710,725

"The result of agricultural depression for the greater part of 20 years, growing into actual distress towards the close of the period, is here shown as accurately as careful calculations can show it.

"That result is a reduction of nearly 88 millions sterling in the value of the produce of the land in the United Kingdom sent to market, average yield of corn being assumed. The amount is not absolutely exhaustive, as there are no data for estimates of certain items, such as the value of horses sold for town use ; but it is as complete as it can fairly be made. There is no doubt that absolutely comprehensive totals for 1874 and 1894 would show a decrease exceeding 88 million sterling (\$428,267,000) in the latter year."

485. With respect to Russia, Sir F. Lascelle reported (March, 1895,) to the British Government, at the instance of the Royal Commission on Agriculture, that severe depression exists and that "the recent general fall in the price of grain in Russian markets is chief among the various causes of agricultural depression." The farmers there "live in a state of chronic debt to the government. With the general fall in prices from the competition of the United States, Canadian, Argentine, East Indian and Australian grains, wheat, rye and oats fell rapidly in Russia between the years 1881-94. The net change in the average prices at the port of shipment is approximately : Wheat, from 127 to 68 kopecs ; rye, 109 to 56 kopecs ; oats 74 to 60 kopecs (paper)." These figures represent a drop in prices in the case of wheat of 46·4 per cent, of rye of 51·8 per cent and of oats of 20 per cent.

With respect to Germany, Sir E. Malet reports, 26th April, 1895, to the Earl of Kimberley : "That a severe depression of agriculture exists at the present time cannot be doubted. The unanimous opinion of all the parliamentary representatives of the landed interest, both in the Prussian Landtag and in the Reichstag, the formation of a distinct agrarian party, and the efforts made by that party to obtain some measures of relief are sufficient proof of this, and the present abnormally low prices of wheat and rye which are admittedly below the cost of production are, in themselves, a sufficient reason."

Baron von Hammerstein, the Prussian Minister of Agriculture, is quoted as "pointing out that the depression was common to all countries in Europe, and that the causes were international. Some countries, he said, were in a worse position than Germany, and whereas the default in payment of interest in Prussia varied from 2 per cent to 6 per cent, it had, during the past year, amounted in Russia to about 65 per cent." The Prussian Statistical Bureau publishes tables showing that the increase of mortgages in Prussia on landed property in eight years amounted to \$318,542,800.

"The Statistical Bureau states that "it is unanimously admitted by all observers that the purchase price of land is, in general, falling."

With respect to the United States, the following, quoted by Mr. Gough, reporting to the Earl of Kimberley, sufficiently indicates the condition of agriculture in that country :—

“ A committee of the United States House of Representatives appointed to inquire into the causes of the prevailing agricultural depression has recently prepared a report in which it says :—

“ It is unnecessary for the committee to enter into or dwell upon the fact that agriculture is depressed in every branch of this most important industry, that the values of land and farm products, unless under exceptionally rare conditions, have depreciated steadily as the purchasing power of the dollar has increased. But while the value of property owned by the American (United States) farmers has decreased in thirty years from nearly one-half of the total wealth in 1860 to less than one-fourth in 1890, of which 30 per cent is now under mortgage, taxes have steadily increased, and debts now require four times the labour to be paid off than was then required.

“ The purchasing capacity of the dollar to secure the farmer's land and produce has increased four-fold, while power to pay his taxes and debts has remained at a standstill. In 1873 wheat sold for \$1.55 to \$2.25 a bushel in New York ; in 1894 it sold at 50 cents.”

486. Many measures of relief have been suggested. A royal commission has been sitting to consider the depressed condition of agriculture in Great Britain. The Imperial, German and Prussian Governments propose measures which include the reduction of the land tax, the construction of canals, the reduction of railway freight rates, light railways, further protection of the sugar industry, stringent measures for the prevention of cattle diseases, &c., &c.

In France, where there has been a great decrease in the value of farm lands,\* and where prices of agricultural produce (which began to drop about 1880, and have scarcely ceased to decline since) are at a low ebb, the government have energetically endeavoured to alleviate or counteract the depression by imposing import duties and by other means amounting to prohibition of imports of many articles whose free admission would reduce the price still further. Under the operation of these efforts, production has increased considerably, both as regards stock and crops.

In the United States the Department of Agriculture has endeavoured to assist the farmers by keeping them informed of the markets for agricultural products in all parts of the world, by the inspection of meat products with guaranty of their purity, by giving advice through bulletins on the best methods of cultivation, while the several states have been active in efforts calculated to widen the intellectual horizon of farmers. The Federal Government has afforded assistance by means of tariffs on agricultural products from Canada and other countries. Bounties have also been given on sugar production.

487. Canada has met the difficulty very much in the way Germany proposes to do and as France has done. She has built canals to enable the grains of the interior to reach the seaboard at the lowest possible cost for transport. She

\*Sir Joseph Crowe's report on the agriculture, bounties, and general trade of France for 1894.

has aided railway construction to the extent of \$203,000,000 contributed by the federal, the provincial and the municipal authorities. She has carried out a stringent quarantine system to prevent the farmers making losses through imported diseases. She has established experimental farms on which to conduct researches and verify experiments to test the relative value for all purposes of different breeds of cattle; to direct the manufacture and disposal of dairy products so that the best articles and the highest prices may be secured; to examine the diseases to which cultivated plants and trees are subject, &c., &c. The Department of Agriculture issues bulletins on various subjects such as the poultry and egg business. The Department of Justice provides against combinations to run up the price of binder twine, &c. The Department of Marine attends to the inspection of vessels intended to carry cattle. The Select Standing Committee of Agriculture every year investigates various subjects touching on agriculture and publishes reports for general information. In 1894 and 1895 this committee took evidence on tuberculosis in cattle, cold storage for butter, for meat exports and for fruit; Dominion registration of pedigree stock; rations in stock raising; agricultural chemistry; horticulture; poultry management; entomology in relation to farm and garden; dairy production in Quebec; cattle and dairying in the North-west Territories; distribution of seed grain; compulsory branding of cheese, and instituted close examinations of the experimental farms in order to see in what directions their usefulness might be increased.

The Parliament of Canada has provided a tariff for the protection of the farmer against assault from outside countries and has passed over 20 Acts intended to assist the farming community.

The several provinces have been active within their spheres of action, in behalf of the farmers, by providing agricultural colleges and in other ways.

488. The following duties by the Canadian tariff of 1894 and 1895 are levied on the products of the farm, including the stock yard, the dairy and the orchard :—

ARTICLES.		\$ cts.	Per cent.

" clarified or refined.....	"	0 10	

The following goods are prohibited absolutely :—

Oleomargarine. Butterine. Similar substitutes for butter.

489. The following articles used by farmers in their business are admitted free :—

Animals—horses, cattle, sheep, swine and dogs, for improving stock.	Indian corn for ensilage.
Bees.	Oil-cake and similar feeds.
Bones, crude.	Rennet, raw or prepared.
Blast furnace slag.	Sawn lumber, not dressed or on one side only.
Domestic fowls to improve stock.	Laths, palings, fences posts, &c.
Guano, bone dust and other animal and vegetable manures.	Seedling stock for grafting.
	Seeds, beet, carrot, flax, turnip, mangolds, &c.
	Locust beans and meal for feed.

There are also on the free list articles so largely consumed by farmers and their families as tea and coffee. Sugar up to No. 16 Dutch standard is subject to a duty of only  $\frac{1}{2}$  of a cent a pound and refined sugar to a duty of  $\frac{1}{8}$  of a cent per pound.

490. Duties on other articles largely used by farmers were also considerably reduced by the tariff of 1894, among them being agricultural implements, mowing machines, self-binding harvesters, harvesters without binders, binding attachments, reapers, sulky and walking ploughs, harrows, cultivators, seed drills and horse rakes from 25 to 20 per cent *ad valorem*; binding twines from 25 to 12½ per cent, and rove for making such twines to 10 per cent and barbed wire to ¾ per cent per pound.

491. From this rapid review of what Canada has done to guard her agriculture from harm to as great a degree as possible in the great struggle that has been going on between the farmers of the United States, Germany, France, Russia, the United Kingdom, India, Argentina, Australia and other countries to establish the "survival of the fittest," it will be seen that no efforts have been spared to maintain the agriculture of Canada on a firm footing.

492. A comparison between the exports and imports of products of the farm and orchard in 1877 and in 1895 will show the general results.

CANADA'S EXPORTS AND IMPORTS OF AGRICULTURAL PRODUCTS  
1877 AND 1895.

ARTICLES.	Exports Domestic.		Imports Home Consumption.	
	1877.	1895.	1877.	1895.
	\$	\$	\$	\$
Animals, living .....	2,138,106	10,111,496	*705,264	*164,891
Animal products.....	10,759,754	22,496,995	3,741,069	3,756,151
Grain, flour and meal, all kinds.....	11,882,085	9,881,912	13,866,799	1,360,390
Fruits, all kinds.....	194,942	2,329,324	331,654	235,857
Tobacco, raw .....	.....	.....	902,497	1,362,985
Other agricultural products.....	2,612,349	3,711,617	916,891	2,399,690
Totals.....	27,587,236	48,531,344	20,464,174	9,270,953

Summarized, the above table is as follows:—

Imports home consumption, 1877.....	\$20,464,174
Exports home produce, 1877.....	27,587,236
Balance in favour of Canadian farmer.....	\$ 7,123,062
Imports home consumption, 1895.....	\$ 9,270,953
Exports home produce, 1895.....	48,531,344
Balance in favour of Canadian farmer.....	\$39,260,391

The imports in 1877 were equal to \$5.10 per head of the population. In 1895 they were equal to \$1.82 per head of the population. Had the per head rate of 1877 been the rate in 1895, the imports of farm produce coming directly into competition with Canadian farmers would have

\* Value of animals for improvement of stock not included.

been \$25,925,462 instead of what it really was, viz: \$9,270,953. The measures adopted have therefore resulted in a gain to the Canadian farmers of \$16,654,510 in the value of the home market.

GREAT BRITAIN'S IMPORTS.

493. During 1895 Great Britain, more largely than ever, drew her food supplies from outside countries.

There was an increase in the value of her imports of wheat, pease, corn-meal, other grains, preserved meats, fresh pork, fish (salt), potatoes, poultry and game, sheep, swine, fresh beef and mutton, lard, rabbits, unenumerated meats, butter, condensed milk, eggs and raw vegetables. There was a decrease in the imports of salted pork, margarine, hops, cattle, barley, oats, beans, corn, wheat-meal, flour, &c., bacon, hams, beef (salted), fresh fish, cheese, apples and onions.

494. The following statement gives in some detail the imports into the United Kingdom to meet the demand for food, during 1894 and 1895:—

ARTICLES.	1894.		*1895.

\* The figures of 1895 are subject to revision—taken from monthly reports.

NOTE.—Cwt. = 112 lbs.

In addition to these articles there are rice, spices, sugars, molasses, chicory, cocoa, coffee, dried fruits, tea, spirits, wines and tobacco.

In all, the imports of articles of food and drink enumerated amounted to \$847,722,000, of which \$41,460,000 were exported, leaving the net food and drink bill paid to outsiders in 1895 to \$806,262,000.

495. The bill in 1894 paid to outside countries amounted to \$843,500,000, of which \$47,500,000 were exported, leaving the net bill for foods and drink paid to outsiders \$796,000,000.

It appears that Great Britain imported \$10,262,000 more of these articles in 1895 than in 1894.

496. The following table gives the quantities and values of the articles named, and is compiled from the trade returns issued by the British Government :—

IMPORTED.	Quantities.	Values for Customs.
1895.	Cwt.	\$
Wheat, barley, flour, &c. ....	179,927,460	241,962,159
Dressed meats.....	12,696,321	115,678,905
Butter.....	2,825,682	69,326,785
Margarine.....	940,168	12,444,894
Cheese.....	2,133,809	22,747,681
Fish.....	2,458,860	14,479,661
Hops.....	217,161	3,136,591

Total.....	202,342,149	494,694,123
1894.		
Wheat, barley, flour, &c. ....	178,466,116	232,297,429
Dressed meats.....	10,718,870	110,594,561
Butter.....	2,574,835	65,489,268
Margarine.....	1,109,325	14,813,975
Cheese.....	2,206,145	26,644,708
Fish.....	2,553,977	12,882,456
Hops.....	189,155	3,768,639
Lard.....	1,400,516	13,424,292
Total.....	199,280,939	479,919,515

Reduced to tons and dollars, the statement stands :—

1894.....	Value per ton, \$43.00
1895.....	" " 43.60
Increase, 1895, \$0.60, or 1.40 per cent.	

497. Of wheat, wheat-flour and other grains, Great Britain imported 9,994,102 tons, valued at \$232,297,429, in 1894, and 10,075,938 tons, valued at \$241,962,159, in 1895. In 1894 the value was \$23.24 per ton, and in 1895 it was \$24.01 per ton. The increase in price was, therefore, 3.31 per cent.

Of dressed meat she imported 600 1895. In the first named year the \$170.77 per ton, a decrease in value

Of butter she imported 144,191 tons in 1894, and 158,238 tons in 1895. The value in the first named year was \$454.18, and in 1895 it was \$438.12 per ton, showing a decrease in value of 3.5 per cent.

Of margarine she imported 62,122 tons, valued at \$235.39 a ton, in 1894, and 52,649 tons, valued at \$236.37 per ton, in 1895—an increase of 0.42 per cent in value.

Of cheese she imported 126,744 tons in 1894, and 119,493 tons in 1895, valued in 1894 at \$209.92 per ton, and in 1895 at \$190.40, a decrease in value of 9.3 per cent.

Of eggs she imported 118,769,680 dozens in 1894, and 127,222,920 dozens in 1895. The imports of 1894 had a value of  $15\frac{31}{100}$  cents per dozen, and those of 1895 of  $15\frac{81}{100}$  cents, showing a decrease of 1.29 per cent in value.

Of fish she imported 143,135 tons in 1894, and 143,135 tons in 1895, having the value of \$90 and \$105.16 per ton, respectively, an increase of 6.1 per cent in value.

Of hops she imported 10,592 tons in 1894, and 12,161 tons in 1895. The value in 1894 was \$355.80 per ton, and in 1895 it was \$257.92 per ton, a drop of 27.5 per cent.

Of lard she imported 78,429 tons, valued at \$171.16 per ton, in 1894 and in 1895, 97,590 tons, valued at \$146.71 per ton, a decrease in value of 14.3 per cent.

Of fruits she imported 17,383,774 bushels in 1894, valued at \$26,816,526, and in 1895, 15,277,260 bushels, with a value of \$23,680,348, or \$1.54 per bushel in 1894, and \$1.55 per bushel in 1895, equal to an increase of 0.6 per cent.

Of potatoes she imported 81,114 tons in 1894, and 112,745 tons in 1895, the value being \$61.80 per ton in 1894, and \$50.52 per ton in 1895, a decrease in value of 18.2 per cent.

Taking the several articles, the increases and decreases in price were :—

	Increase.	Decrease.
	Per cent.	Per cent.
Cereals and other grains .....	3.31	7.31
Dressed meats .....		3.50
Lard .....	0.40	9.30
Margarine .....		1.30
Cheese .....	16.16	27.50
Eggs .....		14.30
Fish .....	0.6	18.2

498. Analyzing cereals and grains, we have the following results:—

—	Year.	Quantity.	Value.	Price per cwt.	Price in 1895 + or - 1894.
		* Cwt.	\$	\$	
Wheat.....	1894	70,126,232	91,301,124	1.30	
	1895	81,749,955	109,627,366	1.34	+ 3.1 pc.
Wheat-flour.....	1894	19,134,605	38,907,408	2.03	
	1895	18,368,410	37,371,216	2.03	
Barley.....	1894	31,241,384	34,507,484	1.10	
	1895	23,618,837	29,953,571	1.14	+ 3.6 pc.
Oats.....	1894	14,979,214	18,980,467	1.27	
	1895	15,528,310	18,120,620	1.17	- 7.9 pc.
Pease.....	1894	2,272,623	3,149,677	1.38	
	1895	2,422,851	3,376,629	1.39	+ 0.7 pc.
Beans.....	1894	5,259,895	6,551,001	1.24	
	1895	4,130,538	5,254,929	1.27	+ 2.4 pc.

	1895	33,944,350	38,003,167	1.12	+ 2.7 pc.
Indian meal.....	1894	87,120	199,377	2.28	
	1895	164,209	367,545	2.24	- 1.8 pc.

\* Cwt. = 112 lbs.

In wheat there was an increase in the quantity imported in 1895 of about 16 per cent, and in the sum total paid of 20 per cent. This is equal to an increase in price of 3.1 per cent.

In wheat-flour there was a decrease in quantity of about 4 per cent, and in the amount paid of about 4 per cent.

In barley, the quantity imported showed a decrease of 7,622,547 cwt., and the value an increase of \$4,553,913, the increase in price being 3.6 per cent.

499. In 1894, as compared with 1893, the result of the comparison showed that the great fact of the year 1894 was the general decrease in the prices of articles of food. The accentuation of this fact having been seen in the greatly depreciated value of wheat.

In 1895, as compared with 1894, the great fact was that the reduction of prices was stayed and a slight recovery experienced.

500. Taking into account the chief countries of the world, the annual importation of wheat is estimated at 55,115,000 tons of 2,000 pounds each, 200,000 bushels of 60 pounds each.

Following is an estimate of the world's wheat supply made by Government :—

WORLD'S WHEAT PRODUCTION

PRODUCTION OF IMPORTING COUNTRIES.

	1895.	1894.
	Bush.	Bush.
.....	46,811,000	60,995,000
.....	301,573,000	354,625,000
.....	103,550,000	102,132,000
.....	43,392,000	45,300,000
.....	114,898,000	120,288,000
.....	3,404,000	6,241,000
.....	5,390,000	7,376,000
.....	21,277,000	21,277,000
.....	5,106,000	4,539,000
.....	5,106,000	5,106,000
.....	86,528,000	97,876,000
.....	7,376,000	9,078,000
.....	3,120,000	3,404,000

PRODUCTION OF EXPORTING COUNTRIES.

	1895.	1894.
	Bush.	Bush.
.....	415,053,000	363,136,000
.....	150,361,000	151,098,000
.....	62,414,000	51,066,000
.....	52,482,000	31,207,000

.....	18,440,000	24,114,000
.....	35,746,000	42,805,000
.....	47,094,000	48,370,000

Production of wheat per head varies in different countries. It is of great importance in estimating the surplus over for domestic countries. In the United States the amount is 4 bushels per head. But of late years considerable uncertainty of this figure. Recent investigations show the amount of 4 bushels per head. The whole question needs

thorough investigation. The following is given as the generally accepted statement :—

**CONSUMPTION OF WHEAT PER HEAD IN VARIOUS COUNTRIES.**

Countries.	Bushels.
United Kingdom.....	5.0
France.....	9.1
Germany.....	2.5
Russia.....	2.0
Austria-Hungary.....	3.9
Italy.....	5.0
Spain and Portugal.....	6.4
Belgium and Holland.....	4.7
Scandinavia.....	1.4
Turkey.....	6.1
United States.....	4.5
Canada.....	5.5
New South Wales.....	5.8
Victoria.....	5.0
Southern Australia.....	6.5
Queensland.....	6.0
Tasmania.....	6.7
New Zealand.....	7.1

503. The consumption of wheat in Canada no doubt varies in different parts. In Manitoba the official estimate a short time ago was six bushels per head, which is likely to be near the mark, both for that province and for some portions of the Territories. In Ontario and Quebec, it has been reckoned at not over five bushels. In the Maritime Provinces wheat is, to a certain extent, displaced by corn-meal, but the fishermen are large consumers of wheat, so that the average is maintained. Rye is used in a constantly decreasing quantity.

504. The United Kingdom is by far the largest importer of food products, and takes nearly one-half the available export of wheat from the wheat exporting countries.

In 1892, Mr. Stephen Bourne, from tables of comparison between the years 1876 and 1891, arrived at the conclusion that of Great Britain's 33,000,000 inhabitants in 1876, 18,000,000 might be deemed to be provided with food for home resources and 15,000,000 from foreign supplies, and that in 1891, of 38,000,000 inhabitants, 16,500,000 depended on home and 21,500,000 on foreign supplies, or in other words than in 1876, 46 per cent, and in 1891, 55 per cent of the food consumed in the British Isles came from abroad. On that estimate every inhabitant in those islands is dependent upon foreign supplies for his food for one hundred and eighty-nine days in the year. Lord George Hamilton recently said: "This process must continue, and if its development during the next twenty years is as rapid as it has been in the past, in little more than a score of years home produce will have receded from being less than one-half of the total supply of food to less than one-quarter."

505. These facts show the permanent value of the market of Great Britain to countries like Canada, so large a proportion of whose inhabitants make their living from the farm. The British market is, also, one of the few open to the world without tariff charges.

506. The following table shows the quantity of wheat and wheat-flour imported into the United Kingdom in 1889 to 1895, and the countries from which supplied :—

BUSHELS.

\* Taken from United Kingdom accounts.  
1 barrel of wheat flour =  $4\frac{1}{2}$  bushels of wheat in grain.

507. The following table shows the proportionate quantities of wheat and wheat-flour imported into the United Kingdom from the principal wheat-exporting countries, 1871-1895:—

YEAR.	IMPORTED FROM

508. The following tables give the values and quantities of imports for home consumption by Canada, and exports of Canadian produce of wheat, flour and other breadstuffs, and the total yearly imports and exports of the same articles since Confederation. During the years 1868-72 (inclusive), as there was no customs duty and no specific return of re-exports of foreign produce, the figures for home consumption are not available. Between 1873-79, the re-exports of foreign produce have been deducted from the imports so as to obtain the quantities retained for consumption in Canada:—

OF IMPORTS OF WHEAT, FLOUR AND OTHER BREADSTUFFS  
HOME CONSUMPTION, AND EXPORTS OF THE SAME BEING  
PRODUCE OF CANADA, DURING EACH OF THE YEARS 1868 TO  
INCLUSIVE.

514. Considerable attention has been directed in recent years to the cultivation of the sugar beet, and for the purpose of encouraging the industry, the Government by statute is required to pay a bounty on all beet sugar produced, the statute limiting the time to the 30th June, 1895. In 1895 Parliament extended the period to 1st July, 1897. The amount authorized to be paid being 75 cents per 100 pounds, and an additional 1 cent per 100 pounds for each degree or fraction of a degree over 70 degrees, such bounty in no case to exceed in the aggregate \$1 per 100 pounds. The previous arrangement was \$1 per 100 pounds, and an additional 3½ cents for every 100 pounds testing over 70 degrees.

Year ended June 30th, 1892.....	\$ 23,767
" " 1893.....	20,568
" " 1894.....	7,766
" " 1895.....	29,449

515. Mr. Licht's monthly circular gives the following as the actual output of beet-root sugar, in the years and for the countries named :—

—	1891-92.	1892-93.	1893-94.	1894-95.
	Tons.	Tons.	Tons.	Tons.
Germany.....	1,198,159	1,225,331	1,393,374	1,796,529
Austria-Hungary.....	786,566	802,577	841,809	1,050,000
France.....	650,377	588,838	579,111	795,000
Russia.....	550,994	455,000	660,000	620,000
Belgium.....	180,377	196,699	325,000	285,000
Holland.....	46,815	68,070	75,015	90,000
Other countries.....	88,635	92,000	111,000	156,000
Total beet sugar.....	3,501,923	3,428,515	3,985,309	4,792,529
Cane sugar.....	2,796,500	2,760,000	3,195,437	3,543,151
Grand total.....	6,297,423	6,188,515	7,180,746	8,335,671

In the last forty years the production of cane sugar increased 1  $\frac{6}{10}$  times. The increase in the production of beet sugar has been twenty-two times.

516. Viticulture in Canada has made considerable progress. There are at least 6,000 acres of land planted in vines capable of producing one million and a half gallons of wine.

Ontario has an area suitable for grape culture at least equal to half the present area of vineyards in France.

There are about 2,000 persons directly and indirectly interested in grape growing and wine-making.

In 1892 there were, in Ontario, 2,174,133 vines of bearing age, and 950,659 of non-bearing age. In 1893 there were 2,223,282 vines of bearing age, and 783,430 of non-bearing age.

The Census returns give the following particulars:—

CANADA, 1891.

Acres in vines, Canada .....	5,951
Grapes, pounds.....	12,252,331
Acres in vines, Ontario .....	4,956
Grapes, pounds.....	11,725,281
All other provinces, acres in vines.....	995
Grapes, pounds.....	527,050

The following are some of the principal grape-growing counties of Ontario:—

Essex.....	1,069 acres and 1,771,667 pounds.
Lincoln and Niagara.....	968 " 2,610,752 "
Welland .....	548 " 1,449,367 "
Wentworth South .....	849 " 2,472,055 "
Total.....	3,434 8,303,841

These counties produced 8,300,000 pounds of the total grown in Ontario in 1890. Every county but six in the province produced grapes.

The returns connected with the wine-making industry of Canada show that in 1891 the capital invested amounted to \$396,475, that the hands employed numbered 150, the wages paid amounted to \$37,955, and the value of the year's output to \$254,489. In 1881 there were 36 persons employed, and the output for the year was valued at \$59,620. The value of the output has more than quadrupled in ten years.

The grapes grown in Canada in 1880-81 amounted to 3,896,508 pounds, and the import for home consumption to 424,848 pounds. These increased in 1890 to 13,334,123 pounds, of which 1,081,792 pounds were imported.

517. Grape-growing and wine-making were begun in some of the southern islands in Lake Erie in the early "fifties." In 1865, Messrs. Thaddeus Smith and D. J. Williams, then living in Kentucky, U.S.A., hearing of the success in Catawba wine making, visited the islands, but as they found the price of land very high they came to the Canadian side, and within twelve miles of the island, where grape-growing started in the region, they found Pelee Island, then covered with primitive forest. The climate and soil proving to be very similar to those of the island on the United States side, these men selected a locality and purchased about 40 acres of land, and in two years had erected a commodious stone house, with extensive wine cellars, and planted 33 acres in grape vines.

In 1866, Mr. Edward Wardroper, an Englishman, visited the island on a hunting expedition. He thought the prospects good, and bought land and planted several acres of grape vines. The wine made from the grapes was placed upon the market and "took," and now there are about 250 acres in vines upon the island, and from 75,000 to 100,000 gallons of wine are made yearly.

The fame of the industry spread to the mainland, and the development of grape-growing and wine-making made rapid progress

518. The tobacco plant is cultivated in many parts of the Dominion.

The Census returns give the following particulars:—

PROVINCES.	1881.	1891.	Increase or Decrease.
	Lbs.	Lbs.	Lbs.
Prince Edward Island.....	1,367	795	— 572
Nova Scotia.....	1,216	228	— 988
New Brunswick.....	6,414	792	— 5,712
Quebec.....	2,356,581	3,958,737	+ 1,602,156
Ontario.....	161,251	314,086	+ 152,835
Manitoba.....	2,037	1,807	— 230
North-west Territories.....	—	1,238	+ 1,238
British Columbia.....	96	343	+ 247
Total .....	2,528,962	4,277,936	+ 1,748,974

These figures show an increase in the ten years of 69·2 per cent. The cultivation of the plant is limited practically to the two Provinces of Ontario and Quebec, the latter province supplying over 90 per cent of all grown in the Dominion.

Near Walkerville, in the County of Essex, Province of Ontario, is a tobacco farm of 110 acres. But this is an exception to the general rule, nearly all grown in Canada being the produce of the few acres devoted to it by each farmer, especially in Quebec.

The amount of tobacco leaf imported into Canada for manufacturing purposes averages during a twelve-year period about 12,400,000 pounds.

In addition to the leaf there are imported annually about 290,800 pounds of cut tobacco, cigarettes, cigars, snuff, &c. In 1885 there were 11,194,764 pounds of leaf imported for manufacturing purposes, and in 1895 the import was 12,199,400 pounds.

The manufactured tobacco imported in 1885 amounted to 398,651 pounds, valued at \$394,708, and in 1895 to 168,034 pounds, with a value for duty of \$256,444.

519. Considerable attention has been given to the cultivation of flax in Manitoba for seed, and in Ontario for both seed and fibre. The yield in Ontario is estimated at ten bushels per acre, and in Manitoba in 1895, it was fifteen and one-half bushels. It is stated that the soil of Manitoba, is too rich for the cultivation of flax for fibre, but very suitable for growing flax for the seed. The Menonites of Manitoba grow flax in large quantities, the seed finding a ready market in Waterloo County, Ontario, the mills there extracting the linseed oil and sending the residuum, known as flax-seed cake, to the United Kingdom. The total yield of flax-seed in 1895 in Manitoba was 1,281,354 bushels. Manitoba and the North-west Territories seem to be specially adapted for growing flax for the seed.

FARM STOCK.

520. The Dominion Government provides no agricultural statistics beyond those procured in connection with the decennial censuses. The following returns are from the Censuses of 1881 and 1891, and relate to the stock on farms :—

HORSES, CATTLE, SHEEP AND SWINE IN CANADA, 1881 AND 1891.

HORSES.

521. There was an increase in every province in the number of horses, that in Manitoba and the Territories being naturally the largest, the proportion of increase having been 418 per cent and 461 per cent respectively; in Ontario it was 31 per cent, and in Quebec 26 per cent. The increase for the Dominion was 39 per cent. In the United States, during the same period, the increase was a little over 44 per cent.

In cattle there was an increase in each province, except in Nova Scotia and New Brunswick; in the latter province there was a decrease of nearly 4 per cent. Ontario and the Territories furnished two-thirds of the total increase. The increase for the whole Dominion was 20 per cent. In the United States the increase was about 14 per cent.

The number of working oxen showed a decrease of 9,030, which indicates the extent to which oxen has been superseded by horses, the change being brought about partly, no doubt, in consequence of the more cultivated condition of the land.

There was a decrease in the number of sheep of no less than 484,897, or 16 per cent. In the four original provinces of the Dominion, the number of sheep in 1871 was 3,155,509; in 1881 this number was reduced to 2,847,975, or 307,534 less, being a decrease of over 9 per cent, while in 1891 the number was still further reduced to 2,266,488, being 581,487 less than in 1881 and a decrease of 20 per cent.

In Prince Edward Island in 1871 the number was 147,364; this number in 1881 had increased by 19,132, or to a total of 166,496. In 1891, however, this number had fallen to 147,372, the decrease in the latter decade and the increase in the earlier one being almost the same. There was, therefore, 889,013 sheep less in the five older provinces in 1891 than there were in 1871. There was a fair increase in the rest of the Dominion, but comparisons with earlier years are not of much value. The increase in the number of sheep in the United States was something over 30 per cent, as compared with a decrease of 16 per cent in Canada.

There was an increase in each province in the number of swine, except in New Brunswick, in which province there has been a general decrease in live stock, except in horses. The increase of swine in the Dominion was larger than in any of the other live stock, except cattle, having been 43 per cent. In the United States there was a decrease of about 3 per cent.

522. Down to the present time the provinces collect the only available annual statistics relating to agriculture, and not all of them do so.

The Province of Ontario, according to the returns of the Bureau of Industries, possessed in 1895 live stock as under :—

Horses.....	647,696
Cattle.....	2,150,103
Sheep.....	2,022,735
Swine.....	1,209,072
Poultry.....	7,752,840

The details of the returns indicate that while working horses increased from 395,686 in 1894 to 423,673 in 1895, breeding mares decreased by 16,806 and unbroken horses by 38,262, showing a net decrease of 27,081.

Comparing 1895 with 1894, cattle show the following increases and decreases :—

Working cattle, decrease.....	642
Milch cows, increase.....	53,991
Store cattle, decrease.....	11,165
Other cattle, increase.....	8,618

The net increase was 50,082.

Sheep show an increase of 6,930, as under :—

Sheep over 1 year, increase.....	9,360
" under 1 year, decrease.....	2,430

Hogs show an increase of 156,939 divided into :—

Hogs over 1 year, increase.....	16,307
" under 1 year.....	140,632

Poultry shows an increase of 200,178 divided into :—

Turkeys, increase.....	7,399
Geese, decrease.....	18,186
Other fowls, increase.....	210,965

The value of horses decreased, according to the returns, from an average of \$73.34 in 1893 to an average of \$68.53 in 1894, notwithstanding that working horses and breeding mares constituted 72 per cent of the whole in 1894 against 69.2 per cent in 1893, and that unbroken horses were 30.8 per cent in 1893 against 28.0 per cent in 1894. This is a decrease of 7.1 per cent.

The Customs returns indicate that the shipment of horses from Ontario in 1895 amounted to 4,741 in number, of an average value of \$84.77, against a shipment in 1894 of 3,041, having an average value of \$143.

There must, therefore, have been a large shipment of horses of high value to the other provinces to have reduced the value of the horses of Ontario in one year to so low an average value as \$68.53. This indicates a large interprovincial trade and great ability on the part of the other provinces to purchase the higher priced horses. Possibly the purchases have

been of high-priced stallions for breeding purposes, Ontario thus becoming an important factor in the development of good horses throughout the Dominion, and especially in the North-west Territories and in Manitoba.

Cattle possessed an average value per head of \$22.66 in 1894 against \$23.19 in 1893, the increase in the value and in the number of milch cattle being offset by the decreased value of store cattle.

Sheep in 1894 were valued at \$4.27 per head, and in 1893 at \$4.66. Hogs are given a value of \$6.05 in 1894 against \$6.54 in 1893. Horses, cattle, sheep and hogs together had a value of \$109,339,134 in 1894 and of \$113,883,744 in 1893, showing the average value of each animal in 1894 to have been \$18.43 against \$20 in 1893, and indicating a decreased value of 7.8 per cent.

523. In the United States, farm animals (horses, cattle, sheep and hogs) had a value in 1894 of \$1,819,446,306, and numbered 155,555,051, giving an average per head value of \$11.70. In 1893 they numbered 161,783,453, and had a value of \$2,170,816,754, giving an average per head value of \$13.42, and indicating a decreased value of 12.8 per cent against Ontario's 7.8 per cent. At the same time Ontario increased the number of her farm animals by 4.23 per cent, and the United States decreased theirs by 3.85 per cent.

The particulars are as under :—

analysis shows that prices for every class in 1894 were higher in Ontario than in the United States.

The Ontario prices are tested by the prices in Michigan and in New York State, the results are as follows for 1894 :—

	Horses.	Cattle.	Sheep.	Swine.	Totals.
	\$	\$	\$	\$	\$
Ontario .....	58 64	25 47	2 27	7 65	94 03
Michigan .....	53 33	22 58	1 88	5 93	83 72
New York .....	68 53	22 66	4 27	6 05	101 51

The prices are taken from the report of the Statistician of the United States Department of Agriculture for January and February, 1895, pages 8, 9 and 10.

An Ontario farmer with one horse, one beeve, one sheep and one hog had what represented \$101.51, while a New York State farmer with the same number and kinds of animals had what represented \$94.03. The Ontario farmer had \$7.48 more money's worth than the New York farmer, and the Michigan farmer had \$17.79 more than the Michigan farmer.

A comparison is made between the decrease in New York State and Ontario in 1894, as judged by the standard of 1893, the following is the

DECREASE IN VALUE, 1894, COMPARED WITH 1893.

IMPORT TRADE OF GREAT BRITAIN.

A comparison of the import trade of Great Britain in certain articles and of the proportion of that trade done by Canada and the United States for the three-year periods, 1887-89, 1890-92 and 1893-95, shows that Great Britain imported from all countries a yearly average of 12,326 horses in the 1887-9 period; of 20,651 in the 1890-2 period, and of 23,574 in the 1893-5 period.

The United States contributed 1.91 per cent of Great Britain's imports of horses during the 1887-89 period, dropped to 1.73 per cent as their contribution in 1890-92 and rose to 23.3 per cent in 1893-95. Canada's contribution was 2.00 per cent in 1887-89, 4.38 per cent in 1890-92 and 28.5 per cent in 1893-95.

There is plenty of room for Canada in the way of supplying horses to Great Britain, for during the past five years the Mother Country has imported 28,574 horses, of which only 22,950 came from Canada. The trade has

developed very considerably, since of the 22,950 imported in five years 12,908 belong to the imports of 1895.

525. Mr. Down, reporting to the Minister of Agriculture, writes: "No doubt there could be a large and profitable trade done in this line with Great Britain if properly conducted." He suggests, 1st, great care being paid to the horses while on board the transporting steamers; 2nd, shipment of sound horses under 6 years old; 3rd, rest, good grooming and feeding for at least a week after arrival and before being offered for sale.

526. Of cattle, Great Britain imported from all countries in the 1887-92 period a yearly average of 409,424, in the 1890-92 period an average of 550,747, and in the 1893-95 period an average of 410,350.

While the United States had 33.76 per cent of the supply needed from abroad by Great Britain in 1887-89 and 65.64 per cent in the 1890-92 period, they secured 73.6 per cent of the supply of the 1893-95 period. Canada had 14.48 per cent in 1887-89; 16.71 per cent in 1890-92, and 21.2 per cent in 1893-95.

527. Sheep (live) were imported by Great Britain from outside countries as under:—

	No.
1887-89 (average) .....	868,524
1890-92 " .....	260,674
1893-95 " .....	537,583

Canada's share in the supply was: for 1887-89, 5.46 per cent, 1890-92 16.66 per cent and 1893-95, 21.9 per cent. The United States sent 0 per cent in the first period, 2.49 per cent in the second and 36.2 per cent in the third period.

Canada's contribution increased from 3,589 sheep in 1893 to 135,622 in 1894, and to 214,310 in 1895.

The sheep trade cannot be disassociated from the mutton trade. Great Britain in the 1887-89 period required to import 439,795,264 pounds of mutton and sheep; in the 1890-92 period, 617,182,976 pounds; in the 1893-95 period, 879,222,824 pounds. In the first period about 104,223,000 pounds were imported as living sheep; in 1890 only about 31,280,000 pounds; in the 1893-95 period, 64,509,300 pounds were imported in the form of the living animal. In the first period there was an average of 35 million pounds; in the second 10,430,000 pounds. In 1893-95 the average was 21,503,320 pounds, but much higher than in 1890-92 but greatly below the 1887-89 period. Reduced to the live sheep to pounds, Canada sent to Great Britain 5,466,760 pounds out of an annual average required by the Mother Country of 146,598,400 pounds in the 1887-89 period, and only 3,600,640 pounds out of an annual average of 205,727,659 pounds which Great Britain required in 1890-92. In the 1893-95 period Great Britain required 293,074,275 pounds of mutton yearly. Of this quantity Canada supplied 14,240,840 pounds. Canada therefore, supplied in the first period 3.7 per cent of the total, in the second 1.8 per cent, and in the 1893-95 period 4.9 per cent. The greater bulk of the fresh mutton wanted in England comes, of course, from Aus-

per cent) in the second and 2.0 per cent in the third. Canada raises the best pork and ought to secure a larger share of the demand of Great Britain.

529. Bacon and hams were imported by Great Britain to the extent of 448,221,088 pounds as the yearly average of 1887-89; of 554,382,752 pounds yearly in the 1890-92 period, and of 536,092,592 pounds yearly during 1893-95. Canada supplied 1.63 per cent of the total in the first period, 1.63 per cent in the second and 6.3 per cent in the third. The United States provided 74.61 per cent, 87.53 per cent, and 73.7 per cent respectively. Canada has made a gain, and there is ample room for a greater gain.

530. In salted beef there was a demand in Great Britain upon outside countries as follows: 1887-89, 26,412,027 pounds; 1890-92, 29,787,483 pounds; 1893-94, 24,070,944 pounds. Of this demand the United States supplied in the first period, 94.42 per cent; in the second, 95.99 per cent, and in the third, 95.6 per cent. Canada supplied 2.2 per cent in the 1893-4 period. What she supplied in the previous periods was so small that it could not be expressed in percentages.

In fresh beef, Great Britain imported a yearly average of 107,467,920 pounds in 1887-89, of 218,580,331 pounds in 1890-92, and of 219,080,736 pounds in 1893-94. The United States supplied 96.98, 88.74 and 83.5 per cent respectively. Canada's share is too small to express in percentages. Other British possessions, chiefly Australasia, have gone on increasing their supply from 5,600,000 pounds a year in 1887-89 to 14,130,000 pounds a year in 1890-92, and 29,689,856 pounds a year in 1893-94.

531. Of all other meats Great Britain needed 92,082,000 pounds a year in 1890-92. This was an increase of over 21,000,000 pounds a year over the 1887-89 period. The United States secured 74.15 per cent and Canada 3.85 per cent, both countries showing an increased proportion as compared with the 1887-89 period, when the United States supplied 46 per cent and Canada 1.54 per cent. For the period of 1893-94 the total amount needed by Great Britain was 84,602,592 pounds a year, of which the United States supplied 44.7 and Canada 1.2 per cent.

532. Great Britain's imports of meats of all kinds, not including living animals, during the period 1887-95, have been as under:—

ARTICLES.	YEARLY AVERAGE.		
	1887-89 (3 years.)	1890-92 (3 years.)	1893-95 (3 years.)
	Lbs.	Lbs.	Lbs.
Mutton, fresh.....	111,857,461	187,390,112	266,790,131
Pork.....	48,572,011	37,888,965	47,903,652
Bacon and hams.....	448,221,088	554,382,752	536,092,592
Beef, salted.....	26,412,027	29,787,483	24,746,824
" fresh.....	107,467,920	218,580,331	227,834,815

Totals.....	813,008,448	1,128,022,534	1,190,001,067

\* Including 7,910,709 lbs. preserved mutton.

†     "     14,831,824     "     "

533. The table shows: 1st. That the English people are taking more and more to fresh mutton,\* the proportion in the 1893-95 period being 21·5 per cent, or over one-fifth of the whole; in 1890-92, 16·6 per cent, and in 1887-89, 13·7 per cent. 2nd. That hog-meat barely holds its own. 3rd. That fresh beef is imported in a somewhat increasing quantity.

534. Summing up these particulars it is found that Great Britain during the 1890-92 period took from outside countries a yearly average of 141,323 more cattle than in the 1887-89 period, and during the 1893-95 period a yearly average of 140,397 fewer cattle than in the 1890-92 period; that she imported a yearly average of 607,854 fewer live sheep in 1890-92 than in 1887-89, and an average of 276,913 more sheep in 1893-95 than in 1890-92; and that of meats of all kinds she imported a yearly average in the 1890-92 period of 1,128 million pounds, which was more than in the 1887-89 period by 315 million pounds, but less than in the period 1893-95 by 63 million pounds.

535. Canada's share in the supplying of the 1,128,000,000 pounds imported yearly in the 1890-92 period was 12,576,362 pounds, or a little over one per cent. The United States' share was 705,255,633 pounds, or about 62½ per cent.

Canada's share in the supplying of the 1,126,500,000 pounds imported yearly in the 1893-94 period was 33,165,528 pounds, or 2·9 per cent. The United States' share was 637,807,981 pounds, or 56·7 per cent. Canada has gained and the United States lost in the proportion supplied.

The following table shows the percentage of increase or decrease in the several items named in the period of 1890-92 compared with 1887-89, and in the period of 1893-94 compared with 1890-92:—

MEATS.	ENGLAND.		CANADA.		UNITED STATES.

\*The English returns show that the home supply of sheep in the 1893-94 period decreased in number by 511,736 compared with the average number of the 1891-92 period, proving that in addition to increasing their imports the English people are drawing upon the home supply to an increasing extent.

‡ Nothing sent in 1890-92 period. † 433,312 pounds a year sent.

536. The requirements of Great Britain, as given in the preceding table, were supplied to a considerable extent by the United States and Canada.

## CANADA SENT.

537. Taking lard, Great Britain imported in the 1890-92 period an average of 133,000,000 pounds against an average of 114,452,000 pounds in 1887-89. In 1893-95 the average was 159,088,907 pounds.

The United States supplied this demand to the following extent:—

1887-89.....	94.37 per cent.
1890-92.....	97.45 "
1893-95.....	96.83 "

Canada's proportion was 0.09 per cent in the first period, 0.03 per cent in the second and 1.6 per cent in the third.

Of tallow, Great Britain's yearly average import in the 1887-89 period was 122,642,987 pounds; in 1890-92, 154,204,325 pounds, and in 1893-95, 208,051,424 pounds.

The United States secured 28.65 per cent of this trade in 1887-89, 30.73 per cent in 1890-92 and 3.58 per cent in 1893-95. Canada in the respective periods had 0.05 per cent, 0.02 per cent and 0.09 per cent.

In butter, Great Britain's imports were a yearly average of 190,863,269 pounds in 1887-89; of 236,929,765 pounds in 1890-92, and of 288,511,664 pounds in 1893-95.

The United States had in 1887-89, 3.64 per cent of the supply; in 1890-92, 3.71 per cent, and in 1893-95, 1.55 per cent. Canada's share was 1.45 per cent, 1.19 per cent and 1.33 per cent respectively—just a *couperon* of a grain—in the supply of an article which Canada could supply to a very large extent.

there are 200 million pounds wanted in Great Britain from the United States, and Canada has sent during the past nine years an average of 100 million pounds.

Great Britain's imports were :—

1887-89, a yearly average of	211,396,416 pounds.
1890-92 " "	239,613,397 "
1893-95 " "	241,823,531 "

The United States supplied the demand to the extent of 35·09 per cent in the first period; of 31·05 per cent in the second, and of 28·07 per cent in the third.

Canada supplied in the first period 38·57 per cent; in the second, 41·55 per cent, or more than one-half the demand in this article of Great Britain.

In poultry, Great Britain imported in 1887-89 a yearly average of £1,200,000 in value; in 1890-92 of \$2,495,409, and in 1893-95 of \$2,701,000. Neither Canada nor the United States does very much in the way of supplying this demand.

In eggs, Great Britain's requirements from outside countries were in 1887-89 a yearly average of 93,021,730 dozen, in 1890-92 of 106,863,263 dozen, and in 1893-95, 118,817,490 dozen. This is practically a new trade, and she has done fairly well, having sent in 1887-89 practically 100,000,000 dozen, and in 1893-95 an average of 2,996,270 dozen.

TABLE OF THE QUANTITIES AND VALUES OF BUTTER, MARSH-MALLOW, AND EGGS IMPORTED INTO THE UNITED KINGDOM FROM PRINCIPAL COUNTRIES DURING THE CALENDAR YEARS 1893, 1894 AND 1895.

January and February, 1893, No. 101.

542. The importation of stock from Europe *via* the St. Lawrence for breeding purposes was less than in 1895, as shown by the following figures:

NUMBER OF CATTLE, SHEEP AND PIGS IMPORTED FROM EUROPE, 1884-95.

YEAR.	Cattle.	Sheep.	Pigs.
1884.....	1,607	473	26
1885.....	1,356	255	37
1886.....	601	328	16
1887.....	162	488	10
1888.....	229	2,106	86
1889.....	150	609	70
1890.....	15	1,902	68
1891.....	14	3,023	10
1892.....	1	2,828	19
1893.....	12	1,926	17
1894.....	17	299	29
1895.....	11	350	4

Of this number 290 sheep and 2 pigs were for the United States, and all the other animals for Canada.

543. The following comparative figures of the total importation of stock in Canada during the years 1887-95 show that there has been a considerable increase, especially of horses and cattle, almost all of which were imported into the Territories:—

—	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.
Horses.....	412	846	2,041	1,694	3,507	2,260	*1,875	*1,663	1,181
Cattle.....	549	454	3,984	1,386	3,473	4,025	1,349	4,182	1,137
Sheep.....	6,539	30,626	34,036	30,551	40,467	33,439	35,718	36,777	35,964
Pigs.....	262	2,468	2,132	1,324	381	167	177	197	206

\*8 mules in 1893 and 36 in 1894.

Of the above numbers in 1895, 27,535 sheep were imported into British Columbia from the United States for slaughter.

544. There was an increase in the number of horses, cattle and sheep exported from Canada in the fiscal year ended 30th June, 1895, as appears

following table, which gives particulars of the export trade of Canada stock since 1874 :—

EXPORTS OF HORSES, CATTLE AND SHEEP, THE PRODUCE OF CANADA, 1874 TO 1895.

YEARS.	HORSES.		CATTLE.		SHEEP.

Total	303,468	33,482,307	1,686,370	100,652,357	6,797,610	25,160,356

Some idea can be formed of the extent and importance of this trade if it is seen that the value of the horses, cattle and sheep exported during the last twenty-two years has reached the sum of \$159,295,020.

Previous to 1872, no meat, either live or dressed, was exported from Canada to Great Britain, except a certain quantity of salted beef, and the export of live cattle may be said to have commenced in that year—the shipment being made through the United States, owing to there being no vessels trading to Canada suitable for the purpose. Since that time, however, vessels have been built specially fitted for the carrying of live stock, and this circumstance, by reducing the rates of freight, has contributed largely towards keeping the business a fairly remunerative one.

The following table shows how rapidly the trade with Great Britain has increased since its inception, and the great difference in the value of the exports to that country and to the United States shows how much more important is the trade with the former country. This difference in value is

explained by the fact that only first-class beasts, specially selected, are, as a rule, shipped to England, while the cattle sent across the line include a large number of calves for immediate consumption. The effect of the high duties imposed by the McKinley Bill on this branch of trade with the United States is shown by the greatly reduced figures for the last five years.

EXPORTS OF LIVE CATTLE TO GREAT BRITAIN AND THE UNITED STATES, 1874-95.

FISCAL YEAR.	CATTLE EXPORTED TO			
	Great Britain.		United States.	
	Number.	Value.	Number.	Value.

Total.....	1,098,890	87,027,810	467,071	9,334,312

\*It is obvious that either the number or value of cattle in this year is incorrect.

548. As regards value, the same remarks, substituting lambs for calves, apply to the next table, which gives the number and value of sheep exported to the United Kingdom and United States in the same period. There was an increase of 120,308 in the number of sheep exported to the United Kingdom in 1895, and an increase in the value of \$1,090,324, but a decrease to the United States of 61,064 in the number, and of \$295,485 in the value:—

EXPORTS OF LIVE SHEEP TO THE UNITED KINGDOM AND THE UNITED STATES, 1874-95.

549. The figures in the preceding tables are taken, in order to show, comparatively, the trade with Great Britain and the United States, from the Trade and Navigation Returns, and are for the fiscal years ended 30th June; but the returns made by the Montreal Board of Trade of exports to Great Britain, as well as those kept in that country, are for the calendar year, and the following figures show the exports of cattle and sheep to Great Britain in each calendar year since 1877 :—

EXPORTS OF CATTLE AND SHEEP FROM CANADA TO GREAT BRITAIN,  
1877-95 (CALENDAR YEAR.)

YEAR.	Cattle.	Sheep.
	No.	No.
1877.....	6,940	9,509

The following is a comparison between the exports of agricultural products of 1894 and 1895, calculated in the same manner as the tables in chapter on Trade and Commerce. It will be seen that there was an increase in volume of \$2,970,000 and a decrease of \$2,242,000 due to a rise in prices, leaving an actual increase of \$728,485. The principal items affected by the decline in price were wheat, horses, bacon, cheese, and apples, while, sheep, pease and beef showed an increase:—

The principal articles of food, it will be seen, that are imported from are cattle, meats, cheese, pease and apples, but as all the articles are capable of being produced in this country in large quantities, no reason why our share of the imports should not be much larger is at present.

The following table from British accounts gives the total quantities of the same articles imported into Great Britain in the years 1889 to 1894, with reference to the countries from whence they came:—

IMPORTS OF CERTAIN ARTICLES OF FOOD, AND AGRICULTURAL PRODUCE INTO GREAT BRITAIN  
IN 1889 TO 1895.

\* Mutton preserved.

During 1894 the value of the above named articles imported into Great Britain amounted to \$646,900,046; out of this amount Canada supplied \$34,825,860 or 5.4 per cent, and the United States supplied \$191,228,028 or 29.6 per cent.

Note.—The above figures have been taken from United Kingdom accounts.

559. The following table, taken from Canadian and United States accounts, gives a comparison, for the fiscal year, 1894-95, of the exports of agricultural products and stock from Canada and the United States, of which articles Canada exports about \$9.55 per head of her population and the United States, \$4.58.

CATTLE QUARANTINE.

560. Neat cattle are prohibited from entering any of the provinces of Canada east of the frontier of Manitoba, except for breeding purposes only, and then subject to a quarantine of ninety days at Point Edward. This refers to cattle crossing the frontier from the United States. They may enter at the seaports of Halifax, N. S., St. John, N. B., Charlettetown, P. E. I., and Quebec from the sea, subject to the same quarantine of ninety days. In Manitoba and the North-west Territories, and also British Columbia, neat cattle are allowed to enter for stock purposes only and subject to a quarantine of ninety days.

561. Swine are prohibited from entering, except subject to a quarantine of 21 days.

562. Sheep are allowed to enter on the Atlantic seaboard subject to a quarantine of fifteen days, but under special arrangements with the United States these may cross the United States inland frontier if found healthy on inspection. If not so found, entry is prohibited.

563. Horses and mules are admitted without quarantine if found healthy on inspection. If not so found, entry is prohibited.

564. Animals in transit, including neat cattle, are allowed to enter Canada on the Sarnia-Windsor frontier and pass through Canadian territory to Eastern United States ports in locked and bonded cars. They are subject to inspection on entering, and the cars are not allowed to be again passed through Canadian territory on return until after disinfection. The movement is considerable, as shown by the following figures:—

At Windsor, the number of stock cars for the twelve months ended 31st October, 1895, was 16,893, and the number of animals passed through was as follows:—

Cattle.....	161,502
Calves.....	17,194
Swine.....	410,426
Sheep.....	682,118
Horses.....	13,684
Total.....	1,284,924

The number of cars passing through Canada at Sarnia, carrying stock in transit, was 20,825 for the same twelve months, and the number of animals follows:—

Cattle.....	162,750
Swine.....	784,246
Sheep.....	211,108
Horses.....	22,588
Total.....	1,180,692

The total number of cars carrying animals in transit through Canada was.....	37,718
Total number of animals carried was.....	2,365,616

During the last fourteen years over thirty millions of animals have been carried through Canada in transit from western to eastern parts of the United States, and during the whole of that time, and in the movement of this vast number of animals, there has not been a single case of contact with Canadian animals—the one essential point of the regulations.

#### CANADIAN CATTLE SCHEDULE IN ENGLAND.

565. The correspondence between the Canadian and the Imperial Government has continued up to the present date (April, 1896.) The points in controversy were discussed at length in the Year-Book of 1894, in paragraphs from 740 to 744 inclusive. There has been no change of principle as respects the grounds of the controversy ; and the points now the subject of correspondence are similar to those above referred to. The scheduling of Canadian cattle has been imposed by the Imperial Government for the reason that their veterinary officers have reported the presence of contagious pleuro-pneumonia in cattle landed in England from Canada. The veterinary advisers of the Canadian Government, on the contrary, positively allege that the disease found was simply pneumonia arising from inflammatory action, sometimes found to arise in cattle carried two or three thousand miles in railway trains and subsequently on shipboard in bad weather, subject to peculiar hardships. The reader is referred to the points of controversy as contained in the Year-Book of 1894. One new feature has arisen, viz. : that the Imperial Government has introduced a Bill in Parliament to prohibit the importation of any live cattle from any part of the world, for the purpose, as alleged, of more perfect protection from any risk of disease being introduced into English herds. It is also stated to be a motive by the Imperial Government in introducing this proposed legislation to cut short any further questions of controversy on points of difference which have been found in the past to be irreconcilable. It has been represented to the Imperial Government by the Minister of Agriculture, the Hon. Dr. Montague, on the occasion of his presence in London, that it is unjust to prevent the entry into England of Canadian cattle for the reason of alleged existence of disease of pleuro-pneumonia, there being none such in Canada.

#### RESTRICTED RECIPROCITY.

566. Connected with agriculture in Canada is the question of Restricted Reciprocity with the United States. Upon this subject the Parliament of Canada has legislated as follows :—

In the Customs Act of 1878 (31 Vic., Chap. 44), Section 6, it is provided as follows :—

“ Any or all of the articles mentioned in Schedule D, when the growth and produce of the United States of America, may be imported into Canada from the said United States free of duty, or at a less rate of duty than is provided in the said schedule upon proclamation of the Governor in Council whenever the United States shall provide for the importation of similar articles from Canada into that country free of duty, or at a less rate of duty

than is now imposed on the importation from Canada of such articles into the United States."

Schedule D, above mentioned, included the following articles:—

"Animals of all kinds, fresh, smoked and salted meats, green and dried fruits, fish of all kinds, products of fish and of all other creatures living in water, poultry, butter, cheese, lard, tallow, timber and lumber of all kinds, round, hewed, sawed, but not otherwise manufactured in whole or in part, fish oil, gypsum, ground or unground."

567. In the Customs Act of 1879 (42 Vic., Chap. 15), Section 6, it is provided as follows:—

"Any or all of the following articles, that is to say: Animals of all kinds, green fruit, hay, straw, bran, seeds of all kinds, vegetables (including potatoes and other roots), plants, trees and shrubs, coal and coke, salt, hops, wheat, pease and beans, barley, rye, oats, Indian corn, buckwheat and all other grain, flour of wheat and flour of rye, Indian meal and oatmeal, and flour or meal of any other grain, butter, lard, tallow, meats (fresh, salted or smoked), cheese, fish (salted or smoked), and lumber may be imported into Canada free of duty, or at a less rate of duty than is provided by this Act, upon proclamation of the Governor in Council, which may be issued whenever it appears to his satisfaction that similar articles from Canada may be imported into the United States free of duty, or at a rate of duty not exceeding that payable on the same under such proclamation when imported into Canada."

The above was incorporated in the Revised Statutes of Canada.

Under this provision anthracite coal from the United States was made (and remains) free of duty.

568. In 1888 an amending Act (51 Vic., Chap. 15) repealed the above and substituted the following:—

"Any or all of the following things, that is to say: Animals of all kinds, hay, straw, vegetables (including potatoes and other roots), salt, pease, beans, barley, malt, rye, oats, buckwheat, flour of rye, oatmeal, buckwheat flour, butter, cheese, fish of all kinds, fish oil, products of fish and of all other creatures living in the water, fresh meats, poultry, stone or marble in its crude or unwrought state, gypsum or plaster of Paris ground, unground or calcined, hewn or wrought or unwrought, burr and grindstones, and timber and lumber of all kinds unmanufactured in whole or in part (including shingles, clapboard and wood-pulp) may be imported into Canada free of duty, or at a less rate of duty than is provided for by any act at the time in force, upon proclamation by the Governor in Council, which may be issued whenever it appears to his satisfaction that similar articles from Canada may be imported into the United States free of duty, or at a rate of duty not exceeding that payable on the same under such proclamation when imported into Canada."

569. In 1894 the Customs Tariff Act (57-8 Vic., Chap. 33) repealed the above and substituted the following:—

"7. The whole or part of the duties hereby imposed upon fish and other products of the fisheries may be remitted as respects either the United

...reclamation of the Governor in  
appears to his satisfaction that  
...and Newfoundland, or of either of  
...of duties imposed upon articles  
...of the duties in force in the

... free of duty, or at a less duty than  
... of the Government in Council,  
... to his satisfaction that eggs from  
... States free of duty, or at a rate of  
... eggs under such proclamation when

them, may be imported into Canada by the Governor in Council, which may be shown that shingles and wood-pulp or exported into the United States the

[illegible]

## 5. AL FARMS.

Central Farms of the Dominion of  
Government in 1886. They are five in  
number, and cover 1,000,000 acres of land. There is a Central  
Farm at Ottawa, and there are four  
others. The Central Farm has been estab-  
lished in Ontario and Quebec, and serves the  
provinces. One of the branch farms is  
on the dividing line between Nova  
Scotia and the three Maritime provinces.  
There is one at Edward Island. Another has  
been established for the Province of Manitoba. A  
fourth is in the Territory of Assiniboia, as an ad-  
vance, while the fourth is located in  
the Northwest, for the purpose of that province.

work is still in progress in all branches of literature, and many problems of general interest remain to be solved. In selecting the sites for

ms due regard has been had to the great variations in climate in parts of the Dominion, and they have been so placed as to render help to the farmers in the more thickly-settled districts, and at the ne to cover the most varied conditions which influence agriculture da.

### CENTRAL [EXPERIMENTAL FARM.

The Central Farm has about 500 acres of land, and an outfit of s suitable for carrying on experimental work, with residences for f officers. There are buildings for cattle, horses, swine and poultry. also a dairy with all modern appliances for experimental tests, a ing and propagating house with a building attached which affords i for the distribution of large quantities of promising varieties of in for test by farmers in different parts of the country.

The principal officers of the farm are the Director, Agriculturist, turist, Chemist, Entomologist and Botanist. The Director, , Entomologist and Botanist are provided with assistants. There Poultry Manager, a Foreman of Forestry—who acts also as assistant director, a Farm Foreman and an Accountant. A suitable office staff led for the conducting of the large correspondence, both in English nch, which is carried on with farmers in all parts of the Dominion, encouraged to write to the officers of the farm for information and whenever required.

director has his headquarters at Ottawa, and supervises all s of the work on all the experimental farms, making personal on of the branch farms at least once a year. During these annual ons the progress of all divisions of the work is enquired into, and rence with the superintendents of these farms future courses of ental work are planned.

e Central Farm the production of new varieties of cereals and other ie ornamentation of the grounds and the forestry plantations are ie immediate personal charge of this officer, aided by his assistant man of Forestry. During the past six years about 700 new varieties have been produced at the experimental farms by cross-fertilizing ridizing, most of them at the Central Farm. Some assistance in k has been had from experts specially employed for this purpose, from some of the superintendents of the branch farms. These new are carefully watched, and those of less promise are from time to ected. There are of these still under test 189 varieties, viz., 87 of 3 of barley, 13 of oats and 56 of pease. Some of these new roots have produced during the past year heavy crops of fine quality, ag that they are likely to occupy a prominent place among the best cultivation. A large number of new fruits have been similarly l, especially of hardy varieties likely to be useful in the Canadian est.

t 900 varieties of trees and shrubs are being tested in the ornamental and groups in different parts of the grounds. These include species eties from all parts of the world where similar climatic conditions

prevail. They are placed in carefully arranged groups with the object of producing good effects, and, to make this part of the work more instructive to the visiting public, the specimens are plainly labelled with their common and botanical names. In this connection there are also large collections of flowering plants, such as roses, paeoniss, irises, lilies, ploxes canna, gladiolus and beds of other attractive perennial and annual plants mixed. A new feature in this division of the work was begun during the past year, by the preparation of a number of large beds for the grouping of the most attractive wild flowers of the Dominion, one each for those of the Maritime provinces, Quebec, Ontario, Manitoba, the North-west Territories and British Columbia.

About twenty acres of land are now occupied by forest belts which extend the whole length of the north and west boundaries of the farm and contain about 20,000 trees, including all the more valuable economic woods which can be grown in this country either for timber or for fuel. Annual measurements are taken of the growth of the many varieties under trial, and useful data is thus being accumulated. The other objects in view in undertaking this branch of work were to determine by experiment with a number of different species the comparative growth and development to be had by planting at different distances apart, also to ascertain the relative growth which these trees would attain when planted in blocks of single species as compared with others planted in mixed clumps where a number of different species are associated together. The value of these tree belts for shelter is also being investigated, as well as the usefulness of hedge planting for the same purpose. To ascertain the most suitable trees and shrubs for hedges 66 trial hedges have been planted in 50 feet lengths, and these now form a very attractive feature in connection with this work of tree planting.

The other branches of the work at the Central Farm in charge of the Director are the permanent test plots for determining the action of fertilizers on important crops, the seed testing houses and conservatory, and the distribution of seed grain. Experiments were begun in 1888 with the object of gaining information as to the effects of certain fertilizers and combinations of fertilizers on the more important crops. During that year the experiments were confined to plots of wheat and Indian corn, but in 1889 the work was enlarged so as to include oats, barley and roots, and the experiments have been repeated every year since. The area devoted to these tests includes 105 one-tenth acre plots, and the results obtained are given each year in the Annual Report of the Experimental Farms. Special arrangements are made each year to test, for farmers in all parts of Canada, samples of grain of all sorts held for seed, the vitality of which may be doubtful. During the past year 1776 samples were thus tested and their germinating power reported on, and thus valuable information was given which in many cases prevented the use of grain for seed with weak or inferior germinating power.

Those varieties of grain grown on the several farms which prove to be the best and most productive are annually distributed by mail free, in small bags containing 3 pounds each, to farmers in all parts of the Dominion who ask for them. These sample bags of grain, when sown and properly cared for, usually produce from one to three bushels, and at the end of the second year the crop will generally furnish the farmer with a sufficient quantity of seed to sow a considerable acreage. This distribution is carried

at all the farms, but the larger part is sent out from the Central Farm. In 1895, 30,553 samples were mailed to 28,282 applicants, and during the last five years more than 100,000 of such samples have been sent out for test to about 70,000 applicants. In many districts the new varieties which have thus been introduced are finding much favour, and are rapidly replacing in general cultivation the less productive sorts formerly grown. The surplus stock of promising varieties of grain grown at all the experimental farms, beyond what is required for the free distribution of sample bags, is sold in larger quantities to farmers for seed.

574. The Agriculturist takes charge of the experiments with field crops, of cereals, roots, Indian corn, hay and other fodder crops; its testing of varieties as to their relative productiveness on different soils, also regarding the effects of the application of manures on field crops, and the ploughing under of clover and other green crops as fertilizers. Much experimental work has been carried on with ensilage, with the object of determining the relative feeding value of different fodder plants and combinations of fodder plants thus preserved, and their general usefulness as food for cattle. Experiments have also been conducted for several years to ascertain how many cows can be fed throughout the year from the crops raised on forty acres of land.

The Agriculturist also conducts the feeding experiments with cattle, the main object of which has been to show the most economical rations for the production of milk and beef. These tests have been made chiefly with various combinations of ensilage, roots, hay and straw with or without certain quantities of grain in the ration. The results have shown the great economy of using ensilage of Indian corn for the winter feeding of cattle. Many experiments have also been carried on in the fattening of swine, and much information has been gained as to the relative value of the different sorts of cereals for this purpose and the best methods of preparing them for feeding, also the usefulness of skim-milk, buckwheat, potatoes and roots as food for some. This officer also takes charge of the dairy department, and conducts the experiments in butter-making.

575. The work of the horticultural division, which is in charge of the Horticulturist, may be classified in the following manner:—

1. That carried on with plants growing on the Central Farm.

- (a.) Testing varieties of fruits and vegetables.
- (b.) Producing new varieties of fruits.
- (c.) Cultural experiments with fruits and vegetables.

The above lines cover a wide field and embrace investigations conducted in the domain of original research, as well as those carried on by observing and recording results obtained by the effect and operation of natural laws, in connection with temperatures, soils and so forth.

2. That carried on with the assistance of interested fruit growers residing in different portions of the Dominion.

- (a.) Treatment and prevention of fungous pests.
- (b.) Effect of soil and climate upon fruit and fruit trees.
- (c.) Adaptability of varieties to varying soils and climates.

The Horticulturist offers his experience and knowledge to fruit growers throughout Canada who are free to make use of his services by corresponding with him, and by sending him specimens for examination and report.

He also attends, by invitation, and delivers addresses at the meetings of the Provincial Fruit Growers' Associations of Canada.

Specimens of fruits, new or old, healthy or diseased, are received and examined with interest and duly acknowledged. In this way originators and introducers of new fruits may obtain an authoritative opinion on their value, before offering them to the public.

The collections of hardy fruits now in the orchards and small fruit plantations at the Central Farm are large and instructive; each year brings additions and increases their value.

576. The Entomologist and Botanist to the Dominion Experimental Farms, with the help of one assistant, carries on careful investigations on the life-histories of injurious and beneficial insects, on the value of various native and imported grasses for hay or pasture, as well as on many other fodder plants. Particular attention has also been paid to the important subject of noxious weeds and their eradication.

The department is also made use of largely by those interested in the scientific aspect of entomology and botany, many collections of plants and insects being sent in every year for identification.

In addition to the annual reports which treat of the work done in the department during the preceding year several useful publications have been issued upon entomological and botanical subjects, *e. g.*, Smut in Wheat, Recommendations for the Prevention of Damage by Insect Pests, The Horn Fly, Potatoe Blight, Grasses and their Uses, Spraying for the Destruction of Injurious Insects, &c., &c. Successful efforts have been made to get into touch with the best practical farmers and fruit growers in all parts of the Dominion, so as to be apprised of the fact promptly whenever any outbreak of an agricultural enemy might occur, in order that the best remedy might be applied without delay. By a prompt attention to the many correspondents who write to the entomologist and botanist and by the publication of timely articles in the agricultural and daily press the importance of this department has been made widely known among the farmers of Canada as a source of trustworthy information upon all subjects which come within its scope.

577. The Chemical Division of the Dominion Experimental Farms, under the direction of the Chemist, comprises a branch of the work that is becoming recognized by the farmers of Canada as one of great importance. The intimate relationship between chemistry and agriculture, and the value of chemical knowledge as applied to the economic and profitable carrying on of farming work, are facts now generally admitted by all who are obtaining themselves a position in the front rank of modern and progressive culture.

In the other divisions of the Farm work this branch has a large share. Numerous inquiries being received daily from all over the country, farmers wishful to obtain advice and information respecting

the treatment of soils, the composition and application of fertilizers—natural and artificial—the relative value of cattle foods, &c., &c.

As far as time permits analyses are made for farmers of matters pertaining to agriculture, when the results would be of interest and value to a large portion of the community. In this connection it may be stated that most useful work has been done by the examination of farmers' water supplies and in calling attention to the danger of drinking water polluted by drainage from the barnyard. For health in the farmer's family, for thrifty stock and wholesome dairy products, pure water is indispensable.

The naturally occurring fertilizers of Canada, peat, mucks, marsh, mud, marl, &c., have been examined in large numbers during the past five years, so that now a large amount of data has accumulated on this important question. These data go to show that in many districts of Canada materials (easily and cheaply obtainable) occur that contain notable quantities of the essential elements of plant food. The knowledge of the composition and value of these deposits will allow farmers in many parts to enrich their fields at small cost.

During the past year an investigation has been made into the character and absorptive qualities of moss litter, as found in many Canadian bogs. The results show that it compares most favourably, from all standpoints, with the litter prepared on the continent.

Original investigations have been pursued to learn the feeding value of various Canadian fodder crops. To this end a large number of native grasses have been analysed at several stages of growth, and extensive chemical examinations of the corn fodder crop have also been made. Chief among the results are the following: That of our native grasses, *Poa pratensis*, or June grass, stands pre-eminent as a pasture grass; that Austrian Brome Grass (*Bromus inermis*), an introduced perennial, has shown itself to be a very nutritious grass, as well as a heavy cropper; that red top for low lands and orchard grass for shady places are both excellent in composition and worthy of cultivation. The chemical data in this investigation go to prove that a large loss in the feeding qualities of the grass results when it is allowed to ripen before being cut for hay. Cutting should be at or shortly after the flowering period. The composition of the corn crop at several periods of growth has been ascertained, and practical deductions made which will prove of great value in the cultivation of this excellent and cheap fodder.

The virgin soils, representing large areas in the Dominion, have been under examination for some years past, and the reports of this division give the analytical and physical data obtained, with deductions therefrom and suggestions as to profitable treatment of the soil. It has been shown that Canada possesses many soils of equal fertility to the most productive in the world, these remarks having especial reference to the prairie soils of Manitoba and the North-west Territories and the alluvial soils of both the Pacific and Atlantic coasts.

Practical assistance to special branches of agriculture, such as horticulture and the dairying industry, has been afforded, and a perusal of the annual reports will show that already a large amount of most useful information for the guidance of Canadian farmers has been obtained and published.

578. In the Poultry Department of the Central Experimental Farm, which is in charge of the Poultry Manager, there are fourteen of the most serviceable standard breeds of fowls with which experimental work—with the view of finding out the best egg-layers and flesh formers—is carried on. Particular effort is made to find out the breeds which give the best egg yield in the winter season, at the least cost. It is in the winter season that high prices are given for the new laid article, and it should be the aim of the farmer to make his hens lay at that time rather than in the late spring, or early summer, when prices are low. Crosses of the different thoroughbreds are made with the same object in view. Particular care is also given to the hatching and rearing of chickens, the treatment and foods best calculated to cause vigorous and rapid growth, and record is kept of the weight development of the offspring per month, so as to show which thoroughbreds, or crosses, give the most satisfactory results as rapid flesh formers for market, or table fowls, in the shortest time. Attention is also given to the behaviour of the different breeds during the long winter term of artificial existence, and every effort is made to have the conditions of that period as like the natural as possible. Some valuable data have been secured which will be found in the reports issued from year to year. Experimental work is at present carried on with the following breeds, viz. :—

EGG LAYERS AND FLESH FORMERS.—Barred and White Plymouth Rocks, Silver Laced and White Wyandottes, Coloured Dorkings, Light Brahmals, Langshans, Houdans, White Javas and Crosses of the Plymouth Rock and Coloured Dorking and Indian Game and Langshan.

FOR EGG PRODUCTION ONLY.—White Leghorns, Black and White Minorcas and Andalusians.

The conditions, as to housing, rations, care and management, are the same in all cases.

There is yet a large field for further extension of experimental work in trial of the different methods of artificial hatching and rearing of chickens, so as to have them early and on the market when they are worth most; caponizing; the hatching and rearing of broilers; the grouping of pullets of the same age to be placed on rations of different composition; the best plan of winter house arrangement so as to prevent egg eating, feather picking and other vices which poultry are addicted to when kept in close confinement, also regarding the diseases of poultry. Much information has already been given on most of these subjects in the annual reports of the Poultry Manager.

579. When the Central Experimental Farm was acquired sixty-five acres of land were set apart for an Arboretum and Botanic Garden. During the past seven years the planting of this section of the farm with trees, shrubs and perennial plants has made much progress, special attention having been given to the obtaining of as many of the trees and shrubs native to Canada as possible, and such species and varieties from other countries as were likely to prove hardy enough to endure the climate here. A large proportion of the native trees have now been secured, and many of the shrubs and perennial plants, most of which are doing well. A large number of species and varieties have also been introduced from other countries, such as the United States, the colder parts of South America,

Great Britain, Russia, Germany, France and other parts of Europe, also from Siberia, Japan, China, the mountain districts of India and from Asia Minor. Of these many have proved hardy, and the collection already formed is a source of much interest to botanists, as well as to the general public. The total number of species and varieties of trees and shrubs now growing in the Arboretum is 935, and of perennial plants, 863. These have been arranged as far as was practicable in related botanical groups so as to admit of convenient comparison. Each tree, shrub and plant is labelled with a durable enamelled or zinc label, so that it may be readily identified. This branch of the work is in charge of the Foreman of Forestry.

580. The Farm Foreman takes charge of and directs the labour of the workmen and teams, and keeps the time of the men. He also carries out the arrangements made in connection with the preparation of the land and the sowing and harvesting of the crops, and takes the many careful records required in connection with the growth and yield of all the field crops, arranges for and superintends the harvesting, storing or threshing, cleaning and subsequent care of all these farm products. During the winter months the farm foreman arranges for the hauling and care of manure, the cutting and preparation of food for stock, and directs the cleaning, hand picking and putting up of all samples of grain sent out for test by farmers, also all the seed supplies sent to the branch experimental farms.

#### BRANCH EXPERIMENTAL FARMS.

581. At the branch farms much of the work is so arranged as to provide for the investigation of those questions which are of the most immediate importance to the farmers residing in the several provinces. Each farm is furnished with suitable buildings and supplied with some of the best breeds of dairy cattle, also with some of these best suited for beef. Useful tests are made in all branches of farm and horticultural work, also with regard to the most practical methods of maintaining the fertility of the soil.

582. At the experimental farm for the Maritime provinces at Nappan, N.S., which comprises 310 acres, a large number of instructive tests have been made during the past 8 years, particularly in the growing of oats and barley, and the large crops obtained there of the most productive sorts have awakened much interest in this subject among farmers generally. Much attention has also been given to the growing of roots and potatoes, for which the climate is very favourable. Turnips and mangels have given large crops. Where these roots succeed so well they form an important element in stock feeding, and it is very desirable that information should be available as to the varieties which succeed best. This is now obtainable from the results of the tests made here. Very useful experiments are in progress in the draining of land, both uplands and marsh, and the results in crops are showing marked advantage as the outcome of this treatment. Many tests are also being made with promising varieties of grasses and clovers. Experiments have also been conducted in feeding cattle for the production of milk and beef, and in the fattening of swine. Large orchards of fruit trees have been established, and plantations made of ornamental trees and shrubs. The

fruits under test now number 278 varieties, and the ornamental trees and shrubs include 280 species and varieties. These are being increased from year to year, and the results obtained are awakening much interest in horticulture in that part of the Dominion.

583. The experimental farm for Manitoba at Brandon, Man., contains about 670 acres. Part of this land lies in the valley of the Assiniboine and a part is on the bluffs. Here much has been done in testing the best methods of treatment of land to prepare it for crop. The results obtained show the great advantage of summer fallowed land, and that better crops are obtained from land ploughed in the spring than in the autumn. Different methods of sowing seed grain have also been tested, and the advantages of the drill over the broadcast machine demonstrated. Grain has also been sown at different depths to determine the best practice in that climate. Experiments have been conducted for the prevention of smut in wheat, a disease which has been very prevalent in many sections, and which depreciates the value of the grain wherever it occurs. The results of these tests, which have been continued for several years, show that, when the seed is properly treated, smut may be almost entirely prevented.

Experiments have been conducted in the cultivation of flax, also with Indian corn, roots, millets and other fodder crops. In view of the large increase in stock in Manitoba, and the scarcity of native hay in some districts, crops of mixed grain have been grown and cured green for hay with much success. Instructive experiments have also been carried on in cultivating native grasses, and their usefulness in the production of hay has been demonstrated. Good bulls are kept at this farm for the improvement of stock in that district. The breeds thus represented are Durham, Ayrshire, Holstein and Polled Angus. Tests have been made in the feeding of milch cows and steers, for the purpose of ascertaining the most economical methods of producing milk and beef from those fodder materials which are most generally available in that province. Since this farm was established, a large number of the hardiest varieties of fruits have been tested there. While small fruits succeed well, very little success has been had as yet with large fruits. Further experiments are being conducted all along this line. A large measure of success has attended the planting of forest trees for shelter, and of ornamental trees and shrubs. Of these about 100 species and varieties have proven hardy, and additions are every year made to this list, showing that there is an abundance of material sufficiently hardy to make successful plantations both for the ornamentation of homes in towns and cities as well as those on the prairie farms in Manitoba.

584. The experimental farm for the North-west Territories, which has been located at Indian Head, in eastern Assiniboia, contains 680 acres. At the time of its selection this was all bare prairie land. The soil is very fertile and produces excellent crops of grain, but there is great need of shelter from prevailing winds. Tree planting on a fairly large scale was begun as soon as practicable after the farm was occupied, and although at first it was but partially successful, the trees first put out formed more or less shelter for each other and for those subsequently planted, and now they

are nearly all doing well. In shelter belts, blocks, avenues and hedges there are now growing on this farm more than 100,000 trees.

Experiments in the treatment of land to prepare it for crop, in methods of sowing and depth of sowing, also in the treatment of seed grain for smut have been carried on here, the results confirming the conclusions which have been reached at Brandon. Many tests have also been made with fodder crops, such as Indian corn, mixed grain crops and spring rye, cut green and cured for hay, grasses, &c. Experiments have also been conducted in the feeding of stock, the fattening of swine and the management of poultry. In this relatively drier climate, where unlimited pasture is found, the value of good grass for hay and pasture can scarcely be over-estimated, and probably among the most important of all the results gained by tests on this farm are those which have established the value of Awnless Brome Grass (*Bromus inermis*) in the North-west. This grass is very hardy, is a strong grower, endures drought, produces a very early growth in the spring and yields fine crops of excellent hay, much relished by cattle. Large quantities of seed of this useful grass have been saved at Indian Head and hundreds of sample bags have been sent to farmers in different parts of the North-west Territories for tests, and the reports received regarding its usefulness are most satisfactory.

Small fruits have been grown successfully at Indian Head, but of the larger fruits tried none have yet been found hardy enough to endure the climate. A large number of different species and varieties of economic and ornamental trees and shrubs have been tested here, and about ninety have proved hardy.

585. The branch experimental farm at Agassiz is situated in the coast climate of British Columbia, seventy miles east of Vancouver, and contains about 1,100 acres of land, 300 of which is valley land and 800 acres mountain. The climate here is admirably adapted to fruit culture, and most fruits thrive wonderfully well. Since the fruit industry promises to become one of great importance to this province, large experimental orchards have been planted on this farm for the purpose of testing side by side the products of similar climates from all parts of the world, so that information as to the most promising and useful sorts may be available to guide the settlers in that country. Already 1,600 varieties of fruits are under test, and the additional sorts planted in 1895 will swell this number to over 2,200. Orchards have been established not only on the valley lands, but also on the bench lands up the sides of the mountains, at different heights, varying from 150 to 1,050 feet.

On the mountain sides have also been planted a large number of timber trees, especially those representing the more valuable hardwoods of the east. Many other useful and ornamental trees and shrubs are also under test. As at the other experimental farms useful lines of work are carried on in connection with the cultivation of many different sorts of cereals, roots and fodder crops, also with cattle and swine. At all these farms many experiments are conducted every year with numerous sorts of vegetables and flowers, and thus useful help is being given to every branch of agriculture, horticulture and arboriculture.

During the past five years more than 7,000 packages of seedling forest trees and cuttings and more than five tons of tree seeds have been sent out in small bags by mail free of charge to farmers in different parts of the Dominion who have applied for them, and thus a general interest in tree-growing has been awakened. An annual report is published containing particulars of the most important work done at each farm, and this report is sent to every farmer in the Dominion who asks for it. A very large number is distributed annually. Occasional bulletins on special subjects of importance are also issued from time to time, all of which are read with interest by a large proportion of the most intelligent farmers in the country. The officers of all the farms attend most of the more important gatherings of farmers in different parts of the Dominion where opportunities are afforded for giving further explanations regarding the work conducted and the results achieved from year to year.

### DAIRYING SERVICE.

586. The Dairying Service of the Department of Agriculture was begun in 1890, when a Dairy Commissioner was appointed to act in affiliation with the Central Experimental Farm. The good work of developing the agricultural resources of Canada through the dairying branch of farming has made steady and rapid progress during the year. The extension of dairy farming is particularly gratifying, in view of the fact that by means of it the coarse grains and fodders are consumed largely upon the farms where they are grown. The elements of fertility, which are necessary to the continued growth of good crops, are thus left on the farms in the form of manure. A continuous and general selling of the crude, bulky and primitive products of agriculture tends to deplete the soil of the substances which are required to enable it to carry profitable crops. The production of fine food-products of concentrated quality and value, such as butter, cheese, pork and beef, affords scope for the exercise of intelligent labour with profit, and at the same time protects the land against exhaustion.

587. There is much less difference between the qualities and values of the cheese from the different provinces and the different sections in each than used to prevail. The methods of manufacture are now nearly uniform throughout the whole Dominion; and while the districts which were formerly backward are now nearly abreast of the foremost in quality of product and in market price obtainable, the dairymen in the districts which were formerly far ahead have also been the gainers by the general improvement. Frequent and commendatory comments have appeared in trade journals outside of Canada on the fact that the manufacture of adulterated cheese is entirely prohibited within the Dominion.

588. The enlargement of the quantity of dairy products has been mainly in the article of cheese. The quantity of Canadian cheese exported during the year ending 30th June, 1895, was an increase of 54 per cent over that exported in the year 1890. The demand in Great Britain for it has been steady; and the general excellence of quality and the total absence of adul-

have gained a continuously improving reputation with the consumers of Great Britain. It is expected that "The Dairy Products Act, 1893," will continue to protect the good name which has been won and conserve it from injury by misrepresentation.

Consequence of the unusually large quantity of cheese made in the United Kingdom in 1894, and the increase in the importations thereof from Australasia, the price was lower in 1895 than formerly.

The following figures from the *Montreal Gazette* may be taken as typical. They show the quotations by public cable report from Liverpool, the prices quoted in Montreal, the prices in Liverpool being given in shillings and pence and those in Montreal in cents, conversion from one to the other being readily made at the rate of \$4.86 $\frac{2}{3}$  to the pound sterling:—

The lectures delivered by the Dairy Commissioner and his assistants have given information on the whole practice of dairying, from the selection of the soil, the growing of fodder-crops, and the management of the stock to the marketing of the finished products. Special instructions and

demonstrations have been given to cheese-makers and butter-makers in nearly all parts of the Dominion.

591. As the climate of Canada impose, a period of at least six months during which cattle must be fed in stables, more attention is being given every year by dairymen to the growth of Indian corn for fodder. Fed either as weather-dried stover or as ensilage, it is a juicy, wholesome, cheap feed for milking cows; and the possibility of growing heavy crops of it per acre nearly everywhere in Canada puts the farmers, in regard to the cost of production, on a footing equal to or better than their competitors in other countries where cows can be fed on pastures for a longer part of the year. In some places horse-beans (*Faba vulgaris*, var. *equina*) have been grown with satisfactory results as a fodder crop. On the Central Experimental Farm as much as twelve tons per acre of green fodder was obtained of this valuable plant.

592. The comparatively new departure in dairying, in the fitting up of cheese factories for manufacturing butter from October until May, has made good progress. Two winter dairying stations were established in Ontario under the charge of the Dairy Commissioner in 1891. During the winter of 1893-94 seven of these butter making stations were conducted by the Dairying Service of the department, and ten were operated during the winter of 1894-95, including the dairy schools at St. Hyacinthe, Que., and Kingston, Ont. A large number of cheese factories were fitted up by the proprietors for the manufacture of butter during the winter. This new industry may now be considered as fairly well established in the Province of Ontario and well introduced into the other provinces. The direct revenue from the sales of butter is not the only advantage which results to the farming interest from an extension of winter dairying. By means of it the number and capacity of the cows which can be reared and kept upon farms are increased and improved; and by the use of skim-milk and buttermilk large numbers of swine can be reared and fattened.

593. Several new departures for the benefit of the dairying interests were taken up during the year.

In consequence of the unfavourable conditions which existed in January for the marketing of fresh-made creamery butter, it appeared desirable to make shipments of such to Great Britain.

1. In order to establish a good reputation for fresh made winter creamery butter, by putting it on the market in the best condition;

2. In order to attract the attention of British consumers to the excellent quality of Canadian creamery butter when it is supplied to them without deterioration in quality;

3. In order to show the farmers in Canada that an outlet may be found through the British markets for all the creamery butter of fine quality which they can furnish, and that at prices remunerative to them;

4. In order to take up in an immediately advantageous way the question of putting Canadian creamery butter on the British markets, to be followed up throughout the summer by cold storage service and accommodation during ansit from the creameries to the warehouses in Great Britain.

To enable the managers of creameries to make payments to the patrons who supplied milk or cream, authority was obtained to pay advances at the rate of 20 cents per pound on creamery butter of finest quality, made between the 1st of January, 1895, and the 30th March, 1895, and put up in neat, clean packages, delivered to the order of the Dairy Commissioner at Montreal.

Under this plan 1,077 packages of butter were exported to Great Britain. Some packages which were received in Montreal, of good quality, but in packages of sizes too small or otherwise unsuitable for export, were sold in Montreal.

That action of the Government in this matter steadied the butter market, so that all creamery butter made in Canada at that time—and there was ten times as much of it manufactured as was handled by the Government—was sold for from 3 to 4 cents per pound more than it would have brought, had the demoralization which threatened the market been allowed to prevail.

A further effect of the action of the Government in giving the little, but most efficacious assistance to the creamerymen during last winter, was to give the farmers confidence to prepare for a great extension of winter butter-making during the winter of 1895-96. That has been done, and with the prices at present current it is likely that the farmers will receive most excellent and satisfactory returns.

The action was followed by the inauguration of the cold storage service, in which arrangements were made whereby refrigerator cars for butter were run during the summer on the main lines of railway leading into Montreal. These were used to pick up small lots of butter offered weekly. The shippers of butter by these cars and routes were allowed to ship at the usual "less-than-carload rates," without any charge for the icing or special service. As far as space permitted, merchants were allowed to use these cars for the shipment of dairy and creamery butter between points at which the cars touched.

594. Arrangements were made for the storage of fresh-made creamery butter in the warehouse of the Montreal Cold Storage and Freezing Company, St. Paul Street, Montreal. Provision was made for storing the butter at a temperature of 20 degrees Fahr.

Arrangements were made for the fitting up of insulated and refrigerator chambers on steamships to Bristol, Liverpool and Glasgow. The chambers were constructed so as to thoroughly isolate the butter and prevent it from being heated by any rise of temperature outside the chamber during the voyage. Galvanized iron tanks were filled with ice, to cool the interior of the chamber and to cool the exterior of the packages, as far as they were heated in transit from the cold storage warehouse to the steamships.

The steamship companies issued bills of lading to the shippers of the butter at such freight charges as were current for that week on cheese and butter going by the same route in the ordinary way, without the cold storage accommodation. The Government constructed the isolated chambers on board the steamships and guaranteed the freight charges on the whole space occupied by the chamber. The amount of the earnings from freight charges on butter carried in the compartments was credited on that guarantee.

This action has resulted most advantageously to the butter-making interests of Canada, inasmuch as the butter was landed in Great Britain in an undeteriorated condition. Increased demand has arisen for Canadian butter; its relative value in the markets of Great Britain has been increased; and it has also gained admission into markets which hitherto had been practically closed to it.

Ten steamships were fitted up; 35,605 packages of butter were carried in insulated compartments. Trial shipments of cheese in cold storage compartments were made during the summer; and the results from these trial shipments were so satisfactory, that it is probable hereafter advantage will be taken of cold storage service for the carriage of large quantities of cheese during the summer to Great Britain, in order that they may arrive there in a cool and undamaged condition.

595. A few paragraphs will indicate the other work carried on in the different provinces in 1895.

In the Province of Ontario a dairy school was erected at Kingston, Ont., in 1895, as a branch of the School of Mining and Agriculture there. The Dairy Commissioner was authorized to take charge of that for the winter. Short courses of instruction were arranged, especially for cheese-makers and butter-makers who have had the experience of working for one season at one of these branches. Each course includes practical instruction for two weeks, and any student may take both courses. 105 students attended during the winter of 1894-95.

In the Province of Quebec the Assistant Dairy Commissioner held meetings during the year. During the winter he delivered a series of lectures to each class of students at the Dairy School at St. Hyacinthe, Que. The school was erected by the Dairy Association of the Province of Quebec in 1892, and has been conducted under the direction of the Dairy Commissioner. The Dairy Association for the Province of Quebec contributes a sum of \$1,000 per annum towards its maintenance. During the winter of 1893-94, 268 students attended the school and took the courses of instruction in cheese-making, butter-making and the testing of milk. Applications beyond the full capacity of the school were received for the season of 1894-95, and 328 students availed themselves of the courses of the school.

Great progress has been made in the cheese-making of the province. Whereas a few years ago Quebec cheese were sold on the average for about one cent or more per pound under the prices obtainable at the same time for Ontario cheese, during the past season the prices obtained in Quebec were almost equal to the prices that were paid in Ontario at the same time. There has also been a marked improvement in the manner of boxing and branding the cheese.

In the Province of New Brunswick a dairy school was conducted at Sussex, N.B. In 1894, 30 students took the course of instruction, and in 1895, 54 students were in attendance.

In the Province of Nova Scotia an experimental dairy station was established on the Experimental Farm at Nappan, N.S., in 1892-93. The

buildings were erected with capital furnished by persons in the neighbourhood, and the Department of Agriculture provided the apparatus for cheese-making and butter-making. Cheese-making is followed during the hot months of summer, and butter-making during the remainder of the year. Many visitors come to this station, as it is situated on the Branch Experimental Farm for the Maritime provinces. Up to 1895, 19 young men learned butter-making and cheese-making there, and are now in positions as makers of cheese or butter in Nova Scotia or New Brunswick. A number of new cheese factories and creameries have been in operation during the summer, and this business, upon the co-operative plan, is likely to become an extensive one.

In the Province of Prince Edward Island the work of the dairying service has been continued during the year. In 1892 there was only one dairy station on the island. The building was put up by a joint stock company of farmers at New Perth. The Dominion Government loaned the machinery to fit up that one factory on Prince Edward Island. All the cheese factories and creameries erected and equipped there since have been built and fitted up at the expense of joint stock companies of the farmers themselves. In 1893 eleven dairy stations were managed by the Dairy Commissioner. The farmers supplied the milk; a charge of  $1\frac{1}{4}$  cents per pound was made for manufacturing the cheese and marketing the same. After the cheese was sold, the proceeds, minus the manufacturing charge, were distributed to the patrons according to the quantity of milk which they furnished. In 1894 there were sixteen cheese factories and two creameries on the island, and they were managed on similar terms. In 1895 there were twenty-eight cheese factories and two creameries, and they were managed on similar terms. The quality of the cheese from Prince Edward Island has been excellent and has won for itself a good place in the markets. Winter dairying has been successfully established on the island; and during this winter of 1895-96, five cream-separating stations and one central butter factory in Charlottetown are being conducted by the Dairy Commissioner.

In the Province of Manitoba two experts from the Dairy Commissioner's staff visited the new creameries and cheese factories during the summer, giving instruction on the establishment of co-operative dairying there. They extended their travels and work into the North-west Territories.

A dairy station has been conducted at Moose Jaw for the making of butter there. In 1894, 22,000 lbs. of butter were made, and in 1895, up to the end of October, 51,124 lbs. were made.

In the Province of British Columbia a travelling dairy began work of instruction and visited a number of places in the agricultural districts on the mainland and on Vancouver Island.

To meet the requests of many of the salesmen of cheese factories and creameries, an inspector was appointed at Montreal to examine and report upon the quality of cheese or butter sold with "quality guaranteed in Montreal." His services have been useful in protecting the interests of the salesmen and shippers representing the producers of cheese.

596. The magnitude and growth of the export trade of Canada in dairy products is shown by the following tables (year ending 30th June):—

DOMINION OF CANADA—EXPORTS OF DAIRY PRODUCTS—HOME PRODUCTION.

BUTTER.

YEAR.	Quantity.	Value.	To Great Britain.	To United States.	To France.	To Germany.	Other Foreign Countries.	B.N.A Provinces.	British India.

## CHAPTER X.

Extensive Fisheries.—Fresh Water Fisheries.—Sea Fisheries.—Yield since Confederation.—Fishermen, Vessels and Gear.—Government Protection.—Protective Fleet.—Fish Hatcheries.—The Great Lakes.—British Columbia.—The Bounty.—Development by Provinces.—Value of Yield and Exports.—Value of Kinds of Fish.—Marine Scientific Stations.—The Fur Sealing Fleet.

597. The fisheries of Canada are the most extensive in the world, embracing a sea-coast line of immense extent in addition to inland seas, innumerable lakes and a great number of rivers. The coast line of British Columbia alone is 7,181 miles, or more than double the coast line of Great Britain and Ireland. The eastern sea-coast line, extending along the shores of Nova Scotia, New Brunswick, Prince Edward Island and Quebec, from the Bay of Fundy to the Straits of Belleisle, cover a distance of 5,600 miles.

598. While the salt water inshore area, not including minor indentations, covers more than 15,000 square miles, abounding with fish life, the fresh water area of that part of the great lakes belonging to Canada is computed at 36,350 square miles. Manitoba and the North-west Territories also contain large sheets of water well stocked with the most excellent fish.

599. The most important deep-sea fishery grounds on the Atlantic are off the coasts of Nova Scotia, New Brunswick and Prince Edward Islands, around the Magdalen Islands, the Baie des Chaleurs, the Island of Anticosti and the Labrador Coast.

600. Between the years 1869 and 1894 the principal commercial fisheries yielded as follows :—

Cod.....	99,175,313
Herring.....	48,676,782
Lobsters.....	44,549,002
Mackerel.....	36,125,437
Salmon.....	38,006,074
Haddock.....	12,245,819

601. The commercial value of the fishereis was nearly \$21,000,000 in 1894, an increase of \$32,912 on the yield of 1893. This does not include the value, probably amounting to two millions, of the large quantity of salmon and other fish consumed by the Indians of British Columbia, Manitoba and the North-west Territories.

602. Engaged in the fishing industry of Canada in 1894 there were 70,719 men using vessels, boats, nets and other gear valued at \$9,439,116.

603. In order to ensure the development of this industry, the Government of Canada enforces efficient measures of protection. These consist of laws and regulations carried out (1) by a large staff of officers stationed at every place where fishing is carried on; (2) by armed cruisers, employed on the Atlantic coast and on the great lakes; (3) by the establishment of close seasons intended to protect the fish at the most critical period of their existence—the spawning season; (4) by a system of leases and licenses, through which the Government is enabled to regulate fishing in accordance with local requirements; (5) by fish-breeding establishments, fourteen hatcheries being now established in various sections of the country; (6) by a fishing bounty of about \$160,000 a year; (7) by prizes awarded for the best models of fishing vessels, with a view to encourage a superior and safe class of deep-sea fishing schooners; (8) by Fishing Intelligence Bureaux, inaugurated in 1889, by means of which the movements of bait and of fish can be daily ascertained and reported, by telegraph communication, at the principal stations. Fifty-five of these bureaux were in operation in 1895.

604. For the purpose of protecting the sea-coast and inland fisheries the Government employs eight steamers and two fast sailing schooners, manned by 175 officers and men and 336 permanent officers, and 190 temporary guardians engaged at certain periods of the year, chiefly when the fish are spawning.

605. The expenditure by the Government in connection with the fisheries, during the fiscal year ended 30th June, 1895, with five previous years, is given below:—

HEADS OF EXPENDITURE.	1890.	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$	\$
Fishery officers .. .. .	65,873	71,306	72,124	72,315	86,964	95,518
Fish-breeding .. .. .	39,127	39,496	43,958	47,322	45,025	39,731
Fisheries protection service...	64,435	83,050	93,397	106,805	115,148	100,297
Fishery bounty .. .. .	150,000	166,967	156,892	159,752	158,794	160,089
Miscellaneous .. .. .	9,314	13,383	17,449	100,602	34,832	24,620
Total .. .. .	328,749	374,202	383,822	486,796	440,823	420,165

\* Among miscellaneous were the following items: Columbia Exposition, \$6,632; Behring Sea, \$74,026; collection of data respecting fur seals, \$1,937.

606. The *modus vivendi* clause of the draft treaty of 1888, between the United States and Great Britain (acting on behalf of Canada), has been deemed to be in force since March, 1889. Under it the Dominion Government have granted United States fishing vessels licenses to fish in Canadian waters under certain restrictions. In 1889, 78 licenses were granted, the charge being \$9,589; in 1890, 119, costing \$14,461; in 1891, 98, costing \$11,098; in 1892, 108, costing \$13,410; in 1893, 71, costing \$9,131; in 1894, 53, costing \$6,776; in 1895, 47, costing \$5,570.

November, 1895, the section (14) of the Acts of 1888, under which licenses were granted, was declared to be without force and no longer

in operation, by Governor General's proclamation. Licenses, however, issue for the year 1896 under Act 55-56 Vic., Chap. 3 of the Acts of the Parliament of Canada.

607. A lobster hatchery was established at Bayview, Pictou county, N.S., in 1891. The report of the officer in charge for 1895 states that during the season 168,200,000 young lobsters were distributed along the coast, from the Straits of Canso, and in Prince Edward Island. About 88,000,000 of lobsters were captured during the season of 1894 to fill the 13,333,693 cans put up; 7,565 tons were shipped alive or fresh.

608. In addition to the lobster hatchery, 13 fish hatcheries were in active operation during 1895. From these there were distributed 125,840,000 fry of salmon, trout, whitefish and salmon-trout. These were planted in many of the rivers and lakes in the Atlantic provinces, in the great lakes of Ontario and in the waters of British Columbia.

609. The work of establishing and restocking oyster beds at Shediac, N.B., and Tracadie, N.S., has been undertaken by the Government and placed under the superintendence of an expert from Great Britain. Preliminary work was done in 1892. In 1893 several hundred barrels of oysters were planted; in 1895, 168 barrels of oysters and 362 barrels of shells were planted in Tracadie, N.S.

610. The fisheries of Hudson Bay are considerable, but they are not included in the statements of the Department of Marine and Fisheries.

The Hudson's Bay Company have established salmon fisheries along the lower parts of the several rivers discharging into Ungava Bay. The fishermen employed are all Esquimaux. Trout are taken in large quantities and of great size, the largest reported weighing 14 pounds, and the average being from 6 to 7 pounds.

611. The fisheries of the great lakes are the most extensive lake fisheries in the world. In these waters are found the whitefish, salmon-trout, herring, sturgeon, bass, pickerel, &c.

The latest statistics published by the Department of Marine and Fisheries show that 75 tugs and schooners and 1,187 boats, manned by 4,155 men, were employed on the great lakes during the season of 1894; 1,689,875 fathoms of gill nets and seines, 359 pound-nets and 323 hoop-nets were used, the whole representing an invested capital of \$702,822. This amount does not include the value of freezers, ice-houses, fish-cans, piers and wharfs. The value of fish caught was \$1,660,000.

612. The total quantity of fish caught in the great lakes during the twelve years, 1883-94, amounts to 293,707,000 pounds, valued at \$17,660,000.

The principal kinds of fish caught in the period named were:—

Herring.....	97,000,000 pounds.
Whitefish.....	62,000,000 "
Salmon-trout.....	63,000,000 "

613. The fisheries of British Columbia are probably the richest in the world. During recent years they have developed rapidly. In 1876 the value of the catch was given at \$104,697; in 1880 it was \$713,335; in 1885, \$1,078,038; in 1890, \$3,481,432; in 1893, \$4,447,083, and in 1894, \$3,950,478.

During twelve years, 1883-94, the value of the salmon caught was \$21,439,437. The catch of 1893 was the greatest in value of any year, the value being \$3,150,709, and the average yearly value of the twelve years was \$1,786,620.

The fish caught include sturgeon, halibut, herring, oulachan, trout, rock codfish, skill, tousqua, &c.

614. Under an Act passed in 1882 to encourage sea-fishing and the building of fishing vessels, provision was made for the distribution of \$150,000 annually among the fishermen and vessels. By Act of 1891, Chapter 42, the amount was increased to \$160,000. This bounty is paid on the basis of \$3 a ton to vessels, \$3 per man to boat fishermen, and \$1 per boat to the owners. The number of vessels which received bounty in 1894 was 899 with a tonnage of 29,584 tons, showing an increase of 94 vessels and 1,605 tons, as compared with 1893. The number of boats on which bounty was paid was 13,351 and the number of boat fishermen who received bounty was 23,132, being an increase of 521 boats and 863 fishermen, as compared with the previous year. The total number of fishermen in vessels and boats to whom bounty was paid in 1894 was 29,222, as against 28,013 in 1893. The number of fishing bounty claims filed was 14,496, and the number paid was 14,350. The increased bounty given to vessels, \$3 per ton, instead of \$1.50 as formerly, has resulted in the addition of a number of new vessels to the fishery fleet. The four tables following give the number of vessels, boats and men in the different provinces receiving bounties. The total bounties paid since 1882 amount to \$2,047,009, distributed as follows:—

YEAR.	Nova Scotia.	New Brunswick.	P. E. Island.	Quebec.	Total.
	\$	\$	\$	\$	\$

.....	9,968	51,854	61,822
.....	9,539	53,282	62,821
.....	8,927	53,073	62,000
.....	8,911	55,247	64,158
.....	9,574	53,109	62,683
.....	9,621	55,382	65,003
.....	8,726	55,000	63,726
.....	8,666	56,909	65,575
.....	8,330	55,348	63,678
.....	8,899	58,854	67,753
.....	9,525	61,194	70,719

The following is a comparative statement showing the number of men employed in the fishing industry in 1881—the year before legislation respecting fishing bounties was effected—and in 1894 :—

## FISHERMEN IN 1881 AND 1894.

PROVINCES.	1881.		1894.	
	In Vessels.	In Boats.	In Vessels.	In Boats.
	No.	No.	No.	No.
Manitoba.....	62	2,831	1,735	10,915
and North-west Territories.....			83	1,293
.....	92	2,516	421	3,734
.....	951	12,706	409	11,672
and Island.....	76	3,559	151	3,178
Quebec.....	1,174	7,563	819	10,831
.....	6,004	21,522	5,907	19,571
Totals.....	8,359	50,697	9,525	61,194

617. Taking the fishing area covered by the fishing bounties the following comparative statement is made up :—

## FISHERMEN IN BOUNTY-PAID WATERS.

PROVINCES.	1881.		1894.	
	In Vessels.	In Boats.	In Vessels.	In Boats.
	No.	No.	No.	No.
Quebec.....	951	9,060	409	9,405
Nova Scotia.....	6,004	21,522	5,907	19,571
New Brunswick.....	1,174	7,563	819	10,831
Prince Edward Island.....	76	3,559	151	3,178
Totals.....	8,205	41,704	7,286	42,985

618. These tables show, 1st., that during the years immediately preceding the passing of the Act relating to the bounty there had been a decrease in the number of the fishermen—those engaged in fishing from vessels showing a decrease in 1881 as compared with 1879 of 459, and those engaged in boat-fishing showing a decrease of 1,880—a total decrease of 2,339.

2nd. That both vessel and boat-fishing began to employ a larger number of men after 1881.

3rd. That during 1883-84-85 vessels fishing employed 15·8 per cent of the total number of fishermen, and 1894, 13·4 per cent, showing that boat-fishing is absorbing a large number of the fishermen.

4th. That the increase in the total number of fishermen since 1881 has been 11,663, or 19·7 per cent.

5th. That while the provinces of British Columbia, Ontario, Manitoba and the North-west Territories and New Brunswick have increased the number of their fishermen in 1894 compared with 1881, the provinces of Nova Scotia, Prince Edward Island and Quebec have decreased their number. Nova Scotia by 2,048, Quebec by 1,576, and Prince Edward Island by 306, the increases and decreases being as under :—

PROVINCES.	Increases.	Decreases.
Prince Edward Island.....		306
British Columbia.....	9,757	
Manitoba and North-west Territories.....	1,376	
Ontario.....	1,547	
New Brunswick.....	2,913	
Nova Scotia.....		2,048
Quebec.....		1,576
Totals.....	15,593	3,930

but comparing 1884 with 1883 the number of vessels and boats employed has increased 362, for the bounty-fed fishermen. The other fishermen of Canada have increased their fishermen by 11,311.

PROVINCES.	1883		1884	
	Vessels.	Boats.	Vessels.	Boats.
Nova Scotia .....	42	4	42	4
New Brunswick .....	55	5	55	5
Prince Edward Island .....	—	—	—	—

The comparatively small increase in the number of fishermen in the bounty-fed fishing grounds is possibly due to the employment of new methods of fishing, requiring fewer men, since the catch of fish shows a considerable increase in the period, the initial and final years of which are under comparison; and the exports show an increase of about 11 per cent.

The development of the fisheries is seen in the following statement, showing, by provinces, the value of the vessels, boats, nets, wharves, traps, smoke and fish-houses, piers and wharfs, sailing and steam docks:—

PROVINCES.	1883.	1884.	Increase.
	\$	\$	\$
Nova Scotia .....	2,490,965	3,361,972	871,007
New Brunswick .....	730,343	1,680,912	950,569
Prince Edward Island .....	126,314	468,736	342,422
Quebec .....	733,571	904,811	171,240
Ontario .....	271,049	839,022	567,973
British Columbia .....	768,245	1,984,943	1,216,698
Manitoba .....	—	198,720	198,720
Total .....	5,120,527	9,439,116	4,318,589

This is a total increase of 84.3 per cent during the period. In the same time the fishermen have increased from 62,225 to 70,719, and the vessels and boats from 27,023 to 35,280, and their value from \$2,806,231 to \$3,418,218. The value of the nets has increased from \$1,243,366 in 1883 to \$1,921,352, or over 54 per cent.

620. The yield of the fisheries in 1894 was very nearly five times as much as it was in 1869, and the exports were nearly four times as much as in 1868. The proportion of exports to total value in 1869 was 74 per cent, and in 1894, 53 per cent, indicating that a much larger proportion of the catch is now taken for home consumption, owing in all likelihood to increased facilities for interprovincial distribution.

621. Though the table shows that there has been a considerable increase during the period, yet that increase would have been much larger but for the decline in the catch of some of the principal kinds of fish. In the catch of mackerel, for instance, there has been a most alarming decrease, as the following figures show :—

YEAR.	Total catch.	Annual average.	No. 1 quality.	Annual average.
	Brls.	Brls.	Brls.	Brls.
1850-50.....	1,864,915	185,491	682,637	68,263
1863-72.....	2,454,265	245,426	1,007,345	100,734
1880-89.....	1,618,603	161,860	198,322	19,832
1890-94.....	486,183	97,236	*	*

\*No details.

622. The following tables give the value of the yearly yield of the fisheries by provinces since Confederation :—

Oysters .....	182,108	25,668	
Pickarel .....	283,266	135,856	
All others .....	975,081	110,475	

626. The following table gives the number and value of boats, nets, &c., and the number of men employed in the fisheries in the several provinces in 1894, according to returns furnished by the Fisheries Department. The value of much of the fishing material has necessarily been estimated only, but on the basis of the figures given below the total amount of capital invested in 1894 reached the sum of \$9,439,116. There were 1,178 vessels, of a total tonnage of 41,768 tons, employing 9,525 men. The boats numbered 34,102, with 61,194 men.

PROVINCES.	Vessels and Boats.		Number of Men.	Nets.		Other Fishing Material.
	Number.	Value.		Fathoms.	Value.	
		\$			\$	\$
Nova Scotia .....	14,918	1,647,458	25,478	2,320,728	606,604	1,107,910

1893.	84,043,000	5,910,000	5,106,000	.....	.....	.....	.....	104,714,000
1894.	45,925,000	8,970,000	5,260,000	.....	.....	.....	.....	83,368,000
1895.	82,270,000	90,663,000	52,829,200	55,437,500	6,145,000	55,262,800	33,500,000	125,840,000
Totals.	976,132,200	90,663,000	52,829,200	55,437,500	6,145,000	55,262,800	33,500,000	1,268,971,700

In addition to the 976,132,200 fry distributed from the hatcheries in Ontario, there are large numbers of semi-hatched ova of various kinds annually transferred from the Newcastle establishment to the Eastern Province hatcheries, as well as a large quantity of eyed eggs from the Sandwich nursery to other hatcheries.

630. The following are statistics of the sealing fleet of Canada for the season of 1895, with those of 1894 added for purposes of comparison :—

	1895.	1894.
Total catch .....	173,614	95,048
Distributed thus :—		
British Columbia coast.....	9,853	11,703
Japanese coast.....	18,687	*49,483
Copper Island coast .....	6,281	7,437
Behring Sea.....	35,918	+26,425
Fleet, No. of vessels.....	64	59 (3,806 tons)
Boats.....	210	266
Canoes.....	421	259
Crews, white .....	705	888
"    Indians.....	854	518
Value fur seal skins.....		\$2048,490

Prior to 1878 very few seals were killed by Canadian sealers. Hunting was not carried on further than 20 miles from shore.

The following statement shows the

	Seals killed.
1883.....	9,195
1889.....	35,310
1890.....	43,325
1891.....	52,365
1892.....	49,743
1893.....	70,502
1894.....	95,048
1895.....	73,614

From 1871 to 1895 the total product of the Canadian pelagic sealing industry amounted to 551,540 seal skins.

Total Pacific catch during the season of 1895 :—

Seals landed at Victoria.....	73,614
"    American ports by U.S. schooners.....	20,307
Seal catch on Pribiloff Islands (North American Commercial Co) .....	15,000
"    Copper Islands (Russian Sealskin Co).....	17,320
	126,841

631. The fisheries report of the Department of Marine and Fisheries for 1895 contains a paper, by R. N. Venning, on the fur-sealing industry of the North Pacific Ocean as affected by the Behring Sea award and consequent legislation. Much valuable information is given in this document.

\*Including 490 landed at Victoria by United States schooners.

+ " 86 " "

† " \$3,750 value of fur seal skins landed at Victoria by United States schooners.

|| " 2,255 landed at Victoria by United States schooners.

" 620 catch of " Director " off Falkland Islands.

## CHAPTER XI.

Minerals Classified.—Statistics of Geological Survey.—Mineral Products in 1893.—Exports of Mineral Products.—Countries Receiving the Exports.—Ontario Commission.—Mining Districts.—Coal Areas.—Production of Coal by Provinces.—Exports of Coal.—Imports of Coal.—Consumption of Coal.—The World's Production of Coal.—Iron Ores.—Iron Furnaces.—Bounties.—Production of Iron.—Export of Iron Ore.—Exports of Iron Goods.—Imports of Iron Goods.—Iron Duties.—Imports from Great Britain and United States.—The World's Production of Iron.—Gold Productions of Canada.—The World's Production of Precious Metals.—Coinage of the World.—Copper.—Nickel.—Petroleum.—Natural Gas.—Salt.—Silver.—Phosphate.—Asbestos.—Gypsum.—Building Stone.—Minor Minerals.

632. The mineral wealth of Canada is so great that an American authority has said: "To particularize the undeveloped wealth of this northern land would require volumes." As might be expected from her vast areas and her varied geological formations, Canada is marvelously rich in minerals, the chief of which, of economic importance, according to information derived from the report of the Geological Survey, are classed as follows:—

1. Metals and their ores.
2. Minerals used in certain manufactures.
3. Minerals used in agriculture.
4. Minerals used as pigments.
5. Combustible and carbonaceous materials.
6. Refractory minerals.
7. Minerals applicable to building.
8. Minerals for grinding and polishing.
9. Minerals applicable to the fine arts and jewellery.
10. Minerals applicable to miscellaneous purposes.

633. In the first class are native iron, magnetic iron ore, iron sand, hematite, ilmenite or titaniferous iron ore, limonite (including bog-iron ore), spathic iron ore, clay ironstone, native copper, sulphide of copper, sulphide of zinc, sulphide of lead or galena, native silver, and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, sulphide of bismuth, nickeliferous pyrrhotite.

634. Among materials applicable to certain chemical manufactures and their products are: iron pyrites, pyrrhotine or magnetic iron pyrites, apatite or phosphate of lime, magnesite or carbonate of magnesia, calcite or carbonate of lime, chromic iron, oxides of manganese, &c.

635. Among mineral manures are: gypsum, shell-marl.

636. Among mineral pigments and detergents are: iron ochers, barytes or heavy spar, soap-clay, &c.

637. Minerals used in the production of heat and light are : anthracite and bituminous coal, lignite or brown coal, bituminous shale, petroleum, peat, &c.

638. Refractory minerals are : plumbago, soap stone, pot stone, mica, asbestos, fire-clays, sandstone and pottery clays.

639. Minerals applicable to common and decorative construction are : limestones, dolomites, sandstones, granites and syenite, gneiss, labradorite rock, marbles, serpentines, breccias, slates, flag stones, common lime, hydraulic lime and brick-clays.

640. Materials for grinding and polishing are : stone for making whetstones, hones, bath-brick, tripoli, grindstones and millstones.

641. Among minerals applicable to the fine arts and jewellery are lithographic stone, porphyrites, labradorite, albite, perthite, jasper conglomerate, amethystine quartz, agates, amber and Canadian precious stones.

642. Among miscellaneous materials are : sands for glass-making, moulding sand, carbonaceous shale, artificial stone, salt, brines and mineral waters.

643. According to the last census there were in Canada 3,643,644 persons ten years old and over, and 45.5 per cent or 1,659,355 of these were engaged in gainful occupations ; of this total number 1,856,971 were males of ten years and over, and 1,786,673 were females.

Of those engaged in earning their own living 1,444,407 were males and 214,948 were females. Of the males 1,371,976 were over 15 years and 72,431 were under that age. Of the females 207,603 were over and 7,345 under 15 years.

Of primary producers, viz. : persons engaged in agriculture, mining and fishing, there were 790,210, of whom 777,812 were males and 12,398 females. Of the males 714,518 were over and 63,294 under 15 years old. Of the females 12,373 were over and 25 under 15 years of age.

Those engaged in mining numbered 13,417, in quarrying 1,509, and of officials of mining and quarrying companies there were 242. There were no women engaged in these occupations. Of the miners 294, and of the quarrymen 9 were boys under 15 years of age.

Mining and quarrying engaged only 0.4 per cent of all those engaged in gainful occupations, and 1.9 per cent of the primary producers.

644. By provinces the miners and quarrymen are distributed according to the census of 1891 as under :—

PROVINCES.	Miners.	Quarrymen.
British Columbia .....	4,591	53
Manitoba .....	9	8
New Brunswick .....	97	231
Nova Scotia .....	5,660	86
Ontario .....	1,034	374
Prince Edward Island .....	18	6
Quebec .....	1,534	327
North-west Territories .....	474	22
Total .....	13,417	1,509

British Columbia and Nova Scotia are pre-eminently the mining provinces of the Dominion, over 76 per cent of the miners being reported in these provinces.

In 1881 the census returns showed that there were 6,541 miners and 469 men in the Dominion. Of the miners British Columbia had 2,792; Alberta, 6; New Brunswick, 121; Nova Scotia, 2,728; Ontario, 493; Edward Island, 4; Quebec, 391, and the North-west Territories, 6.

A comparison of the two enumerations shows that the number of miners in the Dominion more than doubled in the ten years, that British Columbia added 1,799 and Nova Scotia 2,932 to the number employed in 1871.

This indicates very considerable growth in the development of the mining industries of the Dominion.

Coal mining has made rapid advance during the past few years. In British Columbia in 1888 the number of men and boys employed was 2,792 and the output of coal 548,017 tons, giving an average of 272 tons per man.

In 1895 the number of men employed was 2,924, and the coal raised was 612 tons, giving an average of 360 tons per man.

In Nova Scotia in 1888 the number of men employed in connection with mining was 4,651, and the number of tons raised was 1,989,263 long tons, giving an average of 428 tons per man.

In 1895 the number of employees had increased to 5,793 persons, and the number of tons to 2,339,954 long tons, giving an average of 404 tons per man in the year.

The Nova Scotian returns, 1888, show that the 4,651 employees had 897,422 days' labour, or an average of 193 days in the year for each employee.

In 1895 the aggregate number of days of labour was 1,408,568, showing an average of 243 days for each employee in the year.

This average is included all persons employed under ground and above and also those employed in construction, these latter numbering 81 in 1888 and 89 in 1895.

In the United States, in the production of bituminous coal, the average working time in 1893 was 204 days. Thus the Nova Scotian coal miners had 39 days more work in the year than the coal miners in the United States.

The census returns for the United States indicate that each man produced per diem 06 short tons in 1893. The Nova Scotian returns indicate that the miner produced 1.70 short tons per diem. The miners in the United States produced, therefore, about 21 per cent more per man per diem than the miners of Nova Scotia.

650. In the chief coal producing countries of the world the average yearly production per man is given as under :—

	* Tons.

It will be seen that almost everything goes either to the United States or to the United Kingdom, the proportions having, in the years named, been respectively 79 per cent, 77 per cent, 80 per cent, 86 per cent, 83 per cent and 87 per cent, and 13 per cent, 15 per cent, 14 per cent, 6 per cent, 5·63 per cent and 6·78 per cent.

658. The Ontario Provincial Government, in 1888, appointed a commission to enquire into the mineral resources of that province and the best modes of developing them. In 1890 the commission published an exhaustive report, from which has been gathered the following description of the mineral wealth of Ontario: In the central and eastern counties are magnetic and hematite iron ores, gold, galena, plumbago, arsenic, mica, fibrous serpentine, apatite, granite, marble and freestone. In the Sudbury district copper and nickel mines are being worked on a large scale. In the township of Denison, rich specimens of gold-bearing quartz and extensive deposits of copper and nickel are found. Along the north shore of Lake Huron, from the mouth of the French River to Sault Ste. Marie, gold and silver-bearing mines, iron, copper, galena and immense quarries of marble have been discovered. North of the Height of Land and extending towards James Bay, prospectors report a promising mineral region. North of Lake Superior, localities of gold, silver, copper, iron, galena, plumbago and zinc ores have been taken up, besides which there are inexhaustible supplies of granite, marble, serpentine and sandstone. West of Port Arthur is a silver district which, judging from the explorations already made, promises to be an argentiferous region of great richness. Beyond this district to the north-west are found veins of gold-bearing quartz and extensive ranges of magnetic iron ore, while to the south-west is believed to be a continuation of the Vermillion iron range of northern Minnesota. The partial examination already made inspires the hope that here will be developed, in time, an iron region of great value. In the region adjacent to the Lake of the Woods gold-bearing veins of good promise have been discovered, and an early development of some of the properties may be looked for. No reference has been made in the foregoing enumeration to the oil deposits of western Ontario, which are of great value.

Cape Breton.	Pictou.	Cumberland.
0 75	1 19	1 46
37 26	29 10	33 65
58 71	60 63	59 3
8 25	9 34	5 76

There is a wonderful similarity between these coals, as shown by analysis, and some notable coals mined in the United States. The analysis, except that it is high in ash, does not differ much from the lsville coal; the Cape Breton is very much like the Pittsburg, and Aberlath like the Westmoreland.

The coal fields of Nova Scotia and Cape Breton are all practically water. Heretofore the shipment of coal by sea in winter has been impossible, resulting in loss from depreciation and in increased cost of storing and shipping. In the broad scheme of improvements under- in Cape Breton by the Dominion Coal Company (Ltd.) a very im- t feature is the construction of a railway from Sydney to Louisburg. ill give the coal of the Sydney fields a harbour the year round, and easy the distribution of coal during the winter season.

There are no coal measures from New Brunswick westward until the province of Manitoba is reached. The coal areas of Manitoba are estimated at 15,000 square miles. They yield lignites only, often of very good quality. Analysis gives the following result :—

Water .. .. .	15.40
Volatile combustible.....	37.97
Fixed carbon.....	41.21
Ash .. .. .	5.36

Analysis of the coal found in the area (50,000 square miles) extending to the base of the Rocky Mountains, from the international boundary to the vicinity of the Peace River—a distance of 500 miles—gives the following result :—

—	Belly River.	Bow River.	Peace River.
Water .. .. .	6.52	12.37	2.10
Volatile combustible.....	31.03	32.33	21.54
Fixed carbon.....	56.54	46.39	71.63
Ash .. .. .	5.91	8.91	4.73

The third coal area is that in the Rocky Mountains. Though small, measured by miles, it contains much coal of the best quality. Several beds of anthracite of excellent quality have been found.

The fourth area is that of the Pacific coast. Dr. George M. Dawson has given the following estimate of its extent :—

	Square Miles.
Nanaimo coal basin (coals) approximately correct .. .. .	200
Comox coal basin (coals) rough approximation .. .. .	700
Queen Charlotte's Island very rough approximation.....	800
Tertiary lignite-bearing rocks in different parts of British Columbia south of the 54th parallel of latitude (very rough approximation) .. .. .	12,000

670. In quality the Vancouver Island bituminous coals are found to be superior for all practical purposes to any coals on the Pacific coast. They rank in San Francisco with the West Hartley coals.

671. In the Comox district the productive measures show ten seams of coal with a total of 29 feet 3 inches, the thickest seam being 10 feet.

672. The character of the coal is evidenced by the following analysis:—

	Slow Coking.	Fast Coking.
Water.....	1·47	1·47
Volatile combustible.....	28·19	32·69
Fixed carbon.....	64·06	59·55
Ash.....	6·29	6·29

673. Anthracite in 3-feet and 6-feet seams, comparing favourably with that from Pennsylvania, has been found in Queen Charlotte's Island.

Samples analysed give the following results:—

	Sample 1.	Sample 2.
Water.....	1·60	7·89
Volatile combustible.....	5·02	4·77
Fixed carbon.....	83·09	85·76
Ash.....	8·76	6·69
Sulphur.....	1·53	0·89

674. The following gives the production of coal in Canada, by provinces, during the last five years, the figures in each year, however, being subject to revision:—

PRODUCTION OF COAL IN CANADA, 1891 to 1895.

PROVINCES.	Tons of 2,000 lbs.				
	1891.	1892.	1893.	1894.	1895.
Nova Scotia.....	2,290,158	2,175,913	* 1,884,638	2,464,262	2,339,964
British Columbia.....	1,152,588	925,495	1,095,689	1,134,507	1,062,415
Manitoba and N. W. Territories.....	180,330	191,139	221,415	268,000	120,318
New Brunswick.....					
Total.....	3,623,076	3,292,547	3,201,742	3,666,769	3,512,500

\*Nine months only.

Following table shows the production and distribution of coal, Nova Scotia, for the year ended 30th September, 1895:—

PRODUCTION AND DISTRIBUTION OF COAL IN NOVA SCOTIA, 1895.

COUNTIES.	Coal Raised.	SOLD FOR		Total Sold.
		Home Consumption.	Export from Province.	
	*Tons.	*Tons.	*Tons.	*Tons.
.....	554,813	142,006	330,869	472,875
.....	466,296	263,193	149,845	413,038
.....	1,305,865	298,073	857,029	1,155,102
.....	12,980	5,734	4,371	10,105
.....	2,339,954	709,006	1,342,114	2,051,120

2,000 lbs.

Comparing these figures with 1888, the increase in quantity raised in the coal basin is about 15 per cent, and in Cape Breton about 40 per cent. "Other counties" did not appear in the statement of 1888. The net gain is in the Cape Breton basin.

In 1895 the proportions were: round, 70·8 per cent; slack, 21·2 per cent, and run of mine, 8·1 per cent. In 1888 the proportions were: round coal, 65·9 per cent; slack, 21·2 per cent, and run of mine, 12·9 per cent. The increase has, therefore, been in the round coal, and in the methods of mining.

Large quantities of "culm" coal accumulated at the several collieries, and came a cause of expense to owners. But with the development of the coal ring this culm has become a source of profit, being in demand where a great degree of heat is required.

Following table shows the production and distribution of coal in Nova Scotia for six years:—

PRODUCTION AND DISTRIBUTION OF COAL IN NOVA SCOTIA, 1890-95.

YEARS.	Coal Raised.	SOLD FOR		Total Sold.
		Home Consumption.	Export from Provinces.	
	*Tons.	*Tons.	*Tons.	*Tons.
.....	2,222,081	674,191	1,326,254	2,000,444
.....	2,290,158	716,505	1,355,433	2,071,938
.....	2,175,914	698,855	1,264,431	1,963,286
.....	1,884,639	524,079	1,140,156	1,664,235

.....	2,339,954	709,006	1,342,114	2,051,120

2,000 lbs. † For 9 months ended 30th Sept. ‡ Year ended 30th Sept.

In British Columbia, the only collieries at present in operation are the Island, and are situated at Nanaimo, Wellington and Union, in number. Shafts are being sunk and prospecting carried on in the Island, between Victoria and the mainland, and also at Kamloops, but the output at present is nil.

The total output in 1895 was 1,052,412 tons of 2,000 pounds, as compared with 1,134,507 tons in 1894, a decrease of 82,095 tons.

678. The following are details of the production and distribution of British Columbian coal:—

COLLIERIES.	Coal Raised.	* Home Consumption.	Sold for for export.	Coal on hand 1st January, 1895.
	† Tons.	† Tons.	† Tons.	† Tons.
Nanaimo.....	378,782	113,287	262,441	4,040
Wellington. ....	377,334	57,214	330,263	25,683
Union.....	296,296	40,456	254,390	13,477
Total .....	1,052,412	210,951	847,094	43,200

\* Including coal used in the collieries.

† Tons of 2,000 pounds.

The coal is bituminous and of a very high quality, commanding a better price at San Francisco than any United States coal. In an analysis published by the State Mineralogist of California, in 1887, the relative values for steam of British Columbian and Washington Territory coal were given as follows: Wellington, 1,047; Nanaimo, 1,335, and Seattle, 1,330.

679. The next table shows the production of coal in the provinces of Nova Scotia and British Columbia in each year since 1874:—

PRODUCTION OF COAL IN NOVA SCOTIA AND BRITISH COLUMBIA,  
1874 TO 1895.

YEAR.	Nova Scotia.	British Columbia.	Total.

s of 2,000 lbs.

† For 9 months only.

‡ Year ended September 30.

680. The development and the direction of the development of the coal trade of Nova Scotia are shown in the next table.

In 1873 the total sales amounted to 984,839 tons of 2,000 pounds, distributed as follows: Sales within the province, 241,130 tons; sales to neighbouring provinces, 378,434 tons; to countries outside of the Dominion, 367,174 tons. In 1883 the total sales were 1,453,126 tons, of which 527,886 tons were within the province, 770,684 tons to neighbouring provinces and 154,655 tons to outside countries. In 1895 the total sales were 2,051,120 tons, of which Nova Scotia took 709,006 tons, the neighbouring provinces 1,246,949 tons and outside countries 95,165 tons. Thus in twenty-three years the total sales have increased 108 per cent; the amount consumed within the province has increased 194 per cent, and the purchases of neighbouring provinces have increased nearly 230 per cent.

These facts indicate the growth of manufacturing in the Province of Nova Scotia and in the other provinces which draw their supply from the Nova Scotian coal fields. They also indicate the development of railway facilities tending to the cheapening of transportation.

In Nova Scotia there are now 64 miles of railways owned by coal and iron mines. These employ 31 locomotives and require an equipment of 1,697 waggons. These railways, inasmuch as they do not carry passengers, are not included in the railway mileage of Canada.

NOVA SCOTIA COAL SALES (IN TONS OF 2,000 LBS.) DURING THE YEARS ENDED 31st DECEMBER, 1868-95.

YEAR.	SALES.					ANALYSIS OF SALES TO NEIGHBOURING PROVINCES.

\* Tons of 2,000 lbs.

882. With the exception of the small quantity annually raised in New Brunswick, particulars of which for any number of years are not available the average annual quantity is said to be about 4,000 chaldrons, say 5,040 tons, and of the amount given below as having been produced in the Northwest, the above tables (referring specially to paragraph 679), to all intent, represent the coal production of Canada during the period named.

883. The following figures give the output of coal in the North-west during the last eight years :—

	Tons of 2,000 lbs.
1887 .....	74,152
1888 .....	115,124
1889 .....	97,364
1890 .....	128,953
1891 .....	*165,086
1892 .....	*131,000
1893 .....	†213,015
1894 .....	†250,000
Total .....	1,174,694

Alberta Railway and Coal Co. only.

Of this amount 65,000 tons is anthracite.

# STATISTICAL YEAR-BOOK.

The following statement gives the quantities of coal, being the produce of the coal-fields of Nova Scotia, British Columbia and New Brunswick, from the years 1868 to 1895, inclusive :—

THE COAL OF NOVA SCOTIA, BRITISH COLUMBIA AND NEW BRUNSWICK, 1868-95. Tons of 2,000 lbs.

	Nova Scotia.	British Columbia.	New Brunswick.	Total.
Tons.	Tons.	Tons.	Tons.	
1868	232,760		12,575	250,335
1869	481,968		8,175	490,143
1870	287,149		5,425	292,574
1871	311,116		6,992	318,108
1872	322,747	26,761	2,469	351,977
1873	344,899	33,786	6,013	404,698
1874	390,184	50,671	6,627	447,482
1875	421,836	59,355	5,616	486,807
1876	470,517	101,908	5,147	577,572
1877	440,210	102,830	6,237	549,277
1878	553,443	145,542	9,130	708,115
1879	534,017	173,789	7,803	715,609
1880	582,796	204,525	7,206	794,527
1881	640,551	214,243	14,794	869,588
1882	698,905	210,556	13,465	922,926
1883	716,805	193,485	17,670	927,960
1884	713,144	218,856	10,744	942,744
1885	701,949	275,621	1,099	978,669
1886	722,991	258,671	555	982,217
1887	730,788	325,034	156	1,055,978
1888	768,913	350,048	1,202	1,119,163
1889	776,186	452,625		1,228,811
1890	765,630	500,534	710	1,266,874
1891	773,105	647,508	37	1,420,650
1892	710,934	695,560	1,761	1,408,255
1893	1,89,685	669,792	5,582	855,059
1894	240,054	716,304	3,227	959,485
1895	276,203	793,965	805	1,070,973
Total	6,805,405	7,421,969	161,222	13,378,596

When the quantities are divided into five-year periods the following result is obtained :

Average yearly export.

1868-72	326,427
1873-77	327,371
1878-82	368,153
1883-87	471,513
1888-92	722,950
1893-95	965,516

The export trade is clearly marked. It has been increasing steadily in late years, rapid; and in the last year it was four times that of the first year (1868).

683. The following table gives the imports of coal by Canada since Confederation :—

IMPORTS OF ANTHRACITE AND BITUMINOUS COAL (FOR HOME CONSUMPTION) INTO CANADA DURING THE YEARS FROM 1868 TO 1895.

(Tons of 2,000 lbs.)

YEAR.	COAL ANTHRACITE.				COAL BITUMINOUS.

\* Coal and coke, all kinds. † Imports of coal into Ontario, Quebec and Nova Scotia only. ‡ Anthracite coal dust included.

686. The following table gives the imports of coal for home consumption into the several provinces during the last eight years, the figures being taken from the Trade and Navigation Returns. It must not be forgotten that these figures are made up from the import entries only of each province, and that they do not pretend to represent the consumption of each province.

having been 53·2 per cent, while the increase in the 1876-79 period, compared with the 1872-75 period, was only 21·7 per cent. The increase has been highly satisfactory in other periods, that of 1884-87 having been 44 per cent over 1880-83, and that of 1888-91 also 44 per cent over 1884-87.

The details of 1894 are as follows, and are for the calendar year, inasmuch as some of the provinces bring their statistics to correspond with the calendar year :—

Production—	
Nova Scotia.....	2,501,406
British Columbia.....	1,134,507
Manitoba.....	10,000
North-west Territories.....	250,000
New Brunswick.....	8,000
Total production.....	3,903,913
Exported, calendar year .....	1,108,440
Balance for home consumption .....	2,795,473
Imported—	
Bituminous.....	1,435,303
Anthracite.....	1,469,327
Coal dust, n.e.s.....	155,827
	3,061,057
Coke .....	61,971
	3,123,028
Re-exported.....	89,786
Balance for home consumption.....	3,033,242
Total required for home consumption.....	5,828,715

The amount of home production exported (1,108,440 tons) being deducted from the net import (3,033,242 tons), the result (1,924,802 tons) represents the extent to which we were, in 1894, dependent, not from necessity but as a matter of convenience, on outside countries for our coal supply.

688. The consumption of coal *per capita* in the principal coal producing countries of the world is as under :—

	Tons.
The United Kingdom.....	3·40
Belgium .....	2·45
United States.....	2·25
Germany.....	1·50
Canada.....	1·10
France.....	0·75
Austria-Hungary.....	0·40
Russia.....	0·10

689. Canada's advance in the consumption of coal is remarkable, increasing from a little over a third of a ton in 1873 to nearly three-quarters of a ton in 1883, and to 1·10 ton in 1893, or about 200 per cent in 1893, as compared with 1873, a growth corresponding in percentage to that of the United States in the same period.

690. No comparisons can be made with other countries, because in both Canada and the United States a factor exists which is not found in other

countries, or if found has comparatively little influence. That factor is the wood supply, which, as the forests recede from settlement, is less drawn on, coal taking its place. The development in the consumption of coal in other countries may fairly enough be taken to mark the development of manufacturing interests. In Canada and the United States the coal indicator evidences two things, (a) the substitution of coal for wood, (b) the development of industries.

691. The following table shows the coal produced by the principal countries of the world, according to the latest available figures, in tons of 2,000 pounds :—

COUNTRIES.	Year.	Tons.
British Empire—		
Great Britain.....	1894	210,870,828
Australia.....	1892-93	4,840,286
Canada (calendar year).....	1894	3,903,913
Cape and Natal.....	1893	266,945
India (British).....	1894	2,820,632
Total British.....		222,702,634
Austria-Hungary.....	1893	*33,555,133
Belgium.....	1894	22,545,630
France.....	1894	†29,806,222
Germany and Luxembourg.....	1894	108,961,467
Italy.....	1893	349,610
Japan.....	1893	3,500,000
Russia.....	1893	8,181,600
Spain.....	1893	1,688,820
Sweden.....	1892	223,305
United States of America.....	1894	‡169,960,781
Other countries.....		12,000,000
Grand total.....		613,475,802

\* Includes brown coal and lignite. † Includes lignite. ‡ Lignite.

The British Empire contributes 36·3 per cent of the whole output, and the United States of America 27·7, leaving 36 per cent for the production of the other countries.

692. Closely associated with recent efforts to develop trade between Canada and the other colonies of the Empire is the coal capacity of the Colonies. Canada can produce coal, practically, to an unlimited extent. The carboniferous rocks of New South Wales cover an area of 24,000 square miles; so that the coal fields of this colony are among the most extensive in the world. In the adjoining Colony of Queensland the carboniferous rocks cover an area of 14,000 square miles, and the coal formerly extensive and of great prospective value. In Western extensive deposits have been found, and in Tasmania the deposits

Thus by the Canadian route a steamer leaving Liverpool finds coal at Louisburg. Goods are transported across Canada by rail; and water becomes the medium at Vancouver, where coal is close at hand in great abundance and of good quality.

At Sydney, Australia, the steamer reaches a third coal field that challenges comparison, for excellence or economy, with either of the others.

In South Africa the coal bed is extensive and the seams are from 12 feet to 14 feet thick.

#### IRON.

693. The iron ores of the Dominion have a wide range, both geographically and geologically. From Vancouver Island in the west to Cape Breton Island in the east they occur at varied intervals. Sir William Fairbairn, in "Iron, its History, Properties and Processes of Manufacture," says: "In the Mineral and Geological Department of the Exhibition of 1862 were exhibited striking specimens of iron ore from the colonies, among which was the remarkable collection from Canada, consisting of oxide, red hematite and bog ores. The thickness of some of the beds from which the specimens were taken is worthy of notice. In Nova Scotia some of the richest ores yet discovered occur in boundless abundance. The iron manufactured from them is of the very best quality, and is equal to the finest Swedish metal." In the same province the iron ore, the coal and the flux lie in close contiguity to each other and are within a comparatively short distance from fine ship harbours, making that province one of the best regions in the world for the seat of iron and steel ship-building on a large scale.

694. Magnetic ores occur abundantly throughout several counties of Ontario. An important deposit in the Township of South Crosby has been worked for years. A very fine and valuable ore exists as a large deposit in North Crosby. The contiguous townships of Madoc, Marmora, Belmont and Seymour contain several beds of magnetic iron ore. In the region west of Lake Superior, the Province of Ontario has a country rich in iron ore. In the Province of Quebec there are large and valuable deposits of magnetic ore. In the County of Beauce a bed of granular iron ore, about two-thirds magnetic, with a vein of 45 feet wide, occurs in serpentine.

695. Hematite iron ores are found in all parts of Canada. One of the most valuable deposits in Quebec province is near Hull—opposite Ottawa—a specular ore, assaying from 64 to 68 per cent of metallic iron. In New Brunswick large deposits of hematite ore are found near Woodstock. Limonite and bog ores are widely distributed.

696. Chromic Iron.—During the year large deposits of chromic iron were found in Coleraine, Province of Quebec. The ore averaged over 50 per cent of metal, is easily mined and finds a ready market in the United States.

Of the best qualities of chromic iron the manufacturers of Pennsylvania and Baltimore consume annually from 4,000 to 6,000 tons. The total production in the United States in 1894 was 2,653 tons and the importation 3,200 tons; the latter mostly from Asia Minor. The output from the Coleraine mines, Canada, in 1894, was about 1,700 tons. Chromic steel is manufactured in the United States for armour plates, shells, safes, &c. Chrome iron is largely used in the manufacture of bichromates of potassium and sodium, which products constitute the base of the chrome yellow, orange and green colour.

697. In 1893 there were five blast furnaces in operation in Canada—three in Nova Scotia and two in Quebec.

698. For the purpose of stimulating the iron industry the Dominion Parliament, in 1883, authorized the payment of a bounty of \$1.50 a ton upon all pig-iron manufactured in Canada. This bounty was continued until 1st July, 1889, when the rate was made \$1 a ton. A further change was made on 1st July, 1892, when the rate was increased to \$2 a ton until 1st July, 1897.

In the Session of 1894 an Act was passed providing that the Governor in Council may authorize the payment of a bounty of \$2 per ton on all pig-iron made in Canada from Canadian ore, a bounty of \$2 per ton on all puddled bars made in Canada from Canadian pig-iron made from Canadian ore, and a bounty of \$2 per ton on all steel billets manufactured in Canada from Canadian pig-iron, and such other ingredients as are necessary and usual in the manufacture of steel billets. These bounties are applicable till 26th March, 1899, in the case of furnaces in operation on the 27th March, 1894, and in the case of furnaces commencing operations subsequently to that date, but before 27th March, 1899, for five years from the date of commencing.

699. The Legislature of Ontario passed an Act in the Session of 1894 appropriating the sum of \$125,000 to be known as the Iron Mining Fund. Out of this fund the treasurer is authorized to pay \$1 per ton of pig-metal product of iron ores raised or mined and smelted in the Province of Ontario, the amount so paid not to exceed in any one year \$25,000.

None of the other provinces has done anything for the encouragement of their iron industry.

700. Under the operation of the bounty given by the Federal Parliament the production of pig-iron has increased from 29,593 tons in 1884 to 62,522 tons in 1894.

The following table gives 1st, the production in Canada of pig-iron; 2nd, importation of pig-iron, iron kentledge and cast scrap-iron for option—the two columns making up the total consumption—

3rd, the percentage of home manufactured pig in the total consumption:—

YEAR ENDED JUNE 30TH.	Production.	Imports.	Total Consumption.	Per cent of Home produced to total consumed.
	*Tons.	*Tons.	*Tons.	
1884-5-6.....	29,593	†52,184	81,777	36·2
1885-6-7.....	25,770	†43,398	69,168	37·2
1886-7-8.....	26,180	†45,648	71,828	36·4
1887-8-9.....	39,717	50,214	89,931	44·2
1888-9-10.....	22,209	48,973	71,182	31·2
1889-1-2.....	24,823	72,115	96,938	25·6
1890-3-4.....	25,697	87,613	113,310	22·7
1891-4-5.....	20,153	81,317	101,470	19·8
1892-5-6.....	30,294	68,918	99,212	30·5
1893-6-7.....	46,948	63,522	110,470	42·5
1894-7-8.....	62,522	45,790	108,312	57·7
1895-8-9.....	31,692	35,060	66,752	47·5

\*2,000 lbs. † Cast scrap-iron not included.

The total consumption by three-year periods was:—

	Tons.	Yearly average. Tons.
1884-5-6.....	222,773	74,260
1887-8-9.....	258,051	86,017
1890-1-2.....	313,992	104,664
1893-4-5.....	285,534	95,178

These figures show 1st, that there is a very considerable growth in the use of pig-iron, the increase in the three years, 1893-95, over the three years, 1884-86, having been 28·2 per cent; 2nd, that while there has been an increasing demand for pig-iron, iron kentledge and cast scrap-iron, an increasing proportion of the whole is pig-iron made in Canada.

701. Following are the amounts which have been paid under the Federal Parliamentary authorization:—

YEAR.	Amount.	Bounty per ton.	YEAR.	Amount.	Bounty per ton.
	\$	8 cts.		\$	8 cts.
1884.....	44,090	1 50	1890.....	25,697	1 00
1885.....	38,655	1 50	1891.....	20,153	1 00
1886.....	39,270	1 50	1892.....	30,294	1 00
1887.....	59,576	1 50	1893.....	93,896	2 00
1888.....	33,314	1 50	1894.....	125,044	2 00
1889.....	37,234	1 50	1895.....	63,384	2 00

702. Under the Ontario Act mentioned in paragraph 699, the Hamilton Iron and Steel Company began operations on 1st February, 1896, and to the 2nd April, 1896, had used 5,291 tons of Canadian ore and 2,785 tons of United States ore. From the Canadian ore they made 2,630 gross tons of pig-iron, and from the United States ore 1,146 gross tons of pig-iron.

703. The total production of iron ore in Canada in 1890 was 76,511 tons, valued at the mines at \$155,380. In 1891 the quantity produced was 68,979 tons, valued at \$152,005; in 1892, 103,248 tons, valued at \$254,206; in 1893, 124,702 tons, valued at \$298,018; in 1894, 109,991 tons, valued at \$226,611. In Nova Scotia, the quantity produced in 1891 was 57,311 tons; in 1892, 75,000 tons; for the nine months ended 30th September, 1893, 66,837 tons; in 1894, 83,512 tons, and in 1895, 79,636 tons. The quantity of pig-iron made in 1890 was 21,772, valued at \$331,688; in 1891, 23,891 tons, valued at \$368,901; in 1892, 42,443 tons, valued at \$637,421; in 1893, 55,947 tons, valued at \$790,283, and in 1894, 49,967 tons, valued at \$646,447.

The quantity of steel produced in Canada during the fiscal year ended 30th June, 1894, was 17,032 net tons.

With the mileage of railways the country has, and with the increase in that mileage which each year will bring, there is reasonable ground for the belief that this country can enter upon the manufacture of steel with good prospects of ultimate success. During the past 16 years no less than 11,784 miles of railway in Canada have been laid with steel rails. At 100 tons to the mile this would give 1,178,400 tons of steel rails imported.

704. The following table gives the quantity and value of iron ore exported from Canada since 1867:—

YEAR ENDED 30TH JUNE.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1868.....	25,312	54,723	1882.....	43,835	135,465
1869.....	27,848	60,298	1883.....	44,944	138,775
1870.....	15,232	34,927	1884.....	25,308	65,548

manufactures.....	28,385	33,968	59,087	64,690	53,406	42,050
machines and y.....	143,815	137,900	97,031	151,954	93,316	119,253
.....	294,728	257,461	243,762	316,124	295,924	308,711

iron valued at \$6,202 included.

the value of the imports of iron and steel and manufactures of the Canada in 1892 was \$12,625,422, and the duty collected on the 792,088; in 1893, value was \$13,199,523, duty, \$2,878,369; in 1894, \$11,310,771, duty, \$2,456,685; in 1895, value, \$9,249,749, duty, \$2,447,675.

to still further to aid in the development of the iron and steel in the Dominion Parliament adopted, in 1887, a Customs tariff to accomplish that end.

total imports of iron and steel during the five years, 1882-86, immediately preceding the iron tariff were \$75,251,232, and during the five years 1889-93, they were \$70,972,717, a decrease during the last period of 5. Analysis, according to the degree of labour required in the manufacture of these imports, can be made by dividing them into classes.

The following table shows the imports from Great Britain and the United States separately :—

	5 YEAR PERIODS.		FOR THE YEARS

708. 1st. Interchangeable mechanism, the manufacture of which requires the highest skill and workmanship. (This class includes sewing machines, fire-arms, locomotive engines, and agricultural implements.)

2nd. Hardware, cutlery and edged tools.

3rd. Machinery.

4th. Castings and forgings.

5th. Rails and railway supplies.

6th. Other forms of iron and steel.

7th. Pig-iron.

Classes 6 and 7 include (1st) pig-iron, the basis of the iron and steel industries, and (2nd) other forms of iron and steel in the making of which skilled labour enters to a limited extent. They constitute the raw material entering into the manufacture of iron and steel articles by Canadian workmen, and are (in addition to pig-iron) bar-iron, rolled or hammered, boiler plate, steel bloom ends, rolled-iron for horse-shoe nails, steel for skates, files or saws, wrought scrap-iron, &c., and parts of articles in other respects manufactured in Canada.

709. Taking the above division and applying it to our imports from Great Britain and the United States, from which two countries came, in the two

riods under consideration, 98 per cent and 95 per cent, respectively, of the whole import, we obtain the following results:—

Interchangeable mechanism—	
Imports from G. B. and U.S., 1882-86	\$ 5,369,861
"    "    "    1889-93	2,857,637
Decrease	\$ 2,512,224
Hardware, cutlery and edged tools—	
Imports from G. B. and U.S., 1882-86	\$13,094,440
"    "    "    1889-93	11,915,967
Decrease	\$ 1,178,473
Machinery—	
Imports from G. B. and U.S., 1882-86	\$10,130,588
"    "    "    1889-93	8,393,159
Decrease	\$ 1,737,429
Castings and forgings—	
Imports from G. B. and U.S., 1882-86	\$ 3,214,366
"    "    "    1889-93	1,676,382
Decrease	\$ 1,537,984
Rails and railway supplies—	
Imports from G. B. and U.S., 1882-86	\$15,733,927
"    "    "    1889-93	12,194,419
Decrease	\$ 3,539,508
Other forms of iron and steel—	
Imports from G. B. and U.S., 1882-86	\$22,719,719
"    "    "    1889-93	28,225,739
Increase	\$ 5,506,020
Pig-iron, and probably including scrap—	
Imports from G. B. and U.S., 1882-86	\$ 4,045,587
"    "    "    1889-93	4,738,946
Increase	\$ 693,359

Changes were made in the iron and steel tariff in the Session of 1894.

710. The following is a statement in continuation of the above for the years ended 30th June, 1894 and 1895:—

#### IMPORTS FROM GREAT BRITAIN AND UNITED STATES.

Interchangeable mechanism, average 5 years, 1889-93		\$ 571,527
"    "    "    1894		472,910
"    "    "    1895		605,806
Hardware, cutlery and edged tools, average 5 years, 1889-93		2,383,183
"    "    "    1894		1,759,882
"    "    "    1895		1,548,061
Machinery average 5 years, 1889-93		1,678,632
"    "    "    1894		1,571,879
"    "    "    1895		1,443,005
Castings and forgings, average 5 years, 1889-93		335,276
"    "    "    1894		216,752
"    "    "    1895		271,637
Rails and railway supplies, average 5 years, 1889-93		2,438,884
"    "    "    1894		2,144,871
"    "    "    1895		990,131
Other forms of iron and steel, average 5 years, 1889-93		5,645,148
"    "    "    1894		4,132,409
"    "    "    1895		3,786,735
Pig-iron, average 5 years, 1889-93		947,800
"    "    "    1894		511,051
"    "    "    1895		375,003

With one exception all the classes were imported in a decreased proportion from Great Britain, as compared with the United States, during the periods 1889-93 and 1882-86. In 1895 railway supplies and rails and machinery were imported in an increased proportion from Great Britain.

711. Taking totals, and from all countries, we have :—

			Yearly Average.	1894.	1895.
			\$	\$	\$
Total imports, home consumption,	1882-86	\$75,251,232	15,050,246	11,493,120	9,522,357
"	1889-93	70,972,717	14,194,543		
Imports from Great Britain	1882-86	44,125,291	8,825,058	5,514,340	3,340,838
"	1889-93	39,718,373	7,943,274		
" United States	1882-86	29,683,187	5,956,637	5,295,415	5,680,539
"	1889-93	28,162,406	5,632,481		
" other countries	1882-86	1,442,754	288,551	683,365	500,950
"	1889-93	3,091,938	618,387		
Proportion from Great Britain	1882-86	58.6 p.c.	.....	48.0 p.c.	35.1 p.c.
"	1889-93	56.0 "	.....		
" United States	1882-86	39.4 "	.....	46.1 "	59.6 "
"	1889-93	39.6 "	.....		
" other countries	1882-86	2.0 "	.....	5.9 "	5.3 "
"	1889-93	4.4 "	.....		

During the year 1895 the imports from Great Britain decreased in value by \$4,602,436 as compared with the average of the 5-year period, 1889-93, those from the United States increased by \$48,058, while those from other countries decreased by \$117,437.

The total imports of iron and steel, and manufactures of, fell off by \$4,672,216 as compared with the average of the 5 years, 1889-93.

712. Comparing the imports of 1895 and 1894, dividing them into dutiable and free and assorting them into two classes, those coming from other portions of the British Empire and those coming from all other countries, we have the following :—

#### IRON AND STEEL IMPORTS.

		1894.	1895.
		\$	\$
From British Empire—			
Dutiable .....		3,528,164	2,132,300
Free .....		2,005,945	1,177,860
Total .....		5,534,109	3,310,160
Duty paid .....		895,717	439,810
Per cent of duty on total .....		16.4	13.3
Proportion of dutiable .....		63.7	64.4
Free .....		36.3	35.6
From all other countries—			
Dutiable .....		5,248,369	5,273,653
Free .....		528,293	663,860
Total .....		5,776,662	5,937,513
Duty paid .....		1,560,969	1,507,864
Per cent of duty on total .....		29.7	28.6
Proportion of dutiable .....		90.8	88.8
Free .....		9.2	11.2

This statement shows, 1st, that the proportion of dutiable goods was less in 1895 than in 1894 in the imports from other parts of the Empire, and more in the case of imports from other countries; 2nd, that the duty imposed in 1895 was lower than in 1894 on goods coming from within the Empire and higher on goods coming from outside countries.

713. Other countries have, to a considerable extent, increased their exports to Canada, as the following statement shows:—

IMPORTS FROM COUNTRIES OTHER THAN GREAT BRITAIN AND UNITED STATES.

—	1886.	1893.	1894.	1895.
	\$	\$	\$	\$
Interchangeable mechanism.....	15,109	24,559	33,892	27,158
Hardware, cutlery and edged tools.....	149,734	205,690	252,887	162,105
Machinery.....	5,452	64,557	24,909	85,260
Castings and forgings.....	2,504	413	327	555
Rails and railway supplies.....	45,388	54,549	82,464	21,460
Other forms of iron and steel.....	131,563	275,229	288,279	203,637
Pig-iron.....	2,067	359	607	774
Total.....	351,817	625,356	683,365	500,949

714. The following table gives the world's production of pig-iron and steel, principally in 1894, in tons of 2,000 pounds:—

THE WORLD'S PRODUCTION OF IRON AND STEEL.

COUNTRIES.	Year.	Pig-iron.	Steel.
		Tons.	Tons.
Great Britain.....	1894	8,248,514	3,415,622
United States.....	1894	7,456,834	4,941,475
Canada.....	1894	49,967	28,767
Germany.....	1894	6,126,374	3,990,342
Luxembourg.....	1894	231,471	383,703
Belgium.....	1894	893,662	437,399
Austria-Hungary.....	1893	1,082,673	615,571
Russia.....	1893	1,258,880	529,760
Sweden.....	1893	508,841	187,610
Spain.....	1894	286,520	86,410
Italy.....	1893	8,860	78,660
Other countries.....	1894	88,160	5,510
		26,240,756	14,700,889

Great Britain, Germany and the United States together manufacture 34,179,161 tons of the total of 41,011,645 tons. Great Britain heads the list in the manufacture of pig-iron, and stands second in the manufacture of steel.

Great Britain's production of steel as given above was exceeded in 1887, 1888, 1889 and 1890. The United States' production as above given was exceeded in 1892.

The year 1894 was the year of largest production Germany has ever had.

The efforts to develop the iron and steel industry in Germany and in the United States have been remarkably successful.

The world's production of pig-iron has increased from 14,119,263 tons in 1878 to over 26,000,000 tons in 1894, an increase of over 86 per cent, and the production of steel, which was 3,021,093 tons in 1878, has increased in a much greater ratio.

#### GOLD.

715. Gold is found in many parts of Canada. Practically, however, its production is limited to the provinces of British Columbia and Nova Scotia. In the latter province in 1895 there were 37 mines yielding 22,112 ounces of gold from 58,082 tons of quartz crushed. From 1862 to 1895 (both years included) the yield has been 602,268 ounces from 887,491 tons of stone crushed, which is equal to an average of  $13\frac{1}{2}$  dwt. per ton of 2,000 pounds. During this period the highest yield was 1 oz. 2 dwt. per ton, and the lowest 10 dwt. 4 grains.

716. The gold bearing quartz lodes of Nova Scotia occur in the Cambrian or Cambro-silurian measures, and belong chiefly to the class of "bedded" lodes, from which by far the greater bulk of the gold produced has come. The regular lodes vary from 2 to 30 inches in width; the average width may be taken to be from 6 to 12 inches. The richness of these lodes varies, running from \$3 to \$16 a ton. The general average for twenty-nine years is about \$14.50 a ton. There are 35 localities in the province in which workable deposits of gold have been found, and from three thousand to four thousand persons are dependent to a great extent or entirely upon the industry. The area of the gold measures in Nova Scotia has been estimated variously from five thousand to seven thousand square miles, or from one-fifth to one-third of the area of the province; yet the actual area, from which the gold thus far obtained has been won, is less than 40 square miles. Taking the total value of the gold as \$11,000,000, in round numbers, each square mile of surface upon which paying gold lodes have been found has yielded over \$8,000 a year for each year since the discovery of gold in the province.

717. Gold was first discovered in British Columbia in 1851, but was little sought till 1857, when four or five Canadians and half-breeds crossed over the Thompson River and succeeded in finding workable placers at Nicomen on that river. British Columbia, since 1858, has produced \$54,985,608 as early as can be ascertained, but as only an estimate can be made of the quantity carried away by private individuals, the actual amount is larger.

production of gold in Canada in the years 1891 to 1895 was as

## PRODUCTION OF GOLD IN CANADA.

PROVINCES.	VALUE.				
	1891.	1892.	1893.	1894.	1895.

months only.

—1 oz. of gold estimated at \$19.50 per oz.

Production of gold in the Province of Quebec has been regular since  
1862, but no figures are available until 1877, since which date the value of  
gold produced has amounted to \$260,905.

720.—THE FOLLOWING TABLE GIVES THE VALUE OF THE WORLD'S PRODUCTION OF THE PRECIOUS METALS FOR THE YEARS 1891-94.

(The figures for 1891, 1892 and 1893 are chiefly taken from the United States Treasury Report for 1894. The figures for 1894 are from a variety of sources.)

The British Empire, Russia and the United States supplied between them nearly 157 million dollars worth of gold in 1894. In 1891 these three countries supplied 110 million dollars. The increase in their supply has been 47 million dollars, or about five million dollars more than the British Empire supplied *in toto* in 1891. Of that increase the British Empire supplied 37 million. The development of gold in the British Empire has been an immensely powerful factor during the past four or five years in the controversy between mono-metallists and bi-metallists, depriving the latter of one strong argument, viz., that the supply of the yellow metal was not keeping pace with the world's requirements. Whether the white man with the yellow metal or the yellow man with the white metal will eventually take the lead may be a moot question, but the increased production of gold in the British Empire has certainly not strengthened the bi-metallistic side of the argument.

721. The world's annual production of gold is variously estimated. For 1894 the Director of the United States Mint gives it at 8,780,518 ounces of the value of \$181,510,100, against \$158,836,000 for 1893. Muhleman gives it for 1893 at \$155,522,000. The total monetary stock of gold in the world is estimated at \$4,745,000,000, and the average annual consumption of gold used in arts and manufactures is placed at about \$60,000,000.

722. The British Empire is rapidly becoming the leading country in the world in the production of gold. The Australian gold yield of 1894 is given as under:—

	Ounces.
Victoria.....	673,680
Queensland.....	675,000
New South Wales.....	324,787
New Zealand.....	221,533
Western Australia.....	207,131
Tasmania.....	57,873
South Australia.....	35,844
Total.....	2,195,848

The gold production of the Witwatersrand district, in the Transvaal, from which nine-tenths of the South African production is drawn, is as follows:

	Ounces.
1891.....	729,238
1892.....	1,210,868
1893.....	1,478,477
1894.....	2,035,970

Canada contributes 53,000 ounces; British Guiana contributes 129,671 ounces.

The Mysore gold field of India reports for 1894 an output of 209,714 ounces.

Allowing 10,286 ounces for the production of the other parts of India and 203,597 ounces for the remainder of the British possessions in Africa, the total production of the British Empire is 4,838,100 ounces.

Hon. R. E. Preston, the Director of the United States Mint, estimates the world's production of gold for the calendar year, 1894, at 8,780,518 ounces. Of this the British Empire contributed 4,838,100 ounces, leaving the other countries to contribute 3,942,418 ounces. The proportions, therefore, are:—

	Per cent.
British Empire.....	55.1
Other countries.....	44.9

A striking feature is the advance of South Africa to the front rank of gold producers. As shown above the Witwatersrand district has increased output of gold in three years by nearly three times, and has come within a little distance of the total output of Australia.

For the purpose of reference the production of gold and silver in the United States is given by countries in millions of dollars.

.....	59	41	24	16	141
.....	65	47	22	28	162
.....	70	50	26	28	174
.....	75	45	21	36	177
.....	82	51	24	41	198
.....	77	57	25	49	208
.....	64	61	42	47	214

Countries showing the greatest increases in silver production in 1894 were, Peru, \$10,800,000; Mexico, \$3,500,000; Chili, \$2,000,000; Greece, \$1,400,000.

The value of silver in the above table is the coining rate. The commercial value is much below the figures given, being less than half. For 1894 it was 63 cents per ounce, a decrease from 1893 of  $15\frac{2}{3}$  cents.

The production of silver in 1894 is given at 5,205,065 kilos, and in 1893 at 5,339,746 kilos. The decline in production was 134,681 kilos.

The decrease in quantity was 2.6 per cent, and in price 20 per cent.

The increase in the production of gold was over 13 per cent. The weight ratio in 1894 was 17.9 silver to 1 gold, while it required over 32 per cent of silver to equal 1 per cent of gold in value. In 1893 the weight ratio was 20.9 per cent silver to 1 gold, while it required  $26\frac{1}{2}$  silver to equal 1 per cent gold in value.

#### COPPER.

724. Copper occurs in Canada in the forms of native or metallic copper and the sulphuretted ores. The former is confined principally to the rocks of the upper copper-bearing series on Lake Superior. The latter are widely diffused. In Ontario, on the north-eastern shores of Lake Huron, extensive veins of rich copper ores have been mined for years. On Lake Superior the native copper, which has been so extensively and profitably worked on the Michigan shore, exists in large quantities along the Canadian shore. In Quebec and the other eastern provinces deposits of copper have been found. In British Columbia masses of native copper have been found in various parts of the province. The largest deposits are found in the neighbourhood of Sudbury, in Ontario. The development which has taken place in the Sudbury production of copper is to be seen in the returns for the past three years. In the two years, 1892 and 1893, the yearly average of the output was 1,684 tons. In 1894 the output was 2,748 tons, showing an increase of 1,064 tons.

Recent experiments with a compound of aluminum, nickel and copper indicate that this compound resists the action of salt water better than any other and suggest an enlarged use of these metals in connection with shipping. In the event of further experiments confirming the preliminary ones, the nickel and copper matte of Sudbury will be in much greater demand than in the past.

#### PRODUCTION OF COPPER IN CANADA.

	Pounds.	Value
1890.....	6,013,671	\$ 902,000

1881.....			19,802	150,412	1895.....	1,722	222,057	*	*

\*Included in copper, fine.

In 1895 Ontario exported 1,281,333 pounds, Quebec 417,674 pounds, and British Columbia 1,744,451 pounds.

726. The *Bulletin du Musée Commercial* gives the world's production and consumption of copper as follows :—

	1892.	1893.
	Tons.	Tons.
Production.....	315,000	312,000
Consumption.....	327,000	319,000
Excess of consumption.....	12,000	7,000

The product of copper in Canada is, it will be seen, very small, but there are indications that the output will soon be materially increased; the copper is there, and considerable capital has lately been attracted to its development. Further, cheaper and more effective methods for separating the copper and the nickel from each other have been adopted in the Sudbary district, which will doubtless result in a large increase in the output.

## NICKEL.

In 1883 the first discovery of a deposit of nickeliferous pyrrhotite was made while the Canadian Pacific Railway Company was making a cutting through a small hill near Sudbury, in the District of Algoma, Ontario, and since then, though the first discoveries were very much exaggerated, about twenty promising deposits have been discovered in the district, and there is no doubt that this ore is present in large quantities. Operations at present are principally carried on by four companies, viz.: The Canadian Copper Company, H. H. Vivian & Co., the Dominion Mineral Company and the Drury Nickel Company. The ore, which contains on the average about 2.25 per cent of nickel, is roasted and smelted into a copper-nickel matte, the usual composition of which, from average analysis, is about as follows: Copper, 26.91; nickel, 14.14; iron, 31.335; sulphur, 26.95, and cobalt, .935. The matte is also said to contain some ounces of platinum to the ton. The amount of fine nickel in the matte produced at and shipped from the Sudbury mines in 1891 was 4,626,627 pounds; in 1892 the quantity was 2,413,717 pounds; in 1893, 3,982,982 pounds; 1894, 4,907,430, and in 1895, 3,888,525 pounds. The world's annual consumption of nickel has been estimated at about 800 tons, and, previous to these discoveries, the supply came almost entirely from the French colony of New Caledonia.

727. The world's total production of metallic nickel from 1840 to 1860 was about 100 to 250 tons annually; from 1860 to 1870, 600 to 700 tons annually; 1870 to 1889, about 1,500 tons annually; in 1890, 2,000 tons, and a fair estimate for 1894 is about 5,000 tons.

728. The metal sold for \$2.25 per pound in 1860; in 1873 to 1875 for \$6 to \$7 a pound. From that time the price gradually declined, being 65 cents per pound in 1892 and less than 40 cents at the present time. The exceedingly high prices in 1873-1875 were caused by the adoption of a nickel coinage by Germany and some other countries, creating a demand exceeding the supply.\*

## PETROLEUM.

729. Petroleum has been found in Quebec, Nova Scotia and New Brunswick, and particularly in the North-west Territories, where it seems certain there is an immense unexplored oil region, but it is in the County of Lambton, Ontario, whence most of the oil has been and is obtained, Oil Springs and Petrolia being the largest oil-producing districts. The oil is obtained at a depth of from 370 to 500 feet. The first flowing well was struck on the 19th of February, 1862, and before October in the same year there were no less than 35 flowing wells. As there was no accommodation for the storage of this enormous flow there was a great waste, and it is calculated by one authority that between the dates mentioned no less than 5,000,000 barrels of oil floated off upon the water of a neighbouring creek. taken after a time to stop this waste, and, though no exact

rs are available, the annual output for some years has been about barrels.

ling to the census returns there were 12 refineries in operation in 1890, employing about 250 men, and it was estimated that there 00 wells pumped.

he following table contains the only trustworthy statistics of production of oil that are available, and these figures do not give production, since the quantity of crude oil, used as such, is not

MAN PETROLEUM AND NAPHTHA INSPECTED AND CORRESPONDING QUANTITIES OF CRUDE OIL, 1881-95.

1893.....	10,683,806	6,249,946	16,933,752
1894.....	10,825,350	6,666,323	17,491,673
1895.....	10,928,894	6,752,425	17,681,319

736. Petroleum is found in several other countries of the world, but principally in the United States, Russia, Egypt and Burmah. Important deposits of oil are said to have been recently discovered in Peru. It was first discovered in the United States, in Pennsylvania, in 1859, and the total production of crude oil since then to the end of 1893 has amounted to 607,369,164 barrels, valued at an equal number of dollars, the states of Pennsylvania and New York having produced 486,000,000 barrels of that quantity. The total production in the United States in 1893 was 50,349,228 barrels. In 1894 it was 48,527,336, showing a decrease of 1,821,892 barrels compared with the production of 1893. In 1888 the exports amounted to 456,427,221 gallons; in 1889, 502,257,455 gallons; in 1890, 523,295,090 gallons; in 1891, 571,119,805 gallons; in 1892, 564,896,658 gallons; in 1893, 642,239,816 gallons; in 1894, 730,368,626 gallons, and in 1895, 714,859,144 gallons.

737. The earliest records of production of petroleum in Russia commenced in 1821, though the existence of oil was known hundreds of years before. The Baku oil fields, at the eastern extremity of the Caucasus Mountains, are the most important. The total shipments of petroleum products from Baku, from 1889 to 1894, have been :—

YEAR.	Crude Oil.	Illuminating Oil.
	Tons.	Tons.
1889.....	67,448	985,482
1890.....	104,525	1,085,461

Other countries.....	200,000

#### NATURAL GAS.

739. Natural gas has been known to exist in Canada for many years, but no attempt to put it to any practical use was made until July, 1885, when a well was sunk at Port Colborne, Ont., from which gas was utilized in the following August. Since then numerous wells have been sunk, but the two most productive gas fields thus far discovered are situated in Ontario, one in Essex county, and one in Welland, the daily flow of gas in the latter county being 30,895,000 cubic feet. A pipe line connection has been made from these wells with the city of Buffalo. In Essex county one well has a daily flow of 7,000,000 cubic feet, which gas is utilized in lighting the streets of Kingsville. Gas has also been found in small quantities in Quebec and the North-west Territories. The estimated available daily flow of natural gas in Ontario in January, 1891, was 50,000,000 cubic feet. The gross amount received from sales of natural gas in 1893 was nearly \$367,000; in 1894, \$313,754, and 1895, \$423,032.

740. Natural gas has been found in considerable quantities in the United States, and has been largely utilized. It is not easy, for many reasons, to give any exact figures of its consumption, but, measured by the displacement of fuel and the amount actually received from the sale of gas, it appears that in 1893 the value of the natural gas consumed in the United States was \$14,346,250. There has been a falling off since 1888, in which year—the high water mark year—the value was \$22,629,825, the decrease in 1893 being nearly 37 per cent. There was a falling off in 1894, for which year the value is given at \$11,000,000.

#### SALT.

741. The salt produced in the Dominion is almost all manufactured in the Province of Ontario, the census returns showing 19 establishments in

Ontario out of 20 reported for the Dominion. The salt beds of Western Ontario cover an area of about 2,000 square miles, embracing the counties of Lambton and Huron, and portions of Bruce, Middlesex and Kent, and perhaps the whole of Essex. They were first discovered in 1865 at Goderich in boring for petroleum, and since that time wells have been sunk at Clinton, Seaforth, Brussels, Blyth, Wingham, Kincardine, Port Franks, Exeter, Courtright, Parkhill, Windsor and other places. In Kincardine the upper bed is reached at about 900 feet from the surface; in Goderich at 1,000 feet; in Courtright at 1,600 feet. A well drilled in Windsor in November, 1892, struck salt at a little over 1,127 feet. The thickness of the bed is 40 feet. The beds are usually three in number, with an aggregate thickness of about 100 feet, and the salt is of the best quality. The capital invested in salt works, according to the census of 1891, was about \$400,000, and 250 hands were employed.

742. The well referred to above as having been drilled at Windsor is worked by the Canadian Pacific Railway Company. Subsequently the company drilled a second well, finding salt at a depth of 1,127 feet. In each case the company drilled through 40 feet of rock salt, then encountered rock 23 to 30 feet thick, then a second layer of salt 23 feet thick, then rock 5 feet thick, then 38 feet of salt. The rock salt is beautifully white in colour and very free from impurities, particularly from lime, and as a result the company is able to turn out a very pure salt. These works have a capacity of about 600 barrels a day.

The following table gives the production of salt in Canada during the years 1886-95, together with the increase or decrease in both quantity and value.

PRODUCTION OF SALT IN CANADA, 1886-95.

YEAR.	Tons.	Value.	INCREASE OR DECREASE IN	
			Quantity.	Value.
			Tons.	\$
1886	62,359	227,197	—	—
1887	60,173	166,394	— 2,186	— 60,803
1888	59,070	185,460	— 1,103	+ 19,066
1889	32,832	128,547	— 26,238	— 56,913
1890	43,754	198,897	+ 10,922	+ 70,350
1891	45,021	161,179	+ 1,267	— 37,718
1892	45,486	162,041	+ 465	+ 862
1893	62,324	195,926	+ 16,838	+ 33,885
1894	57,199	170,687	— 5,125	— 25,239
1895	60,018	180,417	+ 2,819	+ 9,730

From the returns made to Mr. Blue, Director of the Ontario Bureau of Mines, the salt produced in Ontario in 1894 was 35,215 tons. The Geological Survey Returns, embracing the whole of Canada, give the production of 1894 at 57,199 tons. This would indicate that 21,984 tons were produced in the other provinces. Mr. Blue remarks, however, "that with the

decrease in the business there is a corresponding difficulty in procuring returns from the manufacturers." In view of this statement it is probable that the Geological Survey have been more successful in obtaining full returns. It is hardly likely that the other provinces produce any such quantity as a comparison of the figures of the Geological Survey and the Ontario Bureau of Mines suggests. The divergency suggests closer examination on the part of the collectors of statistics, both federal and provincial.

743. The exports of Canadian salt have been since 1876 as follows:—

YEAR ENDED 30TH JUNE.	Ontario.	Quebec.	Other Provinces.	Total.	Value.

in the Province of British Columbia the Pilot Bay smelter reduces silver ores to silver lead bullion, which is shipped to the United States to be refined. The Hall mines smelter at Nelson reduces silver-copper ore to matte, which is shipped to the United States. The Trail Creek smelter treats its iron ores (pyrrhotite) containing gold, 3 to 4 per cent copper, and a little silver.

The Federal Parliament, in the session of 1895, passed an Act to encourage silver-lead smelting and the smelting of other ores of gold and silver, which continued in effect till the 1st July, 1900. The bounty is not to be in any one year more than \$30,000, at the rate of 50 cents per ton, nor more than \$150,000 for the whole term of years from July 1st, 1895, to July 1st, 1900. Smelting works to participate in the bounty must be established and in operation before the first day of January, 1897.

46. The following table gives the exports of silver ore during the years 1884 to 1895 :—

YEAR ENDED 30TH JUNE.	Quantity.	Value.	YEAR. ENDED 30TH JUNE.	Quantity.	Value.

\* Ounces.

47. The world's production of silver since the discovery of America by Columbus is estimated to be 7,829,328,054 fine ounces.

The production has increased greatly during recent years, as the following table shows :—

	Ounces.
1886.....	93,276,000
1887.....	96,124,000
1888.....	108,827,000
1889.....	120,214,000
1890.....	126,095,000
1891.....	137,171,000
1892.....	152,940,000
1893.....	161,162,000
1894.....	165,918,338

Referring to this income, Robert Hawley, Director of the Mining Chamber of Commerce, says, "Important as the increase of silver has been, it is not this but the changed monetary conditions in 1 alone that have affected its value in relation to gold. \* \* \* The supplies are doubtless important factors in the present divergent relation of the two monetary metals, but formerly they varied as much as they ever have recently without causing any disturbance in their relative value. \* \* \* The supplies of silver have doubtless been increasing in the years quoted, but so have the supplies of gold. When we carefully examine the actual data in this way, it is abundantly evident that it is not changes which have taken place in the supplies of the two metals that led to the present divergence in their value, but that this divergence entirely to the changed monetary conditions affecting the demand for silver. The demand for monetary purposes for the one has been increased and the demand for the other decreased through the demonetization of silver in Europe and America.

748. The value of silver has steadily decreased of late years as compared with that of gold:—

From 1880 to 1899 one ounce of gold was worth 13.3 ounces of silver.

1904	"	13.46	"	"	12.0	"

It is estimated that about \$16,600,000 worth of silver is annually used in the Arts and Industries.

# PHOSPHATE.

749. Phosphate or apatite, in its purest form, contains 92.26 per cent phosphate of lime, equivalent to 42.26 per cent of phosphoric acid. The total quantity of this mineral mined in Canada during 1890 was 31,7

tons, valued at \$361,045, which was an increase over 1889 of 765 tons in quantity, and of \$44,383 in value. A certain number of tons, which cannot be estimated, should be added to the above quantity, representing the result of desultory operations by farmers on their own lots, particularly in Ontario. In 1891, the quantity produced was 23,588 tons, valued at \$241,603; in 1892, 11,932 tons, valued at \$157,424; in 1893, 8,198 tons, valued at \$70,942; in 1894, 7,290 tons, valued at \$43,940; in 1895, 1,822 tons, valued at \$9,565.

750. The following table of exports since 1878 shows the position of this industry during the last eighteen years. The quantity exported in 1895 was 4,189 tons, valued at \$33,810, being a decrease, as compared with 1894, of 758 tons in quantity, and in value of \$6,590. The exports almost all go to Great Britain. It must not be forgotten that the figures of exports from Quebec include a certain amount of material produced in Ontario, but shipped to Montreal for export, and at that port credited to the Province of Quebec:—

## EXPORTS OF PHOSPHATE, 1878-95.

\* Includes 2 tons from New Brunswick, valued at \$80.

751. Since 1891 Algerian and Tunisian phosphates have come to the front, the result being that both the American and the Canadian phosphates have been adversely affected, not because of any superiority of the North African phosphate in high constituent of phosphate, since Canadian apatite may be regarded as a most eligible material for the manufacture of a concentrated

superphosphate, but because of propinquity to the great markets and consequent cheapness of freight.

752. The world's production of phosphates in 1891 aggregated as follows:—

	Tons of 2,240 pounds.
France.....	400,000
West Indies.....	50,000
Belgium.....	200,000
Canada.....	20,000
Germany.....	40,000
England (Coprolites).....	20,000
Russia, Norway, &c.....	100,000
United States.....	757,000
Total.....	1,587,000

753. The world's consumption is given below:—

	Tons.
United Kingdom.....	300,000
Germany.....	250,000
France.....	150,000
France (in the raw state).....	200,000
Belgium and Holland.....	75,000
United States.....	517,000
Other countries.....	55,000
Total.....	1,547,000

754. It will be seen that the demand and the supply are nearly balanced. In these circumstances, only the most easily and cheaply provided phosphates have a living chance in the competition. There is, however, a great future for phosphates. The United States are using only one-quarter of the quantity of fertilizers which should be employed to keep pace with the annual extraction of plant food from the soil. The Canadian Minister of Agriculture, Hon. Mr. Angers, in his report for 1893, refers to the matter in the following terms:—

"I am informed that comparatively little or nothing has been done during the past year as regards the phosphate industry of this country, the low prices ruling in the home market and the cheap rate of production which has enabled the Florida supply of the raw material to be laid down in Europe materially tending to injure, if not destroy, the Canadian trade. In this connection there is a point deserving of much consideration and to which I desire to call marked attention, viz., the amount of phosphoric acid that is taken out of the soil by a cereal crop, the shipment of the greater part of which abroad takes this phosphoric acid with it out of the country instead of returning it to the soil whence it is taken. Professor H. W. Wiley points out the fact that 19 lbs. per acre of phosphoric acid are absorbed by grain, and 12½ lbs. per acre are absorbed annually by the grass crop. This constituent element of the proper plant food, one of the chief essentials to all vegetable and animal life, must be restored to the soil, the latter is to become entirely exhausted; and the agriculturist understand that his farm is not a bank on which he can draw at

pleasure, but a laboratory which will only do its work well when the needed supply of material is forthcoming. Exhaustion of this nature can only be remedied by reintroducing artificially the material that has been abstracted. If a thorough knowledge of the need of phosphate for the soil prevailed, and practical application of such knowledge were more general, it would materially help to develop the phosphate industry of this country, and would lead to the manufacture of fertilizers on a large scale, while an extensive home market tending to a lower price for the manufactured article, instead of exportation of the raw material, would be the result. I am informed that the cereals and the grass crop of Canada extract from the soil annually an average of 235 million pounds of phosphoric acid, equal to 117,972 tons of 2,000 pounds each. Supposing one half only of this to be returned to the soil in the stable manure, there is still left a deficit of 59,000 tons of phosphoric acid. The percentage of phosphoric acid in Canadian apatite is, according to evidence obtained from the leading experts in the trade in England, and given in a report made by Mr. Dyke, of Liverpool, in his appendix to the departmental report for 1885, about 33 per cent. Taking this as a fair average, the requirement for the production of the needed quantity of phosphoric acid to be restored to the soil would be about 177,000 tons (of 2,000 pounds) of apatite. During the past six years the apatite raised averaged 25,500 tons, of which 24,000 tons have been exported; so that we have been supplying ourselves with 500 tons of phosphoric acid against 59,000 needed to keep the constituent elements of plant food to the proper standard. What I mainly desire to impress upon the agricultural community is the necessity of bringing up their farms to the normal condition of fertility, and to give at the same time thereby a much needed impetus to the manufacture of fertilizers and the mining of phosphate. To sum up, the whole art of farming consists in supplying the nutritious elements of plants in the form most favourable for absorption and assimilation. As ordinary manure does not always contain the two most important inorganic elements of plant food, phosphoric acid and potash, in sufficient quantity for plant use, the needs of mankind demand the employment of artificial fertilizers along with or as a substitute for farmyard manure. A demand for the materials from which these could be manufactured would at once materially aid the now almost abandoned phosphate mining of this country.

"Inquiries were made of my department, early in the year, regarding the question of rendering natural phosphate soluble in an economical manner through calcination. It was stated that in France and Belgium apatite had been treated in the same way as limestone for the manufacture of lime, the crude material being baked in an oven, then powdered and mixed with soil with which it at once become incorporated.

"I had the subject at once referred to the chemist at the Experimental Farm, and his report forms an appendix herewith.

"The experiments appear to show that the solubility of this valuable natural fertilizer is not materially increased through calcination. The finely ground phosphate is soluble only to a slight degree in water, and in the soil the process is extremely slow, but further experiments are now in progress with the hope of obtaining results which will be of practical benefit to the agricultural community."

## ASBESTUS.

755. There is probably no mining industry in Canada that has shown such marked progress as that of the peculiar material called asbestos. The mineral which is produced in Canada under this head is in reality not asbestos proper, but a form of serpentine called chrysotile. It occurs in veins in certain portions of the great belt of serpentine rocks of the Eastern Townships of Quebec. In the Laurentian rocks of certain areas the variety actinolite sometimes forms hilly masses of considerable size, which answers well for cements, paints, &c., though not found to answer for the manufacture of millboards and the finer qualities of steam packing.

The Eastern Townships' asbestos is shipped in large quantities to England, Germany, Belgium, Holland and the United States.

756. The true value of the mineral was not at first recognized, and in the first year of mining operations (1878) only 50 tons were disposed of. The mining, though prosecuted now for a dozen years, is practically confined to two small areas about four miles apart. The first, and as yet the most important of these, is a small mound near Thetford Station, which rises about 80 or 90 feet. Employed in this industry are 40 boilers, with a capacity of 1,825 horse-power, and about 2,000 men. The value of the plant is estimated at \$335,000.

757. The following table, made up from returns furnished by the producers, gives the quantity and value of shipments from 1879 to 1887, after which the amount of production is given. It is believed, however, that, in some of the earlier years, the output was sometimes given instead of the quantity shipped, and, according to returns of shipments made by the Quebec Central Railway, the aggregate quantity is too high.

SHIPMENT AND PRODUCTION OF ASBESTUS IN CANADA, 1879 TO 1895.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1879 .....	300	19,500	1888 .....	4,404	255,067
1880 .....	380	24,700	1889 .....	6,113	426,364
1881 .....	540	35,100	1890 .....	9,860	1,260,240
1882 .....	810	52,650	1891 .....	9,279	999,878
1883 .....	955	68,750	1892 .....	6,082	390,462
1884 .....	1,141	75,097	1893 .....	6,331	319,136
1885 .....	2,440	142,441	1894 .....	7,630	420,825
1886 .....	3,458	206,251	1895 .....	8,756	368,175
1887 .....	4,619	226,376			

758. In the Thetford, Black Lake, Coleraine and Danville districts, in the Eastern Townships, there were 16 companies at work, while two companies were at work in Ottawa County. The exports of asbestos in 1892 were 7,316 tons, valued at \$514,512; in 1893 to 5,898 tons, valued

718; in 1894 to 6,229, valued at \$339,756; in 1895 to 8,593 tons, at \$493,075.

## GYPSUM.

Gypsum is at present worked only in Ontario, New Brunswick and Nova Scotia, though deposits of a certain quality have been found in the Yukon and the Territories. Gypsum is one of the oldest worked of any minerals of the country. In 1701 large quantities of it were mined at French in St. John (New Brunswick) and transported to Port Royal (Annapolis Royal), where it was used in connection with the building of the fort then being carried on there. Nearly one-half of the production is credited to Nova Scotia. Of the exports of crude gypsum, nearly all goes from Nova Scotia; the market for it is almost altogether in the United States. From the following table it will be seen that the greater part of the production is exported in a crude state:—

## PRODUCTION AND EXPORTS OF CRUDE GYPSUM, 1886-95.

YEAR.	PRODUCTION.		EXPORTS.	
	Quantity.	Value.	Quantity.	Value.
	Tons.	\$	Tons.	\$
1886	162,000	178,742	107,237	114,736
1887	154,008	157,277	148,533	166,514
1888	175,887	179,393	124,515	133,238
1889	213,273	205,108	176,875	189,491
1890	226,509	194,033	175,111	193,899
1891	203,605	206,251	172,496	184,977
1892	241,048	241,127	175,518	194,304
1893	192,568	196,150	176,489	178,979
1894	223,631	202,031	162,412	160,082
1895	226,178	202,608	160,898	156,897

## BUILDING STONE.

The production of building stone in Canada during the past nine years, as far as known, been:—

—	Cubic yards.	Value.
1886	165,777	\$642,500
1887	262,592	552,267
1888	411,570	641,712
1889	341,337	913,601
1890	382,563	964,783
1891	187,685	708,702
1892	219,747	608,301
1893	220,000	609,827
1894		*1,200,000
1895		*1,200,000

estimated.

The above figures are from actual returns, and are supposed to represent about four-fifths of the total production.

There is not space in a work of this kind to take up all the minor mineral productions in detail. The table, at the commencement of the chapter, of mineral productions in 1894 and 1895, will be some guide to their annual value.

### MINING LAWS.

761. A brief resumé of the mining laws of the Dominion of Canada and of the several provinces is here given.

762. Under the Union Act of 1867, mines and minerals were placed under the care of the Provincial Governments.

#### NOVA SCOTIA.

763. In Nova Scotia the province grants all its minerals with the land, except gold, silver, copper, lead, tin, iron coal and precious stones. These latter are leased under rental and royalty for revenue purposes. The gold and silver leases are for terms of 40 years. Other minerals are leased for 80 years in four renewable terms of 20 years each.

The gold and silver areas are 250 by 150 feet, laid off with the shorter side running east and west. Any number of these areas up to 100 can be secured under a license to prospect for 12 months on payment of 50 cents an area. During this period any number of the areas can be taken under lease, or the areas can be directly applied for under lease. The price of an area under lease is \$2, and thereafter an annual rental of 50 cents per area secures it from forfeiture for non-working. If an amount of work equivalent to 40 days per annum per area is performed on the lease the rental for that year is refunded. A royalty is payable on all gold at the rate of two per cent, the gold being valued at \$19.00 an ounce smelted, and \$18.00 an ounce unsmelted, and at the rate of two per cent on the silver valued at \$1.00 per oz.

In the case of the other minerals the payment of \$30.00 secures a license to search for 18 months over a tract of land 5 square miles in extent, and not exceeding  $2\frac{1}{2}$  miles in length.

All ores and minerals, other than gold or gold and silver, mined are subject to the following royalties :

*Coal*.—10 cents per ton of 2,240 pounds of coal sold or removed from the mine or used in the manufacture of coke—royalty not demanded on coal used by the workmen or in any mining operations in and around the mine.

*Copper*.—4 cents upon every unit, i. e., upon every one per cent of copper contained in each and every ton of 2,352 pounds of copper ore sold or smelted.

*Lead*.—2 cents upon every unit.

5 cents on every ton of 2,240 pounds of ore sold or smelted.

precious stones and any other minerals that may be reserved, in their values.

The Governor in Council has power to lower the rates of royalty above stated on iron, copper, lead, tin and precious stones, on being satisfied that the owners of such leased minerals have commenced effective mining operations. The leases of coal mines contain a proviso that royalties on coal may be increased, diminished or otherwise changed by the Legislature.

764. The mining laws of New Brunswick are very similar to those of Nova Scotia. The royalty on gold and silver mined is  $2\frac{1}{2}$  per cent on the gross amount mined.

#### QUEBEC.

765. The mining laws of the Province of Quebec provide that mining rights are property separate from the soil covering mines and minerals, unless the proprietor of the surface has purchase from the Crown, as a mining concession or otherwise, the underground properties.

Mining concessions are divided into three classes :—

1. In unsurveyed territory (*a*) the first class contains 400 acres, (*b*) the second 200 acres, and (*c*) the third 100 acres.

2. In surveyed townships the three classes respectively comprise one, two and four lots.

All lands supposed to contain mines or ores belonging to the Crown may be acquired from the Commissioner of Crown Lands (*a*) as a mining concession by purchase, or (*b*) be occupied and worked under a mining license.

No sale of mining concessions containing more than 400 acres in superficies can be made by the Commissioner to the same person. The Governor in Council may, however, grant a larger extent of territory up to 1,000 acres under special circumstances.

The rates charged and to be paid in full at the time of the purchase are \$5 and \$10 per acre for mining lands containing the superior metals\*; the first-named price being for lands situated more than 12 miles and the last-named for lands situated less than 12 miles from the railway.

If containing the inferior metals, \$2 and \$4, according to distance from railway.

Unless stipulated to the contrary in the letters patent in concessions for the mining of superior metals, the purchaser has the right to mine for all metals found therein; in concessions for the mining of the inferior metals, those only may be mined for.

Mining lands are sold on the express condition that the purchaser shall commence *bonâ fide* to mine within two years from the date of purchase, and shall spend not less than \$500 if mining for the superior metals; and not less than \$200, if for inferior metals. In default, cancellation of sale of the mining land.

Licenses may be obtained from the Commissioner on the following terms: Application for an exploration and prospecting license, if the mine is on private land, \$2 for every 100 acres or fraction of 100; if the mine is

\*The superior metals include the ores of gold, silver, lead, copper, nickel, graphite, asbestos, mica and phosphate of lime. The words inferior metals include all other minerals and ores.

on Crown Lands (1) in surveyed territory, \$5 for every 100 acres, and (2) in unsurveyed territory, \$5 for each square mile, the license to be valid for three months and renewable. The holder of such license may afterwards purchase the mine, paying the prices mentioned.

Licenses for mining are of two kinds. Private lands' licenses, where the mining rights belong to the Crown, and Public lands' licenses. These licenses are granted on payment of a fee of \$5, and an annual rental of \$1 per acre. Each license is granted for 200 acres or less, but not for more. It is valid for one year and is renewable on the same terms as those on which it was originally granted. The Governor in Council may at any time require the payment of the royalty in lieu of fees for a mining license and the annual rental—such royalties, unless otherwise determined by letters patent or other title from the Crown, being fixed at a rate not to exceed three per cent of the value at the mine of the mineral extracted after deducting the cost of mining it.

766. The Mines Act of Ontario provides for the abolition of all royalties imposed upon ores or minerals within the province prior to the 4th day of May, 1891. Reservations of gold and silver mines contained in any patent issued prior to the above date are made void, and all such mines in and upon such lands are deemed to have been granted in fee simple and to have passed with the lands, excepting as to lands patented under the Free Grants and Homestead Act, Revised Statutes, Ontario, 1887.

All ores and minerals mined on lands located, sold, granted or leased by the Crown on and after the 4th day of May, 1891, are made subject to a royalty to the Crown. The royalties imposed being (a) on silver, nickel or nickel and copper and iron, two per cent; (b) on all other ores such royalty as may be from time to time imposed by the Governor in Council, not exceeding two per cent, such royalties to be calculated upon the value at the mine after deducting cost of labour, explosives and raising the ore to the surface. Royalties are not to be imposed or collected until after seven years from the date of the patent or lease.

Any person may explore for mines and minerals on any Crown land not staked out or occupied. Crown lands supposed to contain ores or minerals may be sold as mining lands, or may, when situated within a mining division, be worked as mining claims under miner's license; such lands, when situated in unsurveyed territory or in townships surveyed into sections or lots, must be sold in blocks to be called mining locations.

Mining locations in the territory north of Lake Superior and Lake Huron and of French River and the River Mattawa are required to be of rectangular shape, containing not less than 40 acres. These locations are sold as follows: if in a surveyed township and within 6 miles of a railway, \$3 per acre, if beyond 6 miles, \$2.50; if in unsurveyed, \$2.50 and \$2.00 according to distance from railway; when in any other region the price is \$2.00 and \$1.50 according to distance from railway. All these mining locations revert to the Crown in default of the expenditure in actual mining operations of \$4 per acre during the first seven years, when the area exceeds 160 acres, and of \$5 per acre in case the area is less than 160 acres.

In addition to granting mining lands in fee simple the province also grants leases of such lands for a term of ten years, renewable for a second like term. The rental is \$1 per acre for the first year and 25 cents per

acre per annum for subsequent years in the lands situated in Algoma and that part of Nipissing district north of the French River and the River Mattawa, and 60 cents the first year and thereafter 15 cents per annum for land situated elsewhere. These leases are all renewable after the second term by further terms of 20 years.

Miners' licenses in territories which may be set apart as Mining Divisions are granted for one year on payment of \$10, renewable for another year on payment of a like fee.

The Legislature of Ontario created a Bureau of Mines in 1891. Mr. Archibald Blue was made director, and he has issued several valuable reports, the latest to hand being that for 1894.

#### DOMINION.

767. The Dominion Government have provided regulations for the disposal of coal lands, the property of the Dominion in Manitoba, the North-west Territories and British Columbia.

Lands containing anthracite coal may be sold at an upset price of \$20 per acre cash, and coal other than anthracite at an upset price of \$10 per acre cash. Not more than 320 acres can be sold to one applicant. The Minister of the Interior has power to grant permission to prospect for coal for a period of 60 days, such permission to cover an area of 320 acres.

The regulations governing the disposal of mineral lands other than coal apply to Manitoba and the North-west Territories, and relate to Dominion lands containing gold, silver, cinnabar, lead, tin, copper, iron, or other mineral deposit of economic value.

No mining location or mining claim is granted until actual discovery of the deposit within the limits of the location or claim.

A location for mining, except for iron and mica on veins, lodes or ledges of quartz or other rock in place, must not be of larger dimensions than 1,500 feet in length and 600 in breadth. After marking out the ground in the manner prescribed, the claimant must, within 60 days thereafter, file with the agent of the Dominion Lands office for the district a sworn declaration setting forth the circumstances of his discovery and describing the locality and dimensions of his claim, paying in the sum of \$5 as an entry fee. He obtains from the agent a receipt, which is his authority to enter into possession on the location for the next five years, and to take and dispose of any mineral deposit contained therein, provided that during each of the five years he expends in actual mining operations at least \$100; which fact being sufficiently proved to the agent of Dominion Lands, and a fee of \$5 in each year being paid, shall entitle the miner to work the location for another year. At any time before the expiry of the five years the claimant is entitled, on proof of having expended at least \$500 in operations, to purchase the location at the rate of \$5 per acre cash, and the further deposit with the agent of \$50 to cover the cost of survey. Forfeiture is evoked by non-compliance during the five years with the regulations respecting annual expenditure.

A location for the mining of iron or mica must not be more than 160 acres in extent.

In the case of placer claims the size is as under :—

For bar diggings a strip of land 100 feet wide at high water mark and thence extending into the river to its lowest water level.

For dry diggings and bench claims 100 feet square. Creek and river claims are 100 feet long and extend in width from base to base of the hill or bench on each side.\*

If any person (or persons) discovers a new mine and establishes the fact to the satisfaction of the agent, claims of the following size in dry, bar, bench, creek or hill diggings are allowed :—

To one discoverer, 300 feet in length ; to a party of two, 600 feet ; of three, 800 feet, and of four, 1,000 feet. (See also paragraph 189, subsection 10).

768. The Mining Laws of British Columbia provide, with respect to coal mining, that a prospector for coal or petroleum on leased Crown Lands in which the minerals are reserved, before obtaining a license, shall place a post at one angle of the land with his name and the initials of the angle, and shall post a notice of his application on the land and on the Government office of the district for 30 days, and shall advertise it in the *British Columbia Gazette* and some local newspaper for 30 days.

Security for damages must be given if the Crown Lands in question have been leased or are covered by a timber license.

After the expiration of the 30 days, and within two months from the application in the *Gazette*, an application in duplicate (with a plan) must be sent to the Assistant Commissioner of Land and Works for a prospecting license for not more than one year, when the Chief Commissioner may grant the license. Such lands must be in one rectangular block with sides running north, south, east and west, and of area not exceeding 640 acres.

The license shall cease at its expiration, and a new license may be granted to a new applicant.

On proving that he has *bonâ fide* explored for coal during the year he shall be entitled to an extension for a second year on payment of \$50, and a further extension for a third year may be granted. License holders of adjoining lands, not exceeding ten, may work in partnership, when they need not prospect separately, provided the Chief Commissioner is satisfied with the prospecting done on the land of one of them.

The licensee may use the timber and stone on the land for the purpose of buildings on the land. Dispute as to right of title shall be decided in the County Court. No transfer for a prospecting license may be made without written notice to the Chief Commissioner of Lands and Works.

The Lieutenant-Governor in Council may grant to a prospecting licensee a lease for five years at a rent of 10 cents on proof that he has discovered coal on the land ; and if during this term, or three months thereafter, he can show that he has continuously and vigorously carried on coal-mining he shall be entitled to purchase the land at \$5 an acre, in one payment, at time of sale.

Before the lease is issued a survey must have been made by the applicant. Besides the 10 cents rent a royalty of 5 cents a ton on coal and 1 cent a

---

\* Creek and river claims in the Yukon district may be 500 feet in length.

barrel on petroleum must be paid. The lessee must be bound to carry on coal-mining continuously. Any number of persons, not exceeding ten, may work in partnership on adjoining lands, when it shall not be necessary to work each leasehold separately, provided work on one is done to the satisfaction of the Chief Commissioner.

(Cons. Act, 1888, Chap. 83, and amending Acts; 1890, Chap. 32; 1892, Chap. 31, and 1895, Chap. 37.)

Proprietors of coal mines may acquire such portion of any Crown Lands, or lands held under pre-emption or Crown grants or lease or license, as may be necessary for a right of way to the sea shore, a river or public highway, together with a block not exceeding 5 acres on the shore, river or highway. Minerals are not to be conferred by the conveyance without the consent of the grantor. Compensation shall be paid by agreement or arbitration. (Cons. Acts, 1888, Chap. 83, and amending Act, 1890, Chap. 32.)

769. *Regulation of Coal Mines.*—No boy under twelve, no woman or girl of any age and no Chinaman shall be employed under ground in coal mines.

Boys from thirteen to fourteen shall only be employed under ground in exceptional circumstances to be allowed by the Minister of Mines.

There are various other regulations as to the employment of young persons.

No wages shall be paid to employees of a coal mine in a public house or contiguous office or place.

Coal getters must be paid by weight, unless exception is allowed by the Minister of Mines; and a check weigher may be appointed by them.

There are a number of regulations to secure safety. (Cons. Acts, 1888, Chap. 84; amending Acts, 1890, Chap. 33; 1894, Chap. 5, and 1895, Chap. 38).

770. *Mining, other than Coal.*—Persons over 18 years of age and joint stock companies may become "Free Miners" on taking out certificates (which are not transferable) for one or more years, on payment of \$5 a year.

Every person or joint stock company mining (except for coal) must take out a free miner's certificate, under penalty of \$25. Owners and contractors shall pay the free miners' fees of their employees, deducting amount from them and giving a list to the Mining Recorder, under penalty of \$100.

No person unless he has an unexpired free miner's certificate can hold any mineral claim, minerals or mining property.

Free miners may prospect and mine (except for coal) upon any Crown Lands or lands where minerals are reserved to the Crown, provided they may not locate or mine on land uncovered by hydraulic mining works for six months, and provided they must give security for damages to any occupier.

Free miners may cut timber necessary for their mining upon Crown Lands, even if covered by timber, lease or reserved, and they may kill game for their own use at any time.

A free miner may locate a mineral claim measuring 1,500 feet square as nearly rectangular as possible, marking it by two posts, 1 and 2, on the line of the vein not more than 1,500 feet apart. On No. 1 post shall be written the names of the locator and the claim, the date, the compass bearing of

No. 2 post and the number of feet (of the 1,500) lying to the right and left respectively of this line ; these particulars are to be furnished also to the Mining Recorder. He must mark the line by blazing or post-planting, and place a post where he discovered rock "in place," and as near as possible to the four corners of the claim. He is entitled to all minerals within the claim. The claim is not to be recorded without an affidavit that mineral has been found "in place" on the claim. A location made on Sunday or a holiday is not invalid. Where from the nature of the ground the location cannot be thus marked, posts may be set as near as possible and the direction and distance recorded. The free miner shall record his claim with the Mining Recorder within 15 days, if his office is within 10 miles, with an additional day for every additional 10 miles. A claim recorded by error in the wrong district may be recorded anew in the right district with the original date. If left in the Recorder's absence the applicant is entitled to a record of that date. The claim may be held from year to year on a certificate by the Gold Commissioner, or Mining Recorder, that work has been done on it to the value of \$100. A free miner or partners having adjoining claims may work them together, and may obtain certificates for all the claims for sufficient work done on one. A free miner may, in lieu of work, pay \$100 to the Mining Recorder. Disputes as to titles are determined by priority.

No free miner can hold (except by purchase) more than one claim on the same vein or lode, but he may hold by location a claim on any separate vein or lode. He may abandon his claim by notice in writing to the Recorder and may remove his machinery and extracted ore ; he cannot relocate the same claim (or one which he has not recorded in time) without written permission from the Gold Commissioner.

Lodes discovered in a tunnel to develop a lode may be marked out as a mineral claim and recorded by the owner. The interest of a free miner in his claim is deemed a chattel interest.

The lawful owner of a mineral claim is entitled to a Crown grant on payment of \$500 to the Government and after having obtained a certificate of improvements from the Gold Commissioner. With a certificate of improvement the owner need not take out a free miner's certificate, or work on the claim to hold it.

With a certificate of improvement the owner of a claim outside the railway belt is entitled to a Crown grant, and inside the railway belt on payment of \$5 an acre to the Mining Recorder.

The claim for the grant must be made within three months. The issue of the grant does not invalidate any previous lien. The grant covers all minerals except coal.

Conveyances, mortgages, &c., of mineral claims shall be recorded or shall not be good against third parties, and transfers must be in writing. A free miner's claim shall not be open for location during his last illness, nor for twelve months after his death. The Gold Commissioner administers a miner's estate.

A mill site may be located by a free miner, not over five acres in extent, on unoccupied and unreserved Crown Lands not known to contain minerals. He may obtain a lease for one year, during its continuance, on proof of having expended \$500 on machinery, and shall be entitled to a Crown grant for

e. This applies to former leases also. Minerals are not included  
ent.

e or drains may be run by a free miner to work his claim by  
om the Gold Commissioner. Water rights may be granted to him  
old Commissioner, and must be recorded, rights of miners working  
reams being safe. He may not sell the water, and the grant shall  
en the mine is no longer worked. Work must be begun within six  
and there must be no waste of water, and an outlet must be pro-  
superfluous water.

partnerships and limited liability companies are regulated by a  
f clauses.

erson contravening the Act or refusing to obey the lawful order of  
ommissioner or Judge is liable to a fine of \$250 or three months  
ment.

ual tax of 25 cents an acre is payable on every claim held under  
rant. This tax shall be remitted on proof that the sum of \$200  
expended on the claim within the year.

and moneys invested in them are not exempt from provincial tax-

utenant Governor in Council may make orders to carry out the

Act 1888, Chap. 82, and amending Acts, 1889, Chap. 16 (repealed);  
ap. 31 (repealed); 1891, Chap. 25; 1892, Chap. 32; 1893, Chap.  
, Chap. 32, and 1895, Chap. 39.)

*Placer Mining Act.*—Every free miner holding a certificate may  
gold or other precious metals on any land except Government  
or town sites, lands occupied by buildings, curtilages and orchards,  
cer mining or Indian reserves. He must give security for damages.  
y locate a placer claim on each separate creek, ravine or hill, but  
than two in the same locality, and only one a creek claim, but he  
any number for purchase. A creek claim shall be 100 feet long,  
dth, from base to base of the hills; a bar diggings claim shall be  
0 feet long, and in width, from high water mark to the lowest  
el; a dry diggings claim shall be 100 feet square, and the same  
diggings and hill diggings. Discoverers of new mines shall be  
If one, a claim 300 feet long; if a party of two, 600 feet; if three  
if four, 1,000 feet; if more than four, ordinary claims.

claims shall be as nearly rectangular as possible. Posts shall be  
the corners, and the initial post shall bear names and description.  
on Sundays and holidays shall not be invalid. Placer claims  
recorded with the Mining Recorder. The removal of posts entails  
, Records of placer claims may be renewed on payment of the  
0 a year.

er claim gives no right to a vein or lode unless the ground is  
nd recorded as a mineral claim.

A placer claim must be worked continuously by the holder or his employee, and shall be held abandoned and forfeited if unworked for 72 hours, except for reasonable cause, satisfying the Gold Commissioner. A year's leave of absence may be given if the sum of \$1,000 has been expended without reasonable return, or if all holders of the set of claims sign the application.

Provisions as to tunnels and drains, water rights, partnerships, mining recorders, gold commissioners, county courts, penalties, paying free miners fees for employees, are much the same as those regarding mineral claims.

Provisions are made for "bed-rock flumes."

Free miners may obtain a lease of placer-mining ground for ten years as follows: Dry diggings, ten acres; bar diggings, half a mile along high water mark; creek diggings, or abandoned or unworked creeks, half a mile in length; bench lands, for hydraulic workings, eighty acres, but not to exceed 500 yards in length. The lease may be renewed. The ground must not be already occupied (without consent of occupiers) nor immediately available for agricultural purposes; and only placer-mining must be carried on.

Water may be granted by the Gold Commissioner for hydraulic workings on bench lands.

Leases may be granted for twenty years of the bed of the river for dredging for a distance not over five miles.

(Act, 1891, Chap. 26, and amending Acts, 1894, Chap. 33, and 1895, Chap. 40).

772. A Bill intituled An Act to repeal "An Act to aid the Development of Quartz Mines," and amending Act, has been introduced this session and has passed its third reading.

Counting the consolidated Acts of 1888 and subsequent amending Acts to 1896, there are twenty-two British Columbia Acts relating to mining without reckoning several special Acts concerning hydraulic mining companies.

773. A Bureau of Mines was established in 1895, under the Minister of Mines, with a Provincial Mineralogist, whose duty it is to collect information relating to the mining industry, and publish it. Besides a museum there are to be lecture rooms, an assay office and laboratory, where assays and tests may be made according to a schedule of fees. Arrangements may be made for giving instructions to prospectors and others, and societies of arts and other societies may affiliate with the Mining Bureau for the instruction and examination of students.

## CHAPTER XII.

Legal Weights and Measures.—Customs Valuations.—Value Imports and Exports.—Exports and Imports by Countries.—Aggregate Trade.—Coin and Bullion.—Trade and Duties per Head.—Increased Total Trade.—Import for Home Consumption by Countries.—Imports for Home Consumption, Dutiable and Free.—Duties by Countries.—Analysis by Imports.—Comparison with United States.—Imports of Luxuries.—Duties on Luxuries.—Imports by Classes.—Dutiable or Free Imports.—Duties Collected.—Interprovincial Trade.—Imports Compared as to the Quantity and Value.—Total Imports by Countries.—Imports for Home Consumption by Countries.—Imports for Great Britain and United States.—Imports by Countries, 1874-84-94.—Imports by Provinces.—Imports of Raw Materials.—Imports remaining in Warehouse.—Value of Total Exports by Countries.—Domestic and Foreign Exports.—Value of Principal Exports.—Destination of Exports.—Exports Classified.—Relative Value of Exports to Great Britain and United States.—Aggregate Trade with Great Britain and United States.—Value of Exports since Confederation.—Volume of Trade.—Comparison of Exports by Means of Index Numbers.—Prices of Principal Articles of Export for Years.—Trade of United Kingdom and British Possessions.—Distribution of Trade of United Kingdom.—Exports and Imports of Foreign Goods by Canada.—Excisable Articles.—Duties on Alcoholic Liquors and Tobacco.—Imports and Exports at each Port in Canada.—Ports at which the Duties Exceeded \$500,000.—Imports and Exports of Canada to different Countries.

774. The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon (of 277.27384 cubic inches), and the Imperial bushel. The Imperial gallon is equal to 4.54174 litres, while the wine gallon, used in the United States, is equal to 3.785 litres.

By Act 42nd Vic. (1879), Chap. 16, it was provided: That in contracts for sale and delivery of any of the undermentioned articles the bushel should be determined by weighing, unless a bushel measure be specially agreed upon, the weight equivalent to a bushel being as follows:—

Wheat.....	60 lbs.	Castor beans.....	40 lbs.
Indian corn.....	56 "	Potatoes.....	60 "
Rye.....	56 "	Turnips.....	60 "
Pease.....	60 "	Carrots.....	60 "
Barley.....	48 "	Parsnips.....	60 "
Malt.....	36 "	Beets.....	60 "
Oats.....	34 "	Onions.....	60 "
Beans.....	60 "	Bituminous coal.....	70 "
Flax seed.....	50 "	Clover seed.....	60 "
Hemp.....	44 "	Timothy.....	48 "
Blue grass seed.....	14 "	Buckwheat.....	48 "

By the same Act the British hundredweight of 112 pounds and the ton of 2,240 pounds were abolished, and the hundredweight was declared to be 100 pounds and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

775. The returns of values of imports and exports are those supplied in entries at the Customs, where imports must be entered for duty at their fair market value as for home consumption in the country of purchase. The recorded *values* of imports are determined by aggregating the total amounts as stated in the entries, free and for duty, of the goods imported into Canada. Such recorded values are arrived at in a similar way, in the case of exports, by aggregating the values as given in the entries of goods for exportation. The *quantities* of goods imported are ascertained as follows: (a) by examination of the invoices of such goods; (b) by examining a certain number of cases or packages in each importation; (c) in the case of wines and liquors, by gauging, and in the case of strong liquors, about the strength of proof or of greater strength, the recorded quantity is determined by the result as ascertained after testing by Syke's hydrometer; (d) by weighing or counting certain goods bearing specific duties. The country of origin of imports is the country of purchase or whence shipment was made to Canada; the country of destination is that to which shipment is made. Thus Canadian wheat purchased by New York dealers, shipped to and entered in bond at New York, and thence exported to Great Britain, would appear only as exported from Canada to the United States. The only Canadian port where transit trade is recorded is Montreal, such trade comprising chiefly goods received from the United States and transhipped to other countries by the St. Lawrence route. Transit trade is not included in the general trade, which comprises all other imports into and exports from Canada. The term "special trade" in Canada is applied to imports from Newfoundland which are exempt from duties leviable on similar goods from other countries.

The accuracy of the statistical results may at times be affected by fraudulent misdescription or undervaluation by importers, and by the adoption of "sight entries," which, under the Customs Act, may be passed when importers declare on oath that, for want of full information, they cannot make a perfect entry. In such circumstances the goods may be landed, examined, and (a sum being deposited sufficient, in the collector's opinion, to pay the duty) delivered to the importer. A time is fixed within which a perfect entry should be made, but when this time is elapsed the deposit is held as payment of the duty, and the provisional valuation, which may be only approximate, is not corrected. Statistics of exports may be affected in two ways: large quantities of goods are shipped at remote points where no officer is stationed, and the prescribed entry outwards is not unfrequently neglected, while, on the other hand, it may happen, by the mistake of officers or of carriers' agents, that exports already entered outwards at the inland port of shipment are recorded also at the point of exit from Canada.

776. The following tables give the value of the imports and exports and of the aggregate trade in each year since Confederation, also the excess of imports over exports, or otherwise, the value of the several branches of trade per head of population, and the amount of duty collected, for the same period:—

# TRADE AND COMMERCE.

The export duties mentioned in the above table ceased in 1891. These were levied on certain products of the forest. The Parliament of Canada has, from the first, legislated in respect to the forest in the only way it could—namely, by imposing an export duty by way of restraint on production. Chap. 44, Schedule F, Acts of 1868, provided for the levy of duties on exports of shingle-bolts and stave-bolts, spruce logs and pine logs \$1 per M. feet b. m., and on oak logs \$2 per M. feet b. m. In Acts 1886, Chap. 37 and in Chap. 33 Revised Statutes Canada, section 6, the duty on exported pine logs was increased to \$2 and on shingle bolts to \$1.50, power being given to the Governor in Council to remove the duty altogether or to increase it on pine logs to \$3 per M. feet, in case public exigencies required a change in either direction. During the fiscal years ended the 30th June, 1887 and 1888, the duty on exported pine logs remained at \$2 per M. feet. During the fiscal year 1890 the duty was \$2, and during the fiscal year 1891 it was \$2, till the 11th October, 1890, when the export duty was abolished and has not since been re-imposed. In 1890 the United States McKinley Tariff (so-called) provided for certain rates of duty on imports of timber, hewn and sawn, into that country. A proviso in the Tariff prevented the application of the newer and lower duties in the event of foreign countries imposing an export duty on products of the forest designed for the United States market. The effect of this proviso was that when the United States tariff went into operation on the 6th October, 1890, the Canadian Government repealed the export duty by proclamation dated 11th October, 1890, and the United States import duty on white pine became \$1, instead of remaining at the old duty of \$2. Analysis of the export duty shows that since 1868 the total yield has been \$521,211, of which the sum of \$70,299 was obtained prior to 1871, in which year the amounts were separated so that they can be apportioned. This leaves \$450,911, and the amount was obtained as follows: Shingle bolts, \$43,034; stave bolts, \$6,912; oak logs, \$8,565; spruce logs, \$185,734; pine logs, \$206,666.

The Trade and Navigation Returns show that the export of pine logs from the 30th June, 1884, to 30th June, 1893, amounted to 291,770 M. feet, an average of 29,177 feet per annum. From 1884 to 1889 the export only amounted to 21,880 feet, or 3,647 feet per annum, the last year, 1889, having an export of 10,839, although the export duty was \$2 per M. feet for one-third of the year and \$3 for the other two-thirds. The next year, 1890, with the export duty \$2, the pine logs exported measured 32,144 M. feet. In 1891 the export was 36,699 M. feet, with the export duty \$2 imposed for 3½ months, when it was repealed. In 1892, with no export duty, the quantity exported was 73,963 M. feet; in 1893 it was 127,084 M. feet; in 1894 it had advanced to 279,707 M. feet, and in 1895 it was 212,251 M. feet. This analysis seems to indicate that the foreign demand for pine logs began in 1889, when for part of the time the export duty was \$3; that the demand increased rapidly in 1890, when three times the quantity of 1889 was exported, though the duty was \$2; and that in the last three years the demand has increased very greatly, 1894 showing an export nearly twenty-six times greater than that of 1889. Examination shows that an immensely preponderating proportion of this export of pine logs is from Ontario. Out of a total export of 772,687 M. feet pine logs in the period 1889-95, not

less than 768,955 M. feet were from Ontario. These exports are chiefly to Michigan from the Georgian Bay district.

1895. The total foreign trade of the Dominion in 1895 was \$18,915,499 less than the average of the previous three years, or 7·7 per cent. The volume of trade of 1895 measured by prices has, however, only been exceeded in four years during the period of Confederation. The total imports of 1895 were less than the average of the previous three years by \$15,870,077 or 12·9 per cent. The exports were less than the average of the same years by \$3,043,422, or 2·7 per cent. The total imports of 1895 have been exceeded in 15 years of the period since Confederation, while the total exports of 1895 have been exceeded only in three years.

The following tables give the value of the imports into Canada for home consumption from the principal countries, in each year since Confederation; and for the purpose of comparison the years are divided into periods of five, the total of each period being given :—

Newfoundland.....	653,270	814,562	739,850
Other British possessions.....	911,896	762,319	692,671
Other Foreign countries.....	6,167,830	5,083,134	3,957,251
Total.....	121,705,030	113,093,983	105,252,511

782. Of the five periods into which the foregoing table is divided, it will be seen that the aggregate value of imports was largest in the period 1873 to 1877, closely followed by the 5-year period 1888-92. Trade was very flourishing all over the world at the commencement of the 1873-77 period, and prices ruled high; the home production was very limited, and inter-provincial trade scarcely had any existence.

The imports from Great Britain during 28 years amount to \$1,236,480,895, or an average per annum of \$44,160,032. This average has been exceeded in the years 1871 to 1875, 1882, 1883 and 1887.

The imports from the United States during 28 years amount to \$1,265,765,913, or an average per annum of \$45,205,925.

Canada has pretty fairly divided her purchases between the Mother Country across the seas and the country contiguous to her.

The value of the total imports for home consumption from all countries during the 28 years is \$2,853,205,770. Deducting our imports from the United Kingdom and the United States from this total there is left \$350,958,962 as our imports for home consumption from all other countries. This is an average of \$12,534,248 a year.

783. The following table shows the proportion of imports from the principal countries to the total aggregate value of each of the same periods:—

PROPORTION TO TOTAL VALUE OF IMPORTS INTO CANADA, ENTERED FOR CONSUMPTION, FROM PRINCIPAL COUNTRIES, FOR QUINQUENNIAL PERIODS BETWEEN 1868 AND 1892, AND FOR THE YEARS 1893, 1894 AND 1895.

Other "								

784. Imports for home consumption from Great Britain show a decrease of \$4,432,264 in 1895 as compared with 1894, while those from the United States show an increase of \$1,600,421. There was a decrease of \$7,841,472 in the total imports.

785. The three statements following give the values of dutiable and free goods imported in each year since Confederation, both as regards total imports and imports for home consumption, together with the percentage of dutiable goods in each case; also, duties collected on imports by countries and the total duties collected:—

## IMPORTS OF GOODS, DUTIALE AND FREE, 1868-1895.

(Coin and Bullion not included.)

TABLE I.

786. The following analysis of the imports of Canada during the year given shows that in the year ended 30th June, 1895, the total importations for home consumption amounted, less coin and bullion, to \$100,675,881 which is \$8,395,020 less than the preceding year and \$12,458,160 less than the average of the three years 1892-3-4.

787. Taking the several classes it is found that in Class A there has been in 1895 a decrease of \$1,110,329 as compared with the average of the three years, 1892-94; in Class B a decrease of \$2,386,135; in Class C a decrease of \$1,831,579; in Class D a decrease of \$5,810,766; in Class E a decrease of \$1,319,456.

788. In Class A the decrease forms about 9 per cent, in Class B about 19 per cent, in Class C 9·8 per cent, in Class D 14·7 per cent and in Class E 13·3 per cent.

The greatest part of the decrease is in Class D, manufactured articles ready for consumption. This decrease is marked and has been continuous. In 1880-2 Class D formed 42·14 per cent of the total imports for home consumption; in 1883-5 it formed 39·17 per cent; in 1886-88, 37·70 per cent; in 1889-91, 35·87 per cent; in 1892-94, 34·87 per cent, and in 1895, 33·42 per cent.

789. Taking the important articles in Class A the result of the analysis is as follows:—

CLASS A.—INCREASES, 1895 COMPARED WITH THE AVERAGE OF 1892-94

Breadstuffs.....	\$ 183,307	Milkfood.....	\$ 2,367
------------------	------------	---------------	----------

CLASS A.—DECREASES.

Animals, all kinds.....	\$ 188,656	Pickles, sauces and catsups.....	\$ 10,673
Chicory.....	531	Provisions.....	221,925
Cocoa paste, &c.....	5,625	Salt.....	36,485
Coffee.....	25,113	Spices.....	11,126
Eggs.....	5,257	Sugar and syrups.....	500,979
Fish.....	125,403	Tallow.....	2,465
Fruits.....	22,666	Tea.....	167,065
Hay.....	497	Vegetables.....	26,282
Honey.....	1,590	Vinegar.....	1,461
Jellies, jams and preserves.....	1,237		

Comparing 1895 with 1894 there was a decrease in the value of imports in Class A of \$1,213,997. Of the 22 articles in this class 19 show decreases and 3 increases.

CLASS A.—INCREASES, 1895 COMPARED WITH 1894.

Spices.....	\$ 12,934	Breadstuffs.....	\$ 477,228
Tea.....	75,088		

CLASS A.—DECREASES, 1895 COMPARED WITH 1894.

Animals of all kinds.....	\$ 123,147	Jellies, jams and preserves.....	\$ 1,316
Bees.....	318	Milkfood and condensed milk.....	2,429
Chicory.....	481	Pickles, sauces, &c.....	13,061

Embroideries.....		71,917	Tobacco.....		23,897
Fancy goods.....		139,791			

794. Comparing the results obtained from the compilation of the tables with those obtained by a similar division of the imports of the United States it is found as follows:—

## UNITED STATES.

Per cent of each Class to Total Imports.

—	1890.	1891.	1892.	1893.	1894.	1895.
A. Articles of food and animals.....	32·13	33·98	36·83	31·89	43·33	30·97
B. " in crude state.....	23·06	22·93	24·32	25·85	19·89	25·64
C. " wholly or partially manu- factured.....	10·94	12·79	9·89	11·20	10·32	11·46
D. Manufactured articles for con- sumption.....	19·96	17·25	17·46	18·22	15·60	19·25
E. Luxuries.....	13·91	13·05	11·50	12·84	10·86	12·86

## CANADA.

Per cent of each Class to Total Imports.

—	1890.	1891.	1892.	1893.	1894.	1895.
A. Articles of food and animals.....	18·36	17·51	19·48	16·28	19·02	19·39
B. " in crude state.....	19·71	21·70	21·24	22·29	21·35	21·94
C. " wholly or partially manu- factured for use in manufactures.....	15·62	16·70	16·65	16·74	16·05	16·72
D. Manufactured articles for con- sumption.....	37·14	35·22	34·06	35·82	34·73	33·42
E. Luxuries.....	9·17	8·87	8·57	8·87	8·85	8·53

795. Thus in Class A the United States imports during five years averaged 35·40 per cent of the total imports, and the Canadian imports averaged 18·34 per cent; in Class B, United States 23·72 per cent, Canadian 21·70 per cent; in Class C, United States 11·13 per cent, Canadian 16·57 per cent; in Class D, United States 17·56 per cent, Canadian 34·65 per cent; in Class E, United States 12·19 per cent, Canadian 8·74.

796. It is evident from this analysis :—

1st. That Canada imports a smaller proportion of articles of food and animals than the United States.

2nd. That the imports, by both countries, of articles in a crude state used in the various processes of manufacturing are, proportionately to the whole import, very nearly the same in the five-year period, Canada importing a somewhat smaller proportion than the United States.

3rd. That of articles wholly or partially manufactured, imported for use in manufacturing, Canada imports more in proportion to the whole than the United States do.

4th. That in manufactured articles ready for consumption Canada imports more than a third of her whole imports, while in the United States only about one-fourth of their total imports fall into this class.

5th. That in articles of voluntary use and luxuries, Canada imports about two-thirds the proportionate amount imported by the United States.

This analysis seems to indicate: 1st. That the United States have not succeeded so well as Canada in provisioning their people. 2nd. That both have to draw between one-fourth and one-fifth of their total imports from outside countries in the form of articles in a crude state for use in the various processes of manufacturing. 3rd. That Canada has to draw a larger proportion of her imports in a partially or totally manufactured state for use in home manufacturing than have the United States. 4th. That Canada has not as yet succeeded in becoming as independent of other countries for the supply of her wants in manufactured articles as have the United States. 5th. That the Canadian people do not consume luxuries and articles of voluntary use in as large a proportion as do the people of the United States.

797. The following table gives the percentage of total Customs duty received from each class in both the United States and Canada.

CLASS.	1890.		1891.		1892.		1893.		1894.		1895.	
	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.
A. ....	29·21	21·30	21·11	21·51	5·95	8·64	6·49	7·30	7·73	8·67	16·51	10·28
B. ....	6·24	4·18	6·32	4·74	8·12	5·43	7·15	5·27	4·92	4·95	3·25	5·48
C. ....	9·43	13·67	11·65	13·95	12·84	16·08	14·53	15·41	15·46	15·24	12·61	14·36
D. ....	32·33	40·70	34·48	39·85	44·38	47·35	42·02	48·74	38·95	46·29	35·70	45·62
E. ....	22·79	20·15	26·44	19·95	28·71	22·60	29·81	23·28	32·94	24·85	31·93	24·26

By far the largest part of the Customs duties paid by any one class comes from imported manufactures. Canada raises somewhat more from these

than do the United States. The United States raises a larger proportion from luxuries and articles of voluntary use than does Canada.

798. The next table shows the average rate of *ad valorem* paid on dutiable imports:—

CLASS.	1890.		1891.		1892.		1893.		1894.		1895.	
	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.	U. S.	Can.

E.....	49·16	19·41	53·00	48·76	55·06	49·32	56·49	50·08	63·80	52·69	56·25	32·88

799. The tables following, of which the preceding paragraphs contain an analysis, have been compared on the basis on which similar tables have been compiled by the United States authorities.

The original basis of the divisions is the celebrated report to the British Parliament in 1840, by Hume, the economist. The divisions as adopted by the British authorities have been modified at the suggestion of Edward Atkinson, of Brookline, and others. Of course there are specific items about the classification of which there is reasonable ground for controversy. But for the purpose of enabling those interested to make comparisons, there has been in the following tables no departure from the classification adopted by the United States authorities. The analysis would have been carried further back, but it was found that prior to 1877 the Customs returns are too incomplete to allow of any exactitude in classification.

800. The usefulness of these tables will appear at a glance. Thus, taking articles of luxury and voluntary use, the table shows that these were dutiable in 1877-79 at the rate of 35·42 per cent; that duties have been imposed on this class so that in 1886-88 they were equal to 45·86 per cent and in 1895 to 52·88 per cent; that duties on manufactured articles ready for consumption were in 1877-79, 17·28 per cent, in 1886-88, 26·58 per cent and in 1895, 28·73 per cent; that duties on articles of food and animals were 29·15 per cent in 1877-79, 35·95 per cent in 1886-8 and 23·51 per cent in 1895; that articles in Class A contributed 30·69 per cent of the total duty collected in 1877-79, and only 10·28 per cent in 1895; that Class B contributed less than two-thirds of one per cent of the total duties in 1877-79, and had become in 1895 a factor in the imports sufficient to contribute over 5 per cent of the Customs revenue, having become over one-fifth of total imports in 1895 as against one-tenth in 1877-79. These illustrations will sufficiently indicate the usefulness of these tables.

They also enable the student of our trade and commerce to note the growth or decay of imports of each specific article, by observing the fluctuations in the import.

Thus, undressed hemp in 1877-79 was imported to the value of \$289,678 ; increased to \$554,585 in 1883-85 ; rose to 951,092 in 1889-91 ; fell to 836,804 in 1892-94, and was in 1895, \$622,396.

In 1883 there were 74,604 cwt. imported. In 1893 the import amounted to 198,200 cwt. ; in 1894 it dropped to 102,247 cwt., and in 1895 it rose to 173,439 cwt. So far as Canadian imports are concerned we have the life-history of undressed hemp showing curious ups and downs and suggesting further examination to show why these fluctuations take place, and if anything can be done to make the importations steadier, or whether there is such a connection between undressed hemp and the crop returns as to make the imports of the article an index of the degree of prosperity attendant upon the farming class.

Take raw hides : during the past 16 years we have imported \$29,458,411 of raw hides. In the same time we have exported 1,483,272 head of cattle. It will be an easy calculation for those interested in our cattle trade to make up the value of the hides which have been exported on the living beeve and thus throw light upon the actual effect upon our cattle trade of the scheduling of our cattle by the British Government, as well as suggest plans by which that effect, if injurious to us, may be reduced to a minimum.

The history of the ups and downs of the cotton manufacture of the country is embalmed in the two lines in Class B, cotton waste and cotton wool. The development of manufactures is seen in the totals of Class B and C, which together, in 1894, amounted to 38,916,663, and in 1879 to \$17,106,434.

The woollen industry has light thrown upon its condition by the study of the nineteen years imports of wool given in Class B, of woollen articles given in Class C, and of manufactured woollen goods given in Class D.

These tables are of use also in enabling persons interested in manufacturing to see to what extent there is a demand, in the event of their thinking of starting any manufacture in Canada.

801. Average annual value of merchandise, grouped according to degree of manufacture and uses, imported into Canada for home consumption, in three-year periods during the years 1877-94 and for the year 1895 :—

comparative summary of the value of the principal articles im-  
home consumption in the last four years will be found in the  
table, dutiable goods being distinguished from those admitted  
table formerly related to the total quantities imported, but in  
show more clearly what the requirements of the country have  
as been changed to apply only to articles for home consumption.

Grand totals.....	116,978,943	121,705,030	113,093,983	105,252,511

There was a decrease of \$4,221,527 in the value of dutiable goods imported for consumption during 1895 as compared with 1894, in the free goods \$945 and in the total amount imported of \$7,841,472.

There are at present, unfortunately, no means existing whereby the value of trade annually carried on between the provinces can be ascertained, but it is certainly much larger than is generally understood, and to a certain extent has taken the place of what was formerly a foreign trade. Its value was estimated a few years ago in a paper, the gist of which is here given:—In 1854, the Reciprocity Treaty with the United States was brought into operation, and this diverted into United States channels so much of what interprovincial trade did exist that the value of the direct trade between the Provinces in 1865—the last year of the treaty—was less by half in value of dollars than that in 1853—the year immediately preceding the termination of the treaty; while in the last few years of the treaty the total value of trade between the Maritime Provinces and the Canadas averaged not more than \$1,000,000 a year. This practically brings us to the year of Confederation, and by this time the Grand Trunk Railway Company, and other trading corporations, had done their utmost to stimulate interprovincial trade, and not without some reward, though in the first year of Canada's national life the interprovincial trade was only equal in value to some \$500,000, while the trade between the North-west and the Provinces along the St. Lawrence was practically nil.

Canada started at Confederation with an interprovincial trade of only an annual value of \$4,000,000,

What has been the result of the efforts made? It is hardly possible to say in actual figures. The trade between Ontario and Quebec, for instance, is very large. Every visitor to Montreal and Toronto knows what an immense interchange of commodities is continually in progress, but exact estimates are difficult to make, and for the purposes of this investigation these two provinces are taken as one division of the Dominion. In the same way the interprovincial trade between the Maritime Provinces themselves is very great, but in the present paper those provinces are also treated as one division. Taking, therefore, only the trade between the Maritime group of provinces on the one hand and Ontario and Quebec on the other, and between the whole of Eastern Canada on the one hand and the whole of Canada which lies west of the Lake of the Woods on the other, we have these totals as the value of the annual interprovincial trade actually in sight:—

Westward from Maritime Provinces . . . . .	\$26,000,000
Between Eastern Provinces <i>via</i> United States Railways . . . . .	1,500,000
Between Eastern and Western Canada by Canadian Pacific and United States Railways . . . . .	24,500,000
Eastward from Ontario and Quebec . . . . .	28,000,000
Total interprovincial trade in sight . . . . .	<u>\$80,000,000</u>

The value as calculated in 1889 was \$80,000,000 per annum, which was \$4.25 per ton of the shipping engaged in the coasting trade. Assuming that this tonnage affords a rough and ready measure of the interprovincial trade, the value of this trade in 1894 would be \$113,000,000.

809. While, however, there is no doubt that the interprovincial trade ought to be taken into consideration when dealing with the trade of the country, yet, being practically an unknown quantity, it has to be put on one side, leaving the figures of the external trade as the only ones available, either for information or comparison. It can be easily understood, however, that, owing to the continual fluctuations in price, values alone cannot give a correct idea of the extent to which the trade of the country is increasing or decreasing, and in order to obtain some information concerning its volume as well as its value, the following tables are given, in which the actual increase or decrease in value is divided into two parts, the one representing the variation in volume and the other in price. For example, take the article cotton wool, as given in the next table, the imports of which in 1894 amounted 31,435,347 pounds, valued at \$2,610,538, while those of 1895 were 45,325,832 pounds, valued at \$2,853,987, the value in the latter year being \$243,449 more than in the former. Now, had the quantities been the same as in 1895 the value would have been \$910,000 less, owing to the fall in price, but this decrease in value is offset to the extent of \$1,153,000 by an increase in quantity. The following table is a comparison as to quantity and value of the principal articles of import in 1895 and 1894. Individual calculations for 291 articles have been made, in order to make up the 69 specified articles in the table, and it is considered these are sufficient to justify the assumption that the remaining articles in each class may be taken in the same ratio. It will be seen that not only a fairer, but also a more instructive estimate can be formed of the condition of the trade of the country by this mode of comparison than by the ordinary one of values only.

Other articles.....	14,318,116	14,909,000 +	141,000 -	591,000 -	456,008
Total.....	44,809,853	47,798,000 -	1,054,000 -	2,989,000 -	4,043,613
Animals.....	344,333	404,000 -	63,000 -	60,000 -	123,156
Miscellaneous.....	10,373,493	11,474,000 +	416,000 -	1,101,000 -	685,228
Total imports.....	105,252,511	116,154,000 +	3,061,000 -	10,902,000 -	7,841,672

If prices had remained in 1895 exactly as they were in 1894 there would have been an increase in the value of imports of \$3,061,000, brought about by a corresponding increase in volume, but this increase in volume was offset by a decline in prices to the extent of \$10,902,000, so that the actual decrease amounted to \$7,841,472.

§10. The following summary, which perhaps sets off these results to better advantage, shows that while the year 1895 was marked by a decided increase in the volume of our import trade, it was also marked by a decline in price:—

## SUMMARY OF IMPORTS IN 1895, COMPARED WITH THOSE IN 1894.

ARTICLES.	Value imported in 1895.	MORE OR LESS THAN 1894.		
		Quantity.	Price.	Together.
	\$	\$	\$	\$
Food and drink.....	20,905,922	+ 1,084,000	- 2,408,000	- 1,324,040

814. Following is a comparative statement by countries of the value of imports for home consumption in the years 1894 and 1895. The amount imported for home consumption in 1895 shows a decrease of \$7,841,472, as compared with 1894. The largest decreases were from Great Britain, Germany and all other Spanish possessions, Dutch East Indies and British Guiana, amounting to \$10,316,013. The principle increases were from the United States, Spanish West Indies, British East Indies and Japan. The value per head of population of goods entered for consumption in 1883 was \$21.95, in 1889, \$23.16, in 1890, \$23.54, in 1891, \$23.40, in 1892, \$23.88, in 1893, \$24.53, in 1894, \$22.52, and in 1895, \$20.71. The amount per head is, however, not nearly so large as it used to be, owing to the large increase in home production and interprovincial trade.

§19. Of the total amount of duty collected \$7,006,677, or 39·2 per cent, were collected on goods from Great Britain, and \$6,897,395, or 38·5 per cent, on goods from the United States. This difference being accounted for by the fact that nearly 53 per cent of the imports from the States were free goods, principally raw material, while only 25 per cent of the imports from Great Britain were on the free list. The next largest amounts were collected as follows: On goods from France, \$985,946; from Germany, \$892,546, and from Holland, \$755,251. The duties on imports from the West Indies were affected by the abolition of the sugar duties, and fell from \$1,337,754 in 1891 to \$380,955 in 1895.

§20. The figures in the preceding table must only be taken as indicative of the channels by which goods enter the Dominion, and not as by any means representing the individual consumption of each province. Quebec contains the principal ports of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States; therefore, it is clear that a very large portion of the duty collected is really paid by the other provinces, and it is probable that the largest portion of the duty collected in the Province of Quebec is actually paid by the Province of Ontario. The same remarks are equally applicable to exports, even many products of Prince Edward Island being taken across to the mainland and thence shipped from Nova Scotia and New Brunswick ports, to which provinces they are credited as exports. According to the Trade and Navigation Returns, 86,583 head of cattle were exported from the Province of Quebec in 1895—that is, from the port of Montreal, but over 90 per cent of this number was actually from Ontario.

§21. The following table shows the growth of the imports of raw material since Confederation:—

## IMPORTS OF CERTAIN ARTICLES OF RAW MATERIAL, 1868-95—(HOME CONSUMPTION).

\*Not including Coin and Bullion.

From this table it appears, first, that the per head value of exports of Canada was greater in 1893 than in any previous year with the single exception of 1882, and was \$1.11 more than in 1895. Second, that the per head value in 1895 was 11.6 per cent greater than the average for the twenty-eight years of Confederation. Third, that divided into five-year periods the proportions of foreign produce in the total exports of the Dominion were: 1868-72, 10.68 per cent; 1873-77, 10.03 per cent; 1878-82, 12.24 per cent; 1883-87, 9.54 per cent; 1888-92, 9.06 per cent; 1893, 7.54 per cent; in 1894, 10.07 per cent, and in 1895, 5.71 per cent. Thus the general trend is towards a larger proportion of our exports being our own produce, although in 1892 the proportion of the exports that were of foreign production was considerably more than the ten years previous.

825. Divided into classes according to their sources, the exports of Canada are as under:—

TRADE AND COMMERCE.

827. Out of 91 articles enumerated in the foregoing table there were in 1895, compared with 1894, increases in 48, the principal being in exports of horses, cattle, sheep, fruits, barley, hides, meat, all kinds, and wool. The principal decreases were in exports of butter, cheese, fish, oats, pease, wheat, hay, lumber and timber square.

It will be noted that the exports to the other portions of the British Empire, on the whole, show an increasing proportion, and that those to foreign countries show a decreasing proportion of the whole. Thus exports to the other parts of the Empire were 51·44 per cent of the whole in 1874, and 63·50 per cent in 1894; while exports to foreign countries were 48·56 per cent in 1874 and 36·50 per cent in 1894.

828. The following table gives the destinations of exports of Canadian produce during 1874, 1884, and 1894 :—

STATEMENT SHOWING THE COUNTRIES TO WHICH GOODS, THE PRODUCE OF CANADA, WERE EXPORTED, AND THE VALUE AND PROPORTIONATE VALUE OF THE SAME, IN THE YEARS 1874, 1884 AND 1894.

(Including Coin and Bullion and estimated amount short.)

831. The United States, it appears, take almost all the mineral products exported from this country, and for some time they took the largest proportion of agricultural products, but in consequence of the McKinley tariff, this branch of trade has been very largely diverted to Great Britain, which country in 1892 took 76·27 per cent, in 1893, 77·64 per cent, in 1894, 80·62 per cent, and in 1895, 76·78 per cent of animal and agricultural products, as compared with 17·2 per cent in 1892, 15·60 per cent in 1893, 11·50 per cent in 1894, and 17·20 per cent in 1895, that went to the United States. The shipments of products of the forest to Great Britain appear to be on the decline, but to be increasing to the United States. Exports of the fisheries to Great Britain in 1894 and 1895 show an increase of 95 and 77 per cent respectively as compared with 1892, while there was a decrease to the United States.

832. The following table is a statement of the quantity and value of exports, the produce of Canada, during the two years 1894 and 1895, the principal articles being in detail. Complaints were frequently being made that the classification in use in the Trade and Navigation Returns did not do justice to the manufacturers of Canada. A different classification, therefore, has been adopted, the grouping of some of the articles having been changed. The principal differences are that scrap-iron and salt have been transferred from wherever they were found in "products of the mine," and ashes, pot, pearl, leached and all other, treenails, lathwood, staves, headings, shingles, box shooks, and sawn lumber of all kinds, from "products of the forest" to "manufactures," to which class they belong. All the tables in this chapter, where exports are given by classes, have been changed to suit this re-arrangement.

ports to Great Britain in 1895 exceeded the imports by and were the largest (with the exception of 1893 and 1894) in the Dominion. The imports from the United States exceeded that country by \$22,330,748.

Trade with Great Britain in 1895 amounted to \$92,995,404, United States to \$100,634,915, being less than that of the by \$14,290,701 for Great Britain and an increase of United States.

Trade with the two countries constituted 86·2 of the aggregate trade of Canada as compared with 85·5 per cent in 1894. The trade with Great Britain in 1895 was 41·2 per cent of Canada's total trade, as compared with 40·5 per cent in 1894; that with the United States was 44·9 per cent in 1895 as compared with 44·5 per cent in 1894.

In exports in 1895 Great Britain and the United States took 88·79 per cent as compared with 88·79 per cent in 1894, 91·09 per cent in 1892 and 91·88 in 1891.

835. The following is a comparative statement by countries of the total exports from Canada in 1894 and 1895 :—

Though the annual value of the exports has necessarily varied from time to time it will be seen that there has been a steady increase in the aggregate value at the end of each period, the aggregate of the period ended 1892 showing an increase over that ended in 1872 of 53 per cent.

836. The proportions of the aggregate value of exports to principal countries to the total exports during each period of five years, 1868 to 1892, and for the years 1893, 1894 and 1895, are given below :—

PROPORTIONS TO TOTAL VALUE OF EXPORTS, THE PRODUCE OF CANADA, TO PRINCIPAL COUNTRIES, FOR QUINQUENNIAL PERIODS BETWEEN 1868 AND 1892, AND FOR THE YEARS 1893, 1894 AND 1895.

837. The bulk of the exports has always gone to Great Britain and the United States, and from the foregoing figures it will be found that while the exports to Great Britain have increased 26 per cent, those to the United States have decreased 16 per cent. The proportion of the exports going to Great Britain and the United States to the total exports is increasing, as while during the first two periods it remained about the same, viz., 89 per cent, in the third period it was 89·72 per cent, and in the last two periods 90·73 per cent and 90·98 per cent respectively. The export trade with the British West Indies has steadily declined during the whole period of 23 years, while the proportions of the export trade with other parts of the world have not varied very much.

838. The next table is a comparison of the exports of 1895 with those of 1894, worked out in a similar manner to the comparison of the imports, the details of the method having been given previously in paragraph

EXPORTS OF PRINCIPAL ARTICLES, THE PRODUCE OF CANADA, IN 1895,  
COMPARED AS TO QUANTITY AND VALUE WITH 1894.

(Coin and bullion and estimated amount short not included.)

The above table may be summarised as follows :—

ARTICLES.	Value Exported, 1895.	MORE OR LESS THAN 1894.		
		Quantity.	Price.	Together.
	\$	\$	\$	\$
Animals, living .....	10,111,496	+ 1,359,000	+ 404,000	+ 1,763,645
Articles of food and drink .....	43,555,476	— 33,000	— 2,276,000	— 2,308,249
Sundry raw materials .....	18,014,404	+ 2,131,000	— 683,000	+ 1,446,964
Oils .....	67,690	+ 6,000	— 4,000	+ 2,388
Manufactures .....	25,147,585	+ 4,387,000	+ 3,044,000	+ 1,343,947
Miscellaneous .....	2,631,700	— 34,000	— 585,000	— 619,305
Total .....	99,528,351	— 958,000	— 100,000	— 1,058,504

The condition of the export trade of the last four years is more clearly shown by this method, in the following table, than it could be by a mere statement of actual values :—

	1892.	1893.	1894.	1895.
	\$	\$	\$	\$
Actual value of exports .....	95,684,253	102,006,490	100,586,859	99,528,351
Value at prices of previous year .....	96,734,000	101,946,000	103,906,000	99,627,000
Variation from prices .....	— 1,050,000	+ 61,000	— 3,319,000	— 100,000
“ quantities .....	+ 10,977,000	+ 6,261,000	+ 1,900,000	— 958,000
Actual difference in value .....	+ 9,926,509	+ 6,322,237	— 1,419,637	— 1,058,504

The export trade of 1895 showed a decrease of \$958,000 in its volume and a decrease of \$100,000 due to a decline in prices, making an actual decrease of \$1,058,504 as compared with 1894.

	1892.	1893.	1894.	1895.
	\$	\$	\$	\$

\* Imports for Home Consumption and Exports of Canadian produce only.

839. In order to ascertain in what proportion the changes in a series of years, in the values both of particular items and in the grand total, have been due to an increased or diminished volume of articles or to a variation in their price, tables relating to the exports of Canadian produce have been prepared on a plan suggested some time ago, in the *Journal of the Royal Statistical Society*, by Mr. Stephen Bourne, F.S.S., by which, by means of index numbers, it can be readily seen in what respects the results of the several years correspond to or differ from one another, both as regards quantity and price. The year 1883 has been taken as the year of comparison, because in that year—with the exception of 1892 and 1893—the total trade of the country reached the highest amount since Confederation, and, as long as the conditions of trade are fairly equal, it is not very material which year is used for the purpose. Individual calculations have been

made for 63 distinct articles, in order to make up the several groups in the table, and these furnish a wide enough range for assuming that the remaining articles, many of which cannot, for want of definite information in the Trade and Navigation Returns as to quantities, be so estimated, may be taken in the same ratio as the specified articles are found to yield. The number 1,000 has been taken to represent the value of the exports of 1883, viz., \$87,702,000, and has been divided up into so many numbers as there were specified articles, the values of which made up the sum of \$87,702,000. This 1,000 has also been taken as the number for quantity and volume, and as the index number for value of each article, being divided by that of price, becomes the index number of quantity, the total represents the volume of last year's transactions as compared with the index of value. For example, in 1883 the exports of coal were 430,081 tons, valued at \$1,087,411; in 1895 they were 1,110,567 tons, valued at \$3,578,195; the price per ton being \$2.52 and \$3.22 respectively, or 28 per cent higher in 1895. The value index of 12.3 stands for 1883, but being multiplied by 1.28 we change it into 15.8 to represent the value \$1,385,000, which would have accrued had the price been the same as in 1895. Or, reversing the process, we divide the value index, 40.8 for 1895 by 1.28, giving 31.9 to show the value \$2,807,000, which the coal of that year would have realized had it been sold in 1883, and thus get the ratio of quantity to value for this article. The ease with which, by means of these tables, comparisons can be made, either backwards or forwards, and either of specific articles or of general totals will be appreciated by those who are at all conversant with or interested in such matters.

GOODS, THE PRODUCE OF CANADA, EXPORTED IN 1895 COMPARED

842. The figures below give the actual values and index numbers for the years comprised in the table, and also what the index numbers and values would have been at the prices of 1883, the basis of comparison being still the same :—

ACTUAL INDEX NUMBERS AND VALUES FOR 1882-95, AND THE SAME  
AT PRICES OF 1883.

YEAR.	Index Number	Actual Values	Index Number	At 1883 Prices.
		\$		\$
82	1073	94,137,660	1078	94,541,000
83	1000	87,702,431	1000	87,702,000
84	910	79,833,098	942	82,666,000
85	902	79,131,735	997	87,429,000
86	887	77,756,704	1015	89,053,000
87	923	80,960,900	1082	94,862,000
88	928	81,382,072	1034	90,687,000
89	915	80,272,456	1023	89,753,000
90	972	85,257,586	1054	92,414,000
91	1012	88,801,006	1087	95,300,000
92	1133	99,338,913	1256	110,180,000
93	1206	105,798,257	1334	116,994,000
94	1188	104,161,770	1378	120,853,000
95	1175	103,085,012	1336	117,170,000

By this mode of comparison it would appear that the value of the aggregate trade during the years named would, if the prices of 1883 had been maintained, have been over \$121,984,000 than it actually was.

843. The next table gives what the actual index numbers and values would have been at prices of 1882-95 :—

EXPORTS OF 1883.

Prices of 1882	Index No. 1008 =	\$ 88,404,000
" 1883	" 1000 =	87,702,000
" 1884	" 980 =	85,948,000
" 1885	" 918 =	80,510,000
" 1886	" 888 =	77,879,000
" 1887	" 875 =	76,739,000
" 1888	" 912 =	79,984,000
" 1889	" 946 =	82,966,000
" 1890	" 938 =	82,264,000
" 1891	" 924 =	81,037,000
" 1892	" 929 =	81,475,000
" 1893	" 905 =	79,370,000
" 1894	" 885 =	77,616,000
" 1895	" 880 =	77,178,000

844. From the following table it will be seen that if the exports of 1895, \$103,085,000, are estimated at the export prices of 1883 they would amount \$117,170,000, or \$14,085,000 more than they actually were. Adding this amount to the actual difference, \$15,383,000, it will give a total increase \$29,468,000 over exports of 1883 :—

The following table of prices of the principal articles of export, and the values in the Trade and Navigation Returns, will afford some idea of the fluctuations during the past thirteen years. As prices are given for all the principal articles of export, this table may be consulted in connection with that on pages 551-2, as it supplies details of the variation in prices as shown in the aggregate. The decline in value of all the principal articles of export is very noticeable. It will be seen that of animals exported, horses reached their highest average in 1890, being then \$85.32 per head, but they declined in price in succeeding years till 1894 and 1895, when they reached their highest average with the exception of 1890; that horses reached their highest average in 1884 and have been going down ever since, the price of 1895 being the lowest of all the years given in the table; that swine reached their highest average in 1895, and have varied in price since 1890, that of 1894 being lower than that of seven years and higher than that of four years; that fish reached their highest average in 1893 and 1895. Taking fish together, the highest average in 1890, when an assortment of the various kinds by the units in the table would have been valued at \$27.27, while the same assortment in 1895 would have a value of \$24.72. The average of 1895 is higher than the average of the thirteen years by \$2.81. It has not yet been found possible to give a similar table of import prices, owing to the uncertain and indefinite definition of quantities:—

back, in the March number of the *Journal of the Royal Statistics*: Of the six groups of commodities five were lower than only one—sundry materials, thanks to the spurt in hides and as a little higher. The index number of all 45 articles is the and so were the index numbers of three groups, viz, l, minerals and textiles, while animal food had been lower in : 1849–52. Twelve articles out of the 45 contained in my in the course of the year records of lowest prices, viz, barley, re, Java sugar, manilla hemp, merino wool, nitrate and crys—the lowest of the century, and pork, bacon and potatoes the the last forty-three years.

allowing table gives the total imports and exports of the om and her possessions for the year 1894, together with the ad in each case, taken from official sources :—

The United Kingdom and India the aggregate value of any other British colony, the Colonies Settlements, Bermuda, Labuan, and the Straits Settlements, the external trade of the United Kingdom and India, the external trade of any other British possession, the external trade of the Colonies Settlements, Bermuda, Labuan, and the Straits Settlements, however, be much reduced if federal trade is introduced, as in that case the intercolonial trade would be much increased. The value of diamonds exported through the Cape of Good Hope, the value of the exports of the Cape of Good Hope.

The value of the trade of the United Kingdom and her possessions, as compared with 85,676,582,839 in 1894, as compared with 85,676,582,839 in 1894.

1893, being a decrease of \$65,914,719. The total imports exceeded the total exports by \$442,524,458. The excess of imports into the United Kingdom amounted to \$654,853,523.

851. The following is a list of British possessions in which imports and exports were respectively in excess in 1894 :—

## Imports exceeded Exports in

United Kingdom,	Windward Islands,
Straits Settlement,	Bermuda,
Labuan,	Bahamas,
Ceylon,	Jamaica,
Mauritius,	Western Australia,
Natal,	Newfoundland,
St. Helena,	Canada,
Sierra Leone,	Trinidad.

During the year 1894 the imports of Great Britain, from foreign countries, amounted to \$1,530,238,867, and those from British possessions amounted to \$457,039,208. The exports of Great Britain to foreign countries in the same year amounted to \$949,972,890 and those to British possessions were \$382,451,662. The imports from the British possessions were 23 per cent of the total imports of the United Kingdom and the exports were 28·7 per cent of the total exports. The comparison with previous years is as follows :—

## PERCENTAGE OF IMPORTS AND EXPORTS OF THE UNITED KINGDOM FROM AND TO BRITISH POSSESSIONS AND FOREIGN COUNTRIES.

	British Possessions.	Foreign Countries.
	p. c.	p. c.
1894—Great Britain—Imports from . . . . .	23·0	77·0
Exports to . . . . .	28·7	71·3
1893— " Imports from . . . . .	22·6	77·4
Exports to . . . . .	28·3	71·7
1892— " Imports from . . . . .	23·6	76·4
Exports to . . . . .	27·8	72·2
1891— " Imports from . . . . .	22·8	77·2
Exports to . . . . .	30·2	69·8
1890— " Imports from . . . . .	22·8	77·2
Exports to . . . . .	28·9	71·1

852. The total value, and the value per head, of the imports and exports of some of the principal foreign countries in the latest available years, are

given in the following table. The figures have been taken from the most reliable sources, and the calculations made in this office :—

## IMPORTS AND EXPORTS OF FOREIGN COUNTRIES.

\* Total imports and exports.

853. In proportion to population the largest trade among foreign countries is done by the Netherlands, the amount per head being considerably larger than that of any other country, the countries next in order being Switzerland, Belgium, Denmark, Chili, Uruguay and Norway, but, with the exception of the Netherlands, the per capita value of the trade in the Australasian colonies is higher than elsewhere. In this connection, however, the remarks in paragraph 849 must not be overlooked. Exports exceeded imports in Russia, Austro-Hungary, Servia, Egypt, Japan, Mexico, Uruguay, Brazil, Venezuela, Bulgaria and United States.

The total trade of the United Kingdom is the largest in the world, Germany, the United States and France taking second, third and fourth places.

the following is the order in which the principal countries doing the greatest trade stand, with the amount of the trade in each case, according to the latest available figures :—

United Kingdom, 1894.....	\$3,319,702,627
Germany, 1893.....	1,721,907,000
United States, 1895.....	1,524,554,689
France, 1893.....	1,380,206,133
Netherlands, 1894.....	1,014,231,300
India, 1895.....	974,564,088
Austro-Hungarian Empire, 1893.....	598,428,000
Belgium, 1893.....	570,587,467
Russia, 1893.....	524,276,266
Italy, 1893.....	419,589,400

854. The United Kingdom takes the largest share of the exports of the United States; in 1860 the proportion was 52·50 per cent, and in 1895, 42 per cent; in the latter year 10·22 per cent went to other British possessions, making a total export to British possessions of 58·64 per cent. In return for this, however, the States only imported 21·76 per cent from the United Kingdom for 1895 as compared with 39·17 per cent in 1860, and 10·59 per cent from other British possessions as compared with 10·84 per cent in 1860, so that the imports from the United Kingdom and British possessions into the United States have decreased 35·3 per cent since 1860, while the proportion of exports remained about the same.

855. The imports into British possessions during 1893 amounted to \$122,097,825, of which \$534,574,479 came from the United Kingdom and \$587,523,346 from other countries; corresponding figures for 1894 were \$103,318,214, of which \$559,516,223 were imports from the United Kingdom and \$479,801,991 from other countries, showing an increase from the United Kingdom of \$24,941,744, but a decrease from other countries of \$107,721,355, and a total decrease of \$82,779,611. The proportion of the amount imported from Great Britain to the total imports in 1894 was 53·83, in 1893, 47·64 per cent.

856. The proportion of imports from British possessions to the total imports into the United Kingdom has remained much about the same, with the exception of 1894, as shown by the following figures :—

PROPORTION OF IMPORTS FROM BRITISH POSSESSIONS TO TOTAL IMPORTS INTO THE UNITED KINGDOM.

	Per cent.

857. The proportion of exports to Great Britain to the total colonial exports has, however, steadily decreased during the same period. In 1891 there was a further decrease, the proportion being decidedly lower than in the preceding year. In 1893 and 1894 they have remained about the same.

PROPORTION OF EXPORTS TO THE UNITED KINGDOM TO THE TOTAL EXPORTS FROM BRITISH POSSESSIONS.

	Per cent.
1871 .....	50.45
1875 .....	49.47
1880 .....	46.46
1884 .....	43.33

1893 .....	28.3
1894 .....	28.7

859. The total foreign trade of British possessions has increased very largely since 1871, and, as will be seen from the figures below, the trade with foreign countries has increased in a greater ratio than that with the United Kingdom, which has been steadily decreasing. There was an increase, however, of 3.62 per cent in the proportion in 1888 which was maintained in 1889, but which fell off over 1 per cent in 1890, and still further declined in 1891. In 1892 there was an increase over 1891 of 1.68

per cent, a decrease of 2·65 per cent in 1893 as compared with the previous year, and an increase in 1894 over 1893 of 2·59 per cent.

PROPORTION OF THE TRADE WITH THE UNITED KINGDOM TO THE  
TOTAL FOREIGN TRADE OF BRITISH POSSESSIONS.

860. The following table taken, with the exception of the figures for 1892, 1893 and 1894, which have been added in this office, from Mulhall's "Fifty Years of National Progress," p. 30, shows the distribution of the trade of the United Kingdom at various dates, and shows also that the trade with India and the Colonies has increased in a much greater degree than that with foreign countries:—

DISTRIBUTION OF THE TRADE OF THE UNITED KINGDOM, 1840-1894.

861. The total value of goods not the produce of Canada, exported during 1895, was \$6,485,043, of which amount \$4,085,625 worth were exported via the St. Lawrence and \$222,484 went in bond to other countries through the United States, from Ontario, Quebec and Manitoba. Of the remainder \$567,475 worth were exported from Nova Scotia and \$152,546 from New Brunswick.

862. The value of foreign goods imported into Ontario and Quebec in bond through the United States in 1895 amounted to \$14,829,581, of foreign goods purchased in the United States markets to \$4,216,115, and of goods the produce of the United States to \$44,230,862. The value of goods imported into the two provinces via the St. Lawrence was \$22,167,973. There are no official returns giving similar information concerning the other provinces.

863. The only articles manufactured in Canada, about which any particulars of consumption in the country are available, are those on which excise duty is payable, and concerning which some particulars are now given.

864. The number of proof gallons of spirits manufactured in 1895 was 2,605,787 as compared with 1,608,344 gallons in 1894, being an increase of 997,443 gallons, and the quantity taken for consumption was 2,509,019 gallons, being a decrease of 240,099 gallons as compared with 1894, and was 221,915 gallons less than the average consumption of ten years. The quantity taken for consumption during the last ten years has been :—

	Proof Galls.
1886 .....	2,412,818
1887 .....	2,864,935
1888 .....	2,326,327
1889 .....	2,960,447
1890 .....	3,521,194
1891 .....	2,687,664
1892 .....	2,545,935
1893 .....	2,731,896
1894 .....	2,749,169
1895 .....	2,509,019
Average for ten years .....	2,730,934

The increase in the quantity of spirits manufactured in 1890 was attributable in part to the withdrawal from the market of methylated spirits for other purposes than the mechanical arts, and in part to distillers paying duty during June, 1890, upon spirits to be held in stock, in view of the provisions as to maturing of spirits which came into force on 1st July, 1890. In consequence of this, the quantity in stock on 1st July, 1891, was the largest on record, but the production has since decreased and is now normal, except in so far as it is affected by the extensive smuggling systematically carried on in the Gulf of St. Lawrence.

In the manufacture of the above mentioned 2,605,787 proof gallons of spirits, 45,110,118 pounds of grain were used. In 1894, the 1,608,344 gallons required 27,791,370 pounds of grain.

865. The quantity of malt manufactured during the year was 43,645,516 pounds and entered for consumption 50,659,627 pounds, a decrease, as compared with 1894, of 3,813,489 pounds in the quantity manufactured, and an increase of 651,579 pounds in the quantity entered for consumption. In addition to the above 1,826,252 pounds of malt were imported for home consumption. The quantity of malt liquor manufactured was 17,628,815

The quantity of malt taken for consumption during the last ten years has been :—

	Lbs.
1886.....	37,604,708
1887.....	42,630,440
1888.....	48,640,467
1889.....	51,111,429
1890.....	54,974,013
1891.....	57,909,201
1892.....	46,425,882
1893.....	50,082,751
1894.....	51,311,206
1895.....	50,659,627

Average for ten years..... 49,134,972

It will be seen that the consumption suddenly dropped during 1892, owing to the increase of duty on malt. There was an increase in 1895 of 4,655 pounds above the average of ten years.

There was a decrease of 234,137 pounds in the quantity of tobacco taken for consumption as compared with 1894, and the amount was also below the average of thirteen years, as shown by the following figures :—

The amount of tobacco entered for consumption in Canada, 1883-95.

	Lbs.
1885.....	8,965,416
1884.....	10,072,745
1885.....	11,061,589
1886.....	8,507,216
1887.....	8,816,593
1888.....	9,248,034
1889.....	9,749,213
1890.....	9,875,337
1891.....	9,778,708
1892.....	9,992,186
1893.....	10,127,871
1894.....	10,002,347
1895.....	9,768,210

Total..... 125,965,465

Average for thirteen years..... 9,689,651

The quantity of Canadian tobacco taken for use during the last ten years has been :—

	Lbs.
1883.....	377,197
1884.....	328,801
1885.....	495,721
1886.....	399,691
1887.....	517,816
1888.....	676,335
1889.....	784,405
1890.....	681,613
1891.....	371,088
1892.....	473,301
1893.....	583,537
1894.....	904,835
1895.....	596,741

Total..... 7,190,084

Average for thirteen years..... 553,083

The consumption of Canadian tobacco, therefore, in 1895, was 43,658 pounds above the average of thirteen years.

868. The following is a statement of the number of cigars taken for consumption during the last eleven years:—

	Number.
1885.....	78,869,878
1886.....	92,046,289
1887.....	85,974,833
1888.....	90,783,558
1889.....	92,589,529
1890.....	98,976,117
1891.....	101,142,481
1892.....	104,538,791
1893.....	114,868,809
1894.....	115,440,480
1895.....	106,151,294
Total.....	1,085,162,340
Average for eleven years.....	98,651,122

It will be seen that the consumption has steadily increased during the years 1888 to 1894, but there was a decrease of 9,309,186 in the number as compared with the years 1894 and 1895; and the number consumed in 1895 was 7,480,172 above the average of eleven years.

869. According to the report of the Department of Inland Revenue, the following has been the annual consumption per head in the Dominion, since Confederation, of spirits, wine, beer and tobacco:—

YEAR.	Spirits.	Wine.	Beer.	Tobacco.
	Galls.	Galls.	Galls.	Lbs.
1867.....	1.62	0.10	1.97	1.81
1868.....	1.60	0.17	2.27	1.74
1869.....	1.12	0.11	2.29	1.75
1870.....	1.43	0.19	2.16	2.19
1871.....	1.58	0.26	2.49	2.05
1872.....	1.72	0.26	2.77	2.48
1873.....	1.68	0.24	3.19	2.60
1874.....	1.99	0.29	3.01	2.57
1875.....	1.39	0.15	3.09	1.91
1876.....	1.20	0.18	2.45	2.32
1877.....	0.97	0.10	2.32	2.05
1878.....	0.96	0.10	2.17	1.98
1879.....	1.13	0.10	2.21	1.95
1880.....	0.71	0.08	2.25	1.94
1881.....	0.92	0.10	2.29	2.03
1882.....	1.01	0.12	2.75	2.15
1883.....	1.09	0.13	2.88	2.28
1884.....	1.00	0.12	2.92	2.48
1885.....	1.13	0.11	2.64	2.62
1886.....	0.71	0.11	2.84	2.05
1887.....	0.75	0.09	3.08	2.06
1888.....	0.64	0.09	3.25	2.00
1889.....	0.78	0.10	3.26	2.15
1890.....	0.88	0.10	3.36	2.14
1891.....	0.74	0.11	3.79	2.29
1892.....	0.70	0.10	3.52	2.29
1893.....	0.74	0.09	3.48	2.31
1894.....	0.74	0.09	3.72	2.26
1895.....	0.67	0.09	3.47	2.16
Average.....	1.05	0.14	2.88	2.17

The above figures go to show that the consumption of spirits in 1895 was decidedly less than it was in 1867. The consumption of spirits, beer and tobacco in 1895 decreased, and wine remained the same.

870. The average amount per head paid annually in Canada for duty on spirits since Confederation has been \$1.08, and on tobacco 47 cents; on beer and wine it only amounted to 12 and 7 cents in each case. It is not possible to obtain any correct figures regarding the actual consumption in each province, for the province that has the greatest number of breweries and distilleries will show the largest consumption, owing to the duty being frequently paid within the province, while the material is exported to and consumed in other provinces.

871. The following table gives the imports and exports at each port in Canada, with the duties collected, in 1895:—

IMPORTS AND EXPORTS AT EACH PORT IN CANADA, 1895.

872. The ports at which customs duty exceeding \$500,000 in amount was collected were as follows :—

Montreal.....	\$5,983,342
Toronto.....	3,721,327
Halifax.....	800,133
St. John, N.B.....	745,542
Quebec.....	723,372
Victoria, B.C.....	603,256
Hamilton.....	575,983
	<hr/>
	\$13,152,955

This forms about 74 per cent of the total duty collected.

873. The following is a statement of the total values of principal articles imported and exported by Canada in 1895 to and from each of the countries named below :—

### BRITISH EMPIRE.

#### EXPORTS TO GREAT BRITAIN.

Cattle, \$6,797,615 ; horses, \$755,506 ; sheep, \$1,253,399 ; other animals \$6,301 ; barley, \$11,961 ; Indian corn, \$732,498 ; oats, \$71,623 ; peas, \$1,184,883 ; rye, \$27,510 ; wheat, \$7,265,246 ; other grain, \$14,193 ; bran, \$66,461 ; oatmeal, \$265,320 ; wheat flour, \$448,503 ; extract of hemlock bark, \$114,734 ; phosphates, \$29,600 ; fish and products of, \$2,980,697 ; apples, \$1,659,486 ; furs and skins, undressed, \$2,312,685 ; hay, \$492,683 ; leather, sole and upper, \$1,103,030 ; agricultural implements, \$299,095 ; other manufactures of iron and steel, \$107,177 ; copper, all kinds, \$103,637 ; asbestos, \$118,852 ; nickel, \$69,877 ; musical instruments, \$188,501 ; oil-cake, \$85,581 ; butter, \$541,320 ; cheese, \$15,086,222 ; eggs, \$524,577 ; bacon and hams, \$3,798,341 ; canned meats, \$314,841 ; meats, other and lard, \$601,662 ; clover and grass seed, \$637,495 ; pine deals, \$2,367,152 ; spruce and other deals, \$4,610,219 ; deal ends, \$454,993 ; planks and boards, \$496,814 ; lumber, all other (n.e.s.), \$124,663 ; timber, square, \$1,929,193 ; sashes, doors and blinds, \$130,790 ; matches and match splints, \$124,395 ; wood pulp, \$251,848. Total exports, \$61,856,990.

#### IMPORTS FROM GREAT BRITAIN.

874. Ale, beer and porter, \$91,266 ; army and military stores, &c., \$547,247 ; books, periodicals, &c., \$333,080 ; buttons, \$42,531 ; carriages, all kinds and parts of, \$109,370 ; cement, \$133,155 ; bituminous coal, \$101,172 ; coffee, green, \$152,206 ; cotton and manufactures of, \$3,213,012 ; curtains, \$165,057 ; drugs, dyes, &c., \$852,679 ; earthenware and china, \$377,326 ; embroideries, \$42,350 ; fancy goods, \$922,598 ; flax, hemp and jute manufactures, \$1,761,392 ; fruits, \$225,432 ; furs and manufactures of, \$494,470 ; glass and manufactures of, \$231,058 ; gloves and mitts, \$267,574 ; gutta-percha, India rubber and manufactures of, \$192,582 ; hats, caps, bonnets and materials, \$869,361 ; leather and manufactures of, \$112,757 ; brass and

manufactures of, \$59,791 ; copper and manufactures of, \$63,932 ; gold, silver and manufactures of, including coin and bullion, \$129,640 ; iron and steel, manufactures of, \$3,094,277 ; lead and manufactures of, \$101,961 ; tin and manufactures of, \$845,084 ; zinc and spelter and manufactures of, \$38,267 ; miscellaneous metals, minerals and manufactures of, \$381,847 ; nets, seines, fishing lines and twines, \$201,314 ; oils, \$340,256 ; oil-cloth \$154,584 ; paints and colours, \$187,728 ; paper and manufactures of, \$285,293 ; rags, \$67,753 ; salt, \$264,301 ; settlers' effects, \$396,957 ; silk and manufactures of, \$1,725,552 ; spirits and wines, \$402,398 ; tea, \$1,057,936 ; umbrellas, parasols, &c., \$185,421 ; wool and manufactures of, \$6,825,505. Total imports, \$31,138,414.

## EXPORTS TO AUSTRALASIA.

875. Fish, \$82,456 ; agricultural implements, \$136,401 ; musical instruments, \$13,457 ; wood and manufactures of, \$94,925. Total exports, \$428,267.

## IMPORTS FROM AUSTRALASIA.

876. Wool, \$71,459 ; tin in blocks, pigs and bars, \$5,056. Total imports, \$117,941.

## EXPORTS TO BRITISH AFRICA.

877. Agricultural implements, \$25,321 ; musical instruments, \$2,552 ; wood and manufactures of, \$35,313. Total exports, \$72,910.

## IMPORTS FROM BRITISH AFRICA.

878. Wool, \$89,917. Total imports, \$96,059.

## EXPORTS TO BRITISH EAST INDIES.

879. Valued at \$4,132.

## IMPORTS FROM BRITISH EAST INDIES.

880. Rice, \$93,863 ; coffee, green, \$7,623 ; tea, \$86,930 ; sugar, \$23,688 , castor oil, \$6,995, Total imports, \$233,345.

## EXPORTS TO BRITISH GUIANA.

881. Breadstuffs, \$38,604 ; coal, charcoal and cinders, \$20,481 ; fish, \$210,390 ; potatoes, \$35,881 ; planks and boards, \$14,420. Total exports, \$346,430.

## IMPORTS FROM BRITISH GUIANA.

882. Molasses, \$14,479 ; sugar, \$143,269 ; rum, \$11,467. Total imports, \$173,412.

## EXPORTS TO BRITISH WEST INDIES.

883. Animals, \$42,883; breadstuffs, \$183,699; coal, &c., \$20,555; drugs, dyes, &c., \$22,226; fish, \$1,206,070; hay, \$12,375; leather and manufactures of, \$14,695; musical instruments, \$3,257; provisions, \$32,769; sugar and molasses, \$9,237; potatoes, \$66,290; tobacco and manufactures of, \$35,081; planks and boards, \$107,500; shingles, \$18,343; other manufactures of wood, \$28,343. Total exports, \$1,857,017.

## IMPORTS FROM BRITISH WEST INDIES.

884. Bananas, \$7,647; coffee, green, \$98,932; cocoanuts, \$10,127; cocoa beans, shells and nibs, \$12,898; molasses, \$467,203; oranges and lemons, \$3,646; salt, \$21,318; sugar, \$533,328; rum, \$8,411; bullion and coin, gold and silver, \$34,294; hides, raw, &c., \$12,050. Total imports, \$1,239,629.

## EXPORTS TO NEWFOUNDLAND.

885. Animals, \$89,378; oats, \$69,220; pease, \$10,157; wheat flour, \$398,446; oatmeal, \$8,373; bran, \$3,733; coal, \$177,254; cotton manufactures, \$12,983; drugs, dyes, &c., \$15,952; apples, \$19,298; hay, \$30,326; sole and upper leather, \$148,069; boots and shoes, \$45,509; iron and steel and manufactures of, \$49,283; butter, \$108,766; cheese, \$9,785; eggs, \$4,523; meats, \$79,529; sugar and molasses, \$46,232; tobacco and manufactures of, \$18,673; potatoes, \$15,864; canned vegetables, \$8,433; wood and manufactures of, \$64,596; wool and manufactures of, \$22,137. Total exports, \$1,837,996.

## IMPORTS FROM NEWFOUNDLAND.

886. Fish, \$624,207; Furs and skins, the produce of fish and marine animals, \$37,371; fish oil, \$44,017. Total imports, \$740,261.

## FOREIGN COUNTRIES.

## EXPORTS TO ARGENTINE REPUBLIC.

887. Agricultural implements, \$40,341; ships, \$15,440; planks and boards, \$204,122; joists and scantlings, \$17,365; other lumber, \$219,761. Total exports, \$502,520.

## IMPORTS FROM ARGENTINE REPUBLIC.

888. Value of imports amount to \$23,604.

## EXPORTS TO AUSTRIA, NIL.

IMPORTS FROM AUSTRIA.

889. Buttons, \$19,843 ; earthenware, china and graniteware, \$10,750 ; fancy goods, \$5,817 ; fruits, dried, prunes and plums, \$32,826 ; glass and manufactures of, \$20,706 ; gloves and mitts, \$5,562 ; leather gloves and other, \$4,825 ; hides and skins, \$4,866 ; tobacco pipes, cigar holders and cases, &c., \$36,868. Total imports, \$178,394.

EXPORTS TO BELGIUM.

890. Cattle, \$163,150 ; buckwheat, \$2,018 ; pease, \$12,874 ; wheat, \$18,006 ; hay, \$7,089 ; fish, \$4,103 ; wood, all kinds, \$16,172. Total exports, \$251,402.

IMPORTS FROM BELGIUM.

891. Cement, \$49,475 ; cotton and manufactures, \$3,762 ; glass and manufactures of, \$334,962 ; muskets, rifles and other firearms, \$19,467 ; zinc in blocks, pigs or sheets, \$21,409 ; other manufactures of iron and steel, \$28,108 ; paints and colours, \$9,624 ; wool and manufactures of, \$13,053. Total imports, \$451,697.

EXPORTS TO BRAZIL.

892. Fish, \$584,701 ; ships, \$9,160 ; wood and manufactures of, \$11,791. Total exports, \$612,639.

IMPORTS FROM BRAZIL.

893. Coffee, green, \$91,457. Total imports, \$91,548.

EXPORTS TO CHINA.

894. Cotton and manufactures of, \$310,122 ; planks and boards, \$32,480. Total exports, \$367,853.

IMPORTS FROM CHINA.

895. Rice, \$76,963 ; crude opium, \$76,287 ; oils, \$7,915 ; spirits and wines, \$9,075 ; silk and manufactures of, \$6,820 ; sugar, \$122,382 ; tea, \$584,056. Total imports, \$942,493.

EXPORTS TO DUTCH EAST INDIES, NIL.

IMPORTS FROM DUTCH EAST INDIES.

896. Sugar, \$360, 92.

## EXPORTS TO FRANCE.

897. Canned lobsters, \$108,753; agricultural implements, \$24,771; spruce and other deals, \$85,665; other wood and manufactures of, \$47,419; pease, \$6,307. Total exports, \$335,282.

## IMPORTS FROM FRANCE.

898. Books, periodicals, &c., \$55,033; cotton and manufactures of, \$60,837; drugs, dyes, &c., \$75,284; earthenware and china, \$18,722; fancy goods, \$108,805; fish and products of, \$22,486; fruits and nuts, dried, \$51,324; glass and manufactures of, \$32,651; gloves and mitts, \$136,097; hides, raw, \$46,466; leather and manufactures of, \$42,601; metals and minerals and manufactures of, \$66,172; musical instruments and parts of, \$18,616; oils, \$23,503; optical instruments, &c., \$17,289; perfumery, all kinds, &c., \$46,743; precious stones and imitations of, \$9,302; seeds and bulbous roots, \$13,743; silk and manufactures of, \$101,505; spirits and wines, \$517,255; tobacco pipes, &c., \$45,748; wool and manufactures of, \$630,327. Total imports, \$2,636,328.

## EXPORTS TO GERMANY.

900. Buckwheat, \$82,046; Indian corn, \$60,423; pease, \$26,554; wheat, \$33,207; fruits, dried, \$120,770; canned lobsters, \$4,420; hay, \$9,084; agricultural implements, \$39,471; asbestos, \$27,286; other metals and minerals and manufactures of, \$38,004; cabinet organs, \$38,882; clover and grass seed, \$61,515. Total exports, \$626,976.

## IMPORTS FROM GERMANY.

901. Books, periodicals, &c., \$34,650; brooms and brushes, \$19,507; buttons, \$24,952; cotton and manufactures of, \$118,189; drugs, dyes, &c., \$143,685; earthenware and china, \$70,956; fancy goods, \$208,167; furs and manufactures of, \$257,346; glass and manufactures of, \$169,563; gloves and mitts, \$194,423; leather and manufactures of, \$54,821; gold and silver and manufactures of, including coin and bullion, \$43,514; iron and steel and manufactures of, \$284,288; metals and manufactures of, \$96,020; musical instruments and parts of, \$45,977; paints and colours, \$119,304; paper and manufactures of, \$47,767; silk and manufactures of, \$87,226; sugar, \$1,205,779; tobacco pipes, &c., \$18,410; wood and manufactures of, \$27,234; wool and manufactures of, \$652,021. Total imports, \$4,983,384.

## EXPORTS TO GREECE, NIL.

## IMPORTS FROM GREECE.

902. Currants, dried, \$67,505; other fruits, \$2,848. Total imports, \$74,291.

## EXPORTS TO HOLLAND.

903. Buckwheat, \$21,862; pease, \$41,451; fruits, dried, \$25,070; asbestos, \$2,800; clover and grass seed, \$1,916; ships, \$11,760; planks and boards, \$12,430. Total exports, \$140,264.

## IMPORTS FROM HOLLAND.

904. Packages, \$80,746; plants and trees, \$11,883; precious stones, diamonds, unset, \$19,888; rennet, \$5,390; gin, \$106,399; tobacco, unmanufactured, \$5,196. Total imports, \$247,468.

## EXPORTS TO ITALY.

905. Fish, \$33,790. Total exports, \$34,325.

## IMPORTS FROM ITALY.

906. Asphaltum or asphalt, crude, \$29,870; drugs, dyes and medicines, &c., \$20,513; fruits and nuts, dried, \$6,379; fruits, green, oranges and lemons, \$223,581; oils, \$3,374; gin, \$8,465; tobacco, unmanufactured, \$23,476. Total imports, \$339,501.

## EXPORTS TO JAPAN.

907. Flour, \$2,500; butter, \$1,024; planks and boards, \$4,664. Total exports, \$10,307.

## IMPORTS FROM JAPAN.

908. Rice, \$20,446; china and porcelain, \$8,208; fancy goods, \$5,867; oranges and lemons, \$2,333; paper and manufactures of, \$2,093; silk and manufactures of, \$142,564; tea, \$1,338,052; wood and manufactures of, \$4,133; coffee, green, \$6,722. Total imports, \$1,572,937.

## EXPORTS TO SPAIN.

909. Spruce and other deals, \$29,761; deal ends, \$1,971; planks and boards, \$1,066. Total exports, \$34,101.

## IMPORTS FROM SPAIN.

910. Raisins, \$230,791; other dried fruits, \$5,324; wines, except sparkling, \$97,069. Total exports, \$420,155.

## ANNUAL YEAR-BOOK.

### EXPORTS FROM POSSESSIONS, OTHER THAN S. W. INDIES.

Exports of \$13,722: laths, palings and pickets, \$1,254;  
Total exports, \$15,810.

### IMPORTS INTO POSSESSIONS, OTHER THAN S. W. INDIES.

Imports of raw cotton and manufactures of, \$4,728. Total

### EXPORTS TO SPANISH WEST INDIES.

Exports of \$4,134; flour, \$12,605; coal, \$17,832; fish  
and manufactures of, \$8,736; potatoes, \$158,555;  
shooks, \$1,556. Total exports, \$1,453,368.

### IMPORTS FROM SPANISH WEST INDIES.

Imports of sugar, \$3,436,012; molasses, \$173,744; tobacco and  
Total imports, \$3,964,224.

### EXPORTS TO SWITZERLAND.

Exports of \$40.

### IMPORTS FROM SWITZERLAND.

Imports of, \$19,644; curtains, \$23,780; embroid-  
eries, \$12; silk and manufactures of, \$81,021;  
wool and manufactures of, \$5,881. Total

### EXPORTS TO THE UNITED STATES.

Exports of, \$1,613,844; grain products,  
\$200,945; fish, \$3,653,951; flax, hemp  
\$85,315; furs and skins undressed, \$426,314;  
lime, \$75,058; copper, ex-  
tract, dust, &c., \$606,254; silver, metal-  
lic bullion, \$3,833,019; iron and steel,  
\$1,566,093; oil-cake, \$8,589; provisions,  
\$1,740; stone and manufactures of, \$339,  
potatoes, \$238,980; canned vegetables,  
fire-wood, \$222,014; logs, all kinds,  
\$481,890; planks and boards, \$695,  
joists and scantlings, \$117,947.

staves and headings, \$603,015; shingles, \$660,214; sleepers and railroad ties, \$127,019; stave bolts, \$64,802; shooks, box and other, \$56,807; wood for wood-pulp, \$458,613; household furniture, \$36,055; wood-pulp, \$336,385; other wood and manufactures of, \$830,760; wool, \$1,054,643; settlers' effects, \$984,117. Total exports, \$41,297,676.

## IMPORTS FROM UNITED STATES.

918. Animals, living, \$496,469; baking powder, \$86,893; books, periodicals, &c., \$650,627; Indian corn, \$1,495,060; oats, 68,923; wheat, \$2,418,704; other grain, \$150,853; bran and mill feed, \$90,280; cornmeal, \$63,319; wheat flour, \$395,172; other breadstuffs, \$129,127; buttons, \$44,279; bicycles, tricycles, &c., \$332,933; other carriages, \$240,335; clocks, clock-cases, &c., \$81,209; coal and coke, \$9,063,769; cordage and twine, \$190,139; cotton and manufactures of, \$961,446; cotton wool, \$2,847,770; cotton waste, \$642,575; drugs, dyes, chemicals, &c., \$1,359,132; electric apparatus, \$357,329; fancy goods, \$214,767; fish, \$317,482; flax, hemp, jute and manufactures of, \$562,554; fruits, dried, \$316,360; fruits, green, \$1,156,532; furs and manufactures of, \$311,289; glass and manufactures of, \$420,656; gutta-percha, &c., and manufactures of, \$950,548; hats, caps and bonnets, \$462,411; hides, raw, \$1,771,641; hops, \$69,029; jewellery, \$200,727; leather and manufactures of, \$1,016,073; brass and manufactures of, \$382,727; copper and manufactures of, \$189,145; gold and silver and manufactures of, \$4,691,072; iron and steel and manufactures of, \$5,391,424; lead and manufactures of, \$81,856; tin and manufactures of, \$106,516; other metals, minerals and manufactures of, \$664,867, musical instruments, \$223,148; oils, \$941,895; paints and colours, \$159,303; paper and manufactures of, \$627,041; provisions, \$1,640,244; rags, \$108,813; seeds, \$515,316; settlers' effects, \$2,095,848; silk and manufactures of, \$221,769; stone and manufactures of, \$116,680; sugar, all kinds, \$1,357,517; tobacco, unmanufactured, \$1,367,616; tobacco, manufactured, \$38,992; turpentine, spirits of, \$156,469; vegetables, \$161,369; watches and watch cases, \$45,926; watch actions and movements, \$173,666; wood and manufactures of, \$2,307,504; wool and manufactures of, \$816,453. Total imports, \$59,337,239.

## CHAPTER XIII.

Early History of Currency.—Dominion Notes.—World's Monetary System.—Coinage of the World.—Monetary System of Canada.—Chartered Banks.—History of Banking in Canada.—Business of Banks.—Prices of Bank Stock.—Profits of Banks.—Clearing Houses.—Insolvency in Canada.—Savings Banks.—Government Savings Banks.—Building Societies and Loan Companies.

### BANKS.

#### CURRENCY, BANKS AND SAVINGS BANKS.

##### PART. I.

919. In the early days all sorts of coin were used in British North America.

The first step taken in Canada for a revision of currency was in 1796, when, to remedy the evils resulting from the coined money in circulation being reduced in weight, debased in value and composed of every variety of pieces peculiar to all countries trading with this continent, an Act was passed which fixed a standard of value founded upon the average intrinsic worth of the gold and silver coins of Great Britain, Portugal, Spain, France and the United States.

Subsequently various Acts of the Legislatures established a valuation for these pieces, at which they were accepted in market overt.

920. Finally, in 1858, the Province of Canada adopted dollars and cents, pounds, shillings and pence as the only moneys of account. In 1871, the Federal Parliament passed the Act (Chap. 4, Acts of 1871) respecting the currency which gave to the provinces of the Dominion a uniform currency, the single gold standard adopted being that of the British sovereign of the weight and fineness prescribed by the laws of the United Kingdom, to pass current at  $4.86\frac{2}{3}$ . Provision was also made that, until otherwise ordered by Her Majesty's proclamation, the gold eagle of the United States of the fixed weight of 10 pennyweights and 18 grains troy, and of a settled standard of fineness, should be legal tender in Canada. The same Act provided for a gold coinage for Canada, but special Canadian gold coinage has not been minted.

Silver coin were made legal tender to \$10, and minor coin to 25 cents.

The silver coins in use are 50, 25, 20, 10 and 5 cents.

921. In addition to the coin used, the Canadian Government issue Government notes. These were first issued in the Province of Canada under the law of 1866. The authority was limited to \$5,000,000 on general account, and \$3,000,000 to replace notes of banks surrendering their power

of issue. It was provided that 20 per cent of the notes issued should be covered by specie reserve and the remainder by Government debentures.

922. On the formation of the Dominion, the permitted issue by Act of 1868 was enlarged to \$8,000,000, any amount in excess of \$5,000,000 to be covered by 25 per cent in specie, or in specie and Canadian securities guaranteed by the Imperial Government, and for the remainder in unguaranteed bonds issued by authority of Parliament.

In 1870 the issue was fixed at \$9,000,000, with a 20 per cent specie reserve, any excess to be fully covered by specie. In 1872 the issues in excess of \$9,000,000 were required to be covered by specie to the extent of 35 per cent. In 1875, 50 per cent specie reserve was required for \$3,000,000 above and beyond the \$9,000,000, any excess over \$12,000,000 to be fully covered.

In 1880 the law authorized the issue of \$20,000,000, to be covered by, at least, 15 per cent of gold, 10 per cent addition in gold or Dominion securities guaranteed by Great Britain, and the remainder in unguaranteed Dominion bonds, any excess above \$20,000,000 to be covered fully with gold.

In 1895 an Act provided that the issue may exceed \$20,000,000, provided that in addition to any amount required to be held in gold under previous Acts, a further amount in gold equal to the excess of issued notes over 20 millions shall be held.

923. These notes are full legal tender, redeemable in specie on demand, and are of the following denominations: 25 cents, \$1, \$2, \$4, \$50, \$100, \$500 and \$1,000; occasionally old issues, called provincial notes, of \$5, \$10, and \$20 are met.

On the 31st December, 1895, \$14,358,500 of the Dominion note circulation were in notes of \$500 and \$1,000. These are principally held by the chartered banks as part of their cash reserves, because by the Banking Act 75 per cent of the reserve cash must be in Dominion notes, and are chiefly used in the settlements between banks.

On the 31st December, 1894, and the same date 1895, there were held in connection with the Dominion notes:—

	1894.	1895.
	\$	\$
Specie.....	9,470,919	10,650,702
Guaranteed sterling debentures.....	1,946,667	1,946,667
Unguaranteed debentures.....	17,250,000	17,250,000
Total.....	28,667,586	29,847,369

This was in excess of the amount required to be held of \$4,865,125 in specie and guaranteed debentures, and of \$1,318,618 in unguaranteed debentures in 1894, and of \$5,183,368 in specie and guaranteed debentures, and of \$2,250,000 in unguaranteed debentures in 1895. Compared with 1893 the figures of 1895 show an increase of \$4,087,511 in specie and of

\$2,250,000 in unguaranteed debentures, guaranteed debentures remaining the same.

If at any time Dominion notes should be issued in excess of the amount authorized, gold for their redemption is required to be held to the full amount of the excess. Officers to superintend the distribution of specie Dominion notes to the several banks are : 1st, the Comptroller of Currency at Ottawa, and, 2nd, the Assistant Receiver-General, appointed in the following cities : Toronto, Montreal, Halifax, St. John, N.B., Victoria, B.C., Charlottetown and Winnipeg.

924. An analysis of the circulation of Dominion notes of the various denominations shows the following results :—

Total average monthly circulation :

1884.....	\$16,434,385
1890.....	15,501,360
1891.....	16,374,460
1892.....	17,407,440
1893.....	18,966,100
1894.....	20,749,200
1895.....	21,397,750

Average monthly circulation of \$500 and \$1,000 notes :

1884.....	\$ 9,507,000
1890.....	8,211,000
1891.....	9,050,000
1892.....	9,895,000
1893.....	11,280,125
1894.....	13,297,166
1895.....	13,834,666

Average monthly circulation of \$50 and \$100 notes :

1884.....	\$ 760,353
1890.....	350,000
1891.....	280,860
1892.....	299,984
1893.....	250,820
1894.....	227,070
1895.....	232,300

Average monthly circulation of \$4, \$5, \$10 and \$20 notes :

1884.....	\$ 518,409
1890.....	434,760
1891.....	449,644
1892.....	473,290
1893.....	451,061
1894.....	403,334
1895.....	369,439

Average monthly circulation of \$1 and \$2 notes :

1884.....	\$ 5,454,700
1890.....	6,331,600
1891.....	6,412,825
1892.....	6,451,283
1893.....	6,788,000
1894.....	6,615,048
1895.....	6,743,555

Average monthly circulation of fractionals :

1884.....	\$ 183,030
1890.....	174,000
1891.....	181,130
1892.....	187,880
1893.....	196,000
1894.....	206,550
1895.....	217,802

The proportion of the \$500 and \$1,000 issued to the total issue of Dominion notes, in 1884, 1894 and 1895 was :—

	1884.	1894.	1895.
Issue of Dominion \$500 and \$1,000 . . . . .	57·8 p.c.	63·1 p.c.	64·6 p.c.
Issue of \$2 and \$1 notes . . . . .	33·2 "	31·9 "	31·5 "
Issue of all other notes . . . . .	9·0 "	5·0 "	3·9 "

925. The result of the analysis is to show that in the period 1884–94 the issue of Dominion notes increased 26·2 per cent, that the issue of notes of \$500 and \$1,000 increased from 57·8 to 63·1 per cent, and that notes of all other denominations decreased relatively to the total issue, 1895 showing the same result. Notes of \$1 and \$2 show an absolute increase of \$1,160,288, or 21·5 per cent in 1894 over 1884, and of \$128,507 in 1895 compared with 1894. Practically the increase relatively to the whole issue has been confined to those denominations of notes which are held by the chartered banks.

## PART II.

### CHARTERED BANKS.

926. In 1817 the first bank was established—the Bank of Montreal, in Montreal, followed the next year by the Bank of Quebec, in Quebec. These banks were not granted a charter till 1821.

The first charter is not remarkably different from those of the present day. The three special functions of banking were performed from the first establishment, viz., receiving deposits, issuing notes and discounting bills. There was one peculiar clause in the Bank of Montreal's original charter. It was that officers of the bank guilty of secreting, embezzling or running away with bill, bond, obligation, money or effects, should, on conviction, be deemed guilty of felony, the penalty attached being death as a felon without benefit of a clergy.

Between 1821 and 1836 many banks were established. Among them was the Bank of British North America, organized by Scotch and English merchants, and incorporated by Royal Charter.

In 1830 the Banking Act was amended so that the total amount of notes of less sum than \$5 in circulation at one time should not exceed one-fifth of the paid up capital; that no notes under the value of \$1 should be issued, and that all issues of less than \$5 might be limited or altogether suppressed by the legislature.

About 1835 the Government provided for the establishment of private, or, as they were called, licensed banks. These were authorized to issue notes, under certain limitations, upon depositing with the Government provincial debentures to the amount of the contemplated issue.

A bank fever seized the province in 1836, and in 1837 applications were made for licenses for nine banks in Upper Canada.

On May 18th, 1837, the Lower Canadian banks suspended specie payments owing to the demand for specie in the United States, in which country the banks had generally suspended on the 12th May. The suspension of the Lower Canadian banks continued till 1st June, 1839, with the exception

of the months of July, August, September and October of 1838, during which period the banks paid out specie.

The legislature of Upper Canada met in extraordinary session on June 19th, 1837, to devise measures by authority of which the banks of Upper Canada might suspend specie payment, the law in their case making repudiation of notes to result in suspension of charter. Sir Francis Bond Head, the then Lieutenant-Governor, opposed the motion, but the Bill became law and one or two banks availed themselves of the Act. The Bank of Upper Canada desired to suspend, Sir Francis opposed and summarily closed the discussion by refusing to allow the suspension. The bank continued to redeem till 5th March, 1838, when it was compelled to suspend. Resumption took place on 1st November, 1839.

This was the first and only time the banks of the Province of Canada suspended specie payment, one of the causes of the suspension being the purchasing of their notes by the banks of the United States at a premium, the notes being then sent to the province and gold demanded to be withdrawn from the country.

During the rebellion of 1837 the Lower Canadian banks placed their specie in the Citadel in Quebec for safe keeping, and a law was passed relieving them from loss of charter for repudiation of their notes, which continued to be legal tender.

With two exceptions, all the banks, prior to 1841, had the limited liability clause. In 1841, in the first session of the legislature after the union, the Committee on Banking reported 13 resolutions on which to found a uniform system of banking. The double liability clause was then generally introduced.

The Banking Act of 1841 imposed a tax of 1 per cent upon the banking circulation.

In 1836 Right Honourable W. E. Gladstone wrote a letter to Earl Cathcart, then Governor General, containing 20 regulations, compliance with which Her Majesty's Government considered necessary to the security of the communities in which banks may be established, and more especially to the poorer classes of such communities.

In 1850 a new Act was passed prohibiting any banks other than those incorporated by Act of Parliament or by Royal Charter from issuing notes. The tax on bank circulation was abolished, and instead thereof a deposit with the Government of provincial debentures to the extent of \$100,000 was required. According to a plan fixed by the legislature, bank statistics to be monthly forwarded to the Government were required in that year. In the Banking Act of 1871 it was provided that banks should not issue notes of a less denomination than \$4, and that they should hold, as far as practicable, one-half their cash reserve in Dominion notes, and never less than one-third. Business could not be engaged in until \$500,000 of stock had been subscribed, \$100,000 paid up in cash, and a certificate to that effect procured from the Government Treasury Board. The amount of notes in circulation was not to exceed the amount of unimpaired capital. No dividend was to be paid that impaired paid-up capital, and no division of profits greater than 8 per cent per annum could be paid, unless, after paying the same, the bank had a reserve fund equal to one-fifth of its paid-up capital. In the Act of 1881 it was provided that banks could not issue notes of less

than \$5, and that all notes of less than \$5 then outstanding should be called in and cancelled as soon as practicable. It was also provided that the notes of the banks should be a first lien upon the assets. The minimum of reserves to be held in Dominion notes was 40 per cent. The unauthorized use of the title of "bank, banking company, &c." without the addition of "not incorporated," was made a misdemeanour. The exchange of warehouse receipts for bills of lading, and *vice versa*, was permitted, in order to facilitate the marketing of the goods.

927. The number of chartered banks in the Dominion on 30th June, 1895, was 38. The development of banking business in Canada is seen from the following statement:—

YEAR.	Capital Paid up per head of Population.	Circulation per head.	People's Deposits per head.	Peoples' Discounts per head.	Liabilities.	Assets.
1871.....	\$10.30	\$5.75	\$15.48	\$23.33	\$22.07	\$34.46
1881.....	13.76	6.60	21.81	27.04	29.40	46.38
1891.....	12.56	6.54	30.70	35.40	38.75	55.72

928. In addition to the capital paid up in 1891, the reserve or rest fund of the banks in that year amounted to \$4.72 per head of the population.

929. The first chartered bank to suspend business since Confederation (1867) was the Commercial Bank of New Brunswick. The Bank of Acadia (Liverpool, N.S.) suspended in 1873; the Metropolitan Bank of Montreal in 1877; the Mechanics' Bank of Montreal, the Consolidated Bank of Montreal, the Bank of Liverpool, N.S., and the Stadacona Bank of Quebec, in 1879; the Exchange Bank of Canada, in 1883; the Maritime Bank of St. John, N.B., the Pictou Bank, the Bank of London, Ont., and the Central Bank of Canada retired from business in 1887, the Federal Bank in 1888; and the Commercial Bank of Manitoba in 1893. In all 14 banks have suspended, representing assets of over \$22,000,000 and liabilities of over \$15,000,000. Of the suspended banks 11 have redeemed their notes in full, one paid  $57\frac{1}{2}$  per cent, and two are not yet reported. Eight paid their deposits in full; one (the Mechanics') paid  $57\frac{1}{2}$  per cent, one (the Exchange) paid 64 per cent, exclusive of final dividend, and one paid  $86\frac{2}{3}$  per cent.

The Commercial Bank of Manitoba closed its doors on the 3rd July, 1893. The notes of the bank in circulation increased 30 per cent over the amount given in the last previous bank statement. This increase was caused by depositors withdrawing their deposits and taking notes of the bank in payment. They did this because, under the Banking Act, claims are to be met in the following order: 1st. Redemption of notes in circulation; 2nd. Claims of Dominion Government; 3rd. Claims of Provincial Government; 4th. Depositors; 5th. Shareholders. By July, 1895, this bank had paid off 50 per cent of its liabilities. By the end of January,

1896, the liquidators had paid off 70 per cent of the ordinary creditors' claims that had passed the Court of Queen's Bench. The total liabilities paid to the end of December, 1895, including preferred claims amounted to \$1,098,343. The Banque du Peuple suspended July 15th, 1895.

930. The chartered and incorporated banks of the Dominion are governed by the Banking Act, 53 Vic., Chap. 31, the principal provisions of which are:—

1. The capital stock of any bank hereafter incorporated shall be not less than \$500,000, in shares of \$100 each.

2. Five hundred thousand dollars must be subscribed and \$250,000 paid to the Minister of Finance, who is also Receiver-General, and a certificate of permission obtained from the Treasury Board\* before business can be commenced.

3. Bank directors must hold capital stock as follows: On a paid-up capital stock of \$1,000,000 or less, stock on which \$3,000 has been paid up; on a paid-up capital stock of over \$1,000,000 and not over \$3,000,000, stock on which \$4,000 has been paid up; and on a paid-up capital of over \$3,000,000, stock on which \$5,000 has been paid. A majority of the directors must be British subjects.

4. The capital stock may be increased or reduced by the shareholders, subject to the approval of the Treasury Board.

5. No dividends or bonus exceeding eight per cent per annum shall be paid by any bank, unless, after deducting all bad and doubtful debts, it has a reserve fund equal to at least 30 per cent of its paid-up capital.

6. Every bank shall, subject to a penalty of \$500 for each violation, hold not less than 40 per cent of its cash reserve in Dominion notes.

7. The amount of notes of any bank in circulation at any time shall not exceed the amount of its unimpaired capital, subject to penalties varying with the amount of such excess.

8. The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency; any amount due to the Dominion Government shall be the second charge, and any amount due to any Provincial Government shall be the third charge.

9. Every bank shall pay to the Minister of Finance a sum equal to 5 per cent on the average amount of its notes in circulation, such sum to be annually adjusted according to the average amount of circulation during the preceding twelve months. Such amounts are to form a fund called "The Bank Circulation Redemption Fund," to be used when necessary, on the suspension of any bank, for the payment of the notes issued and in circulation, and interest. All notes in circulation shall bear interest at 6 per cent per annum from the day of suspension until redeemed. Payments from the fund are to be without regard to the amount contributed.

10. All notes issued for circulation shall be payable at par throughout Canada.†

\*The Treasury Board consists of the Minister of Finance and any five Ministers appointed from time to time by the Governor General in Council, with the Deputy Minister of Finance as secretary.

†Previous to this provision a discount was charged in Ontario and Quebec on notes of banks of Nova Scotia, New Brunswick, Prince Edward Island and British Columbia, in which latter province the banks charged discounts on the notes of all eastern banks.

11. Any bank, when making payment, is compelled, if requested, to pay the same, or part thereof, not exceeding one hundred dollars, in Dominion notes for \$1, \$2 or \$4 each.

12. Penalties are provided for placing anything in the shape of an advertisement on a note, and for issuing advertisements in the form of notes.

13. No bank may lend money on its own shares or on those of any other bank, or upon mortgage of real estate, or on the security of any goods, wares or merchandise, except as collateral security.

14. Except as required for its own use, no bank shall hold any real estate for a longer period than seven years.

15. Any rate of interest may be charged and allowed, but not more than 7 per cent can be recoverable.

16. Monthly returns signed by the chief accountant, the acting president and the manager, shall be made to the Minister of Finance within the first fifteen days of each month, subject to a penalty of \$50 for each day's delay, such returns to be made in the form provided in the Act. Special returns may be required by the Government at any time. All Government cheques are payable at par.

17. No person may use the title of "bank," "banking company," "banking house," "banking association" or "banking institution," unless authorized by this or some other Act of Parliament.

931. The changes in the general features of the Banking Act, consequent upon its revision by Parliament in the Session of 1890, are intended to operate to the advantage of the public in two directions: (a) by securing to the holders, at all times and in all parts of the Dominion, the face value of all notes of all banks of Canada, whether solvent or insolvent; (b) by securing solidity in our banking institutions by compelling associations seeking bank charters to have, before they can obtain a charter, a capital of at least \$250,000 paid up and deposited with the Government. In the case of solvent banks, a uniform face value is secured through mutual agreement. In the case of insolvent banks, the notes are to be redeemed by means of a fund called the "Bank Circulation Redemption Fund," obtained by the deposit (drawing 3 per cent interest) of 5 per cent of the average bank note circulation with the Government. From this the insolvent banks pay their notes with 6 per cent interest until notice of liquidation is published.

The amount held in trust by the Dominion Government for the Bank Circulation Redemption Fund on the 30th June, 1894, was \$1,816,836, and on 30th June, 1895, it was \$1,821,371, an increase in the twelve months of \$4,535. No payments were made from this fund during the year.

932. Of the thirty-eight banks making returns to the Government on 1st January, 1895, ten had headquarters in Ontario, fourteen in Quebec, eight in Nova Scotia, three in New Brunswick, two in Prince Edward Island and one in British Columbia.

933. The following table gives the yearly average paid-up capital, assets, liabilities and other particulars of the various banks in operation in each

year since Confederation, according to the returns made to the Government, as required by the Bank Act. These averages are made up from the twelve monthly returns sent by all the banks to the Government during the calendar year. This is thought to be better than the plan previously adopted of taking the returns for the month of June in each year:—

## PARTICULARS OF BANKS IN CANADA, 1868-1895.

YEAR.	Capital Paid up.	Notes in Circulation.	*Total on Deposits.	Total of Discounts to the People.	Liabilities.	Assets.

1893.....	62,009,346	33,811,925	174,776,722	206,623,042	217,195,975	302,696,715
1894.....	62,063,371	31,166,003	181,743,890	204,124,939	221,066,724	307,520,029
1895.....	61,800,700	30,807,041	190,916,939	203,730,800	229,794,322	316,536,510

\*Includes the deposits of the Federal and Provincial Governments.

The capital paid up has remained practically the same for a good many years. The notes in circulation from 1884 to 1895 (12 years) have been more in 9 years and less in 3 years than in 1895. The total deposits have gone on steadily increasing and in 1895 were over 86 per cent more than in 1884. The total discounts have, in the same period, increased over 56 per cent. Comparing 1895 with 1894 it is seen that notes in circulation and total discounts have decreased, and that deposits have increased.

wh 943 gives the deposits in the chartered banks, not including  
f the Federal and Provincial Governments.

934. The following is a comparative statement of the assets and liabilities of the banks in Canada on the 30th June, 1892 and 1895:—

## BANK STATEMENT, 30TH JUNE, 1892-95.

LIABILITIES.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$
Capital paid up.....	61,512,630	61,954,314	62,112,883	61,701,007
Circulation.....	32,614,699	33,483,413	30,254,159	30,106,578
Deposits—				
Payable on demand.....	65,611,678	64,975,445	65,006,011	66,582,630
Payable after notice or on a fixed day	95,331,100	105,841,988	109,924,925	114,081,499
Made by other banks.....	3,143,967	2,503,558	2,352,405	2,215,596
Balances due other banks or agencies	5,103,355	5,215,691	5,811,714	4,930,873
Balance due Dominion and Provincial Governments.....	7,070,308	7,186,841	7,619,841	8,546,493
Other liabilities.....	486,904	460,060	323,652	479,995
Total liabilities.....	209,362,011	219,666,996	221,292,707	226,943,664
ASSETS.				
Specie and Dominion notes.....	17,926,410	18,547,669	21,455,211	20,945,399
Deposits with Government for security of note circulation.....	998,897	1,761,259	1,831,979	1,824,727
Notes of and cheques on other banks.....	8,661,927	7,333,408	6,462,944	6,780,635
Due from agencies and other banks.....	21,031,350	18,919,048	18,965,288	24,989,694
Dominion debentures or stocks.....	3,053,549	3,191,492	3,157,413	2,647,191
Other government, municipal and public securities.....	15,492,428	14,787,248	19,100,101	18,314,806
Loans to Dominion and Provincial Governments.....	2,967,295	1,751,016	489,722	645,792
Call loans on bonds, stocks, &c.....	15,550,797	14,880,373	14,600,915	16,763,622
Loans to or deposits made in other banks.....	4,006,102	3,825,210	3,377,255	3,108,546
Current loans.....	192,498,571	208,793,415	206,958,912	205,497,046
Debts overdue.....	2,185,009	2,326,010	2,811,395	2,366,964
Mortgages on real estate and real estate held by banks.....	1,916,278	1,723,746	1,551,951	1,718,883
Bank premises.....	4,549,757	4,877,593	5,365,188	5,529,349
Other assets.....	1,215,647	1,646,093	1,414,155	1,853,862
Total assets.....	292,054,017	304,363,580	307,542,429	312,986,516

During these years the proportion of the liabilities to the assets has remained practically the same, being about 70 per cent. The deposits with the Government for the security of the note circulation were somewhat less in 1895 than in the previous year. Investments in Dominion debentures or stocks decreased by \$510,222 and investments in other government, municipal and public securities decreased by \$785,295.

The cash reserves or quick assets increased in 1895 compared with 1894 by 7.3 per cent, and the liabilities increased by 2.5 per cent. The cash reserves have, therefore, increased more rapidly than the total liabilities.

935. The amount due to Canadian banks from agencies and banks outside of Canada in the five years, 1891 to 1895 (30th June), was :—

	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$
Amount due by Canadian banks...	4,774,209	5,103,355	4,962,104	5,642,918	4,801,422
Net amount due to Canadian banks from agencies in United Kingdom and foreign countries.....	16,177,777	15,927,995	13,956,944	13,094,071	20,017,000
Total due to Canadian banks .....	20,951,986	21,031,350	18,919,048	18,736,989	24,818,422

It is evident that the banks of Canada have largely increased the amount of their funds held abroad for banking purposes.

936. Taking specie and Dominion notes held by the banks, the comparison for five years is :—

	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$
Specie.....	6,673,974	6,536,818	6,412,342	7,438,513	7,471,987
Dominion notes.....	10,734,521	11,389,502	12,135,327	14,016,698	13,473,432
Total ..	17,408,495	17,926,410	18,547,669	21,455,211	20,945,339

937. By applying the test of circulation, it is seen that the year 1893 had the highest average of any year since Confederation. By five-year periods the average circulation of bank notes is as follows :—

1869-73, average of 5 years.....	\$ 19,613,142
1874-78 " ".....	22,673,300
1879-83 " ".....	27,479,560
1884-88 " ".....	31,377,000
1889-93 " ".....	33,140,600
1894.....	31,166,003
1895.....	30,807,041

938. The circulation of Dominion Government notes of \$20 and under, being the denominations which circulate among the people, average as under :—

1874-78, average of 5 years.....	\$ 3,712,894
1879-83 " ".....	4,928,216
1884-88 " ".....	6,358,407
1889-93 " ".....	7,097,000
1894.....	7,224,953
1895.....	7,330,706

939. It is thus shown that the business of the country required in 1889-93, \$40,237,600, against \$26,386,194 in 1874-78. In 1894 the amount required was \$1,846,644 less than the average of the five years immediately preceding, and in 1895 it was \$253,119 less than in 1894. It must be remembered that the employment of cheques in settling accounts is con-

ily increasing so that the increase of over 50 per cent in the note circulation does not represent the total increase which has taken place in the internal trade and traffic of the Dominion.

40. During the year 1895, the financial difficulties in other countries retarded business to some extent.

The degree of the influence exerted may be measured by the following comparative table :—

NOTES OF CHARTERED BANKS IN CIRCULATION

MONTHS.	1890.	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$	\$
January...	30,879,961	31,662,099	32,705,400	32,831,747	30,571,375	28,917,276
February...	30,627,078	31,925,749	32,711,015	32,978,840	30,603,267	28,815,434
March...	31,704,281	33,020,661	32,483,965	35,430,883	30,702,607	29,414,796
April...	30,671,938	30,904,096	31,406,369	32,633,073	29,996,472	29,152,152
May...	30,831,914	30,917,215	31,383,218	31,927,342	28,467,718	28,429,134
June...	32,059,178	31,379,886	32,614,699	33,483,413	30,254,159	30,106,578
July...	31,167,628	30,579,968	32,488,718	33,573,468	29,801,772	29,738,115
August...	32,718,363	32,012,196	32,646,187	33,308,967	30,270,366	30,737,622
September...	35,522,319	34,683,051	34,927,615	35,128,926	33,355,156	32,774,442
October...	36,480,649	37,182,768	38,688,429	36,906,941	34,516,651	34,671,028
November...	36,344,546	37,430,690	37,124,505	35,120,561	33,076,868	34,362,746
December...	35,006,274	35,634,129	36,194,023	34,418,936	32,375,620	32,565,179
Total...	394,014,125	396,732,508	405,464,143	405,743,097	373,992,031	369,684,502
Average	32,834,510	33,061,042	33,788,679	33,811,925	31,166,003	30,807,041

The downward tendency exhibited itself throughout nine months of the year; the December quarter showing a gain of 1·6 per cent over the December quarter of 1894.

41. The total deposits in the Chartered Banks by five-year periods are :—

1865-73, average of 5 years	\$	54,397,236
1874-78		73,926,285
1879-83		94,116,645
1884-88		111,131,142
1889-93		152,008,320
1894		181,743,890
1895		190,916,939

There has been a large and steady growth of deposits in the Chartered

42. The people's deposits, made up by excluding the Federal and Provincial Government deposits, in the Chartered Banks, by five-year periods.

1872-73, average of 2 years		\$	53,390,993
1874-78	5		63,227,935
1879-83	5		82,762,543
1884-88	5		102,021,939
1889-93	5		144,728,519
1894			175,406,823
1895			180,664,139

\* Prior to 1872, the Government's and the people's deposits are not separated in the Statements.

943. The next table separates the people's deposits in the chartered banks into two classes: (a) those bearing interest and (b) those not bearing interest, the first representing, in the large, the money not immediately used by the depositors, and the second the money immediately available in the business transactions of the day.

DEPOSITS IN CHARTERED BANKS PAYABLE ON DEMAND AND AFTER NOTICE OR ON A FIXED DAY, 1873-95.

" 31st, 1895.....	66,582,630	114,081,439

taking the average of the five-year periods the deposits payable on demand and after notice increased as under:—

YEAR.	ON DEMAND.		AFTER NOTICE.	
	Increase over previous period.	Per cent.	Increase over previous period.	Per cent.
	\$		\$	
1882.....	7,412,047	22·67	9,267,632	33·83
1887.. ..	6,794,234	16·93	16,255,589	44·34
1892.....	10,370,138	22·10	24,585,271	46·46
.....	7,676,507	13·40	34,135,926	44·06
.....	9,308,819	16·25	36,584,278	47·27

the proportion of Government deposits, both Dominion and Provincial, the total deposits on 30th June, in the years 1890 to 1895, was 5·54 per cent, 4·34 per cent, 4·01 per cent, 3·87 per cent, 3·90 per cent and 4·52 per cent, respectively.

44. The discounts given to the public by the chartered banks by five-year periods are:—

1869-73 average of 5 years.....	\$ 86,705,827
1874-78 " " .....	128,139,062
1879-83 " " .....	123,325,374
1884-88 " " .....	134,181,457
1889-93 " " .....	174,684,383
1894.. ..	204,124,939
1895.....	203,730,800

45. The following is a statement of the discounts to municipalities, to trading corporations, to the public, and also loans on collaterals and overdrafts, but excluding loans to governments:—

## DISCOUNTS GIVEN BY THE BANKS.

YEAR.	\$	Average 5 years.
.....	56,142,071	91,984,372
.....	59,752,526	
.....	69,480,760	
.....	90,961,157

1893 .....	222,496,529	
1894 .....	219,734,112	
1895 .....	220,790,253	

946. The following table shows the proportion of liabilities to assets in each year since 1868. It will be seen that from 1884 the proportion of the liabilities has been steadily increasing, and that in 1895 it was higher than in any previous year.—

## PERCENTAGE OF LIABILITIES TO ASSETS, 1868-95.

YEAR.	Per-centage.	YEAR.	Per-centage.
1868.....	56.55	1882.....	65.86
1869.....	59.04	1883.....	63.98
1870.....	63.65	1884.....	62.30
1871.....	64.06	1885.....	63.22
1872.....	61.04	1886.....	64.41
1873.....	56.60	1887.....	64.78
1874.....	61.95	1888.....	67.35
1875.....	56.17	1889.....	68.13
1876.....	54.29	1890.....	68.05
1877.....	55.14	1891.....	69.38
1878.....	54.45	1892.....	71.94
1879.....	55.75	1893.....	71.73
1880.....	60.69	1894.....	71.87
1881.....	63.39	1895.....	72.39

947. The specie held by the banks and the Government in March, 1895, exceeded the amount held by the two in March, 1894, by \$2,125,173, or nearly 14 per cent more. In March, 1894, the specie held exceeded the amount in March, 1893, by \$3,395,394, or nearly 30 per cent.

comparative statement showing the proportions of the principal assets and liabilities to the total amounts in the years 1868, 1880,

These reserve funds, which may be considered so much additional capital to be employed by the banks, have increased greatly. Between 1885 and 1895 the fund increased by \$9,393,784, or nearly 53 per cent.

950. The following table gives the overdue notes and debts in chartered banks, the proportion being to total amount of call loans, current loans and loans to governments :—

October 31, 1873.....	\$2.07 per \$100	October, 31, 1885.....	\$2.45 per \$100
" 31, 1874.....	2.02 " 100	" 31, 1886.....	1.63 " 100
" 31, 1875.....	4.73 " 100	" 31, 1887.....	1.61 " 100

" 31, 1882.....	1.90 " 100	" 31, 1894.....	1.55 " 100
" 31, 1883.....	2.45 " 100	" 31, 1895.....	1.94 " 100
" 31, 1884.....	3.57 " 100		

951. In 1895 the rates of discount in Canada were, if anything, lower than in 1894. The reason being the great accumulation of deposits in the banks seeking an outlet in commercial discounts.

#### RATES OF DISCOUNT ON LOCAL BILLS.

YEAR.	Average rate of Discount.
1878.....	7½ per cent.
1883.....	7 " "
1886.....	6½ " "
1891.....	6 to 7 " "
1893.....	6 to 7 " "
1894.....	6 to 7½ " "
1895.....	5½ to 7 " "

The above figures are for the city of Montreal, in which place, as well as in Toronto and other commercial centres, discount rates are, as a rule, from one to two per cent lower than they are in country towns; and, moreover, in cities rates are more frequently graded according to the standing of the customers. As far as has been learned, the custom does not prevail in Canada to the same extent as in many other countries of regulating the rate according to the date of the bill, and though sometimes an additional 1 per cent may be charged on bills over six months, as often as not no distinction is made.

952. The rate of sterling exchange was abnormally high throughout the year. This was entirely owing to the operations of the syndicate of capitalists in New York who guaranteed to prevent the exports of gold from the United States Treasury between the 1st February and the 1st October, 1895.

## AVERAGE RATES OF STERLING EXCHANGE.

YEAR.	60 Days.	YEAR.	Demand.
1878.....	8 $\frac{3}{4}$	1878.....	9 $\frac{5}{8}$
1885.....	9	1885.....	9 $\frac{7}{8}$
1890.....	8 $\frac{1}{2}$	1890.....	9 $\frac{1}{8}$
1891.....	8 $\frac{1}{2}$	1891.....	9 $\frac{1}{8}$
1892.....	9 $\frac{1}{2}$ -9 $\frac{3}{4}$	1892.....	9 $\frac{1}{8}$ -9 $\frac{3}{8}$
1893.....	8 $\frac{3}{4}$ -8 $\frac{1}{2}$	1893.....	9 $\frac{1}{8}$ -9 $\frac{3}{8}$
1894.....	9 $\frac{1}{2}$ -9 $\frac{3}{4}$	1894.....	9 $\frac{1}{8}$ -9 $\frac{3}{8}$
1895.....	9 $\frac{1}{2}$	1895.....	10

The above figures, as well as those in the preceding paragraph, were kindly supplied by a leading banking authority in Montreal.

953. The following table, condensed from the *Montreal Journal of Commerce* gives the highest and lowest quotations for the stocks of the banks in the years mentioned :—

—	1875.	1880.	1885.	1890.	1891.	1892.	1893.	1894.	1895.

\* This bank suspended payment on 15th July, 1895.

The Bank of New Brunswick has the largest rest and circulation in proportion to capital; the Dominion Bank the largest amount of deposits in proportion to capital, and the Merchants Bank of Halifax had the largest per cent of profits.

955. Clearing-houses were established in Halifax in 1887; in Montreal in 1889; in Toronto in 1891; in Hamilton in 1891, and in Winnipeg in 1893.

The transactions recorded are:—

CITIES.	1890.	1891.	1892.	1893.	1894.	1895.
Montreal ..	\$473,985,131	\$516,042,400	\$590,043,000	\$568,739,064	\$546,606,148	\$583,160,000
Halifax ...	62,281,748	64,601,856	59,136,983	60,104,338	58,778,698	61,078,520
*Toronto...	.....	.....	326,047,404	309,494,818	279,267,751	308,634,341
Hamilton ..	.....	.....	38,303,289	37,825,076	34,301,856	37,577,878
Winnipeg ..	.....	.....	.....	.....	50,602,644	55,872,340

\* Not including the bank of Toronto, which did not avail itself of the clearing-house until the 25th November, 1895.

The two cities which have a six years' record show the following: 1890, \$536,266,879; 1891, \$580,644,256; 1892, \$649,179,983; 1893, \$628,843,402; 1894, \$605,384,846; 1895, \$644,238,520.

Thus 1895 compared with 1890 shows an increase of + 20·1 per cent.

"	"	1891	"	"	+ 10·9	"
"	"	1892	"	a decrease of	- 0·7	"
"	"	1893	"	an increase of	+ 2·4	"
"	"	1894	"	"	+ 6·4	"

The four cities of Montreal, Halifax, Toronto and Hamilton show for 1895 a decrease of 2·2 per cent compared with the figures of 1892; an increase of 1·4 per cent compared with the figures of 1893, and of 7·8 per cent compared with 1894.

Going back three years, so as to take in the full force of the financial cyclone which devastated the United States and affected Canada, we find that the decline of business as measured by the clearings was in 1894, as compared with 1892, equal to 27 per cent in the United States, and to 9·3 per cent in Canada. If the retardation of business had been as great in Canada as in the United States in the two years 1893 and 1894, the reduction of the bank clearings would have been \$273,653,282 instead of \$94,576,223.

These percentages seem to be the measure of the effects produced upon Canada during 1893 and 1894 by the financial cyclone which prostrated the United States.

In 1895 the increase in the United States as compared with 1894 was 5·6 per cent, and in Canada, taking the five cities as an index, it was 7·8 per cent. It is evident, therefore, that Canada did not suffer so severely as the United States, and has recovered more rapidly.

956. Comparison of bank clearings in twelve cities during five years gives the following results :—

CITIES.	1893.	1892.	1891.	1890.	1889.
	\$	\$	\$	\$	\$
New York....	31,261,037,730	36,662,469,201	33,749,322,211	37,458,607,608	29,841,796,224
Chicago.....	4,675,960,000	5,135,771,186	4,753,840,087	5,130,878,745	4,614,973,136
Boston.....	4,577,920,364	5,105,389,710	4,456,885,230	4,003,145,904	4,757,684,581

San Francisco	690,285,777	771,850,964	735,714,347	746,694,231	693,666,460
Pittsburg.....	663,209,318	759,533,034	679,062,255	753,093,193	746,110,257
Cincinnati....	642,369,600	750,789,400	668,216,750	640,579,450	651,283,330
Montreal.....	568,739,064	590,043,000	516,042,400	473,985,131	583,160,000
New Orleans..	500,901,032	511,624,497	514,807,407	528,883,431	487,948,194
Kansas City..	474,724,593	508,199,283	492,207,771	492,207,771	519,900,290

Montreal ranks tenth among the cities, which position she has held for three years; in 1890 she was twelfth. Making 1890 the datum line, Montreal's clearings in 1895 show an increase of \$109,174,869, or over 23 per cent; New York's show a decrease of \$7,616,810,684, or 23 per cent; Chicago's, a decrease of \$515,899,547, or 10 per cent; Boston's, an increase of \$664,538,690, or 16 per cent; Philadelphia's, a decrease of \$154,396,887, or over 4 per cent; Baltimore's, a decrease of \$165,408,898, or 19 per cent; Pittsburg's, a decrease of \$6,982,936, or nearly 10 per cent; Cincinnati's, an increase of \$10,703,880, or 1·7 per cent, and Kansas City's, an increase of nearly 6 per cent.

957. The English clearing-houses show as follows: Manchester clearings 1893, £153,106,000; 1894, £160,220,700; 1895, £169,188,000; London's, 1893, £6,478,013,000; 1894, £6,337,220,000, and 1895, £7,592,886,000. Manchester showed an increase of 4·70 per cent in 1894 over 1893 and of 5·60 per cent in 1895 over 1894. The London clearings showed a decrease of 2·20 per cent in 1894 compared with 1893, and an increase of 19·80 per cent in 1895 over 1894.

Canada's import and export trade increased in 1895 by 1·2 per cent and the bank clearings increased by 7·8 per cent, the inference being that the internal trade of Canada increased very considerably in 1895 as compared with 1894.

958. The following is a statement, month by month, of the Clearing-house returns of the several cities in the Dominion having clearing-houses:—

—	Montreal.	Toronto.	Halifax.	Hamilton.	Winnipeg.

\* The Bank of Toronto became a member of the Toronto Clearing-house on 25th November, 1895.

### PART III.

#### INSOLVENCY.

959. The four provinces which constituted the Dominion of Canada were provided with an Insolvency Act in 1869, two years after the Dominion was created. This Act was in force for four years, was renewed by Chap. 46 Acts of 1874, arrangements being made respecting the new provinces to tide them over. In 1875 an Insolvent Act, applicable to the whole Dominion, was passed. It remained in force till 1880, in the session of which year it was repealed. Since that date there has been no general statute. A bill dealing with the subject was introduced in the Senate in the Session of 1894, passed by that body and sent to the House of Commons, where it was read a first time, but got no further.

According to returns for the year 1876 (the first year after the passing of the first general Act applicable to the whole Dominion), there were 1,588 insolvents with liabilities of \$31,346,154, and assets, \$4,980,658.

These were distributed as follows :—

PROVINCES.	No. of Insol- vents.	Liabilities.	Assets.
		\$	\$
Ontario.....	797	9,986,971	1,927,229
Quebec.....	581	16,399,199	2,499,651
New Brunswick.....	59	3,517,478	214,575
Nova Scotia.....	141	1,613,957	348,579
Manitoba.....	7	71,463	17,549
British Columbia.....	3	7,053	953
Prince Edward Island.....			
Total.....	1,568	31,346,154	4,989,636

960. No official returns of insolvency having been provided since 1880, the only sources of information are the mercantile agencies of Bradstreet's and Dun & Co.

For the year 1895 these give the following :—

#### BRADSTREET'S.

PROVINCES.	No. of Insol- vents.	Liabilities.	Assets.
		\$	\$
Ontario.....	800	6,094,214	2,411,633
Quebec.....	749	6,881,281	2,490,855
New Brunswick.....	67	446,394	238,605
Nova Scotia.....	114	838,068	348,079
Manitoba.....	38	359,260	168,340
British Columbia.....	85	495,104	272,955
Prince Edward Island.....	10	80,890	46,300
The Territories.....	13	152,700	77,309
Totals.....	1,876	15,347,931	6,054,127

#### DUN & Co.

Ontario.....	907	5,967,161	4,362,208
Quebec.....	678	7,530,707	5,386,714
New Brunswick.....	70	325,697	201,156
Nova Scotia.....	108	690,138	334,942
Manitoba.....	53	505,439	473,350
British Columbia.....	66	708,148	701,373
Prince Edward Island.....	9	75,700	40,500
The Territories.....			
Totals.....	1,891	15,802,990	11,569,943

961. Comparison shows that in 1876 the liabilities per insolvent averaged \$19,740 against \$8,181 per insolvent in 1895, and that the assets in 1876 were 15.9 per cent of the liabilities, and in 1895, 39.3 per cent according to Bradstreet, and 73 per cent according to Dun & Co.

In the year 1895 the commercial failures in the United States numbered 13,013, with liabilities of \$158,842,445, and assets of \$88,115,530. The assets were 55 per cent of the liabilities. Compared with 1894 the increase in the number of failures was 2.30 per cent and in the amount of the liabilities 6.2 per cent.

In Canada, in 1895, the increase over 1894 in the number of insolvents was 25, or 1.3 per cent, and in liabilities the decrease was \$2,376,702, or 13.4 per cent.

962. The following table gives the amount of failures in the United States and Canada (including Newfoundland to 1891) and the proportion Canada's failures (in amount) bear to those of the United States:—

## FAILURES.

YEAR.	In Canada.	In United States.	Proportion Canada to United States.
	\$	\$	
1873.....	12,334,000	228,499,000	5.40
1874.....	7,696,000	153,239,000	5.00
1875.....	28,843,000	201,060,000	14.30
1876.....	25,517,000	191,117,000	13.40
1877.....	25,523,000	190,669,000	13.40
1878.....	23,908,000	238,383,132	10.20
1879.....	29,347,000	98,149,053	30.00
1880.....	7,988,000	65,752,000	12.20
1881.....	5,751,000	81,155,332	7.07
1882.....	8,578,000	102,000,000	8.40
1883.....	15,872,000	172,874,172	9.20
1884.....	18,939,000	226,343,472	8.40
1885.....	9,210,334	124,220,321	7.41
1886.....	11,240,025	114,644,119	9.80
1887.....	17,054,000	167,569,944	10.10
1888.....	15,498,242	123,829,973	12.50
1889.....	13,147,910	140,359,490	9.40
1890.....	12,482,000	175,032,836	7.10
1891.....	14,884,000	193,178,000	7.70
1892*.....	11,560,210	108,595,233	10.60
1893*.....	14,762,575	402,427,818	3.60
1894*.....	17,724,633	149,595,434	11.90
1895*.....	15,347,931	158,842,445	9.70

\* Not including Newfoundland.

The above returns are taken from Bradstreet's. It will be noticed that the returns for 1876 differ from that prepared for the Depression Committee of the House of Commons of Canada, already quoted. They also differ from the returns published in the Sessional Paper, No. 113, of 1880. But these latter are admittedly incomplete.

The returns provided by Dun & Co. differ from those of Bradstreet's, probably caused by different modes of collecting particulars and of deciding what are failures.

963. The following gives the two sets of figures, both including Newfoundland, excepting in 1894 and 1895, when both agencies separated Newfoundland from Canada :—

YEAR.	BRADSTREET'S.		DUN & CO.	
	No.	Value of Liabilities.	No.	Value of Liabilities.
		\$		\$
1885.....	1,280	9,210,334	1,247	8,743,000
1886.....	1,186	11,240,025	1,233	10,111,000
1887.....	1,315	17,054,000	1,366	16,070,505
1888.....	1,730	15,498,242	1,667	13,974,787
1889.....	1,616	13,147,910	1,747	14,528,884
1890.....	1,626	12,482,000	1,847	18,000,000
1891.....	1,846	14,884,000	1,861	16,723,339
1892.....	1,682	11,603,210	1,680	13,703,000
1893.....	1,781	15,690,404	1,344	12,689,794
1894.....	1,851	17,724,633	1,854	17,607,258
1895.....	1,876	15,347,931	1,891	15,802,989

The totals of Dun & Co. for the period 1885-95 are \$158,015,246, and those of Bradstreet's are \$153,882,689.

964. According to Dun & Co., 23·3 per cent of the failures in Canada, in 1895, were manufacturing firms, 76·1 trading, and 0·6 "other," the assets of the manufacturing class being 33·5 per cent of the liabilities, and those of the trading class being 51·2 per cent, "others" being 15·3 per cent.

According to Bradstreet's, from data collected during four years, the causes of failures (taking numbers) are as under :—

CAUSES.		Canada.	United States.
		p. c.	p. c.
Due to incompetence	4 years' average.....	9·7	15·7
" inexperience	" .....	2·0	4·9
" lack of capital	" .....	68·8	33·4
" unwise credits	" .....	0·9	4·4
" speculation (outside)	" .....	1·2	1·2
" neglect of business	" .....	2·4	2·8
" extravagance	" .....	0·3	1·2
" fraudulent disposition	" .....	4·6	8·6
" disasters *	" .....	8·3	23·2
" failures of others	" .....	1·2	2·4
" undue competition	" .....	0·6	2·2

\* i. e., crop failure and commercial crisis.

Capital is responsible for a greater portion of failures in Canada than in the United States. In every other particular the failures in Canada bear a greater proportion to the whole than in United States.

965. Proportion of failures to those in business :—

## CANADA.

	1891.	1892.	1893.	1894.	1895.
Total in business .....	75,589	75,860	76,856	78,793	80,666
Total failing .....	1,846	1,682	1,781	1,864	1,916
Proportion of failing firms to total.	2.44	2.22	2.32	2.37	2.37

During the five years the increase in the number of traders was 6.7 per cent and the increase in the numbers of failures was 3.8 per cent. In the United States the increase in the number of traders was 3.5 per cent and in the number of failures 4.5 per cent.

## PART IV.

## POST OFFICE ACT AND SAVINGS BANKS.

966. The Post Office Act, which provides for the establishment of Post Office Savings Banks in Canada, was passed on the 20th December, 1867, and was limited in operation, as regards the savings banks, to the Provinces of Ontario and Quebec. Under its provisions a deposit must not be less than \$1, and by Order in Council 7th February, 1891, must not exceed \$1,000, in any one year; neither must the total amount on deposit exceed \$3,000. On the 1st September, 1885, the system was extended to the Provinces of Nova Scotia and New Brunswick, and the offices are now distributed in the several provinces as follows: Ontario, 448; Quebec, 123; Nova Scotia 48; New Brunswick, 34; Manitoba, 25; British Columbia, 23; Prince Edward Island, 8, and the Territories, 22, making a total of 731.

967. Government savings banks, under the management of the Finance Department, have been established in the Maritime Provinces and in Manitoba and British Columbia. In these, deposits are allowed to the extent of \$1,000. The number of offices under this system is 35, viz.: 22 in Nova Scotia, 8 in New Brunswick, 2 in Prince Edward Island, 1 in Ontario, 1 in Manitoba, and 1 in British Columbia. On the 30th June, 1895, there were 54,932 depositors with \$17,644,956 on deposit. Arrangements are made for the transfer of the Government savings banks in each province to the Post Office Department, as the position of superintendent at each place becomes vacant. Transfers were made during 1895—one in New Brunswick and one in Nova Scotia.

968. The rate of interest paid in both classes of savings banks was formerly 4 per cent, but is now  $3\frac{1}{2}$  per cent, the reduced rate having come into operation on the 1st of October, 1889.

The Post Office system went into operation on the 1st April, 1868, when 81 offices were opened. At the close of the three months ended June 30th, 1868, there were 2,102 depositors, 3,247 deposits had been made, and the

amount on deposit was \$204,589. On the 30th June, 1895, there were 731 offices opened, 120,628 depositors, and the total amount on deposit was \$26,805,542. Almost the whole of this increase has taken place during the last seventeen years, the amount on deposit on 30th June, 1879, having been only \$3,105,190. The average amount to the credit of each account in 1895 was \$222.22—the highest in any year since Confederation.

¶ 969. In addition to the above there are special savings banks, chiefly the Caisse d'Economie of Quebec and the Montreal City and District Savings Banks. The chartered banks also have savings branches, but the amounts on deposit in these branches are not separated from the general business and other deposits in the returns to the Government.

970. The following table gives the deposits with the Government in the two branches under Government control and the deposits in the special savings banks, but does not include deposits in the chartered banks and in the loan companies and building societies:—

DEPOSITS WITH THE UNDERMENTIONED SAVINGS BANKS.

YEAR ENDED 30TH JUNE.	Post Office Savings Banks	Other Government Savings Banks	Special Savings Banks	Totals
	\$	\$	\$	\$
1868.....	204,589	1,483,219	3,369,799	5,057,607

1886.....	17,159,372	20,014,442	9,177,132	46,350,946
1887.....	19,497,750	21,334,525	10,092,143	50,924,418
1888.....	20,689,033	20,682,025	10,475,292	51,846,350
*1889.....	23,011,423	19,094,934	10,761,061	52,867,418
1890.....	21,990,653	19,021,812	10,908,987	51,921,452
1891.....	21,738,648	17,661,378	10,982,232	50,382,258
1892.....	22,298,402	17,231,146	12,236,100	51,765,648
1893.....	24,153,194	17,696,464	12,823,836	54,673,494
1894.....	25,257,868	17,778,144	12,919,578	55,955,590
1895.....	26,805,542	17,644,956	13,128,483	57,578,981

rest on deposits in post office and other Government savings banks, 2 cent to 3½ per cent.

The amount per head of the population was in 1871, \$2.96; in 1881, \$5.44; in 1891, \$10.42; in 1893, \$11.02; in 1894, \$11.14, and in 1895 it was \$11.32 per head.

The development of the savings of the people may fairly enough be assumed from the above figures. They do not show the extent of the development as very large sums of money are held in the savings branches of the chartered banks of the country and in other institutions. Taking the figures given above, it appears that in 20 years, from 1875 to 1895, the savings of the people have increased till they are now four times what they were at the beginning of the period, per head of the population.

The special savings banks, which are Province of Quebec institutions, one being in Montreal and the other in Quebec City, and the two kinds of savings banks which are in charge of the Federal Government, show development even during the past two years, when the pressure of depressed trade affected the earning capacity of the people. The increase in 1895 over 1890 is over \$2,000,000.

971. The following table shows the number of depositors in each province, the amount on deposit, and the proportion of that amount per head of the population on 30th June, 1895:—

## POST OFFICE SAVINGS BANKS, 1895.

Means used in working out the amounts per head.

1894-5.

Number of post office savings banks during the year as follows: Ontario, 18; Quebec, 1; Nova Scotia, 2; Manitoba, 2; British Columbia, 3; Prince Rupert, 1; Territories, 2.

The number of the post office savings banks increased by 18 in 1895, and the amount on deposit by \$1,547,674. The average amount for each bank was \$6.58, and the average amount per head of the population was 5.16 cents. The number of depositors in 1895 is the largest in the history of these savings banks.

other savings banks under Government management had a number of depositors of 883; in the amount on deposit of an increase in the average amount to each depositor of \$2.69, higher than any year since 1890 with the exception of 1893. The decreases in the number of depositors in Ontario, Nova Scotia, and Prince Edward Island, and increases in New Brunswick and Columbia.

New Brunswick has the largest average amount to each depositor of any Province in the Post Office and the other Government savings banks.

When compared with 1894, the year 1895 shows, for both kinds of Government savings banks, an increase of \$17.66 per depositor in the Province of Ontario; \$3.60 in the Province of Quebec; of \$4.21 in the Province of New Brunswick; of \$16.02 in British Columbia; of \$22.13 in the Territories; of \$17.99 in Nova Scotia, and of \$30.16 in Manitoba. Prince Edward Island has a decrease of \$20.18 in the average amount to each depositor. The general average of the whole Dominion shows an increase of \$7.66 per depositor.

The amount on deposit in the Government savings banks (postal savings banks) in 1892 to 1895 per head of the population, by provinces, is given in the next table:—

PROVINCES.	1895.	1894.	1893.	1892.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.
.....	8 75	8 53	8 38	7 78

rd Island .....	20 27	21 01	20 67	19 61
ries .....	0 92	0 82	0 59	0 65

Post Office Savings Banks only.

The amount of deposits is not now required (as it was formerly) to be invested in Canadian Government securities, but forms part of the unfunded floating capital of the Dominion, and the amount of this floating capital, which is at the disposal of the Government, necessarily fluctuates.

977. The next table gives particulars of the transactions of the Post Office and Government savings banks in Canada for the six years ended 30th June, 1890-95:—

TRANSACTIONS OF THE POST OFFICE AND GOVERNMENT SAVINGS BANKS IN CANADA, DURING THE FISCAL YEARS ENDED 30TH JUNE, 1890-95.

\*Including \$1,384 Suspense.

The withdrawals during the five years 1890-94 averaged \$11,788,693 and the deposits \$11,804,616. The withdrawals in 1895 were \$508,643 less than the five years' average, and the deposits were \$889,911 more than the average for the same five years.

The policy of the Government is to transfer, as occasion arises, the accounts from the savings banks under the control of the Finance Department to the Post Office Department.

Under this policy the following amounts have been transferred :—

Nova Scotia.....1890 .....	\$ 68,579
1891.....	161,596
1894.....	84,292
1895.....	337,349

1894.....	133,882
1895.....	156,540
British Columbia, 1891.....	227,574

## PART V.

### LOAN COMPANIES.

978. The first Canadian Act referring to building societies was passed in 1846, and was to encourage the establishment of building societies in Upper Canada. It was speedily followed by a similar Act for Lower Canada. In 1847, the Legislature of New Brunswick, and in 1849, that of Nova Scotia, passed Acts for the regulation of benefit societies. Since then there have been forty or more Acts passed by the several legislative authorities of what is now the Dominion of Canada.

979. The Act of 1874, passed by the Dominion Parliament, seems to have given these institutions a fresh start, as the statistics show that of the now existing ones, eight were established before 1860, eight between 1860 and 1869, thirty-nine between 1870 and 1879, fourteen between 1880 and 1889, and one since 1889. More than one-half of all in operation were established between 1874 and 1880.

The oldest established is the Lambton Loan and Investment Company, which was started in 1844.

In 1882 the average amount of real estate under mortgage for each of the 91 then existing building and loan and investment companies was \$1,626,706, and in 1894 it was for each of the 94 companies \$2,420,000.

The Act of 1874 permitted building societies to issue debentures and to take deposits, the latter privilege, however, being extended only to such institutions as had a paid-up capital of \$200,000, subsequently, in 1877 reduced to \$100,000.

In 1874 the debentures issued amounted to under \$20,000. In 1882 the debentures payable in Canada amounted to \$2,968,880, and those payable

in Great Britain and elsewhere to \$23,701,481, a total of \$26,670,361. This total had increased in 1894 to \$57,541,700, of which payable in Great Britain and elsewhere was \$47,153,563, and in Canada, \$10,388,147.

In 1874 the current loans on real estate were \$15,041,858; in 1882, \$68,025,897, and in 1894, \$116,810,578.

The deposits with these companies were, in 1874, \$4,614,812; in 1882, \$14,241,782, and in 1894, \$20,782,944.

The reserve fund, which in 1874 was somewhat over 16 per cent of the paid-up capital, was in 1894 about 30 per cent of the paid-up capital.

980. A comparative statement of the liabilities and assets of loan companies and building societies in each year since 1874, and a detailed statement for 1894, are given below. Thirty-three companies made returns to the Federal Government in 1874 and 94 in 1894, 84 of which were in Ontario, 7 in Quebec and 3 in Nova Scotia. In the period between 1875 and 1894, the companies increased in number by 54, their paid-up capital increased \$29,042,767, their deposits \$15,762,237, and their total loans \$102,802,169.

During ten years the capital paid up has increased by 25 per cent, the reserve fund by 59 per cent, the deposits by 34 per cent, debentures payable by 65 per cent and the total liabilities by 52 per cent. On the asset-side of the account, the total assets have increased by 54 per cent, current loans secured on real estate by 48 per cent, total loans by 48 per cent, and total property owned by 104 per cent.

The following is a summary statement of the affairs of the loan companies and building societies in 1894:—

## LIABILITIES.

PROVINCES.	Capital Subscribed.	Capital Paid up.	Reserve Fund.	Total Liabilities to Share- holders.	Deposits.	Debentures payable in Canada.	Debentures payable in Britain or elsewhere.	Total Liabilities to the Public.	GRAND TOTAL LIABILITIES

## STATEMENT OF THE AFFAIRS OF LOAN COMPANIES AND BUILDING SOCIETIES, IN THE DOMINION OF CANADA, FOR THE YEAR 1894.

## CAPITAL STOCK.

Capital subscribed.....\$91,893,510

## LIABILITIES.

1. Capital stock fully paid up.....	\$ 20,986,969
2. Capital stock subscribed, upon which has been paid .....	16,227,946
3. Accumulating stock .....	1,916,851
4. Reserve fund .....	11,433,493
5. Dividends declared and unpaid.....	985,684
6. Profits on accumulating stock.....	173,567
7. Contingent fund and unappropriated profits..	1,272,659

Liabilities to stockholders.....\$ 53,017,169

8. Deposits.....	20,782,944
9. Debentures payable in Canada.....	10,388,147
10. Debentures payable elsewhere.....	47,153,563
11. Debenture stock.....	2,939,452
12. Interest on debentures and debenture stock..	790,016
13. Owing to banks .....	643,697
14. Other liabilities (description specified) in each return.....	5,808,242

Liabilities to the public.....88,506,062

Total liabilities.....\$141,523,231

## ASSETS.

## Current loans secured on—

1. Real estate .....	116,810,578
2. Dominion securities .....	
3. Provincial securities.....	
4. County or city securities.....	940
5. Township, town or village securities.....	55,376
6. School section securities.....	6,786
7. Loan companies' debentures.....	211,093
8. Loans to shareholders on their stock .....	805,077
9. Otherwise secured (description specified) in each return.....	3,803,120

Total.....121,692,979

## Property owned—

10. Dominion securities—present cash value.....	361,207
11. Provincial “ “ .....	343,571
12. County or city securities “ .....	1,393,123
13. Township, town or village securities—present cash value.....	911,194
14. School section securities—present cash value.....	196,548
15. Loan companies' debentures.....	211,461
16. Office furniture and fixtures.....	51,134
17. Cash on hand .....	99,256
18. Cash in bank .....	3,879,150
19. Office premises.....	1,786,693
20. Loans secured on real estate held for sale.....	3,692,531
21. Other property (description specified) in each return—present cash value.....	7,694,591

Total property owned.....20,620,370

Total assets.....\$142,313,349

NOTE.—Liabilities of the Scottish American Investment Company (Limited) not added. "Other liabilities" in 1893 amounted to \$805,749. The very great increase in 1894 to \$5,808,242 is caused by the Toronto General Trusts Co. appearing for the first time in returns. The details under this heading for this company are: High Court of Justice Ontario, investment and accrued interest, \$2,275,618; estates, realizations invested in mortgages, debentures and cash (except lunatic estates) \$2,689,102; other, \$3,798; making total of \$4,958,518.

## MISCELLANEOUS STATEMENTS.

Date of the establishment of the oldest company or society from which returns have been received.....1844	
Amount of dividends declared during the year.....	\$ 2,547,340
" loaned during the year.....	18,469,963

1885.....	166,651,537	78,775,243	47.2	3,084,114	3.91
1886.....	178,625,700	84,573,384	47.3	3,683,914	4.35
1887.....	185,121,682	86,901,364	47.0	3,292,417	3.77
1888.....	183,974,726	93,468,943	50.8	2,516,875	2.69
1889.....	205,780,434	98,726,041	48.0	2,368,274	2.39
1890.....	216,769,604	105,535,649	48.2	2,055,428	1.95
1891.....	223,024,890	106,404,856	47.7	2,138,500	2.03
1892.....	261,589,236	109,807,356	41.9	2,519,452	2.30
1893.....	227,849,872	110,916,560	48.7	2,746,648	2.48
1894.....	225,045,980	116,810,578	51.9	3,244,464	2.78

In the last ten years the value of the real estate under mortgage has increased 34 per cent, the mortgages have increased in amount 48 per cent, and the overdue mortgages have increased 5 per cent.

The proportion of overdue mortgages to total amount of mortgages during years, 1884-93, average 2·90 per cent, and in 1894 it was 2·78 per cent. During 21 years the proportion has been higher in ten years and lower in ten years than it was in 1894.

The aggregate amount of mortgages upon which compulsory proceedings were taken during 1894 was 2·5 per cent of the amount invested and secured by mortgage deeds. The corresponding percentages are, 1880, 4·3 per cent; 1885, 2·3 per cent; 1890, 2·0 per cent; 1891, 2·1 per cent; 1892, 2·0 per cent; 1893, 2·1 per cent, and in 1894, 2·5 per cent. There has been a slight tendency to increase since 1890.

32. Chattel mortgages in the Province of Ontario numbered 21,759 for 1894, 220,205, according to returns published by the Ontario Government. The average amount in 1894 was \$516, \$473.25 in 1893, \$518.30 in 1892, \$490 in 1891, \$502 in 1890 and \$462 in 1889.

Of the total chattel mortgages, farmers gave :—

In 1894, 53 per cent in number and 30·7 per cent in amount.

1893, 54	"	32·8	"
1892, 57	"	33·8	"
1891, 53	"	36·0	"
1890, 61	"	39·6	"
1889, 57	"	38·0	"

The larger proportion of the total number of chattel mortgages was given by farmers, but the proportion of the total amount given by farmers was smaller, and was smaller in 1894 than in any of the previous years.

## CHAPTER XIV.

Railways of Canada.—Distribution by Provinces.—Capital Invested in Railways.—Railway Statistics.—Earnings and Expenditures.—Rolling Stock.—Freight Carried.—Passengers.—Government Railways.—Their Financial Position.—Principal Animals Carried.—Analysis of Business Done.—Canals.—Chronological Statement.—History of Canal Building in Canada.—Traffic on Canals of Canada.—Cost of Canals.—Revenue of Canals.

983. Canada is fairly well supplied with railways. These, in connection with the canal and river system of the country, afford exceptional facilities for internal communication.

There were 15,977 miles of railway in operation in the whole Dominion on the 30th June, 1895, and 16,091 miles of track laid.

984. The distribution by provinces is as follows :—

### MILEAGE OF TRACK LAID AND SQUARE MILES OF AREA TO EACH MILE OF RAILWAY.

PROVINCES.	Miles of track laid.	Square miles of area to each mile of track laid.
Ontario	4,863	10
Quebec	3,539	22
New Brunswick	1,494	21
Nova Scotia	892	25
Prince Edward Island	219	8
Manitoba	1,472	6
The four North-west Territories	1,772	27
British Columbia	891	23
Total	16,091	

In addition to the above there are 28 miles of railway owned by the Government and iron companies, all in Nova Scotia. This mileage is all of the 4 ft. 6 in. gauge, with the exception of three miles with a 3 ft. gauge.

In the older Provinces of Quebec and Ontario the southern portions are covered with a network of lines. Several railway centres have been established. Thus, six lines of railway centre at Quebec City, and at Montreal, seven at Toronto and six at Ottawa. Nine railways meet at

the older province New Brunswick is better supplied with railways in its area than any of the others.

ken according to population :

Manitoba	has population, 43.7 per cent ; railway miles, 39.8 per cent.
Quebec	30.8 " " 19.5 "
Nova Scotia	9.3 " " 5.5 "
New Brunswick	6.6 " " 8.8 "
P.E. Island	2.3 " " 1.3 "
Manitoba	3.2 " " 9.1 "
North W. Ter.	1.4 " " 11.0 "
Columbia	2.0 " " 5.0 "

The immense aid railways are to the Province of Manitoba and the Territories is seen in the above statement. The country has those parts of the Dominion with railway facilities far in advance of it, it having been felt that if the great fertile plains are to become the home of millions of people, railway communication should precede.

It is estimated that during the harvest of 1895, wheat to the value of 10 cents per bushel, of one million dollars was cut every day. As a large portion would be required for use within the province, the export surplus would be very large. In dealing with the export the advantage of having a railway like the Canadian Pacific is incalculable. The crop has demonstrated the necessity of having railway communication though it seems in excess of the wants of the population judged by standards.

In 1850 there were sixty-six miles of railway in operation in all Canada, increased to 2,065 miles in 1860, and to 2,278 miles in 1867, when the provinces were united. In the next ten years there was an increase of 304 in the mileage. In 1888 there were 12,184 miles in operation. In 1895 the miles of railway in operation had increased to 15,977. Since Confederation (1867) there has been an increase of 13,699 miles of railway in operation. In 1868 the paid-up capital amounted to \$90, and in 1895 to \$894,640,559.

There are now 136 railways. Twenty-five of these have been amalgamated into the Grand Trunk railway system. The consolidation of 22 others has created the Canadian Pacific railway system. The remaining 89 are more or less consolidated, so that in all there are 76 separate organizations. Two of these are bridge companies, with 3½ miles of rails ; one is a street railway with 2½ miles of rails, and two are electric railways, one nearly 14 miles, the Niagara Falls Park and River Electric Railway, and one 22 miles, the Montreal Park and Island Railway, leaving 69 railways. Of these the Canadian Pacific Railway, the Grand Trunk and the Inter-

proportion (rails laid) of these several organizations is :—

Canadian Pacific	6,174.10
Grand Trunk	3,161.98
Colonial	1,383.60
Other railways	5,322.29
Electric railways (two)	35.71
Bridges and tunnel	6.08
Total	16,080.76

As a rule, the railways of Canada are built with a gauge of 4 feet 8½ inches. The exceptions to the rule are the Carillon & Grenville (13) with a gauge of 5 feet 6 inches, the Prince Edward Railway (211) with a gauge of 3 feet 6 inches, and the Montford Colonization (21) and the Alberta Coal (64) Railways, each with a gauge of 3 feet.

988. The following table, which gives the sources from which the various sums have been derived that make the total capital paid up, shows to what a large extent the railways of this country have been assisted by state and municipal aid. The Dominion Government has contributed at the rate of \$9,369 per mile constructed, the Provincial Governments at the rate, on an average, of \$1,847 per total mileage constructed, and the municipalities at the rate of \$8·1 per mile on total mileage. As, however, the provincial contributions were limited to roads within the province, the individual provincial contributions per mile were much larger :—

PARTICULARS OF RAILWAY CAPITAL PAID, 1891 to 1895.

SOURCE OF CAPITAL.	AMOUNT.				
	1891.	1892.	1893.	1894.	1895.

Quebec .....	10,879,134	12,033,013	12,630,410	13,711,771	14,439,300
New Brunswick Government	4,297,501	4,365,336	4,425,282	4,452,482	4,455,000
Nova Scotia Government...	2,007,996	1,909,696	2,121,944	2,075,344	1,435,100
Manitoba Government .....	2,477,250	2,390,690	2,623,287	2,625,562	2,625,000
British Columbia Govt. ....	37,500	37,500	37,500	37,500	37,500
Municipalities .....	13,817,509	13,981,248	14,017,957	14,178,611	14,190,000
Capital from other sources...	2,102,062	10,278,200	3,592,378	6,471,312	7,533,000
Total .....	816,647,758	844,991,750	872,156,476	887,975,020	894,640,000

989. The proportion that each amount bears to the total capital is as follows :—

—	1889.	1890.	1891.	1892.	1893.	1894.	1895.
	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent
Ordinary share capital .....	31·0	30·0	29·2	28·9	29·01	28·83	28·6
Bonded debt .....	33·0	34·0	35·8	36·1	35·23	36·83	36·7
Dominion Government aid .....	18·0	18·0	17·5	17·1	16·88	16·80	16·6
Preference share capital .....	12·0	12·0	12·3	11·7	13·63	11·91	11·81
Provincial Government aid .....	3·0	3·0	3·2	3·2	3·23	3·31	3·22
Municipal aid .....	2·0	2·0	1·7	1·7	1·61	1·69	1·52
Other sources .....	0·4	0·4	0·3	1·2	0·41	0·72	0·56

be seen that 21·75 per cent of the total capital has been contributed by federal, provincial and municipal aid.

990. Though returns of a certain kind were annually made to the Government, they were, previously to 1874-75, incomplete; only since that year have any accurate statistics been collected. The following table gives the train mileage, number of passengers and tons of freight carried, and the receipts and expenditures of all railways in the Dominion for each year since the 1st July, 1874:—

RAILWAY STATISTICS, 1875-95.

YEAR ENDED 30TH JUNE.	Miles in Operation.	Train Mileage.	Number of Passengers.	Tons of Freight.	Earnings.	Working Expenses.	Proportion of Expenses to Receipts.
					\$	\$

During the period covered by the table the train mileage increased 130 per cent; the number of passengers carried, 169 per cent, and the tons of freight transported, 280 per cent. The earnings increased in the same period 140 per cent, and the working expenses, instead of keeping pace with the earnings, increased only 107 per cent. The last column in the table shows the proportion of expenses to receipts year by year. Taking 1895, there were only three years in which the proportion of earnings consumed in expenses was as small.

There was a decrease in the total receipts in 1895 of \$2,767,041 as compared with the previous year. The working expenses showed a decrease of \$2,468,764 and the proportion of expenses to receipts was 70 per cent, being 1 per cent lower than in 1894.

991. In 1894 the decrease in total receipts was \$2,489,869, as compared with 1893, while the working expenses showed a decrease of \$1,397,600, and the proportion of expenses to receipts was 71 per cent, being 1 per cent higher than in 1893. The earnings and expenses per mile are as follows, in the years named. The increase or decrease shown in the table is, in each case, with the year immediately preceding:—

## EARNINGS AND EXPENSES PER

YEAR.	Earnings.	Increase or Decrease.
	\$	\$
1875 .....	4,033	.....
1880 .....	3,418	— 615
1885 .....	3,175	— 243
1886 .....	3,106	— 69
1887 .....	3,332	+ 226
1888 .....	3,465	+ 133

As compared with 1894 there was a decrease in 1895 of \$1 per \$100, in the proportion of expenses to receipts, taking all the railways, government and other.

994. The Canadian Pacific system has the greater number of miles in operation, but the Grand Trunk system has considerably the larger traffic, running as it does through the most populous and best settled portions of the Dominion. In proportion to the number of miles in operation, the freight traffic on the Canada Southern exceeded that of any other line, being in 1895 at the rate of 7,518 tons per mile as compared with 6,943 tons per mile in 1894. There was in 1894 a decrease of 1,045 tons per mile compared with 1893, which latter year showed a decrease of 388 tons as compared with 1892. That on the Grand Trunk system was 2,214 tons, a decrease of 61 tons per mile. In 1894 it was 2,275 tons, which was a decrease of 45 tons per mile compared with 1893; on the Canadian Pacific the decrease in 1895 was 53 tons per mile as compared with 1894, and of 82 tons per mile in 1894 as compared with 1893. On the same lines the passengers carried per mile were: On the Grand Trunk 1,600, a decrease of 361; on the Canada Southern 1,234, a decrease of 304; and on the Canadian Pacific 468, a decrease of 46. The number of miles run by trains on the same lines in proportion to each mile in operation was: On the Canada Southern, 9,427 miles in 1893; 8,364 in 1894, and 7,820 in 1895; on the Grand Trunk, 5,457 miles in 1893; 5,567 in 1894, and 4,864 in 1895, and on the Canadian Pacific, 2,392 miles in 1893; 2,156 in 1894, and 2,000 in 1895.

995. The following table shows the percentage of gross receipts expended in working the railways of Canada during the period 1875-95:—

PERCENTAGE OF GROSS RECEIPTS EXPENDED IN WORKING THE RAILWAYS OF CANADA.

1875.....	81.02	1886.....	74.29
1876.....	81.68	1887.....	71.42
1877.....	81.58	1888.....	72.79
1878.....	78.46	1889.....	71.26
1879.....	81.24	1890.....	70.26
1880.....	71.47	1891.....	72.26
1881.....	71.89	1892.....	70.60
1882.....	77.13	1893.....	70.26
1883.....	74.27	1894.....	71.07
1884.....	76.58	1895.....	70.00
1885.....	74.51		

Divided in five-year periods, the average is as under:—

1875-79.....	80.80 per cent.
1880-84.....	74.27 "
1885-89.....	72.78 "
1890-94.....	70.97 "
1895.....	70.00 "

It is apparent, therefore, that there has been a steady decrease in the proportion of receipts required to be expended in working the railways.

Comparing Canada with similar regions of the United States, it is seen the proportion is not quite so high in Canada, notwithstanding the seasonal greater difficulties in winter. In the New England States the proportion is 72·70 per cent, in the Middle States 70·74 per cent, and in the Central Northern States of Ohio, Michigan, Indiana, Illinois and Wisconsin it is 71·5 per cent.

6. The following table is a statement of the receipts and expenditures of the most important roads, showing the principal services of each, and giving also the earnings and expenses per mile:—

## SUMMARY STATEMENT OF EARNINGS ON CANADIAN RAILWAYS, 1895.

Total .....	7,023,104	13,143,916	12,577,649	32,749,669	80·54

The receipts in 1895 from freight traffic formed 63·2 per cent and from passenger traffic 23·4 per cent of the total, while of working expenses 41·1 per cent were for working and repairs, 38·4 per cent for general working expenses, and 21·5 per cent for maintenance of line, &c. The receipts per mile of the Canadian Southern were nearly double those of the Grand Trunk, and more than three times those of the Canadian Pacific and of the average of all the railways of Canada. Considering the enormous length of line to be maintained, the expenditure per mile on the Canadian Pacific Railway is remarkably small. The receipts on the Intercolonial Railway were \$3.37 per mile in excess of the expenses, as compared with an excess of expenditure of \$433 per mile in 1892, and of \$600 per mile in 1891.

997. The following table is a general statement of the gross and net income of the railways of Canada during eleven years. The best year in the eleven years, judged by the percentage of net income to capital, was the fiscal year 1892 :—

Per cent of net income to capital .....	3.04 p. c.	3.51 p. c.	3.46 p. c.	2.92 p. c.	2.61 p. c.	

\* Maintenance of line, buildings, &amp;c., workings and repairs of engines and of cars.

998. The receipts per train mile in Canada were \$1.15 per mile, being lower than those of the United Kingdom and most of the Australasian colonies, but higher than in the principal European countries, as shown by the following table:—

## GROSS RECEIPTS OF RAILWAYS PER TRAIN MILE.

New Zealand.....	\$1.80	Austria-Hungary.....	\$1.21
New South Wales.....	1.72	Russia.....	1.11
South Australia.....	1.58	Italy (State lines).....	1.01
United Kingdom.....	1.33	Germany.....	0.85
Victoria.....	1.32	France.....	1.03
Canada.....	1.15	Belgium.....	0.67
Queensland.....	1.15	Tasmania.....	0.91
Western Australia.....	0.97		

The average amount received per ton of freight carried in Canada in 1893 was \$1.37 against \$1.45 received in 1894, being lower than in the Australasian colonies, Russia, Roumania, Italy, France and Austria-Hungary, but higher than in the other countries named below.

## AVERAGE AMOUNT RECEIVED PER TON OF FREIGHT CARRIED.

Queensland.....	\$2.98	Canada.....	\$1.37
South Australia.....	2.88	Austria-Hungary.....	1.48
Russia.....	2.90	Denmark.....	1.11
New South Wales.....	2.03	Switzerland.....	1.11
Roumania.....	1.99	Norway.....	0.85
Italy.....	1.82	Germany.....	0.79
Victoria.....	1.92	Holland.....	0.75
New Zealand.....	1.66	United Kingdom.....	0.68
France.....	1.52	Belgium.....	0.65
Tasmania.....	1.34		

The greater distances to be travelled, no doubt, account for the average amount being higher in the Colonies than in the United Kingdom and European countries.

999. The average capital cost per completed mile of railroad in Canada has been, up to the present time, \$55,599, which is lower than in European countries and the United States, but higher than in most of the Australasian colonies, as shown by the following table, taken partly from the *Statistical Year-Book*, 1893, the conversions having been made in this office:—

## CAPITAL COST PER MILE OF RAILWAY IN VARIOUS COUNTRIES.

COUNTRIES.	Cost per Mile.	COUNTRIES.	Cost per Mile.
	\$		\$
England and Wales.....	269,851	Victoria.....	62,507
United Kingdom.....	228,960	Canada.....	55,599
Scotland.....	199,638	United States.....	61,498
France.....	133,833	Australia.....	48,574
Belgium.....	108,921	India.....	43,780
British Dominions.....	100,988	Tasmania.....	39,895
Germany.....	98,705	Cape Colony.....	38,940
Austria.....	96,520	New Zealand.....	38,165
Switzerland.....	95,011	Norway.....	35,661
Holland.....	90,355	Queensland.....	33,480
Italy.....	82,217	South Australia.....	31,280
New South Wales.....	70,854	Sweden.....	29,065
Ireland.....	63,064	Western Australia.....	27,790

The proportion of net revenue to capital cost in Canada is very small, and, with two exceptions, is lower than that of any country or colony named in the following table, which is taken partly from the Victorian Year-Book, 1893. The proportion in Canada would be slightly higher if the capital cost of the lines in operation could be ascertained, but, as it is, the figures used include the cost of construction of 14 complete miles not yet in operation, and of 225 miles at present under construction.

PROPORTION OF NET REVENUE TO CAPITAL COST OF RAILWAYS IN  
VARIOUS COUNTRIES.

COUNTRIES.	Per cent.	COUNTRIES.	Per cent.
Cape Colony.....	5·75	Ireland.....	3·80
Germany.....	5·40	Scotland.....	3·35
India.....	4·96	Australasia.....	*3·12
Belgium.....	4·55	Sweden.....	3·24

British Dominions.....	3·93	Western Australia.....	5·44

\*Proportion of net revenue to total capital paid up.

1000. The cost of a railway, it has been said, should not be more than ten times its annual traffic—that is, that the annual traffic should be 10 per cent of its capital cost. If this standard is applied to Canadian railways their cost will be found very far to exceed the limit, as in 1895 the gross receipts only amounted to 52·30 per cent of the total capital expenditure, the theoretical cost having been \$467,854,870 and the actual cost \$894,640,559.. In the United Kingdom, France, Belgium and Italy, the cost of railways is above this standard, while in British India, Germany, Russia and the United States it is below it.

The following table shows the total cost and cost per mile, both actual and theoretical, of some of the principal railroads in Canada in 1895:—

ACTUAL AND THEORETICAL COST OF PRINCIPAL RAILWAYS IN  
CANADA, 1895.

RAILWAYS.	Number of Miles.	THEORETICAL COST.		ACTUAL COST.	
		Total.	Per Mile.	Total.	Per Mile.
		\$	\$	\$	\$

Total . . . . .	13,363	441,220,620	33,018	821,843,360	61,501

\*Central Counties included.

†Saskatchewan and Western included.

‡Windsor & Annapolis, Cornwallis Valley and Annapolis Valley.

There is, it will be seen, only one railway in the above list, the actual cost of which has been less than the theoretical cost, viz., the Canada Southern. The expenditure on the construction and equipment of the Grand Trunk system has been heavier than that on any other road, the original outlay on the main line having been very excessive and the actual cost being over double the theoretical cost. On the same basis of comparison, however, it would appear that the Calgary & Edmonton Railway has been the most expensive to build, for while its theoretical cost should have been \$3,486 per mile its actual cost was no less than \$21,895 per mile.

1001. The following is a table showing the railway receipts per mile in the United Kingdom and British possessions and some foreign countries :—

RAILWAY RECEIPTS PER MILE IN VARIOUS COUNTRIES.

COUNTRIES.	Annual Receipts per Mile Open.	COUNTRIES.	Annual Receipts per Mile Open.
	£		£
England and Wales .....	23,003	New South Wales .....	6,920
United Kingdom .....	19,006	Trinidad and Tobago .....	4,957
Belgium .....	12,420	Cape Colony .....	4,798
France .....	11,042	Jamaica .....	4,078
Russia .....	7,814	Australia .....	4,675
Germany .....	11,451	Australasia .....	4,302
Austria-Hungary .....	7,616	Canada .....	2,928
Natal .....	7,265	New Zealand .....	2,925
India .....	6,648	Barbados .....	2,380
Ceylon .....	6,575	South Australia .....	3,309
United States .....	7,050	Newfoundland .....	2,088
Italy .....	6,300	Queensland .....	2,209
Victoria .....	5,188	Tasmania .....	2,229
Mauritius .....	5,856	Western Australia .....	1,625

The receipts per mile are less in Canada than in most of the countries named, but are higher than in the Australasian colonies, with the exception of Victoria, South Australia and New South Wales. In comparing the receipts of Canada and Australasia with other countries, the large area in most cases to be covered must be taken into account. The receipts by provinces in Canada, if they could be obtained, would be more correct figures to compare with the receipts of the several Australasian colonies.

1002. The quantity and description of the rolling stock in the year 1891 to 1895 will be found in the next table :—

ROLLING STOCK IN USE IN RAILWAYS IN CANADA, 1891 to 1895.

YEAR.	Locomotives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Emigrant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Platform Cars.	Coal and Dump Cars.
1891 .....	1,850	142	849	624	560	34,365	14,614	3,559
1892 .....	1,961	155	909	634	591	35,668	15,403	3,584
1893 .....	1,954	161	977	664	610	35,741	15,719	3,455
1894 .....	2,002	199	992	670	636	35,852	14,904	4,699
1895 .....	2,023	216	1076	702	1,154	36,360	15,758	4,845
Increase 1895 and 1894 .....	+ 21	+ 17	+ 84	+ 32	+ 518	+ 508	+ 854	+ 146

In addition to the above there were, in 1895, 14 engines and 484 waggons employed on the coal railways of Nova Scotia.

The above table represents the rolling stock in use. To ascertain the quantity owned, the following number of cars hired must be deducted in each year :—

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Emi- grant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Platform Cars.
1891 .....	50	17	31	15	25	3,625	289
1892 .....	39	7	39	2	16	2,992	198
1893 .....	17	6	28	2	9	1,946	174
1894 .....	37	45	31	5	10	3,094	*329
1895 .....	75	60	65	8	25	2,783	*321

\*Including coal and dump cars.

Out of the above numbers, the following were in use by the two great railway systems, the Canadian Pacific and the Grand Trunk :—

ROLLING STOCK.	1892.		1893.		1894.		1895.	
	C. P. R. System.	G. T. R. System.	C. P. R. System.	G. T. R. System.	C. P. R. System.	G. T. R. System.	C. P. R. System.	G. T. R. System.

Coal and dump cars	471	.....	361	.....	361	1,225	90	1,225

The C.P.R. also has as part of its equipment, 80 snow ploughs, 44 flangers, 33 tool cars, 26 steam shovels, 44 boarding cars and 81 gravel cars, &c.

1003. In the railway report for 1876, the number of miles of railway laid with steel rails is given at 2,373½ miles. This included mileage owned by Canadian companies in the United States. But it may be said that about 45 per cent of the main tracks in Canada were laid with steel rails. In 1886 the number of miles of steel rails was 10,303, and of iron 1,220. In 1895 the number of miles of steel rails laid was 15,745, there being only 346 miles with iron rails.

During the period of 1876-95 practically all the railways have been supplied with steel rails.

In 1876 the range of the weight of the steel rail then laid was from 56 to 60 pounds per yard.

In 1895 the range was from 50 to 80 pounds, the St. Clair tunnel being laid with rails weighing 100 pounds per yard.

1004. The Canada Southern has  $95\frac{1}{2}$  miles of double track; the Intercolonial has  $1\frac{1}{2}$  miles; the Canadian Pacific,  $13\frac{1}{2}$  miles, and the Grand Trunk,  $404\frac{1}{2}$  miles.

The number of ties per mile on Canadian Railways is, as a general rule, 2,640. The Canada Southern, the Canadian Coal & Railway Co., the Montreal & Vermont Junction, and Montreal, Portland & Boston, have each 3,000. Parts of the Canadian Pacific have 3,168. The Esquimault & Nanaimo Railway has 2,992.

1005. There were 53 grain elevators reported in 1895. The number of level crossings was 10,799, of which 151 were guarded and 218 were level crossings of railways by railways. There were 398 overhead bridges reported, with heights above rail level varying from 14 to 35 feet. The number of junctions between different railways was 316 and between main and branch lines 232.

Of the 16,091 miles of completed railway, all but 309 miles are laid on a 4 ft.  $8\frac{1}{2}$  in. gauge. Of the 309 miles, 13 miles were on the 5 ft. 6 in. gauge, 210 on the 3 ft. 6 in., and the remainder on the 3 feet gauge.

Of the 40,661,880 train miles run in 1895, 15,332,276 miles were with passenger trains, 19,939,699 miles with freight trains, and 5,389,915 miles with mixed, freight and passenger trains. The engine mileage was 51,339,885 miles.

The average rate of speed of passenger trains on 47 Canadian lines giving the rate was 25 miles per hour. The Canada Southern averaged 41 miles; the Canada Atlantic, Lake Erie & Detroit, and the Montreal & Vermont Junction, 35 miles each; the Montreal & Sorel (South Shore), the St. Lawrence & Adirondack, the Canada Eastern, the Montreal & Atlantic, the Montreal, Portland & Boston, the Ottawa & Gatineau, the Ottawa, Arnprior & Parry Sound, the Pontiac & Pacific Junction, and the Grand Trunk, 30 miles each; the Canadian Pacific, 28 miles; the Manitoba & North-western, 27 miles; the Dominion Atlantic and the Intercolonial, 25 miles.

The average rate of speed of freight trains was 17 miles an hour. Thirty-three systems made over 17 miles; three made 17, and thirty-two made under 17 miles.

1006. The progress made in Canada since Confederation has been very great. The total miles in operation in 1867 was 2,278 miles; in 1895, including double tracks and coal companies, it was 16,653 miles.

Compared with 1885 the total train mileage of 1895 shows an increase of 32.73 per cent. The passenger train mileage shows an increase of 61.20 per cent, freight train mileage an increase of 21.71, and mixed freight and passenger 14 per cent.

The following table shows the condition in 1867 :—

## RAILWAYS IN CANADA—1867.

RAILWAYS.	Locomotives.	Cars, all kinds.	Passengers.	Freight.	Revenue.	Expenditure.
	No.	No.	No.	Tons.	\$	\$

Total, 1867 .....	491	7,924	2,784,596	2,272,309	12,029,809	7,933,229
" 1893 .....	1,954	57,267	13,618,927	22,603,599	52,042,397	38,616,683
" 1894 .....	2,002	57,952	14,462,498	20,721,116	49,652,528	35,218,437
" 1895 .....	2,023	60,111	13,987,580	21,524,421	46,783,487	32,749,669

Taking the Grand Trunk, the Great Western, the Nova Scotian, the Northern and the Midland, which railways carried 87 per cent of the passengers and 90 per cent of the freight, their passengers, in 1867, numbered 2,412,496, and their revenue from this source was \$3,987,467; and their freight amounted to 2,051,688 tons, the carrying of which gave a revenue of \$6,545,932. The average charge per passenger was \$1.63, and per ton of freight, \$3.19.

In 1895 the receipts from passengers carried amounted to \$13,311,449 and from freights, including mail and express freight, \$31,743,950. If the rates of 1867 are applied to the freight and passenger business of 1895, the result is receipts from passengers \$22,799,755 and from freights \$68,662,902.

The cost to the average passenger for railway transport in 1895 was \$1.95½, and the cost of transporting one ton of freight averaged \$1.47. The difference is the gain to the country in its transport bill for goods carried by railways. The average passenger is carried for 41 per cent less than the charges of 1867, and the average cost of freight is 54 per cent less.

The Dominion Government has granted aid to railways (including the construction of the Intercolonial) to the amount of 154 million dollars. At 4 per cent the interest on this would be 6 million dollars a year. The saving effected by the public in the one year, 1895, caused by the reduced rates, and taking 1867 as the standard, would pay the interest charges for 14 years.

Mr. Mulhall, in a paper entitled "Our Colonial Empire," published in the *Contemporary Review* for May, 1895, and dealing with recent years only,

says "the average cost of construction per mile in Canada was £11,900. The net earnings were £211 per mile. The net profit in 1893 on every £100 invested in railways was £1 15s. 6d. in Canada. The annual loss on Canadian railways, that is the difference between the net profits and the interest on capital, appears to be £4,000,000. The saving in freight, meantime, at 10 per cent on imports and exports would be £5,000,000 per annum, which more than covers the loss."

Whichever mode of estimating the beneficial effects of railways is adopted it is clear that the result of the expenditure on account of railways by the Dominion Government, the several Provincial Governments and the municipalities is a great saving to the people.

1007. The next table is a statement of the principal articles of freight carried in 1895 by the railways mentioned and of the totals under each head carried by all the railways of Canada for each year since 1875 :—

## STATEMENT OF THE PRINCIPAL ARTICLES OF FREIGHT CARRIED IN 1885 BY THE RAILWAYS MENTIONED.

RAILWAYS.	Flour.		Grain.		Live Stock.		Lumber of all kinds except Fire-wood.		Fire-wood.		Manufactured Goods.		All other Articles.		Total weight carried.

the Grand Trunk system carried the largest share in 1895, viz.: 32·5 per cent of the total freight, as compared with 34 per cent in 1894 and with 33 per cent in 1893; the Canadian Pacific carried 17 per cent against 19 per cent in 1894 and 19 in 1893; the Canada Southern carried 13 per cent, as compared with 13 per cent in 1894 and 12 per cent in 1893. The total freight carried show an increase of 803,305 over 1894, and a decrease of 1,178 as compared with 1893.

During the period 1885-95 the total tons of freight carried increased by 100 per cent. Flour freights show a slight decline. Grain freights increased by 23·9 per cent; live stock increased by 5·16 per cent; lumber by 10 per cent; fire-wood by 84·3 per cent; manufactured goods by 98·7 per cent; all other articles by 47 per cent. The most noticeable feature is the great increase in the tons of freight of manufactured goods carried. This increase was to be expected from the very great development of manufactures in Canada.

1008. The following is a statement of the number of accidents in connection with the railways in Canada, including Government railways, for the last 21 years:—

YEAR.	Killed.	Injured.	YEAR.	Killed.	Injured.
1875.....	92	289	1886.....	144	571
1876.....	109	304	1887.....	178	633
1877.....	111	317	1888.....	231	775
1878.....	97	361	1889.....	210	875
1879.....	107	66	1890.....	218	838
1880.....	80	102	1891.....	196	818
1881.....	99	147	1892.....	233	879
1882.....	147	397	1893.....	216	708
1883.....	169	550	1894.....	211	694
1884.....	227	796	1895.....	187	658
1885.....	157	684			

There was a decrease of 24 in the number of persons killed, and 36 in the number of persons injured. Nine employees were killed while coupling cars, and out of 488 injured no less than 207 were hurt while similarly engaged, being 42·4 per cent of the whole number. The following are comparative figures for the last four years:—

	1892.		1893.		1894.		1895.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Passengers.....	14	40	11	55	12	64	9	60
Employees.....	110	700	72	533	67	521	51	488
Others.....	109	139	133	120	132	109	127	110
	233	879	216	708	211	694	187	658

The number of passengers killed was 3 less, and the number injured 4 less than in 1894. Seven of the passengers were killed by getting on or off trains in motion, so that the railway companies were really responsible for only 2 deaths. Six employees were killed by being on the track and 17 by falling from trains. Eighty-five "other" persons, out of 127 were killed by being on the track, and 39 out of 109 were injured from a similar cause.

The following is an analysis of railway accidents in Canada during the years 1893-95 :—

1893.

CAUSES.	Employees.		Passengers.		Others.		Totals.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Falling off trains.....	21	60	2	10	5	11	28	81

1895.

Falling off trains.....	17	51	1	9	7	9	25	69
Jumping off trains.....	1	36	7	25	12	28	20	89
At work on track.....	3	7					3	7
Head out of window.....		3		3				6
Coupling cars.....	9	207					9	207
Collisions.....	5	54	1	13		1	6	68
Walking on track.....	6	15		4	85	39	91	98
Explosions.....								
Striking bridges.....		2			1		1	
Other causes.....	10	114		6	22	32	32	152
Totals.....	51	489	9	60	127	109	187	688

The year 1895 showed an improvement as compared with previous years, the total killed being 24 fewer than in 1894 and 29 fewer than in 1893, and the total injured being 36 fewer than in 1894 and 50 fewer than in 1893.

In calculating the safety of railway travelling, the number only of those passengers for whose deaths the railway companies must be held solely responsible should, strictly speaking, be included; if the whole number is taken, it will be seen from the following figures that this country stands only fairly well as regards safe travelling :—

## PASSENGERS KILLED PER MILLION CARRIED, 1875-95.

YEAR.	Passengers Killed per Million Carried.	YEAR.	Passengers Killed per Million Carried.
1875 .....	2·11	1886 .....	0·61
1876 .....	0·90	1887 .....	1·03
1877 .....	0·82	1888 .....	1·75
1878 .....	1·40	1889 .....	3·05
1879 .....	1·38	1890 .....	0·86
1880 .....	1·55	1891 .....	0·98
1881 .....	0·72	1892 .....	1·03
1882 .....	1·07	1893 .....	0·81
1883 .....	0·52	1894 .....	0·83
1884 .....	4·60	1895 .....	0·64
1885 .....	0·82		

Average for the whole period.....1·00

The above figures, however, are capable of a large amount of improvement, the safety of travelling having been by no means yet reduced to the minimum that is both desirable and practicable, as is shown by the figures for the United Kingdom in 1893, which shows that only one passenger in 8,237,519 was killed during the year from any cause whatever, and one in 715,132 injured, and season ticket-holders are not included in the number of passengers. The corresponding figures for Canada in 1894 were 1 passenger killed in 1,205,208 and 1 in 225,976 injured. In 1895 the figures for Canada were 1 passenger killed in every 1,554,175, and 1 injured in 233,126. In the United States, in 1893, 299 passengers were killed, being 1 in every 1,985,152, and 3,229 injured, or 1 in every 183,821.

1009. From the following table it is evident that railway travelling in Canada is not quite as safe as in the countries named. In fact, Canada has more killed per million than any of the countries in the list. Taking the period since 1875, the yearly average of passengers killed in Canada has been 1·00. The past three years, 1893, 1894 and 1895, show a great improvement on that average, but compared with the figures of other countries there is room still for greater improvement. The figures are principally for 1893 :—

11. Canada in 1892 had 2,391 miles of railway more than all the Italian colonies combined, and 4,902 miles more than the Continent of Italy; but on the assumption that a railway only opens up country to an extent of about 20 miles on either side, there is yet a vast amount of country waiting for development, as, on that basis, there are only 643,640 square miles of this country within ordinary reach of railway facilities in 1892, not much more than one-sixth of the total area. In the Australasian colonies about one-seventh of the area has been thus developed.

The total railway mileage of the British Empire is 74,090, which, on the estimated area of 9,233,008\* square miles, gives an average of one mile of railway to every 125 square miles, and, on the assumption in the preceding paragraph, allows for rather more than one-fourth of the area of the whole Empire being within reach of railway accommodation.

12. The following is a summary statement of aids granted to railways constructed and under construction, by Governments and Municipalities up to June, 1895:—

GOVERNMENTS.	Loan.	Bonus.	Subscription to Shares or Bonds.	Total.

# STATISTICAL YEAR-BOOK

...the danger to provincial finances consequent on pressure being put on the Provincial Governments for aid for local railways (within the province) the Dominion Government, in 1883, determined to change their policy. It had been to give aid only to those lines which had more than one. The change of attitude was necessary; the Provincial Governments could not build railways without running into debt. This compelled them to make application to the Dominion Government for enlarged financial arrangements, a proceeding which was in the interest of the system of government adopted in Canada, and which was to deprive the Provincial Governments of that independence and local authority which it is deemed advisable should ever be maintained.

At the Session of 1882, Sir Charles Tupper announced the change of policy on the part of the Government and introduced a bill providing for subsidies to eleven railways. The same course was followed in subsequent sessions. The result will be found in the accompanying statement brought down to 30th June, 1894 and 1895.

\* No further liability.

† Balance outstanding.

1015. Since the system of subsidizing railway enterprises was inaugurated the following sums have been paid :—

For the fiscal year 1883-84.....	\$ 308,000
" " 1884-85.....	403,245
" " 1885-86.....	2,171,249
" " 1886-87.....	1,406,532
" " 1887-88.....	1,027,042
" " 1888-89.....	846,722
" " 1889-90.....	1,491,385
" " 1890-91.....	1,079,106
" " 1891-92.....	1,061,616
" " 1892-93.....	624,794
" " 1893-94.....	1,043,256
" " 1894-95.....	1,123,949
	<hr/>
	12,487,136

The balance outstanding amounted to \$2,377,720 on the 30th June, 1895.

The railways subsidized by the Dominion Government, but not paid for under contract on 30th June, 1895, numbered 50, with a total mileage of 1,166½ miles, and the total subsidy granted was not to exceed \$3,815,800.

In addition the Canadian Pacific Railway received \$25,000,000, the Canadian Pacific Railway extension to Quebec \$1,500,000, and the Canadian Northern Railway \$1,525,250.

There is also an annual subsidy of \$186,600 payable for 20 years to the Atlantic & North-western Railway Company, under Act of 1885, Chap. 18, and an annual payment of \$119,700 to the Provincial Government of Quebec—being 5 per cent on the sum of \$2,394,000, granted by Chap. 8, A. 1884, for the line between Ottawa and Quebec. The total paid to June, 1895, was for the first named \$1,119,600, and for the second \$1,256,850.

Several railways, having in the aggregate 4,463½ miles, have been subsidized by grants of land amounting to 32,257,200 acres. This does not include the grant of 25,000,000 acres made to the C. P. R. and subsequently reduced to 18,206,986 acres.

Another way in which railways have been aided is by loaning them rails. Outstanding loans of this kind on 30th June, 1892, were: Northern Railway of New Brunswick, \$58,334; Halifax Cotton Company siding, \$4,335; Steel Company of Canada, \$11,965; Albert Railway Company, \$14,665—in all, \$89,299.

1016. The various kinds of railway finance which have been resorted to in Canada are :—

1. Authority given to the Government to guarantee the interest for a certain term of years.

2. Authority given to the Government to issue debentures by way of loan to railway companies.

3. Authority to grant a like loan with a provision that if the companies did not pay the interest on the Government debentures, the property of the cities and towns benefited should be assessed for the same.

4. Government guarantee of railway companies' bonds as well as interest thereon.

5. Direct issue of Government bonds to railways with a first mortgage on the property of the companies as security.

6. Municipal bonus to companies.
7. Municipal subscriptions to railway stock.
8. Municipal bonuses to railway companies.
9. Government bonuses to railway companies.
10. Imperial Government guarantee of capital with which to construct the Intercolonial.
11. Share capital locally distributed and issue of bonds.
12. Share capital, chiefly English, combined with Government aid in some of the forms mentioned and issue of various degrees of bonds under different names.
13. Aid in the form of lands through which the roads were to be constructed.
14. Practical release of Government loan by placing it behind other claims upon railway companies becoming embarrassed.
15. Composition of Government claims accepted when railways become embarrassed.
16. Assumption by Government of liabilities incurred by municipalities in aid of railways, the Government becoming the creditor of the municipalities.
17. Direct construction of railways by Government.
18. Grants of land and money subsidies combined with Government construction of portions of the railway.

## GOVERNMENT RAILWAYS.

1017. The railways belonging to the Government of Canada are known as the Canadian Government Railway System. They include, 1st, the Intercolonial and its branches; 2nd, the Prince Edward Island Railway.

The Intercolonial Railway was part of the original pact between the provinces, the Union Act, 1867, Sec. 145, reading: "Inasmuch as the provinces of Canada, Nova Scotia and New Brunswick have joined in a declaration that the construction of the Intercolonial Railway is essential to the consolidation of the Union of British North America, and to the assent thereto of Nova Scotia and New Brunswick, and have consequently agreed that provision should be made for its immediate construction by the Government of Canada; therefore, in order to give effect to that agreement, it shall be the duty of the Government and Parliament of Canada to provide for the commencement, within six months after the Union, of a railway connecting the River St. Lawrence with the City of Halifax, in Nova Scotia, and for the construction thereof without intermission, and the completion thereof with all practicable speed."

The following memorandum will serve to round off the story of the Intercolonial since Confederation:—

1867. Minister of Public Works instructs Mr. S. Fleming, Engineer in Chief, to proceed at once with surveys, July, 1867.
1868. Battle of the routes through New Brunswick fought. Commissioners appointed to manage construction; A. Walsh, Hon. E. B. Chandler and Hon. A. W. McLellan, Commissioners.
- 1870-1871. Battle of iron *versus* wooden bridges waged, 1870-71. Windsor Branch, 32 miles, transferred to Windsor & Annapolis Railway for operating purposes.
1872. Railways in New Brunswick and Nova Scotia reconstructed and called Intercolonial Railway by Order in Council, 9th November, 1872.
1874. Railway transferred to Public Works Department. Act of 1874.

ts of the present Minister of Railways (Hon. Mr. Haggart) to expenditures have been successful. The loss of \$767,376 in 1891 led to a net loss of \$54,998 in 1895.

Colonial Railway, instead of showing a loss of \$479,940 (Windsor added), as in 1892, showed in 1895 a gain of \$28,252.

Prince Edward Island Railway the expenditure in 1892 was in the receipts by \$132,263. In 1894 the excess of expenditure was \$7, showing a net gain of \$63,906, as compared with 1892. This was caused by increase in earnings and decrease in expenditure, the earnings being \$1,091, and the decrease in expenditure, \$62,815. Expenditure in 1895 was \$83,250 in excess of the receipts.

The following table gives the amount expended on Government for construction and rolling stock, the working expenses and received, the first item being amount expended prior to Con-

\*Earnings of Windsor Branch not included.

+Includes \$3,754 over-credit in 1880, on Windsor Branch.

‡Earnings C.P.R. not included; the road during part of these two years was operated by the Government.

The receipts from passengers form nearly one-third of the earnings, those from freights over three-fifths, and the remainder comes from various sources. This division has been maintained, practically, from the year 1876, the trend being to a reduction of the proportion received from passengers and a corresponding increase in the proportion received from freights. Compared with the average of all the railways of Canada, the Government railways have a somewhat larger proportion of all their earnings from passenger traffic and a somewhat less from freight. The earnings per train mile on the Government railways average 73·07 cents. For purposes of comparison, the following figures are given showing the earnings per train mile of various railways in Canada: In 1895, Canada Atlantic, 135·20 cents; Canada Southern, 135·20 cents; Canadian Pacific, 145·40 cents; Grand Trunk, 104·61 cents; Montreal, Portland & Boston, 73·69 cents; Central Ontario, 76·30 cents. The average for all the railways

1021. An analysis of the expenditure is as under, from 1876 to 1895:—

## EXPENDITURE ON GOVERNMENT RAILWAYS IN CANADA, 1876-95.

\* Including Northern Division. † Including car mileage, \$21,900 in 1879. ‡ Including car mileage, \$1,990 in 1880. § Including car mileage, \$17,245 in 1881. || Including car mileage, \$7,957 in 1888. ¶ Including car mileage, \$34,531 in 1890.

Comparing these figures with the general average of all the railways of Canada, the result is :—

	1894.	1895.
	Per cent.	Per cent.
General average, buildings and maintenance.	20·8	21·5
Intercolonial	22·8	23·5
General average, working and repairing engines.	32·4	31·8
Intercolonial	36·0	35·3
General average " " cars	8·8	8·4
Intercolonial	14·1	13·6
General average, general operating expenses.	38·0	38·4
Intercolonial	27·4	27·3

The general operating expenses of the Intercolonial are therefore nearly one-third less than those of the average of all the railways of Canada ; maintenance of lines and buildings on the Intercolonial calls for a larger proportion than the average of all the railways ; the working and repairing of engines and cars require more on the Intercolonial than the average expenditure on that account. The proportions of the Canada Southern for 1894 were : Maintenance of line and buildings, 15·8 per cent ; working and repairing of

engines, 28.4 per cent; of cars, 8.0 per cent, and general operating expenses, 47.8 per cent. The proportions of the Canadian Pacific were: 22 per cent, 30.9 per cent, 6.7 per cent and 40.4 per cent; and of the Grand Trunk: 17.3, 34.9, 10.5 and 37.3 per cent respectively. For 1895 the general averages changed but slightly. The several systems mentioned spent a larger proportion on buildings and maintenance, with the exception of the Grand Trunk.

The following table presents these facts in a form easy of comparison:—

1894.	General Average.	Canada Southern.	Canadian Pacific.	Grand Trunk.	Inter- colonial.
	p. c.	p. c.	p. c.	p. c.	p. c.
Buildings and maintenance.....	20.8	15.8	22.0	17.3	22.5
Working and repairing engines....	32.4	28.4	30.9	34.9	36.0

1890.....	3,320 12	2,786 50	19	29.2	63.7
1891.....	2,635 90	2,372 51	18	30.3	62.3
1892.....	2,610 82	2,131 00	18	32.7	61.2
1893.....	2,716 70	2,000 15	18	32.7	61.0
1894.....	2,617 40	2,014 66	18	32.1	61.3
1895.....	2,588 66	1,987 17	18	32.8	60.7

In 1879 there were 2,928 railway employees on the 714 miles of the Intercolonial Railway, and in 1893 there were 3,724 (including 124 employees in the general offices) employees on the 1,122 miles of the railway operated by the Government. In 1879 the staff required was equal to 410 employees for every 100 miles of line; in 1894 there were 332 employees for every 100 miles of line, and in 1895, 326. In the United States the average number is 444 employees for each 100 miles of line. In the group of States comprising Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut, the number of employees is 400 per 100 miles of line. These figures show that the Intercolonial is now at the minimum cost for operating force. The average number of locomotives required for each 100 miles of the Intercolonial is 18. In the United States it is 20, while in the eastern group mentioned above it is 34.

206. The following table gives the passenger revenue of the Intercolonial Railway :—

## PASSENGER REVENUE—INTERCOLONIAL RAILWAY.

YEAR.	Miles.	PASSENGERS CARRIED.		REVENUE.	
		Number.	Revenue.	Per	Per
				Passenger.	Mile.
			\$	Cents.	¢ cts.

\* After 1890 the Eastern Extension was amalgamated with the Intercolonial Railway.

1029. The following table gives the number of tons of ocean-borne goods to and from Europe via the port of Halifax, carried over the Intercolonial Railway :—

YEAR.	Tons.	YEAR.	Tons.
1878.....	18,354	1887.....	26,734
1879.....	24,271	1888.....	50,742
1880.....	26,025	1889.....	26,821
1881.....	18,788	1890.....	21,625
1882.....	25,775	1891.....	24,687
1883.....	32,786	1892.....	33,371
1884.....	26,229	1893.....	19,714
1885.....	31,192	1894.....	16,692
1886.....	21,680	1895.....	17,361

1030. These tables show: 1st. That the earnings of the Intercolonial in 1895 were \$33,229 less than the average of the five preceding years; that the earnings from passenger traffic in 1895 were \$17,961 more than the average of the five preceding years, and from mails and express, \$19,086, while earnings from freight were \$70,276 less in 1895 than the five years average.

2nd. That the expenditure was \$390,886 less in 1895 than the average of the preceding five years, maintenance of buildings showing \$202,537 less, working and repair of engines \$98,473 less, and working and repair of cars \$76,483 less, and general operating expenses are less by \$6,390.

3rd. That the gross earnings per mile of the railway in 1895 were lower than they were in 1894, 1893 and 1892.

4th. That the operating expenses per mile in 1895 were lower than in any previous year to 1883.

5th. That the percentage of passengers' earnings to total earnings in 1895 was higher than in previous years.

6th. That the earnings from passengers carried in 1895 were more per mile than in 1894.

7th. That the freight rates in 1895, being slightly over \$1.40 per ton carried, were 2 cents more than 1894, but were less than those of previous years.

8th. That the Intercolonial, during the period of 1877-95, has carried a total of 4,523,728 tons of manufactured articles, or a yearly average of 238,091 tons, and that in 1895 carried 311,864 tons, or 31 per cent over the average of nineteen years; that the ocean-borne manufactured goods to and from Europe have averaged 25,613 tons a year, which average is 47 per cent more than the tons carried in 1895, and that the average of 212,418 tons of manufactured articles carried by the Intercolonial, over and above the 25,613 tons of ocean freight carried, represents the distribution of manufactured goods within the Dominion affected through the agency of the Intercolonial, suggesting the development of interprovincial trade in manufactures.

the coal carried by the railway constitutes, in bulk, 30 per cent of the total tonnage carried by the Intercolonial.

passengers and tons of freight carried per mile on the Intercolonial Railway are as under:—

#### PASSENGERS AND FREIGHT PER MILE—INTERCOLONIAL RAILWAY.

	Tons carried.	Passen- gers.	YEAR.	Tons carried.	Passen- gers.
.....	590·09	859·1	1887 .....	1,285·60	1,068·3

1889.....	80	38,281	20,176	6,323	25,939	90,719
1890.....	80	23,165	21,158	6,336	28,444	79,103

During the fiscal year 1891 by special Act 54 Vic., Chap. 50, the Eastern Extension Railway was embodied in the Intercolonial system.

1034. The Windsor branch is owned and maintained by the Government & operated by the Windsor & Annapolis Railway, who pay one-third of the gross earnings to the Government. The Government's share is more than sufficient to cover the cost of maintenance, and the net profits amounted to \$24,437. The road runs from Windsor to Annapolis, a distance of 32 miles.

The receipts and expenditure of the Windsor branch for 1895 :—

## REVENUE AND EXPENDITURE—WINDSOR BRANCH.

YEAR.	Receipts.	Expenditure.
	\$	\$
1888	17,403	20,502
1889	21,053	10,935
1890	24,114	23,104
1891	23,019	22,141
1892	24,451	18,752
1893	23,658	19,229
1894	25,328	26,042
1895	24,553	24,040
1896	28,372	20,856
1897	30,162	18,983
1898	30,235	28,932
1899	33,509	19,514
1900	34,316	16,890
1901	32,975	17,645
1902	39,077	14,640

1035. The Prince Edward Island Railway runs the whole length of the land, a distance of  $154\frac{1}{2}$  miles, and, including extensions, has a total length of 211 miles. The number of passengers carried in 1895 was 1,362, and the tons of freight 5,052 less than in 1894. There was a decrease of \$8,879 in the receipts, and an increase in working expenses of \$6,014. In proportion to its cost, the traffic on this road is very light, and it will probably be some years before the earnings will equal the expenditure. The following are traffic figures for the last eight years:—

## TRAFFIC ON PRINCE EDWARD ISLAND RAILWAY, 1888-95.

YEAR.	Earnings.	Working Expenses.	Excess of Expenses.	Freight Carried.	Passengers Carried.
	\$	\$	\$	Tons.	No.
1888	158,364	229,640	71,276	59,603	131,246
1889	171,370	247,559	76,190	55,682	152,780
1890	160,372	266,486	106,514	51,604	133,059
1891	174,258	257,990	83,732	59,511	145,508
1892	157,443	289,706	132,264	51,065	139,389
1893	162,600	226,422	63,732	56,718	132,111
1894	158,534	226,891	68,357	53,577	123,727
1895	149,653	232,905	83,250	48,525	125,089

The annual receipts during the seven years 1888-94 have averaged \$774 per mile, and the expenses \$1,181, being an average annual excess of expenditure of \$407 per mile. The average annual quantity of freight carried was 262 tons per mile, and the average number of passengers 648 per mile.

The receipts for 1895 were \$709 per mile, and the expenses \$1,104 per mile. The year 1895, therefore, fell behind the 7 years' average by \$65 per mile in receipts and \$77 for expenditures. The freight carried in 1895 averaged 20 tons and the passengers 592 per mile, showing a reduction of 32 in freight and of 56 in passengers as compared with the 7 years' average.

1036. The following table gives the revenue and expenditure of the Prince Edward Island Railway from 1877 to 1895, separating the sources of revenue and the heads of expenditure :—

REVENUE AND EXPENDITURE OF PRINCE EDWARD ISLAND  
RAILWAY, 1877-95.

Montreal and European Short Line.....		124,568			18	
Miscellaneous, gratuity.....				280		
Reporting evidence before Railway Committee Privy Council.....					226	
Total.....	7,968,768	6,229,001	5,250,136	4,630,935	4,860,097	4,711,831

During the year 1895 the sum of \$327,605 was expended on capital account of the Intercolonial, of which sum \$66,113 was for increased accommodation at Halifax, \$56,595 for Halifax extension, \$108,611 for branch between Windsor Junction and Halifax Harbour, and \$62,570 for the Cape Breton and Oxford & New Glasgow sections. For increased accommodation at Moncton the sum of \$7,494 was expended.

1038. Mention has been made of one electric railway in Canada, as included in the list of railways published by the Department of Railways. Electricity has been adopted as a motive power by thirty railway companies doing business in Canada.

Returns from 21 show that there were 354 miles of railway on which electricity is used as the motive power.

Every province of Canada, excepting Prince Edward Island, has adopted the electric system.

The following particulars have been collected :—

Miles of track.....	354½	Miles run during year 1894.....	15,587,226
Motor cars.....	658	Passengers carried.....	55,348,612
Trailers.....	341	Employees.....	2,614
Snow sweepers.....	39	Paid up capital.....	\$ 13,035,263
Motors.....	891		

The Niagara Falls Park & River Electric Railway Co. make returns to the Railway Department. These returns show that the company has 13½ miles of railway; that it had last year a train mileage of 196,192 miles; carried 478,879 passengers; earned \$64,563; expended \$52,231, and has a paid-up capital of \$1,134,366.

1039. The following table is compiled from the Statesman's Year-Book and other sources, and gives the date of the opening of the first railway in the British Empire, and in all the principal countries in the world, the length of railway lines therein and the proportion of railway mileage to area:—

## RAILWAYS IN THE BRITISH EMPIRE.

## 1040. CANALS.

## CHRONOLOGY.

i. *The St. Lawrence River Canal System.*

- (a) Lachine Canal, begun in 1821, opened August, 1825.  
 (b) Beauharnois " 1842 " " 1845.  
 (c) Cornwall " 1834 " April, 1843.  
 (d) Williamsburg—  
     Farran's Point " 1844 " June, 1847.  
     Rapide Plat " 1844 " Sept., 1847.  
     Galops " 1844 " Nov., 1846.  
 (e) Welland " 1824 1829.

(First enlargement of Welland begun in 1841, and completed in 1850. Second enlargement begun in 1873, completed in 1883 to 12 feet, and in 1887 to 14 feet.)

(f) Sault Ste. Marie Canal, begun in 1887, opened 1895.

Connections of the St. Lawrence system :—

Burlington Bay Canal,	begun in 1825,	completed in 1832.
St. Clair Channel	" 1855	" 1871.
Murray Bay Canal	" 1882	opened in 1889.
Trent River Navigation	" 1837	

## 2. Ottawa River Canal System.

(a) St. Anne's Lock, begun in 1840, completed in 1843.

(b) Carillon Canal " 1826 " 1833,  
enlarged in 1871-82.

(c) Chute à Blondeau, begun in 1826, completed in 1832.

(The construction of the Carillon Dam has rendered this unnecessary.)

(d) Grenville Canal, begun in 1819, completed in 1833,  
enlarged in 1871-82.

(e) Culbute Locks and Dam, begun in 1873, completed 1876.

## 3. Rideau River Canal System.

This system might be called more properly the Rideau and Cataraqui Navigation, for it consists in the conversion of the two rivers into one continuous navigable channel. The work was begun September, 1826, and on the 29th May, 1832, the works being completed, the Steamer "Plumper" passed through from Bytown to Kingston.

## 4. Richelieu and Lake Champlain System.

St. Ours Lock, begun in 1844, opened in 1849.

Chambly Canal " 1831 " 1843.

5. St. Peter's Canal " 1854, completed in 1869.

(St. Peter's enlarged 1875-81.)

1041. The history of canal building in Canada dates back beyond the present century. The early canals were miniature, toy-like affairs compared with those now in use. The first canals were constructed to overcome the Cedar, Cascades and Coteau rapids. The locks were of cut stone and had a breadth of 6 feet and a depth of  $2\frac{1}{2}$  feet on the sills, and were designed for the passage of boats carrying thirty barrels of flour. These canals were begun in 1779 and finished in 1781. They were enlarged in 1804 and in 1817, and were abandoned in 1845. A canal to overcome the Sault Ste. Marie rapids was begun in 1797 and was used by the North-west Company to take up loaded canoes. It had locks.

The Dominion is well supplied with natural means of intercommunication. But in many cases, owing to the formation, there are rapids rendering navigation difficult for any size vessels and impossible for good-sized

ones. The early inhabitants suffered severely from the cost of transport, which was so great that a barrel of salt transported from Montreal to Port Talbot on Lake Erie was worth 18 bushels of wheat, and a yard of cotton and a bushel of wheat were of equal value. The British Government found great inconvenience and expense attending the transport of supplies. Sir J. Murray stated in the House of Commons, September, 1828, that when the Imperial Government some years before sent out two vessels in frames, one of them, a brig, cost in carriage from Montreal to Kingston a sum of money nearly equal to \$150,000.

The first impulse to the construction on a large scale of Canadian canals came from the Imperial military authorities. From the early reports it is plain that they thought more of military than of commercial requirements. Thus, among the reasons given for having the Rideau Canal only 5 feet deep was the one that the canal was to be used chiefly for military purposes and that a canal larger than would be necessary to transport with convenience all descriptions of naval and military stores would afford no additional security by being of larger dimensions.

The original locks of the Lachine Canal were the same as those of the Rideau, viz., 108 x 20, with a depth of 5 feet.

As the commercial needs have become more pressing the scope of the original plans have been enlarged, both as to the number and the depth of the canals, until at the present time the system of inland navigation in Canada is the largest and most complete in the world.

The River St. Lawrence, with the system of canals established on its course above Montreal, and the Lakes Ontario, Erie, St. Clair, Huron and Superior, with connecting canals, afford a course of water communication extending from the Straits of Belleisle to Port Arthur at the head of Lake Superior, a distance of 2,260 statute miles.

When this system of canals was designed it was in contemplation to afford a depth, at all stages of the St. Lawrence waters, of nine feet, a depth, seemingly from the data then possessed, secured by means of the works proposed. The River St. Lawrence is, however, from various causes, subject to fluctuations, the extent of which it was impossible, at the time these canals were originally constructed, to arrive at with precision, and the continued observations and experience of subsequent years have shown that while the intermediate river-reaches at all times afford ample depth for vessels, in the canals themselves, at certain periods of low water, a depth of nine feet on the sill cannot be maintained.

In the year 1871 it was decided to enlarge the canals on the St. Lawrence route in order to afford a navigable depth of 12 feet throughout. Subsequently it was decided that the depth should ultimately be increased to accommodate vessels of 14 feet draught, and accordingly, in the present scheme of enlargement, while a channel way in the canals is only provided for vessels drawing 12 feet, the permanent structures, locks, bridges, &c., are built of such proportions as to accommodate vessels of 14 feet draught, the locks being 270 feet long between the gates, 45 feet in width, and with a clear depth of 14 feet of water on the sills.

1042. The difference in level between Lake Superior and tide-water is 602 feet. Between these two points Canada has built 8 canals, which are as

under; the length, number of locks, rise in feet and depth of water on the sills being also given:—

## (1) ST. LAWRENCE CANALS.

NAME.	Length in Miles.	LOCKS.			
		Number	Dimensions.	Rise.	Depth on Sill.
			Feet.	Feet.	Feet.
Lachine.....	8½	5	270 by 45	45	{ At 2 locks, 18 3 " 16
Beauharnois.....	11½	9	200 by 45	82½	9
Cornwall.....	11½	6	{ 200 by 55 (3) 270 by 45 (2)	48	{ At 2 locks, 14 4 " 9

Rapide Plat.....	4	2	200 by 45	11½	9
Galops.....	7½	3	200 by 45	15½	9
Welland.....	26½	25	270 by 45	326½	14
Welland Branches—					
*Welland River Branch...	¾	2	150 by 26½	±10	9 to 10
*Grand River Feeder....	21	2	{ 150 by 26½ (1) 200 by 45 (1)	7 to 8	9
*Port Maitland Branch...	1½	1	185 by 45	7½	11
Sault Ste. Marie.....	¾	1	900 by 60	18	22
Total .....	71	52			

\* These are branches of the Welland, but for the purposes of direct navigation their length and number of locks are not to be taken in.

† At present the depth of the canal between locks is only adapted to vessels of 12 feet draught.

‡ From the canal at Welland down to the Welland River.

The Soulanges Canal, in course of construction on the north side of the River St. Lawrence, will take, when finished, the place of the Beauharnois Canal. It will be 14 miles long; will have 5 locks, with a depth on the sills of 14 feet. The dimensions of the locks will be those of the enlarged system, 270 x 45 feet.

Of the total distance between Port Arthur and the Straits of Bellefleur (2,260 miles) 71 miles are artificial and 2,189 miles open navigation. In addition to the 71 miles, there are the St. Clair flats channel and the submerged canal between Montreal and Quebec. The former, though partly in Canadian waters and partly in the waters under control of the United States government, is maintained by the latter government, the free use of both countries being given by Article XXVIII. of the Treaty of Washington, 1871. The submerged canal between Montreal and Quebec is rendered necessary because it was resolved to make of Montreal a fresh water port to be frequented by the largest craft, though that city is nearly 1,000 miles inland from the Atlantic, 250 miles above salt water, and nearly 100 miles above tidal water. To effect this purpose the shoal places between the two cities, aggregating 39½ miles, the largest (17½ miles) being in Lake St. Peter, were dredged by steam power. By 1869 the increase of depth

effected was 9 feet, giving a 20 foot channel to Montreal. The increase in trade and in the size of ocean steamers necessitated a further deepening of the channel. By 1878 the depth was 22 feet; by 1882 it was 25 feet, and by the end of the season of 1885 it was 27½ feet. In the straight part of the channel the dredging is from 300 to 325 feet wide, but in other parts it is 450 feet wide, and in the worst place the sides of this submerged canal are over 16 feet high. The total cost of this work to 30th June, 1895, was \$4,566,002, including \$117,563 cost of dredging plant, and the total quantity of dredged matter amounted to 21,556,286 cubic feet. The dredged matter removed consisted of gravel, sand, clay, boulders and shale rock.

1043. The Government of Canada in pursuance of its general policy, decided to construct a canal on the Canadian side of the Sault Ste. Marie, and in 1889 the first contract was made. This canal, with its approaches, is about 18,100 feet in length. The Chief Engineer in his report for 1894 says, "this work has been visited from time to time during its progress by eminent foreign and Canadian engineers, all of whom, so far as I have heard, speak in the highest terms of the character of the work, more especially of the works of construction of the lock, and I believe it is to be one of the finest works of its kind on this continent. Electricity is used as the motive power."

1044. Connected with the St. Lawrence system are the Murray Canal, the Burlington Bay and the Trent River Navigation. The first extends through the Isthmus of Murray, giving connection between the head waters of the Bay of Quinte and Lake Ontario, thus enabling vessels to avoid the open lake navigation. The works on this canal comprise a cut through the isthmus 4½ miles long, and improvements in the way of dredging and other work to the entrance channels at either end, covering a total distance of 9½ miles. There are no locks. The first official notice of this work occurs in 1796, when a resolution was adopted by the Governor in Council to reserve 3,000 acres of land as a grant in favour of its construction. Various surveys were made at different times down to 1867. The work was begun after Confederation and completed in August, 1889. The canal is 80 feet wide at the bottom, and has a depth of 12½ feet at low water.

The Burlington Bay Canal is a cutting through a piece of low land which partly separates Lake Ontario from a large sheet of deep water called Burlington Bay. It enables vessels to reach the city of Hamilton. Its length is one-half mile, and it is navigable for vessels drawing 11 feet of water.

The name "Trent River Navigation" is applied to a series of water stretches, composed of a chain of lakes and rivers, extending from Trenton, at the mouth of the River Trent, on the Bay of Quinte, Lake Ontario, to Lake Huron. Balsam Lake, which is the summit, has an elevation of 589½ feet above Lake Ontario, and the total rise and fall between Lakes Ontario and Huron is about 832½ feet. At present 160 miles of direct and lateral navigation have been opened up. There are 13 locks, with a depth of water on the mitre sills varying from 7 feet to 14 feet. The navigable reaches amount to 132½ miles, and the unnavigable to 60½ miles. Tenders were let for this work in November, 1894.

1045. In connection with the St. Lawrence system of canals, the following tables are given:—

TABLE OF DISTANCES BETWEEN PORT ARTHUR, LAKE SUPERIOR AND LIVERPOOL.

	Miles.
Port Arthur to Sault Ste. Marie.....	273
Sault Ste. Marie to Sarnia.....	318
Sarnia to Amherstburg.....	76
Amherstburg to Port Colborne.....	232
Port Colborne to Port Dalhousie.....	27
Port Dalhousie to Kingston.....	170
Kingston to Montreal.....	178
Montreal to Three Rivers (tidewater).....	86
Three Rivers to Quebec.....	74
Quebec to Saguenay.....	126
Saguenay to Father Point.....	57
Father Point to West End, Anticosti.....	202
Anticosti to Belleisle.....	441
Belleisle to Malin Head (Ireland).....	2,013
Malin Head to Liverpool.....	221
	<u>4,494</u>

#### THE GREAT LAKES.

LAKES.	Length.	Breadth.	Area.	Height above sea.
	Miles.	Miles.	Sq. miles.	Feet.
Superior.....	390	160	31,420	602
Huron (with Georgian Bay).....	400	160	24,600	579

Michigan.....	345	58	25,590	574

Lake Michigan is wholly within the United States, and is connected with Lake Huron by the Strait of Mackinaw.

#### (2) THE OTTAWA AND RIDEAU RIVERS CANAL SYSTEM.

1046. This system has for its object to connect Montreal with Kingston at the foot of Lake Ontario, by means of the waters of the Ottawa and Rideau Rivers. These canals were constructed primarily with a view to the defence of the Province of Ontario. The necessity of the Rideau Canal for defensive purposes was suggested by the war of 1812, when the difficulty of communication by way of the St. Lawrence River, in the face of an enemy, was often great. The highest point is the Rideau Lake, which is 292 feet above the level of the Ottawa River, at the foot of Parliament Hill. The following table gives the distances and lengths, &c., of the canal

from Montreal to Kingston. The Lachine Canal ( $8\frac{1}{2}$  miles) is common to the St. Lawrence system and the St. Lawrence system.

NAME.	LOCKS.				
	Length in	Number.	Dimensions.	Rise in	Depth on Sill.
	Miles.		Ft.	Ft.	Ft.
St. Anne's Lock.....	$\frac{1}{2}$	1	200 by 45	3	9
Millon.....	$\frac{1}{2}$	2	200 by 45	16	9
de la Blondeau.....	$\frac{1}{2}$	5	200 by 45	43 $\frac{1}{2}$	9
de la Rivière.....	$16\frac{1}{2}$ *	49†	134 by 33	282 $\frac{1}{2}$	5
North Branch.....	6	2	134 by 32	26	5 $\frac{1}{2}$
Total.....	29 $\frac{1}{2}$	59			

\* The total length of navigation waters is  $126\frac{1}{2}$  miles. The total distance from Montreal to Kingston by this route is  $245\frac{1}{2}$  miles. The lockage is  $446\frac{1}{2}$  feet,  $282\frac{1}{2}$  being rise and  $164\frac{1}{2}$  being depth.

† Thirty-five ascending and 14 descending.

On the Upper Ottawa are the Culbute works, situated at L'Islet. These works amount to the Culbute and L'Islet rapids on the northern branch of the Ottawa River. The works comprise two locks and three continuous dams.

### (3) THE RICHELIEU AND LAKE CHAMPLAIN SYSTEM.

1017. This third line of improvements was designed with a view of placing the St. Lawrence in communication with Lake Champlain and the State of New York system of canals, which leads to the Hudson River and the port of New York. Boats leaving Canadian waters for New York enter the mouth of the Richelieu River at Sorel on the St. Lawrence, 46 miles below Montreal and 114 above Quebec. From the mouth of the Richelieu vessels ascend 14 miles to St. Ours, where they are lifted 5 feet. Proceeding up the Richelieu 32 miles further they enter the Chambly Canal, which in a distance of 12 miles raises them by lockage 74 feet more, and after traversing 14 miles more of the Richelieu the vessels reach the Canadian frontier. The total length of canal navigation between Montreal and New York by this route is 85 miles, and the total lockage ascending and descending is 283 feet; the total distance is 457 miles. The distance from Sorel to the boundary line is 81 miles, and from the boundary to New York city 330 miles. The St. Ours lock is one-eighth of a mile in length. Its dimensions are 10 feet by 45 feet, and the depth of water on the sills is 7 feet at low water. The Chambly Canal has nine locks, and the depth of water on the sills is 7 feet. The dimensions of the lock vary from 118 feet to 125 feet in length and from  $22\frac{1}{2}$  feet to 24 feet in width.

This completes the general view of the canal systems connected with the St. Lawrence River and its tributaries.

1018. In the other provinces few attempts have been made in the direction of canal building.

Governor Wentworth, in 1794, proposed to connect Halifax Harbour with the Bay of Minas by the Shubenacadie Canal. Directors

were appointed in 1798, after surveys had been made. The project hung fire till 1826, when it was decided to have an 8 foot canal. Ground was broken by the Earl of Dalhousie. It was opened many years after, but eventually it was abandoned.

In the Isle of Cape Breton a canal has been constructed connecting St. Peter's Bay with the Bras d'Or Lakes. It crosses an isthmus about half a mile wide and gives access from the Bras d'Or Lakes to the Atlantic. It has one (tidal) lock whose dimensions are 200 feet by 49½ feet. The depth of water on the sills is 18 feet at lowest water. It was begun in 1854 and finished in 1869. It was enlarged between 1875 and 1881.

1049. The State of Michigan built a canal to connect Lakes Superior and Huron at the St. Mary's Falls. This canal was transferred to the Federal Government of the United States in 1881. It is somewhat more than a mile in length and has one lock 515 feet long and 80 feet wide with a rise of 18 feet. A larger lock, 800 feet long, 100 feet wide and with 21 feet of water on the sills, is in course of construction.

During the season of 1894 the freight carried through the canal on the United States side of the line amounted to 13,195,860 tons valued at \$143,114,502, being an increase in quantity of 2,399,288 tons, or 22 per cent, and a decrease in value of \$2,322,455, or 2 per cent.

The value per ton of this freight was \$10.84, a decrease of \$2.63 per ton on the value in 1893. The total number of vessels using the canal was 14,491, which is 2,483 more than the number using the canal in 1893. The canal was open to navigation during the season for 234 days, as against 219 days in 1893. The actual freight tonnage passed through the Suez Canal in 1888, according to the official return, was 6,640,834 tons; in 1889, 6,783,187 tons; in 1890, 6,980,014 tons; in 1891, 8,698,777 tons, and in 1892, 7,712,029 tons, from which it will be seen that the freight carried through the Sault Ste. Marie Canal during the season of navigation, 1894, considerably exceeded in bulk that carried through the Suez Canal, which was open for the whole year. The number of vessels that went through the Suez Canal in 1894 was 3,352, with a net tonnage of 8,039,106 tons, being an average of 2,300 tons, while the average tonnage of vessels passing through the Sault Ste. Marie Canal was 856 tons\*. There is of course of comparison as regards value of freight, that through the Suez Canal being upwards of \$300,000,000 annually; but considering that the Suez Canal will accommodate the largest vessels, and is used more or less by the mercantile marine of the world, some idea can be gathered of the business done through the Sault Ste. Marie Canal, both from the foregoing figures and also from the following table, which gives a complete statement of the traffic through the canal since its opening in 1855. The proportion of freight tonnage carried by Canadian vessels was: in 1887, 7 per cent; in 1888, 6 per cent; in 1889, 4 per cent; in 1890, 3½ per cent; in 1891, 4 per cent; in 1892, 3⅞ per cent; in 1893, 4⅛ per cent.

\*The number of ships using the Suez Canal in 1874, twenty years ago, was 1,264. These figures, compared with those of the present, show how completely the canal has revolutionized the channel of traffic between Europe and the far east. The largest business year the canal ever had was 1891, when 4,206 steamships passed through. The application of the electric light to marine purposes is now so general that nearly 95 per cent of the vessels using the canal in 1894 were enabled to steam at night. Great Britain in 1895 sent 2,200 steamers through the Suez Canal and all other nations sent 1,104.

\*The traffic through the Canadian Canal which was opened to commerce September 9th, 1895, is included in the above statement for the season of 1895.

1050. The following statement gives the amount expended on canal works and maintenance to 30th June, 1895 :—

Lachine Canal.....	\$ 9,940,971
Beauharnois.....	1,611,690
Soulanges Canal (under construction).....	1,739,929
Williamsburg Canal (being enlarged).....	3,786,298
Cornwall Canal.....	5,505,254
St. Lawrence River Canals, surveys, &c.....	1,139,677
Murray Canal.....	1,247,470
Welland Canal.....	23,767,673
Sault Ste. Marie Canal.....	3,258,025
Ste. Anne's Canal.....	1,179,216
Carillon and Grenville Canal.....	4,025,939
Culbute Canal.....	379,436
Rideau Canal (including Perth Branch).....	4,999,286
Trent Canal.....	1,145,894
St. Ours Lock.....	121,338
Chambly Canal.....	637,267
St. Peter's Canal.....	647,300
Lake St. Louis.....	4,753
Baie Verte Canal Survey.....	44,387
Total.....	\$ 64,689,579

In addition to the above there have been expended from income :—

Renewals.....	\$ 2,289,909
Repairs.....	4,903,052
Staff and maintenance.....	0,236,788
Making the total expenditure.....	\$ 78,119,319

1051. Of this amount the sum of \$20,692,244 was expended before Confederation, \$4,173,921 by the Imperial Government and \$16,518,323 by the Provincial Government interested. The total amount spent for construction and enlargement alone is \$66,951,287, including in this sum the cost of the surveys of the Baie Verte Canal, at one time considered a feasible plan for uniting the Bay of Fundy and the Gulf of St. Lawrence.

1052. The total cost of the construction of the Welland Canal to 30th June, 1895, was \$24,128,340. Of this amount \$222,220 was contributed by the Imperial Government and \$7,416,020 by the Provincial Government prior to Confederation, leaving \$16,490,100 as the expenditure since Confederation. Of this last amount \$360,664 represents renewals chargeable to income.

The sum of \$2,176,900 has been paid out for staff, and \$1,963,052 for repairs. During the same period the receipts have been \$6,017,218. The expenditures for staff, maintenance, repairs and renewals was \$4,500,616, leaving \$1,516,602 to represent the surplus to meet interest.

The total revenue from canals since Confederation is \$10,578,258, being an average of \$377,795 a year.

1053. The following table is a statement of the number, tonnage and nationality of vessels that passed through the several canals during the season of navigation in each of the years 1883 to 1894, including the number of passengers and tons of freight carried

CANALS.	Year.	CANADIAN VESSELS.			UNITED STATES VESSELS.			Ton- nage.	Total Number of Vessels.	Total Tonnage.	Passengers, No.	Freight, Tons.	Tolls.	Increase or Decrease.
		Steam, No.	Sail, No.	Total, No.	Tonnage.	Steam, No.	Sail, No.	Total, No.

1894.....	23,158	4,060,931	142,124	2,942,715	288,129	-40,885

1055. There was a decrease of 2,184 in the total number of vessels, a decrease of 1,830 in number of Canadian vessels and a decrease of 454 in the number of United States vessels; the total tonnage decreased by 659,418 tons. The decrease in the quantity of freight carried was 604,274 tons and in the amount received for tolls \$40,885. The increase in the number of passengers was 7,935.

1056. The following table shows the quantity of wheat, barley, corn, oats, pease and rye passed down the Welland Canal from the ports west of Port Colborne in each year since 1882. As previously explained full tolls were paid in 1882 and 1883, a refund of half the toll or 10 cents per ton was allowed on grain for Montreal during 1884 and up to June, 1885, and

at date of 18 cents per ton, leaving only 2 cents per ton actually

## GRAIN PASSED DOWN THE WELLAND CANAL, 1882-94.

The refunds for 1895 amounted to \$971 and for 1894 to \$1,882, leaving the actual revenue for 1895, \$339,890, and for 1894, \$385,539, and showing a decrease of \$45,649. The falling off in revenue is mainly in the tolls on the Welland Canal, where the decrease was \$35,689, and on the St. Lawrence canals with a decrease of \$8,706.

## CHAPTER XV.

The Marine Department.—Sea-going Shipping.—Light-houses.—Government Steamers.—Communication with Prince Edward Island.—Harbour Police.—Distressed Mariners.—Inspection of Steamers.—Certificates of Masters and Mates.—Coasting and Inland Certificates.—Wrecks.—Casualties.—Expenditure of Department.—Revenue.—Ships Built and Registered in Canada, or sold to other Countries.—Sea-going Vessels.—British and Foreign Tonnage.—Nationality of Vessels.—The World's Shipping.—Inland Shipping between Canada and the United States.—Total Canadian Shipping, Inland and Sea-going.—Coasting Vessels.—Nationality of Vessels in Canadian Coasting Trade.—Sea-going Vessels Entered and Cleared at principal Canadian Ports.—Shipping in Foreign Countries.—Registered Vessels of principal Countries.—Shipping by Provinces.—Tonnage in 1895.—Graving Docks.—Government Docks.—Docks in other Countries.

1062. The maritime interests of Canada are large, and the importance of a thoroughly equipped Marine Department is, therefore, correspondingly great. This has been recognized by the Government and people of Canada for many years. The Union of the provinces in 1867, by adding the large maritime interests of the eastern provinces to those of the Province of Quebec, emphasized the necessity of a separate department. Hon. P. Mitchell became the first Minister of Marine and Fisheries and organized the department which has control of marine matters.

1063. Since Confederation 200,000,000 tons of sea-going shipping have entered the seaports of Canada; 172,000,000 tons of shipping have crossed and recrossed the great lakes between Canada and the United States; 360,000,000 tons have passed from Canadian ports to Canadian ports, doing the coasting trade of the country.

1064. In 1850 there were 59 light-houses in the Province of Canada, 10 in New Brunswick, 19 in Nova Scotia and 1 in Prince Edward Island—in all 89. In 1868 there were 227 light-houses, 198 light-stations and 2 fog-whistles. In 1895 there were 768 light-houses, 632 light-stations, 22 fog-horns and 37 automatic fog-horns. The light-stations in Newfoundland that are maintained by the Dominion Government are included in the following statement:—

## NUMBER OF LIGHT-HOUSES, &amp;c., IN CANADA, 1868-95.

1065. It will be seen that there are 434 light-stations, 541 light-houses, 20 fog-whistles and 37 fog-horns more than there were in 1868, without taking into account the large number of bell-buoys, buoys and beacons that have also been supplied since then.

These were manned by 710 light-keepers, engineers of fog-whistles, assistants and crews of light-ships, while the whole number of persons employed on the outside service was 1,679. The lights, beacons, &c., were distributed in 1895 among the several divisions as follows:—

1066. The Ontario division, extending from Montreal to Manitoba, contained 224 lights, located at 182 stations. There were also 2 fog-whistles, 11 fog-horns, 3 fog-bells, 4 bell-buoys, also a number of buoys and beacons.

1067. The Quebec division is a large and important one, comprising as it does the Richelieu River and Lake Memphremagog, the River and Gulf of St. Lawrence, the Strait of Belleisle, the north-west coast of Newfoundland and the Labrador coast. In this division there were 154 lights and 117 stations, 8 light-ships, 3 supplied with steam fog-whistles, 9 steam fog-horns, 2 fog-whistles, 9 explosive bomb-stations, 10 gas-buoys, 4 of which were supplied with bells, 140 wooden buoys and 59 beacons. They were supplied by the steamers "La Canadienne" and "Druid."

1068. The Nova Scotia division, likewise a very important one, contained 180 light-houses, showing 192 lights, 1 light-ship, 16 steam fog-alarms, 18 hand fog-alarms, 2 fog-bells, 1 signal bomb-station, 17 automatic signal-buoys, 13 bell-buoys, 98 iron can-buoys, 700 other buoys, 8 stationary beacons, 16 life-boat stations, 3 humane establishments and 4 signal stations. The lights were supplied by the steamers "Newfield" and "Aberdeen."

1069. In the New Brunswick division there were 117 light-houses, 12 fog-alarms, 87 light-keepers and 12 engineers and 10 assistants in charge of light-houses and fog-alarms. The lights were supplied by the steamer "Lansdowne."

1070. Prince Edward Island division contained 35 light-houses, showing 56 lights, 1 steam fog-horn, 3 automatic buoys, and one bell-buoy. The steamer "Prince Edward" delivered the annual supplies.

1071. British Columbia division contained 16 light-houses, 5 of which are fog-alarms and at 3 others bells are rung by machinery, and 4 lantern lights on pile-beacons. The lights were supplied by the steamer "Quadra."

1072. The total cost of maintaining the light-houses, fog-whistles, &c., in Canada in 1895 was \$457,548.

1073. On the 1st July, 1886, the light-house at Cape Race, Newfoundland, was transferred by the Imperial Government to the Dominion of Canada, and the sum of \$100,151, being the balance of light dues collected by the Board of Trade, was paid to the Canadian Government, on the understanding that the light-house and fog-alarm should in future be maintained at the expense of the Dominion, free of dues. The light-house is indispensable to the safety of all vessels navigating the North Atlantic to and from Canada, and the transfer has relieved the Dominion of dues which amounted to about \$1,200 annually.

1074. The department has 8 steamers, the property of the Government, under its control, for the purpose of supplying the different lights, laying down and taking up buoys, attending to wrecks, &c., &c. The total cost of maintaining these vessels during 1895, after deducting receipts, was \$118,133.

1075. The steel steamer "Stanley," built expressly for the winter service between Prince Edward Island and the mainland, kept up communication, with a few unavoidable exceptions, during the winter of 1894-95, and the service generally gave satisfaction. During the summer this boat is employed in the Fisheries Protection Service.

1076. In order to provide for the treatment of sick and distressed mariners, all vessels over 100 tons register are required to pay a duty of 2 cents per ton three times a year, vessels under 100 tons only paying once in the same period; fishing vessels are also now entitled to the same benefits as other vessels, provided the dues are paid before leaving on a fishing

voyage. Any vessel not registered in Canada, and employed exclusively in fishing, is exempt from the payment of this duty. These provisions do not apply to Ontario, but a parliamentary grant of \$500 is made to each of the general hospitals at Kingston and St. Catharines for the care of seamen. At Montreal sick seamen are cared for at the General and Notre-Dame hospitals, and at Quebec at the Jeffrey Hale and Hotel-Dieu hospitals. Marine hospitals are established at St. John, St. Andrew's, Miramichi, Richibucto and Bathurst, in New Brunswick; at Yarmouth, Pictou, Sydney, Lunenburg and Point Tupper, in Nova Scotia, and at Victoria, in British Columbia. Seamen are also cared for at the Victoria General Hospital, Halifax, and at the Prince Edward Island and Charlottetown hospitals, Prince Edward Island. At ports where no hospitals are established, sick seamen are cared for under the direction of the chief officer of customs. The total amount received from dues in 1895 was \$42,816, a decrease of \$6,289 as compared with 1894. The total expenditure was \$38,333, being \$4,483 less than the receipts. The total excess of expenditure over receipts during the past twenty-seven years has been \$32,529.

1077. The total number of vessels on the registry books of the Dominion on 31st December, 1895, was 7,262, with a gross tonnage of 825,837 tons. Of this number 1,718 were steamboats with a gross tonnage of 247,007 tons, being an increase of 6,101 tons, and 78 in number, as compared with 1894; 250 vessels were added to the number during the past year, with a gross tonnage of 16,270 tons. The expenditure on account of the steamboat inspection fund during the last twenty-six years has exceeded the receipts by \$28,431. During the year 1895 the receipts amounted to \$24,631 and the expenditure to \$26,386, being an excess of expenditure of \$1,755.

1078. Since the 16th September, 1871, when the Act came into operation, 1,926 candidates have passed and obtained masters' certificates and 1,337 certificates as mates. The receipts from fees amounted to \$3,978 and the expenditure to \$3,758. Since 1871 the expenditure has exceeded the receipts by \$45,741.

1079. During the twelve months ended 30th June, 1895, 51 candidates for inland and coasting certificates passed and obtained masters' certificates of service and 15 mates' certificates of service, while 191 obtained masters' and 65 obtained mates' certificates of competency.

1080. The total number of wrecks and casualties to sea-going vessels of all nations that occurred in Canadian waters and to Canadian sea-going vessels in other waters, during the twelve months ended 30th June, 1895, as reported to the department, was 247; the tonnage involved was 93,914, and the amount of loss, so far as ascertained, \$767,536. The number of lives lost was 54. No particulars are available of disasters to vessels in Canadian inland waters and to Canadian vessels on American inland waters. Owing to the manner in which the returns are made it is not possible to make any just comparison of the returns for recent years with those of previous ones.

The following is a comparative statement of loss for each year since 1870, casualties, whether at sea or on inland waters, being included in the statement:—

COMPARATIVE STATEMENT OF WRECKS AND CASUALTIES, 1870 TO 1895.

YEAR ENDED 31ST DECEMBER.	Casualties.	Tonnage.	Lives Lost.	Damage.

Total	8,528	3,170,968	4,745	57,687,681

Persons were lost by the wreck of the White Star ss. "Atlantic" in Turn's Bay, N.S.W.

Since 1870 the casualties which have happened in Canadian waters of all nationalities, and to Canadian vessels all over the world, are 8,528, affecting over 3,000,000 tons of shipping, causing a loss of human lives and a money damage equal to nearly \$57,700,000, an average of 328 wrecks and casualties a year, affecting 121,960 tons of shipping, causing the loss of about 190 lives a year and destruction of property equal to \$2,218,753 annually.

That the efforts of the Government and people of Canada to reduce the number of casualties, and consequently the number of lives lost and to

... property, have been successful, is seen in the

# TABLE OF CASUALTIES AND DEATHS.

	1880-84.	1885-89.	1890-93.	1894.	1895.
No. of ships.	405	329	263	80	17

Tons engaged.	28,801,605	32,430,937	42,983,937	46,914,049	44,574,177

About fourteen to every million tons of ship in the period, about twenty in the 1875-79 period, 25 in 1880-84 and five in the 1890-93 period, were lost. The loss was thirteen for every million tons of ship in 1875-79, under ten in 1880-84, four in 1885-89, 1,500,000 tons engaged in 1890-93, and one every four million tons.

... actions of the Meteorological Service, which is concerned with the welfare of our sailors and of

... general summary of the expenditure of the Department ended 30th June, 1890 to 1895. There is a saving in 1895 over that of 1894 of \$15,537.

.....	108,304	761,731			
.....	109,125	774,832	Total.....	2,837,695	21,800,698

There was an excess of expenditure during the whole period of \$18,963, but it must be remembered that the expenditure includes the construction of a large number of light-houses and other permanent works, as well as the purchase of several steamers, besides which \$237,618 have been spent on the survey of Georgian Bay and \$121,000 on the taking of observations in Hudson Bay.

The following table gives the number and tonnage of vessels built and registered in Canada in each year since 1874, and of the tonnage and value

of vessels sold to other countries since 1876, will give some idea of the decline in the ship-building industry of late years:—

VESSELS BUILT AND REGISTERED IN CANADA, AND VESSELS SOLD TO OTHER COUNTRIES, 1874-95.

YEAR.	BUILT AND REGISTERED.*		SOLD TO OTHER COUNTRIES.*		
	No.	Tonnage.	No.	Value.	Tonnage.

1895.....	250	16,270	31	172,563	16,367

\* Calendar year. † Fiscal year.

From the above figures it appears that the ship-building industry reached the lowest point of depression in 1887, since which year there was a partial recovery, until 1892, when there was a marked decline both in number and tonnage. The figures for the year 1895 show a decrease of 76 in number, and a decrease of 4,993 in the tonnage as compared with 1889. The value of ships sold to other countries in 1895 decreased by \$70,868, and the tonnage by 5,393 tons as compared with 1894. There is, however, a very marked decline in the value per ton of ships sold, since it averaged in the earlier years of the table \$34 per ton, while in 1895 it had fallen to \$10.41 per ton, so that at the prices of 1876, 1877 and 1878 the ships sold in 1895 would have realized \$563,278, or \$390,715 more than they actually did. The tendency of the present day is, as is well known, towards larger ships, and it will be seen that, in the earlier years of the table, the ships averaged 400 tons each, and in the later years 500 to 700 tons each.

1089. The following is a comparative statement of sea-going vessels arrived and departed from Canadian ports (exclusive of coasting vessels in 1894 and 1895), distinguishing between British, Canadian and foreign vessels:—

SEA-GOING SHIPPING, ENTERED AND CLEARED AT CANADIAN PORTS,  
1894 AND 1895.

NATIONALITIES.	Number of Vessels.	Tons Register.	FREIGHT.		Number of Men.
			Tons Weight.	Tons Measure- ment.	
1894.					
British .....	3,381	4,146,645	1,758,192	667,114	112,090
Canadian.....	13,780	2,334,081	783,316	922,899	115,887
Foreign .....	11,179	4,799,810	1,204,698	884,623	202,588
Total .. . . .	28,340	11,280,536	3,746,206	2,474,636	430,565
1895.					
British .....	3,206	3,994,224	1,739,873	771,425	105,255
Canadian .....	12,918	2,054,024	755,930	781,414	112,272
Foreign .....	11,752	4,928,581	1,161,441	864,902	212,436
Total .....	27,876	10,976,829	3,657,244	2,417,741	429,963

There was a decrease in the number of British vessels in 1895 as compared with the preceding year of 175, and in the tonnage of 152,421 tons. The foreign vessels increased 573 in number and 128,771 in tons. The Canadian vessels decreased 862 in number and 280,057 in tonnage.

The freight carried decreased 88,962 tons in the class of freight charged by weight, and decreased 56,895 tons in the class charged by measurement.

1090. The next table shows the principal countries from which sea-going vessels arrived, and for which they cleared, at Canadian ports, in 1895:—

ARRIVALS FROM, AND CLEARANCES FOR, PRINCIPAL COUNTRIES  
BY SEA-GOING VESSELS IN 1895.

\* Canadian vessels not separated.

11 more British and 4,364 more Canadian vessels entered 1895 than there were in 1876, the first year in which the two countries were distinguished, and 9,647 more foreign in 1868, the increase in the latter having been much larger than in the former nationalities.

The foregoing statement refers to sea-going vessels entered and cleared at Canadian ports, with cargo and in ballast. The tables which follow give an analysis of the sea-going vessels carrying cargo :—

STATE OF SEA-GOING VESSELS CARRYING CARGO INTO AND FROM CANADA.

It will be observed, 1st, that there has been a steady increase in the total tonnage employed in carrying cargo to and from Canada, the five years 1889-93 showing an increase of nearly 80 per cent over the periods 1869-73. The tonnage employed in 1895 shows an increase of 8 per cent over the average of the 1889-93 period and the tonnage in 1895 a decrease of about 4 per cent as compared with 1894.

2nd. That the proportion between tonnage carrying cargo in and tonnage carrying cargo out has remained nearly the same. In the first period, 1869-73, the proportion being 60 per cent cargo out and 40 per cent cargo in; in the second period, 61 per cent out, and 39 per cent in; in the third period, 59.9 per cent out and 40.1 per cent in; in the fourth period, 58.6 per cent out and 41.4 per cent in; in the 1889-93 period, 58 per cent out, and 42 per cent in; in 1894, 57.8 per cent out and 42.2 per cent in, and in 1895, 57.2 per cent out and 42.8 per cent in.

1093. The following tables show total tonnage of sea-going vessels carrying cargo into and out of the different provinces by five-year periods, with yearly average and percentage of increase or decrease:—

#### QUEBEC.

Registered sea-going tonnage carrying cargo into and out of the province by five-year periods, with yearly averages and percentages of increase or decrease:—

PERIOD.	Total Tonnage.	Yearly Average.	Per cent.
1869-73.....	8,541,112	1,708,222	.....
1874-78.....	9,180,482	1,836,096	+ 7.5
1879-83.....	10,087,924	2,017,585	+ 9.9
1884-88.....	10,646,050	2,129,210	+ 5.5
1889-93.....	10,900,830	2,180,166	+ 2.4
1894.....	.....	2,587,044	+ 18.7
1895.....	.....	2,257,352	- 12.7

Registered sea-going tonnage carrying cargo into the province, &c. :—

PERIOD.	Total Tonnage.	Yearly Average.	Per cent.
1869-73.....	3,389,426	677,885	.....
1874-78.....	3,392,515	678,503	+ .91
1879-83.....	4,260,500	852,100	+ 25.6

The tables relating to nationality of the sea-going vessels doing the over-sea portion of our transit trade show that (a) the proportion of British and Canadian vessels employed in the trade was, in the 1869-73 period, 77·8 per cent, and foreign 22·2 per cent; (b) that the foreign element has advanced during each subsequent five-year period, and in 1889-93 had a tonnage equal to 41·9 per cent of the whole employed; (c) that this tonnage fell off in 1893 to 38·7, as compared with the average of the previous four years, 1889-92, and to 38·4 in 1894, and in 1895 increased to 40·9 per cent; (d) that the Canadian tonnage employed was 17·9 per cent of the whole in the 1874-78 period, 25 per cent in the next period, and 16·7 per cent in the last five-year period, showing, however, a gain in 1893, as compared with the previous four years, 1889-92; (e) that British tonnage, as distinct from Canadian, has barely held its own during the period 1879-93; (f) that in the year 1895 the percentage of British tonnage employed was about the same as the periods 1884-88 and 1889-93, that the proportion of Canadian

tonnage was less than in 1894, but was more than the period 1889-93, and that the proportion of Foreign tonnage was somewhat more than in 1894.

1100. Taking the provinces and comparing the five years 1876-80 with the five years 1889-93, and both periods with the years 1894 and 1895, we have the following results:—

PROVINCES.	Nationality.	Period 1876-80.	Period 1889-93.	Year 1894.	Year 1895.

1101. Iron and steel have so completely superseded the use of wood in the construction of ships that there can be little, if any, development in the ship-building industry of Canada till the great natural facilities of the Dominion are properly applied. The Province of Nova Scotia possesses such large deposits of iron ore, coal and flux in close proximity to each other and to ship harbours that capital and skill should find a splendid opening for successful enterprise.

The following tables show the number and tonnage of sea-going vessels of 100 tons or over recorded in Lloyd's. The statistics for steam vessels are based on gross tonnage, as the deductions to secure net tonnage in steam vessels vary considerably among nations. The number of vessels, as well as the tonnage in the world's mercantile marine, is given. The salient features are the steady increase in size of vessels and the substitution of steel for other materials. The compilation shows the progress for the last

MERCANTILE MARINE.

707

five years of changes in the materials of ship-building and for the substitution of steam for sail :—

The world's shipping in 1892 was 32,326 vessels of 22,939,958 tonnage.

In 1895-96 it was 30,368 vessels of 25,107,632 tons, an increase of 2,167,674 tons or 9·5 per cent.

In 1892 of a total of 32,326 vessels with 22,939,958 tons, 19,606 vessels with 7,065,555 tons were of wood and 12,720 vessels with 15,874,382 tons were of iron and steel.

In 1895-96 of a total of 30,368 vessels with 25,107,632 tons, 15,803 with 5,672,970 tons were of wood and 14,565 with 19,434,662 tons were of iron and steel.

The tonnage of wooden vessels decreased 1,392,585 tons and the tonnage of iron and steel increased 3,560,280 tons. Thus in three years the tonnage of wooden vessels has decreased from 30·8 per cent of the whole to 22·6 per cent, while the tonnage of iron and steel vessels has increased from 69·2 per cent of the whole to 77·4 per cent.

The tonnage under construction in the United Kingdom has not been increasing. Lloyd's register gives the following merchant and other vessel (not warships) under construction :—

In 1881 there were 611 vessels of 1,024,626 tons.			
" 1889	"	521	" 882,749 "
" 1891	"	475	" 702,114 "
" 1892	"	385	" 678,780 "
" 1883	"	326	" 616,560 "
" 1894	"	327	" 653,311 "
" 1895	"	356	" 716,573 "

In 1875 there were under construction 132 steam vessels of 158,531 tons and 317 sail vessels of 157,643 tons.

In 1895 there were under construction 314 steam vessels of 688,989 tons and 42 sailing vessels of 27,576 tons.

In 1875 the tonnage under hand was equally divided between steam and sail.

In 1895 the proportion of steam to sailing tonnage building was 25 to 1. These facts are apparent :—

1st. That wooden vessels have been largely supplanted by those constructed of iron and steel—the process having gone on so rapidly that between 1891 and 1895 the proportion has changed from 30 to 22 per cent of wooden vessels.

2nd. Steam has supplanted sail very greatly—in 20 years change has been made from the construction of an equal tonnage under sail and under steam to the building of 25 tons under steam to 1 under sail.

3rd. The tonnage under construction in Great Britain was 308,051 less in 1895 than in 1881.

4th. That during the past three years there has been an increase in the tons of shipping being built.

The first iron ship was built in Great Britain in 1843. The first steel ships were built on the Clyde in 1879, when 18,000 tons of shipping were constructed of the metal.

1102. The next table is a statement of shipping on inland waters between Canada and the United States in each year since Confederation :—

VESSELS ARRIVED AT AND DEPARTED FROM CANADIAN PORTS ON INLAND WATERS BETWEEN CANADA AND THE UNITED STATES IN EACH YEAR SINCE 1867.

YEAR.	CANADIAN.		UNITED STATES.		TOTAL.

1894.....	20,939	5,917,145	16,727	3,155,400	37,666	9,072,545
1895.....	16,866	5,196,811	15,547	2,927,323	32,413	8,124,134

During the period of Confederation 179,684,285 registered tons of shipping having arrived at and departed from Canadian ports on inland waters between Canada and the United States. This is an average of 6,417,296 tons a year. The tonnage engaged in 1895 was 948,411 tons less than in 1894, but 1,707,838 tons more than the average of 28 years.

The table above given shows that the average tonnage of Canadian vessels has increased since 1868 and that of the United States decreased, Canadian having averaged 180 tons in 1868 and 308 tons in 1895, while United States vessels averaged 286 tons in 1868 and only 188 tons in 1895.

Comparing 1885 and 1895 the Canadian tonnage, which was in the former year over 75 per cent of the whole, was in 1895 nearly 64 per cent, showing that the United States tonnage has made the greater gain.

1103. The next table gives the tons of freight carried and the number of men employed from 1876 to 1895:—

VESSELS ARRIVED AT AND DEPARTED FROM CANADIAN PORTS ON

Taking 1895 and 1885 for purposes of comparison, we have in 1895 an increase in the number of vessels which entered and left Canadian inland ports of 2,454, in the tonnage of the vessels of 1,684,037, and in the number of men, 117,067. The tons of freight carried in connection with the 32,413 trips made by vessels engaged in this trade in 1895 amounted to 2,392,287.

tons, of which 1,734,114 tons were in the class of freight charged by weight and 518,173 tons in the class charged by measurement. In 1885 the 29,959 trips made resulted in the transport of 2,675,153 tons of goods, of which 1,745,725 tons were in the class of freight charged by weight and 929,428 tons were in the class paying by measurement, *i. e.*, that the vessels on each trip in and out averaged 89.29 tons of freight in 1885 and 69.49 tons in 1895. The increase in number of trips, the tonnage and the number of men, together with the decrease in the average tons of freight, indicate that the business is becoming more and more a passenger-carrying business. The total increase in the tons carried in 1894, as compared with 1884, being only 76,943 tons, or 2.1 per cent against an increase in tonnage of vessels engaged of over 54 per cent, and in a number of trips made of over 15 per cent. As a channel for the conveyance of goods, the shipping between Canada and the United States on the inland waters is barely holding its own, other means of transport being more largely employed.

The Canadian vessels employed are not holding their own. In 1885 they carried 67 per cent of the freight, and in 1895 barely 50 per cent.

The following table is a comparative statement of the total shipping of Canada, inland as well as sea-going, in the years 1894 and 1895 :—

COMPARATIVE STATEMENT OF ALL VESSELS (BOTH SEA-GOING AND INLAND) ARRIVED AT AND DEPARTED FROM CANADIAN PORTS (EXCLUSIVE OF COASTING VESSELS) IN 1894 AND 1895.

NATIONALITIES.	Number of Vessels.	Tons Register.	FREIGHT.		Number of Men.
			Tons Weight.	Tons Mea- surement.	
1894.					
British.....	3,381	4,146,645	1,758,192	667,114	112,090
Canadian.....	34,719	8,251,226	1,737,834	1,227,310	378,091
Foreign.....	27,906	7,955,210	1,210,383	1,159,817	338,823
Total.....	66,006	20,353,081	4,706,409	3,054,241	829,004
1895.					
British.....	3,266	3,994,224	1,739,873	771,425	105,255
Canadian.....	29,784	7,250,835	1,619,273	1,042,444	361,355
Foreign.....	27,299	7,855,904	2,032,212	1,122,045	349,010
Total.....	60,289	19,100,963	5,391,358	2,935,914	815,616

There was a decrease in the shipping of the Dominion in 1895, as compared with the previous year. The number of vessels was less by 5,717; the registered tonnage by 1,252,118 tons, while there was an increase in tons weight of freight of 684,949 tons, and a decrease in tons measurement of freight of 118,327 tons and 13,388 in the number of men.

In the next year, 1854, six steamers of 5,545 tons aggregate, 252 ocean-sailing vessels of 65,365 tons, and 4,251 inland vessels of 323,578 tons arrived at the port, making an aggregate tonnage of 394,488 tons, the average tonnage of the sea-going vessels 274 tons.

In 1892, thirty-eight years after, the total tonnage that arrived at the port was 2,086,308 tons, of which 1,036,707 belonged to sea-going vessels, 658 of which were steamers and 7 sailing vessels, the average tonnage of each sea-going vessel having increased to 1,410 tons.

In 1894 the number of sea-going vessels that arrived was 734, with a tonnage of 1,096,909 tons. Of these 684 were steamers with a tonnage of 1,013 tons, and 50, with a tonnage of 17,596, were sailing vessels. Compared with 1893 the reduction in the number of steamers was 120 and the tonnage 72,464 tons.

In 1895 the number of sea-going vessels that arrived was 640, with a tonnage of 1,069,386 tons. Of these 592 were steamships with a tonnage of 1,056,111 tons.

The number of vessels that arrived in Montreal from the Maritime Provinces in 1881 was 212, with a tonnage of 99,378 tons.

In 1895 the total number of vessels from the Maritime Provinces was 256 with a tonnage of 300,060 tons. Of these 256 were steamships, having a tonnage of 296,256 tons.

In 1881 the shipping employed in the interprovincial trade between Montreal and the provinces of New Brunswick, Nova Scotia and Prince Edward Island has increased by 200,682 tons, an increase of 202 per cent.

3. Comparison between 1876 and 1895 shows the following changes in the whole Dominion :—

	1876.	1895.
Employed in sea-going trade.....	5,910,764	10,976,829
in inland waters between Canada and the United States..	4,000,435	8,124,134
coasting trade.....	10,300,939	25,473,434
Totals.....	20,212,138	44,574,497

The proportion of each to the whole in each year is as under :—

	1876. Per cent.	1895. Per cent.
in sea-going trade .....	29·2	24·6
in inland waters.....	19·8	18·2
coasting trade .....	51·0	57·2

The increase in the total tonnage employed in these three branches of transportation has been 120 per cent.

The coasting trade of Canada is regulated by the Act, Chap. 83, of the Statutes of Canada, which provides that no goods or passengers be carried by water from one port in Canada to another except in British ships. This provision, however, may be declared by the Governor in Council not to be applicable to the vessels of any country that British vessels to participate in its coasting trade on the same footing as our national vessels. By different Orders in Council the ships of the United States, Germany, the Netherlands, Sweden and Norway, Austria-Hungary, Belgium and the Argentine Republic.

1108. The coasting trade of Canada is not included in any of the foregoing tables, but is given in the following one, since 1876, before which no returns were kept :—

TONNAGE OF VESSELS, BRITISH AND FOREIGN, EMPLOYED IN THE  
COASTING TRADE, WHICH ARRIVED AT AND DEPARTED FROM  
CANADIAN PORTS, 1876-95.

YEAR.	TONNAGE.							Canada.

Manitoba	1,735	1,735	1,398	1,398	.....	.....	.....	.....	6,366
Totals	10,838,723	9,892,319	2,240,877	2,233,214	73,474	60,338	80,941	53,528	25,473,434

1110. In 1876 the British tonnage was 10,108,110 tons and that of foreign vessels 192,829 tons, or 1·9 per cent of the whole. In 1895 the tonnage of British vessels was 25,205,133 tons and of foreign vessels 268,301 tons, or 1·05 per cent.

The growth of the coasting trade of Canada is very considerable.

Taking 4-year periods, the totals and the averages are :—

PERIODS.	Total Tonnage.	Yearly Average.
1876-79 .....	42,384,145	10,596,036
1880-83 .....	59,644,409	14,911,102
1884-87 .....	65,300,089	16,325,022
1888-91 .....	86,407,101	21,601,775
1892-95 .....	101,723,454	25,430,863

Making 1876-79 the datum line, the increases are as follow :—

1880-3 over 1876-79.....	40·7 per cent.
1884-7   "                    .....	54·1   "
1888-91   "                   .....	103·9   "
1892-5    "                   .....	140·0   "

By Provinces the growth has been :—

\*Decrease.

This analysis shows : (1st.) That the coasting trade of Canada has made continuous progress, indicating the development of water-borne business of a provincial and interprovincial character, notwithstanding the growth of the railway mileage of the country. (2nd.) That British Columbia is the banner province in the development of her coasting trade, Nova Scotia coming second and Ontario third. (3rd.) That Ontario has the largest absolute growth, her coasting trade employing 10,408,372 tons a year in the 1892-95 period, which is an increase of 5,854,268 tons over the 1876-79 average. (4th.) That, with the exception of Quebec and British Columbia, all the provinces show growth in the 1892-95 period as compared with the immediately preceding period of 1888-91. (5th.) That, with the exception of New Brunswick for the 1880-83 and the 1884-87 periods, there is not a minus sign in all the table.

# STATISTICAL YEAR-BOOK.

This table gives the number and tonnage of ships and boats entered at the principal ports of the Dominion in

## VESSELS ENTERED AND CLEARED.

figures cannot be given owing to destruction of books in the great fire.

Malta and Malta being merely ports of call, it will be seen that no possession outside of the United Kingdom has a larger shipping than Canada, though the combined shipping of the Australasian exceeds that of this country; the latter figures, however, include intercolonial trade.

3. The next table gives the tonnage of vessels trading to and from of the principal foreign countries. It will be seen that, including the United Kingdom, Canada ranked thirteenth in 1893 among the countries of the world as regards the magnitude of her shipping trade.

111  
1890

1115. If registered tonnage alone is strictly taken Canada will take fourth place in the above table and the United States the fifth place, but as Canadian vessels engaged in the lake and river trade are on the registry books of this country, while those belonging to the United States, and engaged in the same trade, are only either licensed or enrolled, the latter, for the purposes of comparison, have been included in registered tonnage. The United States mercantile marine has declined very much of late years, and the registered tonnage proper was in 1895 only 822,347 tons. In 1856, 75.2 per cent of the foreign trade of the country was carried in United States bottoms, while in 1895 the proportion was only 11.7 per cent; the value carried having increased in the meantime from \$641,604,000 to \$1,456,403,388.

The sea-going shipping of the world is given by *Bureau Veritas* at 24,627,473 tons; of this amount 8,593,670 are sailing vessels and 16,033,803 tons are steamers. The British Empire has 13,317,887 tons, or over 54 per cent of the total. Of the tonnage in steamers, the British Empire has over 62 per cent.

1116. As early as 1723 ship-building was a branch of industry in Canada, six merchant ships and two men of war having been built in the colony during that year. In 1752 a 74-gun ship was built at Cape Diamond, Quebec, but it was wrecked in the launching. In 1810 no less than 26 vessels, having an aggregate tonnage of 5,836 tons, were built in the provinces. In 1812, 37 vessels were built at Quebec. In 1830-31 the "Royal William"—the first steam-driven vessel that ever crossed the Atlantic—was constructed in the "Cove," Quebec, and supplied with machinery in Montreal.

From these small beginnings sprang Canada's fleet, now numbering over 7,000 vessels.

1117. On July 1st, 1867, when the Confederation was created, there were 5,693 vessels with a registered tonnage of 767,654 tons on the registry of shipping.

In December, 1874, the registry contained 6,930 vessels with a tonnage of 1,158,363 tons.

In December, 1877, the registry held the names of 7,362 vessels with a tonnage of 1,310,468 tons.

The next two years saw the culmination of the development of our marine. In 1878 there were 7,469 vessels with 1,333,015 tons, and in 1879 there were 7,471 vessels with 1,332,094 tons.

1118. In 1867 the steamers on the registry numbered 335, with a tonnage of 45,766 tons. In 1874 there were 634 steamers, of a gross tonnage of 22,836 tons. In 1883 the steamers numbered 1,006 with a gross tonnage of 203,539 tons; in 1886, 1,198 steamers and gross tonnage 257,818 tons; in 1889, 1,348 steamers and gross tonnage 205,632 tons; in 1892, 1,500

with a gross tonnage of 234,711 tons; in 1893, 1,538 steamers with 241,171 tons gross; in 1894, 1,640 steamers with a gross tonnage of 240,906 tons, and in 1895, 1,718 steamers with a gross tonnage of 247,007. Apparently the steamers were more in tonnage in 1886 than they have been since. Probably this arose from the transfer of ocean steamers from the Canadian to the British Registry—a process which goes on from year to year, more or less, and in some years more than in others—unaccompanied, however, by change in ownership.

1119. Analysis of the returns (which are published once every three years) at different periods gives the following results in net tonnage:—

DESCRIPTION OF VESSEL.	1867.		1873.		1883.		1892.

\* These figures differ from those given on pages 719 and 720, the above being net tonnage and the others gross tonnage of steamers.

Comparing 1892 with 1883, the analysis shows that the decrease has been 303,043 tons; that steamers decreased by 58,691 tons; ships by 71,665 tons; barkentine, brigs, barks and brigantines by 232,863 tons, and barges by 12,866 tons; that among increases are schooners, with an increase of 69,814 tons, and sloops, with 3,106 tons of an increase; that schooners are increasing in size, the average schooner in 1892 having a registered tonnage of 61 tons against 43 tons in 1883, and that the barge and the wood-boat are slowly retreating before other conveyances of a better type.

The ships of 1892 averaged 1,457 tons each; those of 1883 averaged 1,280 tons; of 1873, 1,088 tons, and of 1867, 1,028 tons.

The class of vessels designated barks, barkentine, brigs and brigantine averaged in 1867, 290.14 tons; in 1873, 377.25 tons; in 1883, 546.95 tons, 1892, 578.17 tons.

By provinces the changes which have taken place are shown in the following table:—

PROVINCES.	VESSELS.							
	1867.		1873.		1883.		1892.	
	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.	No.	Tonnage.

P. E. Island.....			280	38,918	241	49,416	197	22,721
British Columbia..			30	4,095	94	9,046	297	23,558
Manitoba.....					24	2,778	82	6,162
Total.....	5,693	767,654	6,783	1,073,718	7,374	1,267,394	7,010	964,351

From 1873 to 1883 all the provinces gained in tonnage. From 1883 to January, 1892, Ontario just about held her own. British Columbia made large gains, while Quebec, New Brunswick, Nova Scotia and Prince Edward Island lost heavily, Prince Edward Island most of all, the decrease in that province amounting to 54 per cent, against 42 per cent in New Brunswick, 25 per cent in Quebec and 21 per cent in Nova Scotia.

The steamers' tonnage in 1892 was divided among the provinces in the following proportions: Ontario, 41·1 per cent; Quebec, 32·3 per cent; British Columbia, 10·0 per cent; Nova Scotia, 7·9 per cent; New Brunswick, 3·8 per cent; Prince Edward Island, 2 per cent, and Manitoba, 2·6 per cent.

The tonnage of sailing vessels is distributed proportionately as follows: Nova Scotia, 50·5 per cent; New Brunswick, 21·7 per cent; Quebec, 14·2 per cent; Ontario, 9·8 per cent; Prince Edward Island, 2·4 per cent; British Columbia, 1·2 per cent, and Manitoba, 0·2 per cent.

On 31st December, 1895, there were on the registry 7,262 vessels with a registered net tonnage of 825,837 tons. Of these 1,718 were steamers. The number of vessels of all kinds increased by 17. The tonnage decreased by 43,787 tons. The number of new vessels registered during the year was 250, with a tonnage of 16,270 tons. The number sold during the year was 71 of a tonnage of 16,567 tons, valued at \$172,563.

1120. The following is a statement of the number and tonnage of wrecked Canadian vessels, 1884-95 (calendar years):—

NUMBER AND TONNAGE OF WRECKED CANADIAN VESSELS—*Continued.*

YEAR.	Number.	Tonnage.
1884.....	138	31,302
1885.....	120	33,634
1886.....	173	56,220
1887.....	115	40,346
1888.....	94	22,807
1889.....	109	33,688
1890.....	103	25,654
1891.....	176	32,890
1892.....	72	22,728
1893.....	85	27,228
1894.....	86	36,577
1895.....	247	93,914
Total.....	1,518	456,788

According to the returns published by the Department of Marine, there were entered in the Shipping Registry of the Dominion, from 1st January, 1884, to 31st December, 1895, 3,414 vessels with a tonnage of 429,038 tons.

According to the special return, name by name, of the vessels on the registry, there were 7,374 vessels with 1,267,394 tons, on 31st December, 1883.

This gives a total of 10,788 vessels of 1,696,432 tons. Deducting from this total the vessels sold as per trade returns (455 vessels of 229,033 tons), and the vessels wrecked (1,518 vessels of 456,788 tons), and there remain 8,815 vessels of 1,010,611 tons.

The number given on the registry of 1895 is 7,262 vessels of 823,837 tons, showing a difference of 1,553 vessels and 184,774 tons.

If the returns of the Customs Department be correct then these 1,553 vessels have been transferred from Canadian registry to British registry, ownership continuing to be vested in Canadians.

1121. There are four graving docks in Canada, three belonging to the Federal Government and one owned by a company. The following statement shows the dimensions of these graving docks:—

NAME.	Length.	WIDTH			Water on Sills.	Rise of	
		At coping.	At entrance.	At bottom.		Spring tide.	Low tide.
	Ft.	Ft.	Ft.	Ft.	Ft.	Ft.	Ft.
Esquimalt.....	430	90	65	41	*26½	7 to 10	2 to 4
Kingston.....	280	79	55	47	16½	†	
Levis.....	445	100	62	73	25½	26½	3½
Halifax.....	585	102	89½	72	30	6	1

\* At ordinary spring tide. † Height of water in Lake Ontario varies 3½ feet.

The Esquimalt dock in British Columbia is the first built on the Pacific Coast. It was finished in June, 1886. The Lévis dock was finished in 1887, and was the first in the St. Lawrence River. The graving dock at Kingston was finished in November, 1891, and serves the shipping in Lake Ontario and the River St. Lawrence. These three belong to the Government of Canada.

The Halifax graving dock was opened September 20th, 1889, and is the largest on this continent. It can be adapted to vessels 601 feet long. The "Teutonic" is 582 feet, and the "Campania" and "Lucania" are each 620 feet in length.

For 20 years from the completion the company owning it have subsidies from the Imperial and the Canadian Governments and from the city of Halifax, amounting in all to about \$30,000 (£6,180).

The three Government docks cost for construction as under:—

Esquimalt .....	\$ 1,171,694*
Kingston .....	310,210
Lévis .....	910,000

The number of vessels which used the docks from their opening to June, 1893, was: Esquimalt, 102; Kingston, 74; Lévis, 33.

During the year ended 30th June, 1895, 11 vessels used the Esquimalt dock, 24 the Kingston dock, and 8 the Lévis dock.

During 1895 the expenditure on repairs for the Esquimalt dock amounted to nil and the receipts to \$6,320; for the Kingston dock, the expenditure was nil and receipts \$2,878; for the Lévis dock, expenditure nil, receipts \$13,995.

The expenditure for staff and maintenance was: for Lévis dock, \$8,322; for Kingston dock, \$5,940, and for the Esquimalt dock, \$420.

1122. In the United States the largest docks have 26 feet of water on the sill. In England the naval dock-yards at Chatham contain 7 docks with from  $31\frac{1}{2}$  to 33 feet of water on the sills. At Portsmouth there are nine dry-docks having from  $33\frac{1}{2}$  to  $41\frac{1}{2}$  feet of water; at Devonport there are 3 docks with  $27\frac{3}{4}$  to  $35\frac{1}{2}$  feet of water; at Queenstown there are two docks with  $32\frac{3}{4}$  feet. The two private docks at Tilbury have respectively 30 and 35 feet of water. Russia has three large docks at Cronstadt capable of holding the largest vessels. France has on the north coast, at Havre, two dry-docks, each with  $28\frac{1}{2}$  feet of water on the sills; at Cherbourg there are three docks with 30 feet and one with 37 feet of water. On the south coast, at Toulon, there are two docks with 30 feet of water each, and two with  $32\frac{3}{4}$  feet of water each. Spain has a Government dock at Ferrol with  $32\frac{3}{4}$  feet of water on the sill. Italy has two docks at Genoa with 28 and 31 feet respectively, and 2 at Spezzia with 33 each and two with 30 feet; one at Taranto with  $32\frac{3}{4}$  feet, and one at Venice with 28 feet of water. Austria has two docks at Pola with  $27\frac{3}{4}$  feet and 32 feet. Turkey has a dock at Constantinople with 30 feet, and England has in Malta two docks with  $33\frac{1}{2}$  and  $35\frac{1}{2}$  feet of water.

\* Including \$243,333 (£50,000 stg.) contributed by the Imperial Government.

## CHAPTER XVI.

Postal System before Confederation.—Dominion System.—The Postal Union and Conferences.—Post Offices in the Dominion.—Postal Revenue and Expenditure.—Growth of Postal Operations.—Government Telegraph Lines.—Telegraph Mileage.—Submarine Cables.—Telephones.

1123. By an Act of the Imperial Parliament, 12-13 Vic. (1851), Chap. 66, the management of the postal systems in the colonies of British North America was transferred to the various provincial authorities, and up to the time of Confederation each province controlled its own system, under its own laws and regulations.

1124. After Confederation these various laws were allowed to remain in force until the 1st April, 1868, when the Post Office Act, 31 Vic. (1868), Chap. 10, came into effect, establishing uniform rates and regulations for the Dominion.

1125. These latter, which since that date have been changed from time to time, are now as follow: General letter rate, 3 cents per ounce or under; letters for local delivery, where there is a free delivery, 2 cents per ounce or under; letters for local delivery, where not delivered free, 1 cent per ounce or under. Registration fee, 5 cents. Letter cards, 3 cents. Post cards, 1 cent. Newspapers, books, &c., generally, 1 cent per 4 ounces. Parcels, 6 cents per 4 ounces. Fifth class matter (parcels open to inspection), 1 cent per ounce.

1126. In 1875 an agreement was made with the United States by which a common rate of postage between the two countries was adopted, each country retaining all money collected, and no accounts being kept between the two post offices in regard to international correspondence.

An agreement which came into effect on 1st March, 1888, and specially provided for the establishment of an exchange of general articles of merchandise, open to inspection, between the two countries, subject to certain regulations, for the protection of customs, with respect to articles liable to duty, superseded the agreement of 1875, but all the principal provisions were retained. The internal postage rates of each country generally govern, and official correspondence entitled to pass free in one country is delivered free in the other.

1127. The Universal Postal Union was formed at a conference held at Berne in 1874, and the first treaty was signed on 9th October in that year, the countries represented being the several countries of Europe, the United States and Egypt. This treaty came into force on 1st July, 1875. The object of the Union was to form all the countries of the world into one

single postal territory, and to establish, as far as possible, uniform reduced rates of postage, and also to further the interchange of correspondence by arranging that every country should be bound to convey the mails of other countries by its land or sea services at the lowest possible rates.

The next postal congress was held in Paris in May, 1878, when the Dominion of Canada was admitted a member from the following 1st July, and letters, newspapers and other printed matter, samples and patterns, became subject to uniform postage rates and regulations for all places in Europe, and for all other countries that were members of the Union. The existing postal arrangements with the United States were allowed to remain undisturbed, being of a more liberal and advantageous character than the ordinary regulations of the treaty. At this meeting the regulations of the Treaty of 1874 were revised and embodied in a convention which came into force on 1st April, 1879.

The third congress was held in Lisbon, in February, 1885, and Canada was represented by the delegates of the British post office. No material change was made in the convention of 1879.

The fourth congress was held in Vienna in May, 1891, and Canada was represented by the High Commissioner at London, Hon. Sir Charles Tupper, Bart., G.C.M.G. At this meeting the admission of the Australasian colonies was agreed upon, and those countries joined the Union on 1st October, 1891. A number of measures, all tending towards facilitating the transmission of correspondence, was agreed upon. The next meeting will be held at Washington, D.C., United States, in 1897.

The Union now includes almost every civilized country in the world, being composed of the following: The whole of Europe; the whole of America; in Asia—Russia in Asia, Turkey in Asia, Persia, British India (Hindustan), Burmah, Ceylon and the postal establishments at Aden, Mascat and Guadar, Japan, Siam, the British, French, Dutch, Spanish and Portuguese colonies and the British, French, German and Japanese postal establishments in China and Corea. In Africa—Egypt, Algeria, Tripoli, Tunis, Liberia, Congo Free State, the Azores, Madeira, the postal establishments of India and France at Zanzibar, the French, Italian, Portuguese and Spanish colonies, the British colonies, the Orange Free State, the Transvaal or South African Republic, all the territories under the protectorate of Germany and the French postal establishment at Tamatave (Madagascar). In Australasia and Oceania—the British colonies on the continent, Tasmania, New Zealand, Fiji, British and German New Guinea, Hawaii, the Marshall Islands and the French, Dutch and Spanish colonies.

A central office, under the name of the "Bureau International de l'Union Postale," has been established at Berne, at the cost of the various countries composing the Union. At the time that the Treaty of Berne came into force, 1st July, 1875, the jurisdiction of the Union extended over an area of about 14,293,750 square miles, with upwards of 350 millions of inhabitants, whereas it now extends over an area of 39,372,000 square miles and 1,035,000,000 inhabitants.

The number of pieces of postal matter distributed over the whole area of the Union during 1893 was computed at 8,201 millions of letters; 1,898 millions of postal cards; 5,899 millions of papers, printed matter and official documents; 143 millions of samples; 44 millions of registered letters, with a declared value of \$8,028,400,000; 307 millions of money orders and

postal credits, with a value of \$3,061,752,000, making a total of 17,578 millions of pieces of mail matter. The prevailing rates among Postal Union countries are: 5 cents per  $\frac{1}{2}$  ounce and under for letters, 2 cents for postal cards, and 1 cent per 2 ounces for newspapers, books, &c. The registration fee is 5 cents.\*

1128. The development of the country has required, and will require, for some years continued development of postal facilities. From Cape Breton Island across the widest part of the continent to Vancouver Island is a long distance, and from York Factory, on Hudson Bay, to Pelee Island, in Lake Erie, is 10 degrees of north latitude. Yet over distances so enormous for the most part sparsely peopled, the postal department has to transport letters for three cents an ounce. If transportation were as easy, or letters as frequent, over great stretches of prairie or mountain as they are in the western peninsula of Ontario, the postal revenues would no doubt closely approximate to the expenditures.

The postal administrators in the United States find similar obstacles confronting them. In only ten of the States are the postal revenues in excess of the expenditure. In all the Pacific States, all the Southern States and all but two of the Western States the receipts are behind the cost of carrying the mails.

In the year ended 30th June, 1895, it cost \$800,857 more to do the work than the department received for doing it.

The total expenditure by cheque last year was \$3,593,647 and the total net revenue was \$2,792,790, although the actual revenue, before percentages to postmasters, discounts for stamps and other deductions were made, was \$3,815,456.

The following sums were expended for carrying mails:—

	1894.	1895.
By Rail .....	\$1,215,728	\$1,241,115
Land .....	820,369	844,118
Steamers .....	77,235	79,356

The development of the business in the last ten years is as follows:—

	1885.	1895.
	\$	\$
Number of post offices in Canada .....	7,084	8,831
" miles of post route .....	50,461	65,321
" letters sent by post .....	68,400	167,565,000
" miles of railway over which mails are carried .....	9,858	11,425
Revenue .....	2,400,002	3,815,456
Savings Bank deposits .....	7,098,459	7,448,025
Post cards sent .....	11,800,000	24,025,000
Value of money orders issued .....	10,384,211	13,187,322

1129. By provinces, the (1) miles of annual travel on the post routes, the (2) number of transient newspapers and periodicals, books, circulars, samples

\* *Almanach de Götta*, 1895.

patterns, &c., the (3) number of packets of printers' copy, photographs, deeds, insurance policies, the (4) number of packets of fifth class matter, ordinary merchandise open to examination, and the (5) number of parcels by parcel post are as follows:—

PROVINCES.	1.	2.	3.	4.	5.
Ontario .....	20,274	15,000,000	1,120,000	590,000	210,800
Quebec .....	12,637	4,300,000	425,000	170,000	61,500
Nova Scotia .....	8,949	840,000	100,000	65,000	25,200
New Brunswick .....	5,680	760,000	80,000	44,000	16,100
Prince Edward Island.....	1,401	190,000	13,000	6,000	3,160
British Columbia.....	6,640	400,000	70,000	27,000	13,200
Manitoba and North-west Territories.....	9,744	1,180,000	100,000	43,000	27,800
Total.....	65,325	22,730,000	1,908,000	945,000	357,760

1130. The department has postal contracts with 48 railways, whose combined length is 14,463 miles, being an increase of 293 miles in the year. It uses 157 postal cars, of which 53 are on the Grand Trunk, 50 on the Canadian Pacific and 18 on the Intercolonial. The daily distance travelled is 30,436 miles, an increase of 1,180 miles a day. The total distance travelled in 1895 was 14,836,735 miles.

1131. The mail service of Canada has assumed such dimensions that a considerable increase can be afforded in postal facilities without any great addition to the cost. As evidence of this, attention is called to the fact that in opening 168 post offices in 1895, the new mail routes necessary aggregate only 1,253 miles, or an average of less than eight miles for each office.

1132. The correspondence passing between Canada and Japan and China shows satisfactory increase. The letters carried between Vancouver and Yokohama, Hong Kong, Shanghai, Tokio and Amoy numbered 179,993 in 1895 against 163,314 in 1894, the newspapers numbered 77,488 against 50,890, parcels 652 pounds against 442, and miscellaneous matter numbered 61,049 against 43,178.

In addition to the above, through bags were forwarded as follows: Yokohama, 1,123; Hong Kong, 160; Shanghai, 156; Tokio, 499; Kobe, 127; Hakodate, 53; Nagasaki, 70.

With Australian colonies the mail communication resulted in the transmission of 148,729 letters, 313,525 newspapers, 206,916 books and samples; 56,219 of the letters and 91,217 of the newspapers reached or left Sydney, Melbourne coming next with 32,212 letters and 64,526 newspapers.

A direct mail service between Canada and the West Indian Islands was established in January, 1890, the steamers being subsidized by the Canadian Government. The number of letters carried for year ended 30th November, 1895, was 9,499; of books, papers, &c., 5,117, and of parcels, &c., 149.

1133. The following table gives the number of post offices in the Dominion, and the estimated number, and number per head, of letters and post cards sent in each year, from 1st July, 1868, to 30th June, 1895 :—

NUMBER OF POST OFFICES IN CANADA, AND ESTIMATED NUMBER AND NUMBER PER HEAD, OF LETTERS AND POST CARDS SENT, 1868 TO 1895.

YEAR ENDED 30TH JUNE	Number of Post Offices.	ESTIMATED NUMBER SENT.				Number of Letters per Head.
		Registered Letters.	Free Letters.	Total Letters Posted.	Post Cards.

\* Including post cards.

1134. During the past year 168 new offices were opened, and the total number of offices is now considerably more than double the number at Confederation, there having been an increase of 5,194. As compared with 1894, there was a decrease of 5,194 in the number of registered letters and of 484,500 in that of free letters, and an increase of 420,000 in the total number of letters sent. Considering that the privilege of free postage was taken away from members of the Dominion Civil Service early in 1892, the increase in the number of free letters is surprising. The decrease in the number of registered letters is due, no doubt, to the increased registration fee. The increase in the total number of letters sent was considerably less than in the previous year, but too much importance must not be attached to fluctuations in these figures, for, as the total number is derived from an average struck four times a year, it may well be that the circumstances prevailing at the times of enumeration have a tendency to abnormally increase

or diminish the figures then obtained. The total number sent was nearly six times the number sent in the first year of Confederation; while the number of letters per head of estimated population is now almost four times what it was in 1868. Post cards, which were first issued in 1871, have now reached the large total of 24,025,000, the increase over 1894 being 330,000, as compared with an increase of 905,000 in 1894 over 1893.

1135. The next table gives the number of newspapers, books, periodicals and parcels sent during the same period:—

NEWSPAPERS, PERIODICALS, BOOKS, CIRCULARS, PARCELS, &c.,  
1868 TO 1895.

YEAR ENDED 30TH JUNE.	Newspapers and Periodicals posted otherwise than from Office of Publication.	Newspapers and Periodicals posted from Office of Publication.	Books, Circulars, Samples, Patterns, &c.	Parcels, Domestic and Foreign.	Total.	Number per Head.
1868.	18,860,000			24,800	18,884,800	5.60
1869.	18,700,000			38,720	18,738,720	5.49
1870.	20,150,000			51,344	20,201,344	5.85
1871.	22,250,000			64,160	22,314,160	6.34
1872.	24,400,000			95,200	24,495,200	6.78
1873.	25,480,000			112,300	25,592,300	6.98
1874.	29,000,000			102,800	29,102,800	7.61

\* Including books, circulars, samples, patterns, &c.

† Packages of printers' copy, photographs, deeds, insurance policies, packets of merchandise, &c.

1136. In the figures in the first column for the years 1868 to 1877, inclusive, are included all newspapers and periodicals sent by mail, whether from the office of publication or otherwise. In 1877 a change was made in the regulations, and all newspapers, periodicals, &c., sent from the office of

publication were carried at the rate of 1 cent per pound, and the number carried has, since that date, been estimated in the above table at nine newspapers to one pound. By an Act that came into operation on the 1st June, 1882, all such newspapers were entirely exempted from postage and have since been carried free of charge, and as no attempt is now made to ascertain the number so carried, the figures given for the years 1883 to 1885, inclusive, can only be considered as an approximate estimate, and the probability is that they are below the mark. The rearrangement of the returns of periodicals, books, &c., furnished by the Post Office Department unfortunately prevents any comparison with former years.

In proportion to land area, the post offices are distributed as follow:—

Prince Edward Island.....	1 post office to	6 sq. miles.
Nova Scotia.....	1 "	13 "
New Brunswick.....	1 "	23 "
Ontario.....	1 "	70 "
Quebec.....	1 "	142 "
Manitoba.....	1 "	178 "
British Columbia.....	1 "	1,553 "
The Territories.....	1 "	6,876 "

1137. The number of letters and post cards sent in the several provinces during the last eight years, as estimated in the official reports, is given in the following table:—

ESTIMATED NUMBER OF LETTERS AND POST CARDS, BY PROVINCES  
1888 TO 1895.

PROVINCES.	Year ended 30th June.	Number of Post Offices.	ESTIMATED NUMBER SENT.				
			Registered Letters.	Free Letters.	Total Letters Posted.	Post Cards.	No. of Letters per Head.
Ontario.....	1888	2,927	2,050,000	2,600,000	43,500,000	11,000,000	21.13
	1889	2,971	2,084,000	2,908,000	49,887,000	12,671,000	23.70

	1891	167	82,000	72,000	2,450,000	175,000	24.52
	1892	187	95,000	88,000	3,100,000	225,000	28.97
	1893	219	110,000	110,000	3,400,000	275,000	29.67
	1894	229	105,000	115,000	3,550,000	330,000	28.92
	1895	246	105,000	115,000	3,580,000	355,000	27.24
Manitoba & North-West Territories.	1888	484	272,000	127,000	4,500,000	460,000	20.83
	1889	501	295,000	149,000	5,210,000	520,000	22.83
	1890	523	245,000	157,000	5,400,000	530,000	22.38
	1891	571	280,000	150,000	5,900,000	660,000	23.13
	1892	612	278,000	180,000	6,800,000	720,000	25.20
	1893	646	290,000	178,000	7,600,000	870,000	26.61
	1894	692	294,000	185,000	7,900,000	945,000	26.12
	1895	729	280,000	190,000	8,000,000	965,000	24.98

There was an increase in the number of letters per head in the provinces of Nova Scotia and New Brunswick, and a decrease in Ontario, Quebec, British Columbia, Manitoba and the Territories; but the figures being only based on averages cannot be considered as anything but approximate, and are, probably, generally under the mark, as the present system of estimation is not calculated to do full justice to the correspondence of the year. British Columbia and Ontario have the largest correspondence in proportion to population, Manitoba and the Territories coming next, while the proportion is lowest in Prince Edward Island and Quebec.

1138. The following table gives the gross postal revenue and expenditure for every year since Confederation, and the proportion each year per head of population :—

POSTAL REVENUE AND EXPENDITURE OF CANADA FROM 1868 TO 1895

YEAR ENDED 30TH JUNE.	Revenue.	Expenditure.	Expenditure in excess of Revenue.	AMOUNT PER HEAD.	
				Revenue.	Expenditure.
	\$	\$	\$	\$ cts.	\$ cts.

1888.....	2,751,139	3,533,397	782,258	0 59	0 75
1889.....	2,984,222	3,746,040	761,817	0 63	0 75
1890.....	3,223,615	3,940,696	717,081	0 67	0 82
1891.....	3,374,888	4,020,740	645,852	0 70	0 83
1892.....	3,542,611	4,205,985	663,374	0 72	0 86
1893.....	3,696,062	4,343,758	647,696	0 74	0 88
1894.....	3,734,418	4,442,339	707,921	0 74	0 88
1895.....	3,815,456	4,616,313	800,857	0 75	0 91

The expenditure has exceeded the revenue continuously during the last twenty-eight years, but the excess of expenditure has been decreasing during recent years, with the exception of 1894 and 1895, when there was an increase of \$60,225 and \$92,936 respectively. The revenue, which has been steadily increasing for several years showed a further increase of \$81,038. It is estimated that the annual loss through the free transmission of newspapers cannot be less than \$100,000. Making certain deductions from revenue the net revenue for 1895 shows a decrease of \$16,551 over that of 1894.

1139. The number of stamps, post bands, letter cards, post cards, &c., issued to postmasters during the year was 164,186,900, as compared with 160,796,100 in 1894, being an increase of 3,390,800, and almost the whole postal revenue is derived from this source, the amount received from the sale of stamps, post cards, letter cards, &c., in 1895 having been \$3,625,874.

he sum of \$16,154 was paid during the year in money on letters delivered. Its letter boxes and drawers produced \$27,698. Postage on parcels in the United Kingdom, Jamaica and Barbados paid in during the fiscal year 1895 amounted to \$12,757, commissions received on money orders sent to \$107,085, and profit on exchange on money order business in other countries to \$1,815. Against this revenue there were deducted salaries and allowances and compensation to postmasters on money order business, \$905,369; discount to stamp vendors, \$17,325; balance of commission paid to other countries on money order business, \$2,275; losses by theft and burglaries, \$3,278, and other items, making in all deductions of \$22,666, and leaving the net revenue \$2,792,790.

1140. The following comparative statement shows not only the extended operations but also the increased efficiency of the service since 1868, inasmuch as a much larger quantity of mail matter is carried at the same expense:—

POSTAL OPERATIONS IN CANADA COMPARED, 1868 WITH 1895.

Year.	Number of Officers.	Number of Money Order Offices.	Miles of Post Route.	Miles Travelled.	Amount paid for conveyance of Mails.	Number of Letters, &c.	Number of Newspapers, &c.	Total Cost per Head.
					\$			¢ cts.
1868.	3,638	515	27,674	10,622,216	543,109	18,100,000	18,884,800	0 31
1895.	8,832	1,261	65,325	30,351,115	2,189,731	131,590,090	96,176,206	0 91

1141. In 1868 the conveyance of mails over 10,622,216 miles cost per mile  $5\frac{1}{10}$  cents, and the transmission of 36,984,800 letters, newspapers, &c., cost  $1\frac{1}{10}$  cents apiece; in 1895 the conveyance of mails over 30,351,115 miles cost  $7\frac{2}{10}$  cents per mile, and the transmission of 227,766,206 letters, newspapers, &c.,  $\frac{9}{10}$  of 1 cent apiece, so that there is a decrease in the cost of each article carried of about  $\frac{1}{2}$  of 1 cent, and it must not be overlooked that if newspapers were carried now at the old rate of 1 cent apiece, a sum of probably not less than \$100,000 would be added to the revenue each year.

The system of free delivery of letters by carriers in the principal cities was commenced in 1875, and it was estimated that the total number of letters delivered in this manner in 1895 was: letters and post cards 38,088,749; newspapers 13,734,474. The number of carriers employed was 398. There was an increase in the number of letters and post cards of 591,864, and a decrease in the number of newspapers of 327,759.

owing to a change in the system of keeping accounts, it is no longer possible to give the postal revenue and expenditure by provinces.

1142. The following are statements of the number of registered letters in each year since 1868, with particulars of their disposal since 1879:—

## REGISTERED LETTERS IN CANADA, 1868 TO 1895.

YEAR.	Estimated Number of Registered Letters.	Number per Head.	Failed to Reach Destination.	Sent to Dead Letter Office.	HOW DISPOSED OF.			
					Delivered to Addressee.	Returned to Writers or Offices of origin.	Remaining in Office or with Postmaster for delivery.	Failed to conform to value
1868.....	704,700	0.21	58					
1869.....	805,000	0.24	41					
1870.....	1,000,000	0.29	50

1883.....	2,650,000	0.60	148	10,706	1,004	9,125	146	42
1884.....	3,000,000	0.67	105	12,948	4,025	8,192	230	51
1885.....	3,060,000	0.67	229	16,340	4,277	11,072	246	74
1886.....	3,400,000	0.74	160	17,856	2,878	13,063	119	89
1887.....	3,550,000	0.76	166	21,612	4,833	15,525	122	1.13
1888.....	3,580,000	0.76	197	19,618	6,345	11,788	664	87
1889.....	3,649,000	0.77	243	23,091	*	20,933	847	1.51
1890.....	3,280,000	0.68	149	19,994	*	13,171	1,169	3.74
1891.....	3,292,000	0.68	155	11,120	*	9,334	261	1.52
1892.....	3,286,700	0.67	147	24,691	*	13,479	239	10.62
1893.....	3,254,000	0.66	149	13,344	*	11,552	396	1.29
1894.....	3,237,200	0.64	222	13,324	*	11,825	397	1.02
1895.....	3,183,200	0.63	164	28,158	*	15,189	1,339	12.39

\* Included in letters returned to writers or offices of origin.

† This large number is accounted for by the fact that an immense number of *franchise* notices were returned N. C. F. and were refused by the sender and were destroyed.

Of 3,183,200 registered letters estimated to have been sent in 1895, only 164 containing money failed to reach their destination. The contents of 125 were made good by the officials or others held responsible for the loss, 5 were stolen, and in 28 cases no evidence could be obtained to account for discrepancies. There was a decrease in the total number sent, as compared with 1894, of 54,000, and a decrease in the number that miscarried of 58. In every 19,410 letters registered one miscarried, a smaller proportion than in 1894, when it was one in 14,136 letters.

43. The number of letters and other articles sent to the dead letter office in each year, since Confederation, is given below :—

LETTERS, POST CARDS, CIRCULARS, BOOKS, PARCELS, &c., RECEIVED AT THE DEAD LETTER OFFICE IN CANADA DURING THE YEARS 1868 TO 1895.

Total Number.	HOW DISPOSED OF.						
	Returned to other Countries.	Delivered or forwarded to Address	Returned to Writers.	Remain- ing in Office or with Post-master.	Failed of Delivery, contained no value, Destroyed	Returned to printed Address.	Returned to Govern- ment Department.

960,031	134,343	24,973	288,770	8,547	471,850	23,093	8,455

There was a decrease of 76,822 in the number of letters, &c., sent to the dead letter office. The number of letters containing money or other articles of value received at the office during the year was 34,647, and their contents were valued at \$224,038. Of the total number of dead letters 89,122 originated in Canada, and were returned as undelivered from other countries.

144. The following statement shows the general operations of the money order system, year by year, from the 1st July, 1867, to 30th June, 1896. It will be seen that there has been a steady and satisfactory increase. Since Confederation there was an increase in the number of offices from 46 to 1,001; in the number of orders issued of 1,001,889; in the amount of orders issued of \$9,834,441, and in the amount of orders issued in other countries of \$1,965,405.

## OPERATIONS OF THE MONEY ORDER SYSTEM IN CANADA, 1868 TO 1895.

\* No returns available.

There was an increase in the number of orders sent of 39,642, and a decrease in the amount sent of \$58,668. The average value of each order has been still further reduced. In 1868 it was \$37.18; in 1885, \$20.72; in 1886, \$19.32; in 1887, \$17.96; in 1888, \$17.30; in 1889, \$16.72; in 1890, \$15.37; in 1891, \$14.58; in 1892, \$13.94; in 1893, \$13.33; in 1894, \$12.58, and in 1895, \$12.08. It may be argued from this, that as the country progresses, the business and wealthier classes avail themselves of the increase in banking facilities, while the money order system is used principally by the working classes, who keep no banking accounts.

1145. There was an increase of 68 in the number of money order offices in operation. They are distributed among the provinces in the following order:—

Ontario .....	624	Manitoba .....	61
Quebec .....	190	British Columbia.....	50
Nova Scotia.....	170	The Territories.....	41
New Brunswick.....	192	Prince Edward Island.....	15

The revenue from fees, profit on exchange, &c., amounted to \$107,084, but under the new system of keeping the accounts no details of expenditure are available.

Of the total amount of orders issued in Canada \$10,736,647 were payable in Canada and \$2,450,664 were payable in other countries, being an increase of \$249,367 and a decrease of \$308,036 respectively; and of the total transactions with other countries \$2,450,674 were sent out of the country and \$2,055,984 came in.

1146. The next table shows the money order transactions between the Dominion and other countries since Confederation :—

1895..	818,384	487,912	1,443,419	1,352,986	20,306	123,070	168,565	92,016

From the above table it is seen that the principal money order business with other countries is transacted with the United States, the United Kingdom and Newfoundland. Since the year 1876, inclusive, the amount of money sent by this system to the United Kingdom has exceeded the

amount payable in Canada by \$8,715,860; during the same period the amount sent to the States has exceeded the amount received by \$1,693,953, while the amount received from Newfoundland has exceeded that sent to the island by \$897,620. With the exception of Newfoundland, it will be seen that more money is sent from this to other countries than is received.

1147. The growth of the business done through this channel is seen in the following statements of the average amounts, by five-year periods:—

TOTAL MONEY ORDERS ISSUED IN CANADA AND PAYABLE IN CANADA.

	Great Britain.	United States.	Newfoundland.	Other Countries.
	\$	\$	\$	\$

1148. The contract with the Montreal Ocean Steamship Company (Allan line) for the carriage of mails across the Atlantic expired in April, 1891. An agreement for the season of navigation was afterwards made, and in December another contract with the Allan line was made for the resumption of the direct service, it being stipulated that only the very best boats of the Allan and Dominion lines should carry the mails. One or two of the steamers have made fairly quick passages, notably the "Parisian" of the Allan line, and the "Vancouver" and "Labrador" of the Dominion line, but the service is considerably slower than that between New York and Liverpool. The contract that expired in December, 1894, has again been renewed for another year. The efforts of the Dominion Government to establish a direct fast service between England and Canada have not yet been successful. The Allan line boats have carried the mails almost continuously since May, 1856.

1149. The following table gives the numbers and number per head of letters and post cards sent in the principal countries of the world. The figures have been taken from the best available sources, and the calculations have been made in this office. The extraordinary quantity of mail matter sent in the Australasian colonies is very remarkable. The system adopted in Canada does not do justice to the correspondence of the country, as no notice whatever is taken of the large number of letters which come from foreign countries.

\* 1893. † Including telegraph offices. ‡ Including all kinds of mail matter. § Book post included. ¶ Not including internal communications.

## TELEGRAPHS.

1150. The principal telegraph lines in Canada are in private hands, and the Government only own and operate those lines which have been built by them in furtherance of the public service, between places where the traffic could not be expected to be sufficient to compensate private outlay, but where public interests require that there shall be communication, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces and British Columbia, and also for the advancement of settlement in the North-west Territories. Since the establishment of the telegraph service in the Gulf of St. Lawrence and along the Atlantic coast, the reduction in marine insurance premiums has been 50 per cent.

1151. There were 1,259 miles of land lines and 227 miles of cable along the St. Lawrence and eastern coast, 698 miles of land lines in the Territories and 505 miles of land lines in British Columbia. The principal cable lines on the eastern coast are in connection with the Island of Anticosti and the Magdalen Islands; and in British Columbia, across the Straits of Georgia, and between Vancouver Island and Washington Territory.

The following table gives the length of the various lines owned by the Government on 30th June, 1895:—

Totals		2,486 $\frac{1}{2}$	*238	2,724 $\frac{1}{2}$

\* Knots changed into statute miles in total.

1152. In addition to the above lines, the Government have built or subsidized the following lines: From Canso to Halifax, 208 miles, maintained and operated by the Western Union Telegraph Company; south shore of St. Lawrence, Grand Métis to Gaspé Basin, 206 miles, operated by the Great North-western Telegraph Company, and the Bath-Amherst Island line, 8 miles, operated by the North American Telegraph Company. They have also built and transferred the following cables: Nova Scotia, 1 $\frac{1}{2}$  miles; Ontario, 2 $\frac{1}{2}$  miles; British Columbia, 42 miles (sold to Canadian Pacific Railway); making in all a total of 3,176 $\frac{1}{2}$  miles built or subsidized by Government.

The Government lines are used by the Government for purposes connected with quarantine, with the fisheries and the fisheries protection service. Daily reports are sent from the 55 stations in connection with the fisheries of the several eastern provinces to one central station. The movements of the fish are charted and the commander of the Fisheries Protection services is thereby enabled to keep track of the fish and dispose of his cruisers in the most effective way. The cables are also of great service to the fishermen, enabling them to ascertain without loss of time the position of the "schools" of fish.

on to the above the Anglo-American Cable Company operate the Prince Edward Island system, and have 385 miles of poles, 403 miles of cable and 32 offices. This system includes  $1\frac{1}{2}$  miles of cable across the St. Lawrence River, and 12 miles of heavy cable between Prince Edward Island and New Brunswick.

Messages are not included in the number sent by the Canadian Pacific Railway Company, particulars not being available. There is now communication by the Canadian Pacific Railway system between Montreal, S., and Victoria, B.C.

The ordinary rate for messages to places in Canada is 25 cents for ten words, not including names and addresses not charged for; to Halifax, and British Columbia rates vary from 30 cents to \$1 for ten words. In the United States the rate is from 40 cents per ten words upwards, according to distance. The rate to the United Kingdom is 25 cents per

The total length of telegraph lines in the world is 601,142 miles of land and 153,649 nautical miles of cable; the length of telegraph wire is 1,000,000 miles. The United States possesses the greatest individual mileage, the length in that country being 210,000 miles, open for 189,714 miles belong to the Western Union Telegraph Company, the wire mileage of the company being 802,651 miles. The number of messages, however, sent by this company was only 58,307,315, compared with 71,589,064 messages sent in the United Kingdom over the same length of line. The total messages despatched chiefly within the area of the telegraphic Union in 1895 are estimated at 378 millions.

The following table shows that only eight countries in the world have a greater telegraphic mileage than Canada, and that with the exception of the Australasian colonies no other country possesses the same telegraphic mileage. Canada has one telegraph office to every 1,988 persons. The telegraphic mileage in the colonies vary from New South Wales with one telegraph office to every 1,522 persons to Tasmania with telegraph facilities such as one telegraph office for every 719 persons. On this continent, Canada is the United States with one office for the telegraphic Union for each group of 3,266 persons. Switzerland stands close to Canada, having 857 persons for each office. The German Empire has one office for each 2,483 persons. Great Britain has 3,621 persons for each office and Great Britain has 4,051 persons for each office. The proposal to build a telegraph line across the continent from Montreal to the Pacific Ocean was made to the Imperial Government and was recommended by the Governor General in the speech at the opening of the 2nd session of the 13th Parliament. It was not entertained by the Legislature of Canada, because it was thought a post road ought to be built simultaneously.

## TELEGRAPHS IN THE PRINCIPAL COUNTRIES OF THE WORLD

COUNTRIES.	Miles of Line.	Miles of Wire.	Number of Messages.	Number of Offices.	Number of Persons employed.

\*Cable lines only. \*Western Union Co. only.

telegraph lines are usually owned by governments, the companies. The United States own no tele-

so far as the public is concerned. In the British colonies the telegraph, as a rule, under Government control. In 1895 the Government controlled 44,648 miles of line and 138,256 miles of wire, exclusive of the Indo-European section; handled 4,391,226 messages. At the Cape of Good Hope the telegraphs were built at the expense of the Government.

In South Wales \$4,000,000 have been borrowed to construct the lines of wire operated by the state, the net return of which was last year 1 per cent of the cost of construction. In New Zealand the telegraph is entirely in the hands of the state, as it is in Queensland. Canada excepted to most of the British colonies, the telegraph lines being in the hands of companies, only 2,700 miles out of 28,815 miles belonging to the Government.

In Europe the Government control is almost complete. In Great Britain, there were 220,975 miles of wire, of which 27,880 were private. In Hungary, Belgium, France, Germany, Greece, Italy, Portugal, Norway and Switzerland the state owns the lines, excepting those belonging to railways. Denmark owns 2,810 out of 3,674 miles. Russia owns 367 miles, or about nineteen-twentieths of the total length in the country.

In Japan, Government control prevails. In Persia the Government owns about 3,400 miles of wire, and the Indo-European Company operates the others. Brazil controls her lines. In the Argentine Republic, in 1890, the 20,415 miles 11,250 were national; 1,115 miles of land lines and 8,050 submarine belonged to cable companies. In Chili, in 1892, of 10,000 miles 8,000 belonged to the state.

Telegraphy was the first interest to bring the Governments of the world together to form a union—the first subject on which they sought a mutual understanding and formed a code of regulations, which each of them has adopted and which all of them have kept. The International Telegraphic Union was founded in Paris, in May, 1865, France calling a convention of European states with a view to put an end to the annoyances, delays and exorbitant charges experienced for want of concerted action. The Paris Convention was followed by those at St. Petersburg, in July, 1875, at London, in 1879, at Berlin, 1885, and again at Paris, 1890. Twenty states responded to the call in 1865. There were over 100 delegates present at the Convention of 1890, and at present thirty-eight different nations and thirteen companies are subscribers to the constitution. Thirteen other companies follow the rules of the union, though not regular members, and several others are indirectly connected with it. The central office of the International Telegraph Bureau is at Berne, Switzerland. To Berne all modifications of the tariff, all interruptions of routes, all extensions and changes on each line in the union, to be sent to all the lines by wire if of immediate importance, by circular if less urgent.

The first submarine cable was laid in 1851, between Dover and Calcutta and was 25 miles in length. In 1852, 10 miles of cable were laid between New Brunswick and Prince Edward Island, being the first laid in America. In 1853 two submarine lines were laid, one between New York and Ostend, the other between Orford and Scheveningen, in the North Sea.

Holland. In 1857 two vessels left Ireland, carrying a length of 2,500 nautical miles of electric cable to connect Valentia, in Ireland, and Trinity Bay in Newfoundland. The cable broke after 380 miles had been paid out. The next year success attended the second effort, and on the 12th August, 1858, Queen Victoria and the President of the United States exchanged greetings by cable messages. On the 1st September, 1858, the first transatlantic cable was rendered useless by a breakage. For a few years little was done in the way of laying submarine cables. Lines were laid between Malta and Alexandria, and between Malta and Tripoli. Lines were also laid in other parts of the Mediterranean Sea and in the Red Sea. The engineers in these experiments perfected their knowledge by the experience gained. In 1865 the "Great Eastern" commenced on the 21st July to lay the second transatlantic cable, but on the 12th August the cable broke. On the 13th July, 1866, the "Great Eastern" started on her second attempt to connect Canada and Great Britain, and on the 10th of August the cable was safely landed on the shores of Newfoundland. From that time the submarine systems increased rapidly. By 1868, 15,830 nautical miles of cable had been laid. In 1870 more than 12,000 miles were put down; in 1871, 7,777 miles, and in 1873, 7,918 miles. Between these dates the immense line connecting Suez with Bombay was established. In 1874 Europe and South America were connected by cable.

1161. In 1875 the various State systems comprised 420 cables of a total length of 4,442 miles, and 5,727 miles of wire. Of this total British India had the largest share, viz.: 1,781 miles, distributed among 8 lines. France had 673 miles; Great Britain, 283; Norway, 233; Italy, 218; Germany, 149; Turkey, 143; Denmark, 101; Japan, 71; the Netherlands, 56; Russia, 62; Sweden, 22; New Zealand, 20, and Greece, 3½ miles.

1162. While the various State systems comprised, as above stated, 420 cables in 1875, private companies owned a much larger extent of submarine cables. In 1875 they had 59,547 miles of cable and 65,535 miles of wire. The Eastern Cable Company, undertaking the business between England and Spain, the service of the Archipelago and the line between Aden and Bombay, owned 39 cables, aggregating 14,502 miles in length. The Anglo-American, owning the Valentia-Newfoundland line and that joining Brazil to the United States, had 17 cables and a length of 12,315 miles.

Since 1875 the oceans have been net-worked with submarine cables. In 1879, 10,550 miles were laid; in 1883, 2,584; in 1884, 13,671; in 1885, 4,382 miles, and from 1886 to 1888, 5,893 miles.

1163. In 1889 the actual situation as regards the extent of submarine telegraph was:—

Total.....	113,084 nautical miles (4).
Of which single wires.....	110,518 " "
And several wires.....	

Of this total length, 10,500 miles were owned by the governments of various countries.

France, which in 1875 had 673 miles, had in 1889 .....	3,197
British India had in 1889 .....	1,873
Italy .....	960
Great Britain .....	877
Germany .....	468
Greece .....	457
Turkey .....	331
Russia .....	272
Norway .....	220
New Zealand .....	197
Denmark .....	124

The other countries show but little variation. Spain had gone into the business on a small scale, and in 1889 had 128 miles of cable.

Cochin China, which had no cable in 1875, possessed 810 miles in 1889. Canada in 1889 had 200 miles.

1164. The company lines increased greatly between 1875 and 1889 :—

Eastern Telegraph Co. increased to .....	18,838 miles.
Eastern extension, Australia and China .....	12,035 "
Anglo-American .....	10,438 "
Great Northern .....	6,108 "
Brazilian Submarine .....	7,326 "
West India and Panama .....	4,119 "
Western and Brazilian .....	3,801 "
Direct United States cable .....	2,980 "
West coast of America .....	1,699 "
Commercial Cable .....	6,937 "
Western Union .....	5,537 "
Eastern and South African .....	4,554 "
Compagnie Française du Télégraphe de Paris à New York ..	3,409 "
Central and South American .....	3,178 "
West African .....	2,825 "
African direct .....	2,739 "
Spanish National Submarine .....	1,173 "

1165. Taking account of all the cables under water, including those useless by reason of breakages, &c., in 1889, a total length of 125,000 miles of cable had been laid. Since then cables have been laid in different parts of Africa; from Halifax to Bermuda, and from Nova Scotia to Ireland (1894).

1166. According to the latest published statistical returns, the submarine telegraph system comprises 1,170 lines, extending over 153,649 nautical miles. Of this total the various governmental administrations own nearly 900 cables, with 16,171 nautical miles of length.

France owns 4,053 miles; Germany, 1761 miles; the United Kingdom 1,759 miles; India, 1971 miles. The remaining mileage, 137,478 miles, is in the hands of 27 private companies, the three largest of which are the Eastern Telegraph Co. (26,028 miles), the Eastern Extension, Australian and Chinese Telegraph Co. (16,132), and the Anglo-American Telegraph Co. (10,400).

1167. The name of Canada has been honourably associated with submarine telegraphy. As already stated, the first submarine cable was laid between Dover and Calais in 1851. In 1852 the first cable laid on the North American Continent was laid from Prince Edward Island to New Brunswick, and the second, in 1856, from Cape Breton Island to Newfoundland, 85 miles in length.

1168. In 1880 the Canadian Government entered upon a system of cable communication designed to connect fishing islands in the Gulf of St. Lawrence and the Bay of Fundy with the mainland, for the purpose of giving speedy information of the weather, of the strike in of fish, and of notifying the quarantine officers of the arrival of steamers, &c. Since that date the Government have established 21 cables, with a total length of 207 nautical miles. In addition, they have built and transferred by sale or lease 444 miles, making in all 272 miles of cable in Canada. One of these cables is in Lake Ontario.

1169. Anticosti Island and the Magdalen Islands, in the Gulf of St. Lawrence, are connected with the mainland at different points. Ports and places along the north shore of the St. Lawrence River are connected by cable, and some of the outlying islands off the Nova Scotian coast are connected with the mainland. The Canadian Pacific Railway Company owns 42 miles of submarine cable in British Columbia.

1170. The telephone system in Ontario, Quebec and Manitoba is largely under the control of the Bell Telephone Company of Montreal. In the other provinces a number of companies have undertaken to supply the public needs.

The returns received show that there were connected with the several systems 44,000 miles of wire and 33,500 instruments, and that 72,500,000 messages were sent in 1893. The returns for 1895 do not vary greatly from those of 1893.

The first experimental telephone erected in Canada was from the residence of Professor Grahame Bell's father, in Brantford, Ontario, to the residence of the Rev. T. Henderson, also of Brantford. The first commercial line was established at Hamilton, Ontario, in October, 1877. In the same year Edison opened up correspondence with parties in Montreal, but he admitted Bell's claim to priority. Canada is the birth-place of the telephone.

## CHAPTER XVII.

Values in Currency.—Consolidated Fund.—Sources of Revenue.—Revenue and Expenditure.—Consolidated Fund Receipts and Payments.—Surplus Revenue.—Provincial Subsidies.—Railway Subsidies.—Loans to Railways.—Land Subsidies.—Payments on Capital Account.—Revenue and Expenditure since Confederation.—Revenue and Expenditure per Head.—Provincial Revenues and Expenditures.—Revenues and Expenditures in British Empire.—Revenues and Expenditures in Foreign Countries.—Sources of Revenue.—Taxation.—Customs and Excise Receipts.—Customs Duties per Head in other Countries.—Cost of Collection.—Heads of Taxation.—Excise Duties.—Taxation in British Empire.—Taxation in Foreign Countries.—Public Debt.—Assets and Liabilities.—Assumption of Provincial Debts.—Expenditure on Canals and Railways.—On Capital Account.—On Public works from Revenue.—On Parliament Buildings.—Assets.—Interest on Debts and Assets.—Dominion Notes.—Debt, Assets and Interest per Head.—The Debt for Improvements.—Loans since Confederation.—Loan of 1892.—Debt in British Empire.—Debts of Foreign Countries.—Superannuation.—Gratuities.—Superannuation Payments in 1893.—Pensions.—British Investments in Colonies.—Provincial Public Debts.—Debts and Assets of Provinces.—Finances of Cities and Towns.

1171. The fiscal year for the Federal Government ends on the 30th June. Unless otherwise stated, this is the year referred to throughout the Year-Book.

1172. In all cases where figures relating to foreign countries have been used, their values have been first changed into pounds sterling, and then converted into currency at the rate of \$4.86·66. For the sake of convenience, cents have been omitted from most of the tables and only used with reference to amounts per head and similar calculations.

1173. The receipts from the sources of the ordinary revenue of the country are paid into what is called the Consolidated Fund, and payments therefrom are made to cover the ordinary expenses. These receipts and payments, therefore, constitute what may be considered the regular income and expenditure of the country, receipts from and expenditures out of loans and all other extraordinary transactions being excluded.

1174. The ordinary revenue is derived from a variety of sources, which may, however, be divided into two classes, viz., "Taxation" and "Other Sources." The amounts raised by taxation consist solely of customs and excise duties; those raised from other sources consist of money derived from the postal service, railways, public works, &c. The ordinary expenditure provides for the charges for debt and provincial subsidies, collection of revenue, and the current expenses of the country.

1175. The following figures give the ordinary revenue and expenditure for the year ended 30th June, 1895 :—

Revenue .....	\$ 33,978,129
Expenditure .....	38,132,005
Expenditure in excess of revenue.....	\$ 4,153,876

The revenue was \$2,396,564 less than that of the preceding year, while the expenditure showed an increase of \$546,979. The Customs duties during 1895 show a decrease of \$1,557,648, and the Excise duties a decrease of \$575,356, making a total decrease of \$2,133,004.

1176. The following table gives the receipts and payments on account of the Consolidated Fund—that is the ordinary revenue and expenditure of the country—for the last 28 years, and shows the surplus or deficiency in each year :—

RECEIPTS AND PAYMENTS ON ACCOUNT OF THE CONSOLIDATED FUND (ORDINARY REVENUE AND EXPENDITURE), 1868 TO 1895.

YEAR ENDED 30TH JUNE.	CONSOLIDATED FUND.		Revenue in Excess of Expenditure.	Expenditure in Excess of Revenue.
	Revenue.	Expenditure.		
	\$	\$	\$	\$

1890.....	39,879,925	35,994,031	3,885,894	
1891.....	38,579,311	36,343,568	2,235,743	
1892.....	36,921,872	36,765,894	155,978	
1893.....	38,168,609	36,814,053	1,354,556	
1894.....	36,374,693	37,585,026		1,210,333
1895.....	33,978,129	38,132,005		4,153,876

In eighteen years out of the twenty-eight that have elapsed since Confederation there has been a surplus of revenue, and in the remaining ten years of expenditure. The total amount of surplus during the period \$39,873,069, and of deficit, \$22,219,057, showing a net excess of

revenue over expenditure of \$17,654,012. The revenue in 1895 was \$20,290,201 in excess of that of 1868, the first year after Confederation, being an increase of nearly 148 per cent. It will be seen that the expenditure in 1895 shows an increase of \$546,979 over 1894, while it exceeds that of 1868 by \$24,645,913, being an increase of 183 per cent. Taking the first and the latest years, the revenue and the expenditure have increased in about the same proportion.

1177. The following is a detailed comparative statement of the various receipts on account of the Consolidated Fund from all sources in the years 1894 and 1895, showing the increase and decrease in each item:—

## HEADS OF REVENUE—CONSOLIDATED FUND—1894 AND 1895.

HEADS OF REVENUE.	AMOUNTS RECEIVED.		Increase.	Decrease.

Total Expenditure on account of Con- solidated Fund.....	37,585,026	38,132,005	546,979	

NOTE.—The items of exceptional expenditure are printed in italics. Though the Census expenditure is periodical, for the purpose of comparison it is treated as exceptional.

1179. The net decrease in the revenue was \$2,396,564. Of that the sum of \$2,133,004 was due to decrease in receipts from Customs and Excise, leaving \$263,560 as the net decrease in the other items.

The net increase in the expenditure was \$546,979; of that the sum of \$510,204 was due to increase in charges for Debt and Subsidies to Provinces and Legislation, leaving \$36,775 as the net increase.

1180. The cost of collecting the revenue was greater in proportion to the amount collected in 1895 than in the previous year, being 26.9 per cent, as compared with 25.1 per cent in 1894. It was more than in 1893 by 3.4 per cent.

1181. The accounts of payments of subsidies to provinces show an increase of \$44,019. The details are as under:—

PROVINCES.	1894.	1895.
	\$	\$
Ontario .....	1,339,287	1,339,287
Quebec .....	1,086,714	1,086,714
Nova Scotia .....	432,814	432,813
New Brunswick .....	483,570	483,567
Manitoba .....	437,601	482,593
British Columbia .....	243,585	242,689
Prince Edward Island .....	183,084	183,011
Total .....	4,206,655	4,250,674

1182. There was an increase of \$80,664 in the amount of subsidies paid to railways under parliamentary authorization; as compared with 1894 the details are:—

Atlantic & North-western Railway .....	\$186,600
Canada Eastern Railway .....	30,400
Canadian Pacific Railway .....	28,000
Drummond County Railway .....	92,096
Dominion Coal Co's. Railway .....	32,000
Irondale, Bancroft & Ottawa Railway .....	32,000
Grand Trunk, Georgian Bay & Lake Erie Railway .....	39,744
Great Northern Railway .....	32,000
Lake Temiscamingue Colonization Railway .....	233,199
Lotbinière & Megantic Railway .....	38,400
Montford Colonization Railway .....	35,200
Wakusp Slocan Railway .....	117,760
Ottawa, Arnprior & Parry Sound Railway .....	249,280
Parry Sound Colonization Railway .....	68,780
Philipsburg Junction Railway & Quarry Company .....	2,912
Quebec, Montmorency and Charlevoix Railway .....	30,400
Shuswap & Kanagan Railway .....	300
United Counties Railway .....	42,728
Pontiac & Pacific Junction Railway .....	18,750
Total, 1895 .....	\$1,310,549
" 1894 .....	1,229,885

1183. The total amount of subsidies, on the mileage system, voted by Parliament towards the construction of railways that have been placed

under contract, and of which payments have been made or liabilities still exist, was, on the 30th June, 1895 (exclusive of the Canadian Pacific Railway), \$15,132,552, of which sum \$12,806,831 had been paid and \$432,399 cancelled, not being wanted, leaving a balance still due on contracts of \$2,325,721.

1184. There were on the same date forty-five railways for which subsidies amounting to \$3,815,800 had been voted, but to which no payments had been made, as none of the proposed railways had been placed under contract. In addition to the above, subsidies payable by instalments for a period of years, amounting to \$3,982,680, have been voted, but so far only \$1,119,600 has been paid. The sum of \$2,394,000 was voted to the Montreal & Ottawa road, on which sum interest amounting to \$1,256,850 has been paid. The estimated number of miles covered by the above transactions was 5,720. The cash subsidy paid to the Canadian Pacific Railway, including the Canada Central and extension to Quebec and Revelstoke extension, was \$28,053,250.

1185. The Government, therefore, has paid, or promised to pay, money subsidies to railways as follows:—

## GOVERNMENT RAILWAY AID.

SUBSIDIES.	Voted.	Paid.
	\$	\$
Subsidies to railways under contract.....	15,132,552	12,806,831
“ “ not yet under contract.....	3,815,800	—
“ Canadian Pacific Railway.....	25,000,000	25,000,000
“ Canadian Pacific Railway extension to Quebec.....	1,500,000	1,500,000
“ Canada Central.....	1,525,250	1,525,250
“ Revelstoke extension.....	80,000	28,000
“ payable by instalments.....	3,982,680	1,119,600
“ Province of Quebec, North Shore Road.....	2,394,000	1,256,850
Railways subsidized by grant of loans.....	815,000	748,600
“ “ “ rails.....	89,299	—
Total.....	54,334,581	43,985,157

1186. Previous to Confederation, the Government of Nova Scotia had subsidized the Windsor & Annapolis Railway to the extent of \$1,089,674, and the Canadian Government had paid \$2,656 to the Toronto, Grey & Bruce Railway, which amounts were afterwards assumed by the Dominion Government.

1187. The total amount, therefore, paid by way of subsidy or assumed by the Dominion Government, up to the 30th June, 1895, towards the construction of railways, has been:—

Amount paid before Confederation by Provincial Government and subsequently assumed by the Dominion.....	\$ 1,092,330
Loans to the Grand Trunk Railway.....	15,142,631
Subsidies paid by the Dominion Government.....	43,985,157
Total.....	\$ 60,220,118

1192. The public revenue of 1895 was estimated at \$33,800,000, which was 78,129 less than the amount actually realized, and the expenditure was estimated at \$38,300,000, being \$167,995 above the actual expenditure.

The profit from the silver and copper coined during the year 1894 was 33,467, and from copper coined alone in 1895 it amounted to \$8,678.

1193. The following table gives the several amounts received and expended under the principal heads of ordinary revenue and expenditure in each year since Confederation :—

SINCE CONFEDERATION THE FOLLOWING SUMS HAVE BEEN EXPENDED TO 30TH JUNE, 1895.

Year ended 30th June.	Canals.	Canadian Pacific Railway.	Debts allowed to Provinces.	Dominion Lands.	Inter-colonial connected Railways.	Other Public Works.	Public Buildings, Ottawa.	Prince Edward Island Railway.	North-west Territories.	Total.

Manitoba not included in estimated population until 1871.

British Columbia not included in estimated population until 1872.

Prince Edward Island not included in estimated population until 1874.

The Territories not included in estimated population until 1881.

While the revenue was 56 cents per head less than in the previous year, the expenditure was 2 cents more.

At the time of Confederation the revenue was 5 cents per head more than the per head expenditure. This surplus of revenue continued during 1867 to 1875. During 1876 to 1880 the expenditure per head was in excess of the per head receipts. During 1881, 1882, 1883 and 1884 revenue per head was in excess of the per head expenditure. During 1885 and 1886 expenditure was in excess of revenue. In 1887 revenue was in excess of expenditure. In 1888 expenditure was in excess of revenue. During 1889 to 1893 revenue was in excess of expenditure. In 1894 and 1895 expenditure per head was in excess of per head revenue. Thus, during 28 years, 12

years have witnessed an excess of income and 10 years an excess of expenditure over income. The longest period during which there was a surplus of the national income over expenditure was the period 1868-75, when there were eight years without a break. The longest period in which there was an excess of expenditure over income was that included in the years 1876-80, when for five years without a break the expenses were more than the receipts. During the eight years the yearly average excess of income over expenditure was 39 cents per head, and during the five years the yearly average excess of expenditure was 39 cents per head. During the period 1889-93 revenue was in excess of expenditure by 39½ cents per head per annum, or a little more than in the period 1876-80. Compared with the excess of expenditure of 39 cents in the five years, 1876-80, the expenditure of 1894 was in excess of the revenue by 24 cents per head, and in 1895 it was 82 cents more.

1195. The following table gives the revenues and expenditures of the several provinces for the year 1895, with the amount of each per head of population respectively. The total receipts and payments, exclusive of loans and payments thereout, as far as could be ascertained, are given in each case :—

## REVENUES AND EXPENDITURES OF THE PROVINCES OF CANADA, 1895.

PROVINCES.	Revenue.	Amount per Head.	Expenditure	Amount per Head.

\* 6 months. † 18 months. ‡ 11 months only. \$ Includes the sum of \$169,454, being discount (\$101,850) and expenses (\$67,604) in connection with floating of loan of 1895 (£420,000).

1197. The figures for Nova Scotia are not those of the ordinary revenue and expenditure, several items not coming under that head, having been entered as such for convenience, and the actual revenue of the province available for ordinary purposes is less than is shown in the table. In 1888 a considerable sum, in addition to the subsidy, was received from the Dominion Government on account of a claim of the province for piers, breakwaters, &c. In Prince Edward Island the financial year, previous to 1873, began on the 1st February and ended on the 31st of the following January, but in that year it was changed to correspond with the calendar year.

1198. The next table gives the revenue and expenditure in the United Kingdom and British possessions\*, principally in the year 1894, with the proportion of each per head of population:—

\* Gross revenue and expenditure.

† Year ended 31st March.

The revenue exceeded the expenditure in 18 out of the 36 countries and colonies named in the list, the total revenue having been but little less than the expenditure. In proportion to population, both revenues and expenditures of the Australasian colonies are very high, the chief explanation of which is that "a considerable revenue is derived from the usufruct of the unsold lands, which is not generally the case elsewhere; the revenues also are swelled by the large sums which are received annually from the alienation of Crown lands, and from the working of the State railways.\* The practice of treating money derived from the sale of Crown lands as revenue obtains in all the Australian colonies, and the money so raised forms one of the largest items of their annual income."† In a few years Canada should be deriving a large income from the sale of Dominion lands if the practice of treating such moneys as revenue be in force, but all her principal railways are in the hands of private companies. Both in India and Cape Colony, as well as in Australasia, the railways are principally owned by the Government, producing a corresponding difference in the amount of revenue.

1199. The ordinary revenues and expenditures in some of the principal foreign countries are given in the following table:—

† Wealth and Progress of New South Wales, 1887, page 383.

‡ Budget estimate. § Total revenue and expenditure.

1200. The sources from which the ordinary revenue of Canada is derived may be divided, as previously explained (*see* paragraph 1174), into two classes, viz.:—1. Taxation; 2. Other Sources. The following figures give the amount raised in each class in 1891 to 1895:—

REVENUE.	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$
Revenue raised by taxation.....	30,514,151	28,446,157	29,391,367	27,579,203	25,445,139
Revenue raised from other sources..	8,265,160	8,475,715	8,847,242	8,795,490	8,531,906
Total .....	38,579,311	36,921,871	38,168,609	36,374,693	33,977,045

There was a decrease in receipts from taxation in 1895, as compared with 1894, of \$2,396,564; in 1894, as compared with 1893, of \$1,742,164; but an increase in 1893, as compared with 1892, of \$875,210. The receipts from other sources in 1895 decreased by \$263,560. The proportion of the total revenue derived from taxation in 1895 was 74·89 per cent; in 1894, it was 75·82 per cent, as compared with 76·82 per cent in 1893, with 77·04 per cent in 1892 and with 78·57 per cent in 1891, and was a smaller proportion than in any previous year since Confederation.

During 28 years the yearly average amount of taxation per head is \$3·24. The taxation of 1895 is 23 cents per head less than the average of the 28 years. Since Confederation there have been 16 years in which the per head taxation was higher and 11 years in which it was lower than in 1895. The highest years was in 1893 and 1890, when the taxation was \$6·60 per head. The lowest year was in 1869, when the taxation was \$3·26 per head. The development of other sources of revenue outside of the revenue by customs and excise duties has been considerable, as the following table shows:—

YEAR.	Per cent of Revenue from Taxation.	Per cent of Revenue from other sources.	YEAR.	Per cent of Revenue from Taxation.	Per cent of Revenue from other sources.
1868.....	85·5	14·5	1882.....	82·5	17·5
1869.....	77·0	23·0	1883.....	81·8	18·2
1870.....	84·4	15·6	1884.....	80·0	20·0
1871.....	84·4	15·6	1885.....	77·4	22·6
1872.....	85·5	14·5	1886.....	76·0	23·9
1873.....	84·6	15·4	1887.....	80·2	19·8
1874.....	83·1	16·9	1888.....	78·5	21·5
1875.....	83·8	16·2	1889.....	78·0	22·0
1876.....	82·4	17·6	1890.....	79·2	20·8
1877.....	80·2	19·8	1891.....	78·6	21·4
1878.....	80·0	20·0	1892.....	77·0	23·0
1879.....	82·0	18·0	1893.....	76·8	23·2
1880.....	79·3	20·7	1894.....	75·8	24·2
1881.....	80·8	19·2	1895.....	74·9	25·1

The trend during the whole period has been in the direction of other sources than taxation supplying a larger proportion of the revenue. The average for the 28 years is: taxation 80·4 per cent, other sources 19·6 per cent. The average of the last five years is: revenue from taxation 76·6 per cent, revenue from other sources 23·4 per cent.

1201. The following table gives the amount raised by taxation in each year since 1st July, 1867; also the average amount of such taxation paid per head of population, and the proportion of total revenue:—

REVENUE FROM TAXATION SHOWING INCREASE OR DECREASE; ALSO AMOUNT PER HEAD AND THE PROPORTION WHICH TAXATION BEARS TO THE TOTAL REVENUE FROM 1868 TO 1895.

YEAR ENDED 30TH JUNE.	TAXATION.				Per-centage of Total Revenue

1895.....	25,446,199		2,133,004	5 01	74 89

Comparing the first with the last year of the above period of twenty-eight years, it will be found that while the total receipts have increased 117 per cent, the amount paid per head of population has only increased 44 per cent, while the proportion to total revenue has decreased 12·4 per cent.

1202. The following tables give the amount raised by Customs and Excise duties during the last twenty-eight years, together with the proportion of each to population\* :—

TAXATION BY CUSTOMS AND EXCISE DUTIES AND PROPORTION TO POPULATION IN CANADA—1868-95.

\* The amounts of Customs duties being taken from the Public Accounts represent the amounts actually paid in, and will not quite correspond with the figures in the Trade and Navigation Returns, these latter being for amounts accrued.

It will be seen that considerably the larger part of the whole amount of taxation is derived from Customs duties, the average proportion for the twenty-eight years having been 73·7 per cent, later years showing a tendency to decrease it. The proportion in the United Kingdom in 1895 was 26 per cent; in the United States in 1895 it was 51 per cent, and in the Australasian colonies in 1894 it averaged 73 per cent.

The amount of Customs duties paid per head in the United Kingdom in 1895 was \$2.50 and in the United States \$2.18, in both cases being a

proportion than in this country, while in the Australasian colonies considerably higher, the proportion having averaged \$9.07 per head in

The cost of collecting the Customs revenue has been reduced very largely since the first years of Confederation; in 1868, for every \$100 collected \$5.41 was expended, as compared with \$5.13 for every 1895. The following table shows the total cost and the cost per collecting the Customs revenue in each year since 1868. The columns represent the amount accrued in each year:—

COST OF COLLECTING CUSTOMS REVENUE, 1868 TO 1895.

YEAR.	*Customs Revenue.	CHARGES OF COLLECTION.

.....	17,887,269	917,632	5 13

\* duty included.

It cost to collect each \$100 of Customs revenue 28 cents less than in 1868. The large area of the Dominion, the extent of its coast and the number of ports of entry it is necessary to keep up being so great, the cost of collection is moderate. In the United States it is 4.42 per cent, and in the United Kingdom 4.15 per cent.

1204. The following statement shows the cost of collection of Customs revenue in the Colony of Victoria for the period of 1881-94. It is taken from the Victorian Year-Book, the conversions into dollars having been made in the Statistical Division of the Canadian Department of Agriculture:—

YEAR.	CUSTOMS REVENUE.		
	Net Receipts.	Charges of Collection	
		Total.	Per \$100 collected.
	\$	\$	\$ cts.

1205. The following are statements for the last twenty-eight years of the amounts received from the principal heads under which taxation has been levied by means of Customs and Excise duties.

By adding together the amounts received from customs and excise duties on spirits, wine, beer and cider, malt liquor, malt, tobacco, snuff, cigars and cigarettes during 28 years, we have the sum of \$212,157,000. The total amount expended by the Federal Government on the construction of railways, canals, public buildings, including the payments on account of the Canadian Pacific Railway, the North-west Territories and debts allowed to provinces, is \$200,143,171. The duties collected from liquors and tobacco have, therefore, paid for the cost of the Intercolonial and connecting railways, the contribution of the Federal Government in aid of the Canadian Pacific Railway, the purchase and subsequent cost of the North-west Territories, including Manitoba, the public buildings at Ottawa, all the canals, including the Sault St. Marie, and all the post offices and other public buildings erected all over the Dominion since Confederation.

The liquor drinkers and the tobacco users have been well utilized.

\* These figures being for the amount of duty accrued, will not agree with those on page 778, which are for the net receipts. † Less deductions.

The average per cent of revenue derived from taxation in the 34 divisions of the Empire is 66.39 per cent. The average taxation per head of the various portions of the Empire specified above is \$7.01. Canada is \$5.01 per head.

1210. The following table gives the amount of taxation, as nearly as it can be arrived at, in some of the principal foreign countries:—

TAXATION IN PRINCIPAL FOREIGN COUNTRIES.

COUNTRIES.	Year.	TAXATION.		
		Amount.	Per Head.	Percentage of Revenue.
		\$	\$ cts.	
Europe—				
Austria-Hungary..	1892	284,792,467	6 67	73.5
Belgium .....	1894	33,083,600	5 40	48.0
Denmark .....	1893-94	12,809,067	5 90	80.0
France (including Algeria).....	1894	503,590,267	11 92	73.2
Germany.....	1892-93	235,498,000	6 32	80.0
Greece.....	1893	8,278,200	3 77	38.0
Holland.....	1892	19,174,667	4 16	30.0
Italy .....	1894	256,385,733	8 46	75.0
Portugal.....	1893-94	35,078,933	8 13	79.0
Russia.....	1894	314,221,200	3 16	67.0
Spain.....	1893-94	111,582,933	6 35	77.0
Sweden and Norway.....	1890-91	26,620,667	3 91	98.0
Switzerland.....	1894	7,786,667	2 68	32.0
Turkey.....	1883-84	61,865,067	2 82	76.0
Asia—				
Japan .....	1892-93	51,143,800	1 24	80.0
Africa—				
Egypt.....	1894	31,960,123	4 68	62.0
America—				
Argentine Confederation.....	1891	51,951,667	12 71	73.0
Brazil .....	1891	62,327,400	4 46	88.0
Mexico .....	1894-95	38,193,600	3 28	94.0
United States. ..	1895	297,293,540	4 26	70.0

It will be seen that the amount raised by taxation in France is larger than in any country named in the two tables, the United Kingdom having second place; Russia, Austria-Hungary, United States, Italy, Germany and India following in the order named. Taxation per head is much larger in the Australasian colonies than in any of the countries named, except in the Argentine Confederation. In Great Britain taxation is \$4.77 per head more than in Canada, and in the United States it is 75 cents less.

1211. The gross public debt of the Dominion of Canada on 30th June 1895, amounted to \$318,048,755; on the same date in 1894 it was \$305,348,024. There was, therefore, an increase during the year in the gross amount of liabilities of \$9,700,731.

The net public debt on the same date in 1895 was \$253,074,927, and in 94, \$246,183,029, being an increase in the actual net liabilities of ,891,898. This increase is to be accounted for as follows :—

Expenditure on Capital Account—

Public Works .....	\$ 102,393	
Railways and Canals .....	2,829,088	
Dominion Lands .....	99,842	
		\$ 3,031,323
Railway Subsidies.....	\$1,310,549	
Charges of management on loans.....	399,199	
Excess of payments over receipts.....	4,153,876	
Consolidated fund transfers.....	95	
		5,863,719
		\$ 8,895,042
Less sinking fund .....	\$2,002,311	
Refund of expenses in connection with North-west rebellion .....	833	
		2,003,144
Total net increase.....		\$ 6,891,898

1212. The following table gives the total liabilities and assets, and the liabilities, together with the multiple of revenue, for every year since federation :—

## COMPARATIVE STATEMENT OF THE ASSETS, LIABILITIES AND NET DEBT OF THE DOMINION, WITH THE INCREASE OR DECREASE AND MULTIPLE OF REVENUE, 1867 TO 1895.

YEAR ENDED 30TH JUNE.	Gross Debt.	Increase or Decrease.	Assets.	Increase or Decrease.	Net Debt.	Increase or Decrease.	Years of Revenue to pay Net debt.
	\$	\$	\$	\$	\$	\$	
1867	93,046,051	+	17,317,410	+	75,728,641	+	5.53
1868	96,896,666	+	21,139,531	+	75,757,135	+	5.27
1869	112,361,998	+	36,502,679	+	75,859,319	+	5.04
1870	115,993,706	+	37,783,364	+	78,209,742	+	5.01

1874	141,163,551	+	32,838,586	+	108,324,965	+	4.70
1875	151,663,401	+	35,635,923	+	116,028,478	+	4.37
1876	161,204,687	+	36,653,173	+	124,551,514	+	5.51
1877	174,673,834	+	41,440,825	+	133,233,009	+	6.03
1878	174,937,298	+	34,595,199	-	140,362,069	+	6.27
1879	179,483,871	+	36,493,683	+	142,990,188	+	6.34
1880	194,634,440	+	42,182,452	+	152,451,988	+	6.54
1881	199,861,537	+	44,465,757	+	155,395,780	+	5.24
1882	205,365,251	+	51,703,601	+	153,761,650	+	4.60
1883	202,159,104	-	43,602,389	+	158,556,715	+	5.71
1884	242,482,416	+	60,330,565	+	182,151,850	+	5.71
1885	264,703,607	+	68,295,915	+	196,407,692	+	5.98
1886	273,164,341	+	50,095,234	-	223,159,107	+	6.72
1887	273,187,636	+	45,872,851	-	227,314,775	+	6.35
1888	284,513,842	+	49,082,483	+	235,431,358	+	6.53
1889	287,722,063	+	50,192,021	+	237,530,042	+	6.12
1890	286,112,295	-	48,573,083	-	237,539,212	+	5.96
1891	290,809,290	+	52,090,199	+	238,719,091	+	6.16
1892	295,333,274	+	54,201,840	+	241,131,434	+	6.53
1893	309,054,595	+	58,373,485	+	250,681,110	+	6.83
1894	308,348,021	+	62,164,294	+	246,183,727	+	6.74
1895	318,618,765	+	64,073,898	+	254,544,867	+	7.40

Applying the test of public revenue to the public debt of Canada two facts appear: First, that the debt has not increased more rapidly than the revenue. Thus in 1878, 1879 and 1880 the net debt was such that it would have taken 6.38 years of the revenue to pay it off. In 1892, 1893, 1894 and 1895 the net debt was such that it would take 6.99 years of the average revenue of those years to extinguish the net debt.

The second fact is that the debt of Canada is not, in proportion to the revenue of the country, as great as the debts of many other countries considered to be prosperous countries. While it would take 6 $\frac{3}{4}$  years of the revenue of 1894 to pay off the net debt of Canada it would take 7 $\frac{1}{2}$  years of the revenue of Great Britain in 1894 to pay off its debt; 7 $\frac{1}{2}$  years of the revenue of 1892 would be required to pay off the debt of Austria-Hungary that year; 6 $\frac{1}{2}$  years that of Belgium; 9 $\frac{1}{2}$  years that of France, and 8 $\frac{1}{2}$  years that of the Netherlands.

Three times only since Confederation has there been a decrease in the gross debt, viz., in the years 1890, 1883 and 1871; and only in the years 1882 and 1871 has there been any decrease in the net debt. The increase in the gross debt since Confederation has been \$225,002,704, and in the net debt \$177,346,286, being an average annual increase of the latter of \$6,333,796. There was an increase in the assets in 1895, as compared with 1894, of \$2,808,834.

In 1868 the debt was equivalent to five and one-half years' revenue, and in 1895 it would have required almost seven and one-half years to pay off the debt. It will be seen, therefore, that the debt has increased in a somewhat greater ratio than the revenue, the proportion of increase being 234 per cent and 148 per cent respectively.

1213. The items which have increased the debt are railways and canals, Canadian Pacific Railway and other public works, \$161,932,218; Dominion lands, \$3,668,904; Consolidated Fund transfers, \$13,087,101; railway subsidies, \$14,136,737; expenses of and discounts on loans, \$12,249,524; deficits, \$22,219,056; territorial, \$3,798,656; allowances to provinces, \$743,393.

The items which have decreased the debt are: Sinking Fund, \$33,962,166; surplus, \$33,873,060; Consolidated Fund transfers, \$5,768,766; receipts from premiums on loans, \$555,972; Dominion lands, \$4,275,526; refunds from sales of public works, \$53,804.

1214. Of the Consolidated Fund transfers which increased the debt (amounting to \$13,087,101) the sum of \$10,189,521 was paid for 6,793,014 acres of land transferred to the Government by the Canadian Pacific Railway in 1886 from their original grant of 25,000,000 acres made by Parliament in aid of that enterprise.

Consolidated Fund transfers which decreased the debt, the chief item being an award of \$4,490,883, obtained by virtue of the award of Commission of 1877.

The gross increase of the debt was, therefore, \$261,835,589 and the gross decrease \$84,489,303, leaving the net increase as above stated, \$177,346,286.

1215. The allowed debt of the four provinces, as assumed by the Dominion at the time of Confederation, was \$77,500,000. In 1869 a further allowance of \$1,186,756 was made to Nova Scotia, and since that date additional debts have been assumed or allowed by the Dominion to the extent of \$30,743,392, making a total assumption of provincial debts of \$109,430,148, leaving, therefore, the sum of \$143,644,779 as the actual net liability created by the Dominion Government since Confederation. It must be remembered that the allowance of these debts to the provinces was in accordance with arrangements made at that time, and that though the amount of the public debt has been thereby increased, no new liabilities have been actually created, inasmuch as these debts, if not taken over by the Dominion, would still be owing by the provinces. This assumption of provincial debts has been, therefore, a simple transfer of liability, and the burden on the people has not been increased but has been made actually lighter, since the Federal Government has been enabled to exchange the high interest-bearing bonds of the provinces for its own bonds at a lower rate.

1216. The following are particulars of the provincial debts assumed by the Dominion at Confederation :—

Canada (Province).....	\$ 62,500,000
Nova Scotia.....	8,000,000
New Brunswick.....	7,000,000
Total.....	\$ 77,500,000
Debts subsequently assumed or allowed :	
Nova Scotia (1869) .....	1,186,756
The old Province of Canada (1873).....	10,506,089
Province of Ontario.....	2,848,289
“ Quebec.....	2,549,214
“ Nova Scotia.....	2,343,039
“ New Brunswick.....	1,807,720
“ Manitoba.....	3,775,006
“ British Columbia.....	2,029,392
“ Prince Edward Island.....	4,884,023
Total provincial debts assumed.....	\$109,430,148

1217. Inquiries for further particulars having been made respecting these assumed debts, the following statement is given :—

Sections 111-120 of the British North America Act, 1867, deal with the financial arrangements between the Federal and the several Provincial Governments.

In consequence of the protest by Nova Scotia against the financial arrangement made for that province an “Act relating to Nova Scotia” was passed. It is to be found in Chap. 2, Acts of 1869.

In consequence of the creation of Manitoba and the admission of other provinces, other Acts were passed as under :—

- (a.) Manitoba Act, 1870, Chap. 3 (consult sections 24 and 25).
- (b.) British Columbia, Order in Council, page 84, Statutes of Canada, 1872.
- (c.) Prince Edward Island, Order in Council, page 14, Acts of 1873.

Agitation having sprung up in the Provinces of Ontario and Quebec against payment of interest on the sum of 10½ million dollars (by which amount the actual debt of the old Province of Canada exceeded its allowed debt under the Union Act, 1867), an Act was passed to readjust the amounts payable to and chargeable against the several provinces. That Act is to be found in Canadian Acts, 1873, Chap. 30.

These Acts and Orders in Council contain the authority under which the sums mentioned in paragraph 1216 were assumed or allowed by the Dominion, and by such allowance became part of the Federal debt.

A question behind these Acts, viz., how to reconcile them with Section 18, Union Act, 1867, was discussed fully in the Session of 1869. A careful presentation of the case by Sir Alexander Campbell is in the Senate Documents. Mr. Blake took the opposite view.

1218. On the (1) Canadian Pacific Railway has been expended \$62,653,745, on the (2) Intercolonial and connecting railways \$45,294,030, on the (3) Prince Edward Island Railway \$635,830, and on (4) canals \$44,161,312, making a total of \$152,744,917. Not only, therefore, is the whole debt thus accounted for, but it will be seen that under the four above heads alone there has been spent the sum of \$9,100,138 more than the total actual increase of the debt since Confederation.

1219. The total expenditure on capital account since Confederation has been \$200,143,171, made up as follows :—

Debt allowed to provinces.....	\$ 30,743,393
Canadian Pacific Railway.....	62,653,745
Canals.....	44,161,312
Intercolonial and connected railways.....	45,294,030
North-west Territories.....	3,798,656
Dominion Lands.....	3,668,904
Public Buildings, Ottawa.....	2,163,545
Prince Edward Island Railway.....	635,830
Other public works.....	*7,023,756
	<u>\$ 200,143,171</u>
Increase of debt.....	177,346,286
Expenditure in excess of increase of debt.....	<u>\$ 22,796,885</u>

1220. The following table shows the amounts, including expenditure charged to revenue, spent by the Government in each year since Confederation.

\* Including the sum of \$2,725,504 expended in previous years by the Montreal Harbour Commission on the improvement of the St. Lawrence and assumed in 1890 by the Dominion Government.

ation on the construction of railways, canals, public buildings and other works :—

YEAR ENDED 30TH JUNE.	Railways.	Canals.	Public Buildings.	Other Public Works.	Total.

1894.....	1,633,889	3,156,306	611,923	730,813	6,132,931
1895.....	1,513,985	2,691,768	375,379	664,397	5,245,529
Total.....	120,077,322	46,474,084	16,862,100	24,663,813	208,077,319

1221. The following amounts, including expenditure charged to revenue, have been spent on public works since Confederation :—

	Amount.
	\$
Railways.....	120,077,322
Canals.....	46,474,084
Government buildings and miscellaneous public works, including light-houses and navigation.....	41,869,910
	208,077,319
Prior to Confederation there was expended on railways and canals.....	52,944,173
On public works.....	10,000,000
Making a total expenditure on public works of.....	271,721,492

The fine Parliament Buildings at Ottawa have been erected at a total cost up to the 30th June, 1895, including the new departmental building

Wellington street, of \$4,979,242. The sum of \$262,168 has also been expended on the construction of a building near Nepean Point for the Government Printing Bureau.

1222. In 1868 the public assets amounted to \$17,317,410, and in 1895 \$64,973,828, showing an increase of \$47,656,418. The assets only include interest-bearing investments, loans, cash and banking accounts, no account being taken of the unsold lands belonging to the Government nor of the railways, canals, public buildings and other public works, which it either owns or has assisted in constructing, and which are the material results of the large expenditure of public money. The following are details of the assets on 30th June, 1895 :—

	Amount.
	\$
Sinking funds .....	34,359,088
Quebec Harbour debentures .....	3,748,520
Montreal Harbour bonds .....	385,000
Northern Railway .....	73,000
St. John River and Railway Extension Company .....	433,900
Canadian Pacific Railway land grant bonds .....	29,000
Province accounts .....	10,923,487
Sundry investments .....	287,030
Total interest-bearing investments .....	50,239,025
Miscellaneous accounts .....	2,508,600
Cash .....	3,931,348

1224. The reduction in high interest-bearing debts, and, consequently, the decrease in the rate of interest now payable, have been very considerable, as shown by the following table, in which the amounts given are those of the actual interest paid and received, and of the actual net interest; the average rate of net interest is the average rate of the interest actually paid on the gross debt, after deducting that received on assets.

The chief fact set forth in the table is the general tendency towards a reduction in the net actual interest paid. For three years after Confederation the net actual interest paid remained among the 4 per cents. From 1871 to 1883 it remained among the 3 per cents. From 1884 to 1887 it got down among the 2 per cents. From 1887 to 1889 it went up to the 3's again. In 1890 it dropped to the 2 per cents, where it has since remained.

AVERAGE INTEREST ON THE DEBT AND ASSETS OF CANADA, 1st JULY, 1867, TO 30th JUNE, 1890.

YEAR ENDED 30th JUNE.	Actual Interest paid on Debt.	Increase or Decrease.	Average Rate of actual interest paid.	Actual Interest received on Assets.	Increase or Decrease.	Average Rate of actual interest received.	Net actual Interest.	Increase or Decrease.	Average Rate of net actual interest.

The average rate of net interest actually paid on the net debt has decreased, it will be seen, from \$4.51 per cent in 1868 to \$2.93 per cent in 1895, being a decrease of \$1.58 on each \$100. The average actual rate paid has decreased to the extent of \$1.35 per cent, owing to the reduction of high interest-bearing debts, as shown in the next paragraph.

1225. The following shows the several rates of interest paid and the amounts on which the same are payable on 30th June, 1895:—

Funded debt payable in London:—

5 per cent.....	\$ 2,433,333
4 ".....	140,856,596
3½ ".....	24,333,333
3 ".....	50,602,241

Total payable in London..... \$ 218,225,503

Funded debt payable in Canada:—

6 per cent.....	\$ 130,900
5 ".....	485,297
4 ".....	6,180,728
3½ ".....	298,700

Total payable in Canada..... \$ 7,095,625

Total Funded Debt..... \$ 225,321,128

Savings banks 3½ per cent..... 44,450,490

Province accounts, 5 per cent..... 16,407,032

Trust Accounts:—

6 per cent.....	\$ 1,105,220
5 ".....	5,400,604
3½ ".....	1,882,396
3 ".....	1,875,474

Total Trust Accounts..... \$ 10,263,694

Compensation to seigniors, 6 per cent..... 131,387

Dominion notes..... 19,520,233

Provincial notes..... 29,529

Miscellaneous (interest varying)..... 1,913,383

\$ 318,048,755

Interest is therefore payable at the rate of—

6 per cent on.....	\$ 1,367,867
5 ".....	24,796,296
4 ".....	147,087,324
3½ ".....	70,964,928
3 ".....	52,477,713

In 1868 interest was payable at the rate of—

7 per cent on.....	\$ 873,280
6 ".....	38,206,235
5 ".....	32,613,267
4 ".....	681,531

1226. The Dominion notes in circulation, which bear no interest, form a considerable item among the liabilities, and have increased from \$3,113,700 in 1867 to \$19,520,233 in 1895. (For particulars of circulation see chapter on "Banks and Savings Banks.") The fixed charges, *i. e.*, the charges for debt, sinking fund and subsidies to provinces, amounted in 1868 to 58 per cent of the revenue, but in 1895 had been reduced to 50 per cent.

The Government have made arrangements with the Bank of Montreal by which all the Dominion business in London is attended to by that institution, and this change is expected to make a reduction in the charges of

The following table gives the proportions per head of estimated debt, of the gross and net debt, of the assets, and of the interest on debt paid and received in each year since Confederation:—

30TH JUNE.	Gross Debt per Head.	Total Assets per Head.	Net Debt per Head.	Interest paid per Head.	Interest received per Head.	Net Interest paid per Head.

was an increase of \$1.16 per head in the gross debt and of 75 cents in the net debt, and in the gross and net interest 2 and 1 cents respectively per head, as compared with 1894. The rate of interest paid is lower than it used to be, and while the amount of net debt per head increased 121 per cent the amount of net interest paid has only increased 39 per cent.

From these statements it is seen that, with the exception of the debt owed to provinces—which were rendered more or less necessary by the conditions of Confederation, and which were themselves originally contracted for the purpose of public improvements—the whole of the public debt has been created by the construction of railways, canals and other works of importance, calculated to aid in the development of the country, and it is for these reasons that the debts of Canada and other Colonies, whose debts have been contracted for similar purposes, are on a very different footing to those of European countries and the United States, the debts of which have accumulated mainly for war pur-

1229. The following table gives particulars of the several Canadian loans since Confederation :—

LOAN.	Total Issue.	Rate.	Duration.	Minimum.	Price Realized.	Net Amount Realized.	Actual Rate of Interest Paid.

\* Or 50 years, calculated for 25 years only.

† Sinking fund of ½ per cent. ‡ Sinking fund of 1 per cent.

The last loan floated was in October, 1894. It was a three per cent loan for £2,500,000. The number of tenderers was 566; total amount of tenders, £11,294,222; highest and lowest prices, £99 12s. 6d and £95; average price, £97 9s. 2d. Both in point of number of tenderers, of amounts tendered and of value received, this loan surpassed any previous issue placed by the Dominion upon the London market.

The loan was asked for the purpose of paying off the floating and maturing debt of the Dominion and for amount required for deepening and enlarging the canals.

The loans of 1869 and 1873, and the guaranteed portion of the loan of 1875, had sinking funds of 1 per cent attached to them. The other loans have sinking funds of ½ per cent, excepting the loans of 1885, 1888, 1892 and 1894, which have no sinking funds.

1230. T. Lloyd, the chief writer for the London (Eng.) *Statist.*, affirms that "no better means of ascertaining what a country can pay in the shape of interest to outside creditors exists than can be found in the exports of the country. No independent country can pay its creditors more than one-third of the value of its exports. After it pays more than one-third it has reached the danger point. The capacity of the people will be strained."

During the last three years the exports of Canada have amounted to an average of \$117,000,000 a year, one-third of which is \$39,000,000.

It has been estimated that the outside indebtedness of Canada—Federal, Provincial, railways, municipalities, and other debts upon which interest is paid, causes an outgo of from \$22,000,000 to \$25,000,000 a year. Taking the latter figure, there is still a margin of \$14,000,000. We have drawn

mit of 64 per cent, and have 36 per cent yet to the good to come in.

The following are the amounts of public debts in the United Kingdom and British possessions with the proportion to population and of revenue :—

## PUBLIC DEBTS IN BRITISH POSSESSIONS.

COUNTRIES.	Year.	PUBLIC DEBT.

Total .....		8,775,277,899	20 79	5·11

total public debts of Great Britain and her possessions amount to 8,775,277,899, of which Great Britain owes 55·3 per cent; India, 19·2; the Australasian colonies, 17·1 per cent, and Canada, 4·4 per cent. The debt of Great Britain was reduced by \$44,556,050 during the year. In the exception of the Australasian colonies, the amount per head in the United Kingdom was higher than in any of her possessions, and with the exception of South Australia, Queensland, Tasmania, New Zealand, and Natal, the multiple of revenue was also the highest. At the Confederation, five years and six months of the revenue would have been required to pay off the net debt of Canada; in 1895 it would have required nearly seven and one-half years.

The proportions of debt to population in the Australasian colonies and also in Cape Colony are very large, but while, as in Canada, the whole amounts have been incurred in the construction of public works, by far the largest portion has been expended on railways, which in those colonies are almost altogether the property of the state, and there is consequently a very much larger revenue available for the payment of interest, derived directly from the expenditure of loans, than there is in this country, where the money has been spent on works productive to the country but only indirectly so to the state revenue. In proportion, moreover, to the wealth and general trade, more particularly of the Australasian colonies, their populations are very scanty.

1232. The public debts of some of the principal foreign countries are given below :—

\* 31st March.

1233. Under the provisions of the Civil Service Superannuation Act, 1883, retiring allowances are granted to such members of the Civil Service of Canada, coming within the scope of the Act, as have served for not less than ten years and have attained the age of sixty years, or become in some manner incapacitated from properly performing their duties, or whose office may be abolished for the better promotion of efficiency.

These allowances are calculated on the average yearly salary received in the last three years, as follows: For ten years but less than fifteen years' service an allowance of ten-fiftieths of such average salary; for fifteen years but less than twenty years' service an allowance of eleven-fiftieths of such average salary; and a further allowance of one-fiftieth for each additional year of service up to thirty-five years, when the maximum allowance of thirty-five-fiftieths may be granted, but no addition is made for any service over thirty-five years.

These provisions practically apply to all officers, clerks and servants of the Inside and Outside Service, including those of the Senate, the House of Commons and Library of Parliament.

In order to make good the above allowances, a reduction of 2 per cent per annum on all salaries over \$600, and of one and one-half per cent on those under that amount.

By an amendment to the Civil Service Superannuation Act, the reduction was increased to 3½ per cent and 3 per cent per annum on the salaries of persons (except those persons whose age exceeds 45 years) who have completed the service after that date.

All persons under sixty years of age, in receipt of a superannuation allowance, and not mentally or bodily disabled, are liable to fill, if required, in the event of forfeiture of such allowance, any public position in any part of the Government for which their previous services have rendered them eligible. The position, however, is to be lower in rank or salary than that from which the officer retired.

The Superannuation Act was brought into force in 1871. The following table shows the receipts and expenditures in account of the fund beginning:—

RECEIPTS AND EXPENDITURES, 1871-95.

YEAR.	Receipts.	Expenditure.
	\$	\$
1871-72	49,470	12,880
1872-73	53,213	38,842
1873-74	54,757	53,026
1874-75	34,620	64,442
1875-76	36,678	77,298
1876-77	38,476	101,627
1877-78	40,890	104,826
1878-79	41,856	106,588
1879-80	41,959	113,631
1880-81	43,531	127,792
1881-82	44,995	147,362
1882-83	46,426	160,319
1883-84	46,372	186,236
1884-85	51,882	192,692
1885-86	52,701	203,636
1886-87	57,075	200,655
1887-88	62,600	202,285
1888-89	62,967	212,473
1889-90	63,031	218,933
1890-91	61,513	241,764
1891-92	62,824	241,110
1892-93	63,862	253,679
1893-94	64,433	263,710
1894-95	63,974	262,302
1895-96	63,275	265,386

Upon the question of the wide divergence between the receipts and expenditures, the Civil Service Commission of 1892 said: "Your commissioners are of opinion that much misapprehension exists in the public mind in connection with this expenditure, especially as regards those officers who have been retired on account of abolition of office or to promote efficiency and economy. It will be found in many cases of persons so retired that the superannuation was entirely for the benefit of the State and resulted in real economy, although the allowance paid is charged to superannuation and swells the expenditure under that head to that extent."

Provision is also made for the granting of gratuities in cases where an allowance has not been earned by duration of service.

1238. Pensions, which are of a different nature to superannuation allowances, are also granted, in accordance with various Acts of Parliament, to retired judges and to a certain number of persons, or their widows and children, for military services. The total amount paid under this head in 1895 was \$84,349, being \$2,578 less than in the preceding year.

The amount paid out for pensions in the United States during 1895 was no less than \$141,395,229.

1239. The following table gives the gross debts, assets and net debts of the several provinces:—

#### PROVINCIAL DEBTS.

1241. The following statements relate to cities and towns of the Dominion and are the result of a special inquiry made by the Statistical Branch.

This inquiry is part of a general investigation into the municipal indebtedness of the several provinces of the Dominion, instituted during the year by the Statistical Branch of the Department of Agriculture, but by no means completed. The Provincial Governments of Ontario and Quebec

published returns from time to time. But examination showed that they are imperfect, especially the returns made public respecting the Province of Quebec. Special inquiries regarding the other provinces were made and considerable information collected, which, when thoroughly sifted, was available to give a full statement of the municipal indebtedness of the various parishes and other municipalities of the Dominion. An estimate of this indebtedness, based upon the information obtained, gives the total municipal debt of Canada in the neighbourhood of \$100,000,000.

In the Province of Ontario complete returns from 43 cities, towns and incorporated villages give a population of over 470,000, with liabilities \$8,500,000.

The returns recently published by the Ontario Government give the liabilities of all the municipalities of the province, including cities, towns and villages, for the year 1893, at \$54,879,000, including taxes in arrears, rates due from other municipalities, and so on, at \$60,092,229.

## CHAPTER XVIII.

**Fire Insurance Companies.**—Premiums and Losses.—Payments by British and United States Companies.—Payments by Canadian Companies.—Amount at Risk.—Inland Marine Insurance.—Ocean Marine Insurance.—Life Insurance Companies.—Amount of Insurance since Confederation.—Amount of Business.—Amount in Force.—Death Rate.—Premium Income.—Claims Paid.—Proportion for Expenses.—Financial Position of Canadian Companies.—Assessment Insurance.—Accident Insurance.—Plate Glass Insurance.—Burglary Insurance.—Comparative Standing of Companies.—Water Supply for Fire Purposes.

1242. During the year 1894 the business of fire insurance in Canada was carried on by 35 active companies; of these 6 were Canadian, 21 British and 8 belonged to the United States. Inland marine insurance was also transacted by 4 of them—2 Canadian, 1 British and 1 United States. Ocean marine was transacted by 2 companies, both Canadian. Two British companies were withdrawn during the year.

Accident, guarantee, plate-glass, steam boiler and burglary insurance business was done by 9 companies.

1243. The cash received for premiums during the year 1895 in Canada amounted to \$6,986,925, being greater than that received in 1894 by \$275,556; and the amount paid for losses was \$5,019,516, being more than that paid in 1894 by \$430,153. The ratio of losses paid to premiums received is shown in the following table:—

FIRE INSURANCE IN CANADA, 1895.\*

	Paid for Losses.	Received for Premiums.	Percentage of Losses to Premiums.	
	\$	\$	1895.	1894.
Canadian companies.....	809,161	1,153,903	70·12	72·35
British ".....	3,439,223	4,808,971	71·52	67·24
United States ".....	771,132	1,024,051	75·30	69·24
Total.....	5,019,516	6,986,925	71·84	68·38

\* The figures for Fire Insurance in Canada in 1895 are subject to revision.

1244. The following table shows the amount received for premiums and paid for losses, as well as the percentage of losses to premiums, in every year from 1869 :—

YEAR ENDED 31ST DECEMBER.	Premiums Received.	Losses Paid.	Percentage of Losses to Premiums.
	\$	\$	
1869.....	1,785,539	1,027,720	57.56
1870.....	1,916,779	1,624,837	84.77
1871.....	2,321,716	1,549,199	66.73
1872.....	2,628,710	1,909,975	72.66
1873.....	2,968,416	1,682,184	56.67
1874.....	3,522,303	1,926,159	54.68
1875.....	3,594,764	2,563,631	71.31
1876.....	3,708,006	2,867,285	77.33
1877.....	3,764,005	8,490,919	225.58
1878.....	3,368,439	1,822,674	54.11
1879.....	3,227,488	2,145,198	66.47
1880.....	3,479,377	1,666,578	47.90
1881.....	3,827,116	3,169,824	82.83
1882.....	4,229,706	2,664,986	63.01
1883.....	4,624,741	2,920,228	63.14
1884.....	4,980,128	3,245,323	65.16
1885.....	4,852,460	2,679,287	55.22
1886.....	4,932,335	3,301,388	66.93
1887.....	5,244,502	3,403,514	64.90
1888.....	5,437,263	3,073,822	56.53
1889.....	5,588,016	2,876,211	51.47
1890.....	5,836,071	3,266,567	55.97
1891.....	6,168,716	3,905,697	63.32
1892.....	6,512,327	4,377,270	67.22
1893.....	6,793,595	5,052,690	74.37
1894.....	6,711,369	4,589,363	68.38
1895.....	6,986,925	5,019,516	71.84
Total.....	119,011,003	82,821,955	69.58

1245. The total amounts for the whole period were divided among the companies according to their nationalities, as follows :—

COMPANIES.	Premiums Received.	Losses Paid.	Percentage of Losses to Premiums.
	\$	\$	
Canadian companies.....	30,540,651	21,890,005	71.67
British ".....	76,831,156	52,991,622	68.98
United States ".....	11,639,196	7,940,328	68.22
Total.....	119,011,003	82,821,955	69.58

If the year of the fire in St. John, N.B. (1877), had been excluded the average percentage of loss would have been 64.63.

1246. The next statement shows the business done by the several companies during the year 1895 :—

## FIRE INSURANCE BUSINESS IN CANADA IN 1895.

	Gross Amount of Risks Taken.	Pre- miums charged thereon.	Rate of Premiums per cent of Risks taken.	The same for 1894.	Net Cash Paid for Losses.	Net Cash Received for Pre- miums.	Percentage of Losses paid to Premiums received.	The same for 1894.

\*Including \$250,731 Re-insurance Premiums.

+Including Inland Marine Insurance.

The business done by British fire companies during the period 1875-95 resulted in a balance in their favour of \$3,607,454, or a yearly average of \$171,783. If the adverse balance of 1877 (the year of the disastrous fire in St. John, N.B.) be omitted, the favourable balance would amount to \$7,818,405, or an average of \$372,305 for each year. The figures of 1895 show an adverse balance of \$8,179.

The business done by United States fire companies during the period 1875-95 shows a favourable balance of \$598,309, or an annual average of \$28,491. In 1895 there was an adverse balance of \$60,159.

1248. Statement showing the cash income and expenditure of Canadian companies doing fire or marine insurance, 1875-95:—

Total.	71,828,310	3,190,343	584,923	75,603,576

\* Of this amount \$197,500 was premium upon the new stock issued by the British America and Western.

The above table and that following give the income and expenditure of Canadian companies for the period 1875-95.

The first table shows that there has been a steady growth in the amount of premiums received, notwithstanding the general reduction in the rates of insurance. The figures for 1895 show a decrease both in the premiums received and in the amount paid out for general expenses.

The Canadian companies in 1894 received \$626,768 in premiums for business done in Canada, and \$2,303,219 for business done in other countries. The percentage of losses paid to premiums received for Canadian business was 67.61 and for business in other countries, 62.63.

1250. For every \$100 received for premiums on fire insurance the payments by British and United States companies therefor were as follows :—

\* Including Inland Marine Insurance.

Taking the whole period of Confederation the total income of the Canadian companies from all sources was \$75,603,576, and the expenditure \$76,820,735, showing an excess of expenditure over income of \$1,217,159 ; of this excess the sum of \$2,866,028 represents dividends to shareholders.

During twenty years for every \$100 of income received by Canadian companies, the proportion used for losses, for expenses and for dividends has been \$67.57, \$30.27 and \$3.73 respectively.

Taking these averages as a standard, it is seen :—

1st. That the proportion of the income used for losses exceeded the average in the years 1877, 1881, 1882, 1883, 1884, 1887, 1888 and 1891, and was below the average in the years 1875, 1876, 1878, 1879, 1880, 1885, 1886, 1889, 1890, 1892, 1893, 1894 and 1895.

2nd. That the proportion of the income used for expenses exceeded the average in 1876, 1877, 1878, 1879, 1891, 1892, 1893, 1894 and 1895.

Taking British, United States and Canadian companies and judging them by the standard of payments in proportion to premiums received, the table immediately preceding and that immediately following show that in 1895 the British losses absorbed \$71.52 in every \$100 of premiums, the United States companies' losses absorbed \$75.30 in every \$100 and Canadian companies' losses absorbed \$67.75 in every \$100 of premiums paid.

1251. For every \$100 received for income by \*Canadian companies the payments were as follows :—

YEAR.	FOR EVERY \$100 OF INCOME.			FOR EVERY \$100 OF PREMIUMS.		
	For Losses.	For Expenses.	For Dividends.	For Losses.	For Expenses.	For Dividends.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.

1895	65 58	31 85	3 56	67 75	32 91	3 69

\* Including Inland Marine Insurance and Ocean.

Their total cash income in 1894 was \$4,289,162 and in 1895 \$4,557,201, and their cash expenditure was, in the same years, \$4,296,334 and \$4,602,332.

1252. The total amount at risk against fire in each year from 1869 is given in the next table. When it is considered that the very large increase in the amount, about \$639,000,000, represents a proportionate increase in the value of property, it must be admitted that the progress made during the period has been considerable :—

1882.....	526,856,478		

In the first year of the Confederation the amount of risk in the several fire insurance companies reporting to the Dominion Government was \$56 a head of the population. In 1871 it was \$65 a head of the population and was an average of \$377 on each house inhabited, uninhabited and in course of construction. In 1881 it was \$106 a head and \$614 for each house, and in 1891, \$157 a head and \$865 for each house. In 1894 the amount per head was \$163, or about three times what it was in 1867. Edward Atkinson says: "Progressive wealth can perhaps be measured as accurately by the amount of insurance against fire as by any other standard."

1253. The inland marine insurance business was, on the whole, more favourable than that of the preceding year, the losses incurred having been 66·87 per cent of the premiums received, as against 93·82 per cent in 1893.

1254. The ocean business was less favourable, the proportion of losses to premiums having been 62·23 as compared with 72·89 per cent in 1893.

1255. The following figures show the total of inland and ocean marine insurance business, in 1894, done by the companies reporting to the Insurance Branch of the Finance Department :—

	1894.
Premiums received .....	\$768,077
Losses incurred.....	502,514
" paid.....	\$ 422,373
" for previous years.....	95,248
Total losses during the year.....	517,422
Losses outstanding .....	82,050

1256. There were 30 companies transacting a life insurance business in 1895, viz.: 12 Canadian, 8 British and 10 United States. The Queen of Liverpool, Insurance Company has ceased to do business in Canada.

1257. The value of insurance effected during the year 1894 was \$49,525,257, being an increase of \$4,322,410 as compared with 1893, and a decrease of \$4,743,673 in 1895 as compared with the previous year.

1258. The Canadian companies do a larger share of the business than all the other companies combined, their share in 1889 having been 59.34 per cent, in 1890, 58.09 per cent in 1891, 57.87 per cent, in 1892, 57.34 per cent, in 1893, 62.14 per cent, in 1894, 57.89 per cent and in 1895, 62.22 per cent.

1259. The following table shows the amount of life insurance effected in each year from 1869 to 1895, inclusive:—

YEAR ENDED 31ST DECEMBER.	COMPANIES.			Total.

1888	114,034,279	30,003,210	67,724,094	211,761,583
1889	125,125,692	30,488,618	76,348,392	231,963,702
1890	135,218,990	31,613,730	81,599,847	248,424,567
1891	143,368,817	32,497,937	85,698,475	261,475,229
1892	154,709,077	33,692,706	90,708,482	279,110,265
1893	167,475,872	33,543,884	94,602,966	295,622,722
1894	177,511,846	33,911,885	96,737,705	308,161,436
1895	188,461,077	34,589,584	96,731,278	319,781,939

The Canadian companies' share was \$182,984,719, or 64.41 per cent; the British companies' share was \$18,271,109, or 6.43 per cent, and the United States companies' share was \$82,846,029, or 29.16 per cent.

1261. In 1871 the amount at risk in the several life insurance companies reporting to the Government averaged \$13.12 per head of the population, and \$73.60 per family. In 1881 it was \$23.88 per head and \$127.18 per family, and in 1891 it was \$54.10 per head and \$283.70 per family. In 1895 it was \$62.97 per head of the population.

1262. The following table gives the amount of life insurance allowed to lapse by non-payment of premiums in each year, and the proportions of such amount lapsed in each \$1,000 of risk, and in each \$1,000 effected in each year.

The table shows that a close relation exists between the degree of prosperity experienced by the people generally and the amount of life insurance allowed to lapse through non-payment of premiums.

In 1877 the amount lapsed by non-payment of premiums was 10·1 per cent of the total amount of life insurance in force; in 1878 it was 10·7 per cent; in 1879 it was 9·5 per cent, and in 1880 it was 7·9 per cent. Then began a period of rapid development of life insurance, the amount effected reaching into the 100 millions and rising to the 200 millions in 1888, after which it climbed up towards the 300 million mark, which figure it reached in 1895 with 19 millions over. Meanwhile the proportion of the lapsed by non-payment of premiums went down till in 1886 the percentage of lapsed was 5·4 per cent against 10·1 per cent ten years before. In 1887 it rose to 5·9 per cent; in 1888 to 7·2 per cent; in 1889 it fell to 7·1 per cent, and in 1890 it fell to 7·0 per cent. In 1891 it fell to 6·0 per cent, and in 1894 it rose to 8 per cent, indicating that the strain upon the purses of the people was being felt.

1893....	99,804	165,738,029	1,661	49,821	92,954,033	1,866	16,759	33,543,884	2,036
1894....	106,609	175,291,169	1,644	50,043	92,617,463	1,851	17,075	33,911,885	1,988
1895....	114,051	185,961,376	1,631	50,229	93,542,993	1,862	17,297	34,589,584	2,000

1266. The average amount of new policies was : for Canadian companies, \$1,481 ; for British companies, \$2,001, and for United States companies, \$1,966, the corresponding amounts for 1894 having been \$1,549, \$1,841 and \$1,932 respectively.

1267. The death rate was lower in 1894 than in 1893, as shown by the following table :—

INSURANCE DEATH RATE IN CANADA, 1890-94.

COMPANIES.	1894.		1893.	1892.	1891.	1890.
	Number of Lives exposed to Risks.	Number of Deaths.	Death Rate per 1,000.	Death Rate.	Death Rate.	Death Rate.
Active companies.....	204,023	2,107	10.327	10.176	10.676	10.178
Assessment companies...	35,798	290	8.101	9.407	8.946	9.245
Retired companies.....	5,142	136	26.449	22.574	26.512	20.109
Total.....	244,963	2,533	10.340	10.364	10.860	10.360

In the calculation of the death rate, the mean number of policies in force and the number of policies terminated by death during the year have been admitted as approximations to the mean number of lives exposed to risk, and the number of deaths during the year respectively, in the case of those companies which did not report that item, and it is believed that the result arrived at represents the actual mortality among insured lives in Canada as accurately as can be gathered from the returns of the companies.

1268. There was a decrease of \$432,787 in the amount of insurance terminated naturally, *i.e.*, by death, maturity or expiration, in 1894, as compared with 1893, the amount for 1894 having been \$4,552,944; and an increase of \$7,059,319 in the amount terminated by surrender and lapse, the total amount so terminated having been \$30,452,742, as compared with \$23,393,423 in 1893.

1269. The next table gives the amount of income from premiums received by all companies in each year from 1869 to 1895 inclusive, from which it will be seen that Canadian companies received 55 per cent of the total amount, United States companies 34 per cent, and British companies 11 per cent.

1273. The receipts from income of Canadian Companies in 1890 to 1895 were respectively made up as follows :—

—	1890.	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$	\$
Premiums and annuity sales .....	4,236,746	4,508,834	5,006,717	5,476,059	5,871,677	6,297,930
Interest and dividends ..	953,328	1,408,954	1,138,159	1,242,169	1,369,752	1,456,386
Sundry .....	32,587	48,756	35,851	38,862	54,180	52,263
Total .....	5,222,661	5,966,544	6,180,727	6,757,090	7,295,609	7,806,579

And the expenditure during the same years was :—

—	1890.	1891.	1892.	1893.	1894.	1895.
	\$	\$	\$	\$	\$	\$
Paid to policy-holders and annuitants. ....	2,081,236	2,036,711	2,438,040	2,265,703	2,567,454	3,070,454
General expenses. ....	1,006,698	1,093,215	1,210,501	1,432,144	1,560,229	1,723,346
Dividends to stockholders. ....	121,005	55,465	57,010	57,994	59,908	132,112
Total. ....	3,208,939	3,185,391	3,705,551	3,755,841	4,187,591	4,925,912

1274. From the above figures, therefore, it appears that out of every \$100 of income received the companies expended :—

OBJECT OF EXPENDITURE.	1890.	1891.	1892.	1893.	1894.	1895.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.
Paid to policy-holders. ....	39 85	36 33	39 45	33 53	35 19	39 33
General expenses. ....	19 28	19 50	19 59	21 19	21 39	22 08
Dividends to Stockholders. ....	2 32	0 99	0 92	0 86	0 82	1 69
Reserve. ....	38 55	43 18	40 04	44 42	42 60	36 50

1275. The following table gives the results of the valuation of the policies of some of the life insurance companies. The valuation was made in the office of the superintendent of insurance and on the basis of the H. M. Mortality Table of the Institute of Actuaries at  $4\frac{1}{2}$  per cent interest, the pure premiums only being valued :—

COMPANIES.	1894.		1895.	
	Amount in Force.	Value.	Amount in Force.	Value.

1276. The following table has been prepared for purposes of comparison. The London *Statist* says :—

“ By the amount of the premium income the importance of the office, so far as the quantity of business is concerned, can be gauged. The ‘considerations received for annuities’ is a supplementary guide to the amount of business done by the office. The income from interest and dividends received is most important, but without further information as to the nature of the investments and the amount of the invested funds the mere figure of the income received is not much guide; when we come to the cost of working and the proportion of the annual premium income absorbed for management expenses and commission, we touch a point of vital importance which is a fairly accurate guide to the ‘goodness’ of the various offices.”

In this table the total business done by the several companies is the basis of the calculations and not the portion done in Canada only. The Canadian business done by the English companies represents about 6 per cent of their whole premium income, that done by the United States companies about 2½ per cent of their total premium income.

1894.....	50	4,763,069,069	209,641,725	261,959,111	63,867,349	69,300,675	118,423,247

1277. Seven companies did business on the assessment plan in 1895, six Canadian and three United States, having at the end of the year \$71,385,765 in force, being an increase of \$3,672,295. The amount of policies taken during the year was \$12,862,025. The amount of insurance terminated by surrender and lapse was \$8,288,750, in 1894 being \$122.11 for every \$1,000 of current risk, which is \$29.18 less than in 1893. The amount terminated by death was \$543,450, or \$8.03 for every \$1,000 risk, being \$1.48 less than in 1893. The total terminations amounted to 72.73 per cent of the amount of the new business, against 66.32 per cent in 1893.

1278. Accident insurance business was transacted by 10 companies, viz.: 7 Canadian, 2 British and 1 United States, and guarantee business by 4 companies, 2 Canadian, 1 British and 1 United States. The business done in the years 1889 to 1895 was :—

	1889.	1890.	1891.	1892.	1893.	1894.	1895.
<i>Accident.</i>	\$	\$	\$	\$	\$	\$	\$
Premiums received, ....	278,755	295,553	313,177	317,643	313,286	323,272	337,740
Amount insured, ....	43,735,729	40,215,565	50,279,155	59,086,779	61,123,499	58,047,696	61,762,880
Paid for claims, ....	127,156	97,339	127,274	152,485	172,874	147,945	190,836
<i>Guarantee.</i>

Paid for claims, ....	17,835	24,802	12,255	13,046	49,704	19,806	11,533

1279. Plate glass insurance was transacted by 4 companies—2 Canadian, 1 British and 1 United States. The premiums received during the year 1895 were \$50,710, and the losses incurred \$25,530. One company and one firm transact this class of business on the system of replacement, instead of paying the value of the glass broken, and their returns do not show either the insurance effected during the year or the amount in force at the end.

1280. Burglary insurance was introduced into Canada during 1893, a license being issued to the Dominion Burglary Guarantee Company (limited) to transact the business of guaranteeing against loss or damage by reason of burglary or housebreaking, and of guaranteeing against loss of jewellery, bullion and other movable property deposited with it for safe keeping. The premiums received during the year 1895 amounted to \$14,903, and the amount in force was \$1,669,477; the losses incurred amounted to \$2,601.

The Credit Indemnity insurance was commenced in Canada in 1893, when a license was issued to the Canadian and European Credit System Company of Newark, New Jersey, for the purpose of insuring on the business of insuring wholesale dealers, jobbers and exporters against losses by reason of bad debts.

Amount of premiums received in 1894 was \$18,553, the amount in 1895 was \$593,000, losses incurred \$21,453, and claims paid \$12,453.

The total amount of premiums received for all forms of insurance, marine, fire, &c., in 1882-95 was :—

YEAR.	COMPANIES.			Total.
	Canadian.	British.	United States.	
	\$	\$	\$	\$
1882	3,080,218	3,601,467	1,633,238	8,314,923
1883	3,256,558	3,911,981	1,828,122	8,996,661

1893	6,900,013	5,824,984	5,042,589	17,767,586
1894	7,295,401	5,809,436	5,122,738	18,227,575
1895	7,573,431	6,101,844	5,133,418	18,808,693

Premiums received from Ocean Insurance not included.

The total amount of premiums has increased from \$8,314,923 in 1882 to \$18,808,693 in 1895, or over 126 per cent. Of this increase of \$10,493,770 in sixteen years, the Canadian companies have secured as their share the sum of \$4,493,213, the United States companies \$3,500,180, and the British companies \$2,500,377. The proportional shares in the increase are for Canadian companies 42·8 per cent, United States companies 33·2 per cent and British 24·0 per cent.

83. The deposits held by the Receiver General for the protection of y-holders amounted on the 22nd July, 1895, to \$23,570,040, represented by the following securities :—

Canada stock .....	\$ 3,551,429
Canada Provincial debentures .....	3,097,331
United States bonds .....	1,795,000
Swedish Government bonds .....	58,400
British Government securities .....	845,143
British Colonial securities .....	512,217
Bank deposit receipts .....	110,000
Montreal Harbour bonds .....	433,000
Municipal securities .....	11,518,479
Bank stock .....	25,420
Loan companies' debentures .....	178,120
C. P. R. and Canada Central bonds .....	1,445,500
	<u>\$ 23,570,040</u>

284. In 1895 the sum of \$4,450,697, also, was deposited with Canadian steers, making a total of \$28,020,737 held for the protection of policy-holders, and this amount was distributed among the different classes as follows :—

Fire and Inland Marine .....	\$ 5,893,535
Life .....	21,440,009
Accident, Guarantee, &c. ....	687,193
	<u>\$ 28,020,737</u>

285. At the close of 1893 there were 93 companies under the supervision of the Superintendent of Insurance; in 1894 there were 95. They were engaged in business as follows :—

	1893.	1894.
Doing life insurance .....	40	39
“ “ assessment plan .....	7	9
“ fire insurance .....	35	34
“ inland marine insurance .....	8	6
“ ocean marine .....	2	2
“ accident .....	6	7
“ guarantee .....	3	4
“ steam boiler .....	2	2
“ plate glass .....	6	6
“ credit indemnity .....	1	1
“ burglary guarantee .....	1	1
“ tornado .....		1

Comparison of 1894 with 1886 shows that during eight years companies doing life insurance on the old plan have decreased by 2, and companies doing business under the assessment plan increased by 5; that fire insurance companies have increased by 4; that inland marine insurance companies remain the same in number; that ocean marine insurance companies have increased by 2; that accident insurance companies remain the same; that guarantee companies have increased by 1; that steam boiler insurance companies have increased by 1; that plate glass insurance companies have increased by 3, and that of the remainder there were none in 1886.

## ONTARIO—Concluded.

<b>Kingston</b> .....	Pumping to tank from lake to tower.
<b>Kindarsine</b> .....	Stand pipe; capacity, 1,000,000 galls.; also direct pumping; 35 hydrants.
<b>Lindsay</b> .....	Direct pumping in stand pipe of 300,000 galls.
<b>London</b> .....	Reservoir and direct pumping; average pressure, 75 lbs.
<b>Midland</b> .....	Six tanks and Midland Bay.
<b>Mount Forest</b> .....	Private wells only.
<b>Napanee</b> .....	Tower system, in combination with force pumps.
<b>Niagara Falls</b> .....	Direct pumping; capacity, 2,000,000 galls. daily; pressure, 120 lbs.
<b>Newmarket</b> .....	“ steam power.
<b>Oakville</b> .....	Tanks in various portions of the town; capacity limited.
<b>Oshawa</b> .....	Ten tanks on east side; along west side is a stream of easy access.
<b>Ottawa</b> .....	Water-works; direct pumping into mains; pressure ranges from 85 to 120 lbs. for fire duty.
<b>Penetanguishene</b> .....	Water-works; reservoir on hill and pumping engine at base of hill; tank holds 40,000 galls.
<b>Perth</b> .....	River and tanks; supply unlimited.
<b>Pictou</b> .....	Water-works; reservoir, capacity, 400,000 galls.; gravity pressure, 210 feet above level of pumping station; average pressure, 75 lbs.
<b>Peterborough</b> .....	Water-works; hydrants; capacity, 2,000,000 galls. daily.
<b>Prescott</b> .....	Four tanks, supplied by St. Lawrence River by fire engine.
<b>Preston</b> .....	Seven cisterns of 1,000 galls.; river, 2 small streams and 2 mill-dams.
<b>Pembroke</b> .....	Water-works.
<b>Palmerston</b> .....	Seven tanks.
<b>Paris</b> .....	Water-works; reservoir, capacity, 1,000,000 galls.
<b>Port Hope</b> .....	Direct from mill-dam adjoining water-works house; 2 wheels, 52 inches; capacity, 250 galls. each; pumping direct into mains.
<b>Renfrew</b> .....	Bonnechère River, Smith's Creek and tanks in different parts of the village.
<b>Ridgetown</b> .....	Ten tanks fed by running streams.
<b>Simcoe</b> .....	Kent's Creek and River Lynn run through the town, also tanks in different parts.
<b>Seaforth</b> .....	Water-works; Waterous or Holly's system.
<b>Strathroy</b> .....	No system of water-works; mill-pond, River Sydenham and tanks.
<b>Toronto</b> .....	Water-works; fire hydrants on all water mains; average pressure, 80 lbs.; hydrants 300 feet apart, except in centre of city, where they are placed as required.
<b>Tilsonburg</b> .....	Water works; Holly's reservoir; pressure, 90 lbs.
<b>Thorold</b> .....	Canal.
<b>Toronto Junction</b> .....	Water-works; Holly's system; capacity, 4,000,000 galls. daily.
<b>Welland</b> .....	“ “ “ 5,000,000 “ “
<b>Windsor</b> .....	“ “ direct pumping “ “ 312,500 “ per hour.
<b>Whitby</b> .....	Eleven underground tanks, average 20,000 galls. each.
<b>Wingham</b> .....	Water power; Holly's system; capacity, 500 galls. per minute; pressure, 90 lbs.; 8 hydrants.
<b>Woodstock</b> .....	Water-works; direct pumping; capacity, 4,000,000 galls. daily.
QUEBEC.	
<b>Buckingham</b> .....	River flowing through centre of town; 1,250,000 galls. power pump in use.
<b>Côte St. Antoine</b> .....	Water system not given.
<b>Farnham</b> .....	Water-works; 1 power pump; capacity, 1,843,200 galls. daily; 1 steam pump, capacity, 750,000 galls. daily.
<b>Hull</b> .....	Water-works; mains; steam power; capacity, 800 galls. per minute.
<b>Joliette</b> .....	“ “ 200 H. P.; pressure, 80 lbs.
<b>Lachine</b> .....	“ “ steam power, pumping direct to stand pipe; pressure 110 lbs.
<b>Longueuil</b> .....	“ “ Two steam pumps; capacity, 750,000 galls.
<b>Launon</b> .....	“ “ System not given.
<b>Montreal</b> .....	“ “ Direct pumping to reservoir; capacity, 20,000,000 galls. daily.
<b>Nicolet</b> .....	“ “ Pressure, 125 lbs.
<b>Notre Dame de Grace</b> .....	No system.
<b>Richmond</b> .....	Water-works; good supply of water, not much force.
<b>St. Hyacinthe</b> .....	“ “ 80 hydrants.
<b>St. Jérôme</b> .....	Five cisterns.
<b>St. Johns</b> .....	Water-works; capacity, 3,000 galls. per minute.
<b>Valleyfield</b> .....	“ “ pressure, 110 lbs.

## NOVA SCOTIA.

Amherst . . . . .	Water-works; direct pumping; 2 pumps; capacity, 1,000,000 galls. daily; also a reservoir holding 3,000,000 galls., at an elevation of 160 feet.
Dartmouth . . . . .	Gravitation system; pressure, 75 to 90 lbs.
Liverpool . . . . .	Two large tanks; river running through the town.
Lunenburg . . . . .	Wells, reservoirs and harbour.
New Glasgow . . . . .	Water-works; 45 hydrants.
North Sydney . . . . .	Brook at each extremity; wells and harbour along front street.
Springhill . . . . .	Wells and springs.
Stellarton . . . . .	Water-works; 24 hydrants.
Sydney . . . . .	Gravitation; supply unlimited.
Treasure Island . . . . .	Gravitation, pressure 75 lbs.; augmented by 2 steam rotary pumps; hydrants.
Westville . . . . .	None.
Halifax . . . . .	Gravity system; capacity, about 6,000,000 galls. daily.

## NEW BRUNSWICK.

Moncton . . . . .	Reservoir with pumping station.
St. Andrews . . . . .	Public fresh water tanks; capacity, 20,000 galls. each.

## MANITOBA.

Brandon . . . . .	Water-works; 52 hydrants; direct pumping; also 6 tanks, with capacity, 35,000 galls. each.
St. Boniface . . . . .	Two water tanks and the Red River.
Winnipeg . . . . .	Water-works.

## BRITISH COLUMBIA.

New Westminster . . . . .	Gravity system; 432 feet, with reservoir 400 feet
Vancouver . . . . .	From hydrants; pressure 80 lbs.

## PRINCE EDWARD ISLAND.

Summerside . . . . .	Six tanks; capacity 150,000 galls.; also river supply.
----------------------	--

## THE TERRITORIES.

Calgary . . . . .	Water-works and tanks
Prince Albert . . . . .	River Saskatchewan.

## CHAPTER XIX.

Canada before Confederation.—Short history of Militia.—Establishment of Department.—Militia Act.—Active and Reserve Militia.—Military districts.—Infantry corps.—Military schools.—Royal Military College.—Regimental establishment.—Expenditure.—Revenue.—North-west Mounted Police.—Duties of the Force.

General Commanding Her Majesty's forces, Alex. G. Montgomery Major-General, in command of Militia.

By the Union Act, 1867, the command in chief of all naval and military forces of and in Canada is vested in the Queen, and the control of the militia is placed in the Parliament of Canada.

The record of the service of the militia of Canada dates back from 1600, when a few companies were organized out of a population of about 1000. In 1649-51 there was a camp volant of about 100 volunteering between Three Rivers and Montreal. In 1664 the whole of Montreal able to carry arms were enrolled as volunteers. From 1636 to 1664 were twenty, forty, seventy men and no more. In 1665 came the Carignan regiment, and the militia system was developed. The regiment partially returned to France in 1669-70, and the rest was disbanded. In 1674 the Count of Frontenac gave the militia a definite form; each parish or cote formed a company who were called to the time of war only. From that time to the capitulation of Montreal in 1760, the militia took part in several contests with the English and Indians and gained high distinction. The garrisons kept by the British in the few forts of the colony never amounted to more than 150 men, and the militia maintained with the rank of major. After the conquest the militia was disbanded, but a kind of reorganization took place in 1775 at the formation of the Republican army, commanded by Major-General Richard Montgomery and Benedict Arnold, but there was very little done after that. In 1812, when the militia was again organized and equipped, and the British regulars then in the country, defeated the United States at Detroit, Queenstown Heights, Lundy's Lane, Chrysler's Farm, and Teague's, &c., and captured General Hull.

In 1815 the force, with the exception of a few regiments, was for all purposes disbanded, and no call for its services was made until the rebellion of 1837-38. On that occasion, at the call of the authorities, numerous militia were hastily organized and acted in concert with the regulars. When the rebellion was over, these corps, with a few exceptions, were disbanded.

Upper and Lower Canada continued to be garrisoned by the

departure of most of the regulars for the Crimea, the Government of Canada voted the necessary amount for the

1291. The Militia Act of 1868 was subsequently amended in various ways. The Act under which the Militia Department conducts its work was passed in 1883 and is Chap. 40 of the Revised Statutes of Canada, 1886.

By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years and upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follow:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married or widowers with children.

The fourth class comprises those between 45 and 60.

And those liable to serve shall be called upon in the above order.

1292. The following persons are exempt from enrollment and actual service at any time:—Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, persons engaged in the collection or management of the revenue, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Half-pay and retired officers of the Imperial forces, sailors actually employed in their calling, pilots during the season of navigation, and masters of schools are exempt from service, except in case of war. Quakers, Mennonites, &c., may be exempted altogether under regulations prescribed by the Governor in Council.

1293. The militia is divided into active and reserve land force and active and reserve marine force. The active militia land force is composed of corps raised either by voluntary enlistment or ballot; the active marine force shall be raised in the same way, and composed of seamen, sailors and persons whose occupation is on vessels navigating the waters of Canada; and the reserve force, land and marine, consisting of the whole of the men not serving in the active militia for the time being.

1294. The period of service in time of peace is three years.

1295. The number of men to be trained and drilled annually is limited to forty-five thousand, except as specially authorized, and the period of drill is to be sixteen days, and not less than eight days in each year.

1296. The Dominion is divided into eleven military districts, in each of which a permanent military staff is maintained, under command of a Deputy Adjutant-General.

1297. The permanent corps and Schools of Instruction consist of "A" and "B" Troops, Royal Canadian Dragoons, at Toronto and Winnipeg; "A" and "B" Batteries, Royal Canadian Artillery, at Kingston and Quebec; Nos. 1 and 2 Companies of Garrison Artillery at Quebec; Nos. 1, 2,

3 and 4 Companies, Royal Canadian Regiment of Infantry, at London, Ont., Toronto, Ont., St. John's, Que., and Fredericton, N.B. The total strength of these permanent corps is limited by the militia law to 1,000 men.

1298. The Royal Military College at Kingston, which is under the control of the Militia Department, was founded in 1875, and has proved a most successful institution. Of the total number of cadets who have graduated, 89 have been gazetted to commissions in the Imperial army. Four commissions are annually offered by the Imperial Government, and in 1899 six others were offered, proving that the Imperial Government is fully satisfied with those graduates who have already obtained commissions in the service. In 1893 the number of cadets recommended for commissions in H. M. regular forces was five, one for commission in the Royal Engineers, one in the Royal Artillery and three in the Infantry.

1299. A government cartridge factory was established in Quebec in 1882. The number of rounds of ammunition issued in 1894 was: free for practice 644,150 rounds of ball and 103,510 rounds of blank; the issues on repayment were 822,249 rounds.

The number of rifle ranges in the Dominion in 1895 was 106, distributed as follows: No. 1 District, 17; No. 2, 11; No. 3, 8; No. 4, 12; No. 5, 7; No. 6, 10; No. 7, 8; No. 8, 11; No. 9, 19; No. 10, 5; No. 11, 2.

1300. The following is a statement of the regimental establishments of the permanent and active militia for the year ended 30th June, 1895:—

REGIMENTAL ESTABLISHMENTS OF THE PERMANENT AND ACTIVE MILITIA OF CANADA, 1894-95.

*Permanent Militia.*

REGIMENTS OF	Officers.	Staff-Sgts. and Sergeants.	Rank and File.	Total.	Horses.

<b>Total.....</b>		<b>24,270</b>
REVENUE, 1895.		
Casual revenue.....		1,819
Ammunition.....	\$10,136	
Military stores and clothing.....	4,638	
Miscellaneous.....	1,341	
Rents.....	4,056	20,171
Royal Military College.....	\$19,274	
<b>Total.....</b>		<b>41,264</b>

The sums paid for militia pensions amounted to \$31,940 in 1889, to \$30,766 in 1890, to \$28,547 in 1891, to \$27,012 in 1892, to \$26,203 in 1893, to \$25,409 in 1894 and to \$24,270 in 1895.

On the 30th June, 1895, there were only three survivors of the war of 1812.

The amount expended by the department upon the militia and defence of Canada since Confederation was \$36,684,034.

1302 The number of men available for active service in Canada, between the ages of 18 and 45, is about one million. There is, at present, no active marine militia, the naval defences of the country being under the care of the Imperial Government. There are eleven ships on the North America and West India stations, and eight on the Pacific station.

1303. Since Confederation the active militia of Canada have been called upon for service on the following occasions: (1) Anticipated Fenian raid, when 6,000 men were under arms for ten days, April, 1870. (2) Manitoba contingent under Colonel Wolseley, May, 1870; 750 men, afterwards increased to 1,000. (3) Fenian raid (Eccles Hill, &c.), May and June, 1870, 13,489 men with 18 guns were under arms for about ten days. (4) Fenian raid into Manitoba, 3rd October, 1871; 942 men for a few days. (5) In anticipation of disturbance at the interment of M. Guibord (under Imperial Privy Council decision) in Roman Catholic Cemetery at Montreal, November 16th, 1875; about 1,100 men for a few hours. (6) Anticipated riot in St. John, N.B., 12th July, 1876; 45 men, one day. (7) Grand Trunk Railway disturbance, 31st December, 1876; 240 men, two or three days. (8) Quebec riot between ship labourers, 20th June, 1878; 1,300 men, two or three days. (9) Montreal, to maintain peace on 12th July, 1878; 3,000 men for a week. (10) Montreal riots on Ottawa & Occidental Railway, 31st August, 1878; 239 men, four days. (11) Anticipated riots, St. Andrew's, N.B., 17th January, 1879; 45 men, two or three days. (12) Quebec riots, ship labourers, 15th August, 1879; 800 men, three days. (13) Anticipated riots, Long Point, county Norfolk, Ontario, prize fight, 18th January, 1880; 71 men, one day. (14) Port Dover, county Norfolk, one day. (15) Riot at Lingan Mines, Cape Breton, Nova Scotia, miners, 24th March, 1883; 100 men, two and a half months. (16) Anticipated election riot at Rat Portage, 25th September, 1883; 42 men, one day. (17) Pontiac & Pacific Railway, near Aylmer; anticipated disturbance between farmers and labourers, 28th July, 1884; 45 men, one day. (18) Disturbance at Tamworth, Ontario, railway labourers, 6th October, 1884; 44 men, one day. (19) Anticipated riot at Winnipeg, 11th November, 1885; 247 men, one day. (20) North-west rebellion, on actual service, March, 1885; 5,400 men, about three months. Besides these, 1,140 men were held in readiness under canvas, and 942 (at different dates during the rebellion) in barracks at Toronto, Kingston, Prescott and Quebec. (21) Visit to Skeena River, B.C., (from Victoria); anticipated Indian troubles, July 16th, 1888; "C" Battery Canadian Artillery, 41 days. (22) Strike of Italian labourers at Hereford Railway, September 27th, 1888; detachment of 586 Battalion and one troop cavalry, seven days. (23) Anticipated riot between Red River Valley and Canadian Pacific Railway companies, October 31st, 1888; Mounted Infantry School Corps, seven days. (24) Anticipated riot consequent on strike at lumber mills, Hull, P.Q., September 15th, 1891; four companies, two days. (25) Suppression of smuggling in the Lower St. Lawrence River, July 7th, 1892; detachment of "B" Battery Canadian Artillery, twenty days on revenue cutter "Constance." (26) Similar errand, same place, August 9th, 1892; sergeant and four men, "B" Battery, until October, 1892. (27) Anticipated riot of sailors and fishermen at Souris, P.E.I., 19th August, 1893; Prince Edward Island Battery Garrison Artillery, for a few hours. (28) Slight disturbance between ratepayers and county officials at Township of Lowe, 113 officers and men for a few days, 20th November, 1895.

1304. By an Act 56 Vic. Chap. 35 (1873), authority was given for the establishment of a Mounted Police Force, for the better preservation of law in the North-west Territories, the number of men being limited to

Accordingly, in the autumn of the same year, a small force was organized, consisting of 190 men. Subsequent Acts have amended the original provisions in various ways, and the number of men is now limited to 1,000. On the 30th November, 1895, the strength of the force was as follows: 1 commissioner, 1 assistant commissioner, 8 superintendents, 10 inspectors, 5 surgeons, 2 veterinary surgeons, 166 non-commissioned officers, 658 constables, and 53 scouts, &c., making a total of 774. There were also 774 horses, and 15 ponies and mules. The country is divided into seven divisions, exclusive of the depot, and these divisions are subdivided into a total of 83 stations.

305. The duties of the force, as defined by Act of Parliament, are:—

1. The preservation of peace and order, the prevention of crime and the apprehension of criminals.

2. To execute warrants of magistrates, &c., and generally discharge the duties of a constable in relation thereto.

3. To escort prisoners and lunatics to and from jails, asylums, &c.

4. To search for, seize and destroy all intoxicating liquors held contrary to law.

For the better performance of the above duties, it is provided that the force, in addition to special powers, shall have all the powers that any constable has by law.

The amount of work that is yearly done by this force can hardly be realized by any one unfamiliar with the enormous extent of territory that they have to watch. They patrol steadily along the frontier from person to the Rocky Mountains, a distance of 800 miles, keeping down cattle-stealing and smuggling—especially of intoxicants—and in every way are of the greatest possible use, as well as protecting peaceable persons along the border. They also see that the Indians do not leave their reserves, and keep a watch on their actions generally. The maintenance of an ordinance against starting fire on the prairie, with the punishment of offenders, is one of their important duties. They have immediate charge of cattle quarantine on the frontier. They are, in short, responsible for the preservation of law and order throughout a district of upwards of 1,500,000 square miles, and some idea may be formed of the amount of work when it is considered that upwards of 1,500,000 miles are annually patrolled by the force, in the discharge of duty. It is generally admitted that the force constitutes a remarkable fine body of men, and the regulations are strictly adhered to.

As said to be the principal regulations:—

Application, must be between the ages of 22 and 45, of good constitution, and must produce certificates of birth and write either the English or French

language, must understand the care and management of horses, and be able to ride well. The term of engagement is five years, and the rates of pay are as follows:—

Staff-Sergeants, .....	\$1.25 to \$2.00 per day.		
Corporals, .....	85c. "		
	Service Pay.	Good Conduct Pay.	Total per day.
Constables—1st year's service .....	50c.	—	50c.
2nd " .....	50c.	5c.	55c.
3rd " .....	50c.	10c.	60c.
4th " .....	50c.	15c.	65c.
5th " .....	50c.	20c.	70c.

Extra pay is allowed to a limited number of blacksmiths, carpenters, and other artisans. The minimum height is 5 feet 8 inches, minimum chest measurement, 35 inches, maximum weight 175 pounds. No married men are engaged.

Out of 196 men whose time expired during 1894, 152 men re-engaged without leaving, and 28, who took their discharge, afterwards rejoined.

The average height of the present force is 5 feet 9½ inches, and average chest measurement 38½ inches.

1307. There were 1,250 criminal cases tried in the North-west in 1894. Of those tried before the Inspectors of the Mounted Police, 224 were indictable offences, resulting in 169 acquittals and 55 convictions. Of 872 summary convictions in the North-west, 325 were by the Inspectors of the Mounted Police. In 1894 there were 1,036 criminal cases. Of those tried by the Inspectors, 161 were indictable offences, of which 41 were convictions. The summary convictions numbered 363. In 1893 there were 911 criminal cases in all. Of those tried before the Inspectors, 161 were indictable offences, of which 37 were convictions. The summary convictions numbered 277. In 1892, of the cases tried before the Mounted Police, 296 resulted in convictions, 10 being for indictable offences. In 1891, 286 summary, the number of charges for indictable offences being 57.

## CHAPTER XX.

Religious Statistics.—Education.—Provincial Systems.—Insane Asylums.—Charitable Institutions.—Vital Statistics.—Patent Office.—Copyrights and Trade-Marks.—Temperance Statistics.—Divorces.—Historical Archives.—Indian Population.—Chinese in Canada.—Penitentiaries.—Criminal Statistics.

1308. The census returns, relating to religion, are given in paragraphs 273-277.

1309. From the same returns it is learned that there were 10,480 churches in Canada in April, 1891. This is an increase over 1881 of 1,828.

1310. Divided among the denominations, the increase is distributed as follows: Baptists, 324; Roman Catholics, 301; Church of England, 415; Methodists, 322; Presbyterians, 411. All other denominations, 55.

1311. Of the total number of churches, the Methodists have nearly 32 per cent, the Presbyterians and Roman Catholics 17 per cent each, the Church of England 16 per cent, the Baptists 12 per cent, leaving 6 per cent for "all others."

1312. Taking the total population, there is a church provided for every group of 461 persons. Taking the several denominations, the Roman Catholics have one church for every group of 1,115 of their persuasion, the Church of England one for every group of 386 of its adherents, the Methodists one for every group of 251, the Presbyterians one for every group of 428, and the Baptists one for every group of 240.

1313. During the decade 1881-91, the Church of England appears to have been the most active in providing places of worship for the people, the Presbyterians coming next, the Baptists third, the Methodists fourth and the Roman Catholics fifth.

1314. Territorially considered, the Church of England has provided 337 additional churches in the provinces east of Manitoba, and 78 in Manitoba and the other western provinces. Methodists have provided 227 in the eastern and 95 in the western provinces; Presbyterians, 302 and 109 respectively; Roman Catholics, 257 and 44, and the Baptists 305 and 19

the Methodists have established 70 per  
and 30 per cent in the western pro-

vinces. The Presbyterians have built 73 per cent of their increase in the eastern, and 27 per cent in the western provinces. The Church of England 81 per cent in the east, and 19 per cent in the west. The Roman Catholics have apportioned their increase by building 85 per cent of it in the eastern, and 15 per cent in the western, and the Baptists 94 per cent and 6 per cent respectively.

1316. By provinces, the increased number of churches is distributed as follows:—

PROVINCES.	Baptists	Roman Catholics.	Church of England	Methodists.	Presbyterians.	Others
Prince Edward Island.....	16	...	1	1	15	2
Nova Scotia.....	71	18	54	75	38	*10
New Brunswick.....	81	28	28	58	26	*3
Quebec.....	11	113	37	38	42	*13
Ontario.....	126	98	217	55	181	47
Manitoba.....	14	18	30	50	61	30
British Columbia.....	4	7	26	24	8	5
North-west Territories.....	1	19	22	21	40	*3
Total.....	324	301	415	322	411	55

\*Decrease.

1317. The Roman Catholic church in Canada has one cardinal, seven archbishops, twenty-three bishops, and about 1,500 clergy. The Church of England has two metropolitans and eighteen bishops, and about 1,000 clergy. The first colonial see established in the British Empire was that of Nova Scotia, 1787. In 1793 the Canadas were erected into a separate see. In 1839 the See of Toronto was established. In 1849 Rupert's land received its first Anglican bishop, and British Columbia received its first in 1859. New Brunswick became a see, independent of Nova Scotia, in 1845.

1318. The Presbyterians became united as the Presbyterian Church in Canada in 1875. The Methodists were first united into one ecclesiastical organization in Canada in 1883.

1319. The census returns showed that the number of clergymen of all churches in Canada, in 1891, was 7,164, an increase of 735 in the ten years.

## EDUCATION.

1320. Under the British North America Act, 1867, the right to legislate on matters respecting education was placed in the hands of the governments of the several provinces, the rights and privileges of denominational and separate schools then existing being specially protected.

321. The census returns gave 112 universities and classical colleges in Canada in 1891. They were distributed as follows: British Columbia, 5; Manitoba, 5; New Brunswick, 5; Nova Scotia, 10; Ontario, 34; Prince Edward Island, 2; Quebec, 51. Of boarding schools for young ladies, the census returned 318, with 15,302 inmates. The number of persons giving their occupation as teachers was 21,851, showing an increase of 2,619 in five years. There was a decrease of 60 male teachers, and an increase of 19 female teachers. The universities and classical colleges showed an increase of 27, and the young ladies' boarding schools an increase of 44 in number of schools, and of 2,238 in the number of inmates. There is, of course, considerable difference in many details in the public school systems in force in the various provinces, though they are all based on the principle of free education, the funds being supplied by local taxation and government grants.

322. In Ontario the school system is under the control of the Minister of Education, who is a member of the Provincial Government for the time being. In the other provinces there are superintendents and boards of education, who report to the respective provincial secretaries. In Nova Scotia, New Brunswick, British Columbia and Prince Edward Island the schools are purely undenominational. In British Columbia "the highest reality is to be inculcated, but no religious creed or dogma taught." In the other three provinces religious exercises are permitted, but no children can be compelled to be present against the wishes of their parents. In Manitoba the schools were Protestant and Roman Catholic, but an Act passed by the Manitoba House of Assembly, during the session of 1890, providing for the abolition of separate schools—all public schools to be non-sectarian, and religious exercises to be at the option of the school trustees in the district, subject to the regulations of the advisory board. That Act has been the subject of great controversy still unsettled. In Quebec the schools are Protestant and Roman Catholic, and education is based on religious teaching—the Roman Catholic catechism, and, in Protestant schools, the Bible and good text books. In Ontario the schools are undenominational, but Protestants and Roman Catholics are allowed separate schools within certain limitations. Every public and high school is opened and closed with prayer and the reading of the Scriptures, but without comment or explanation. The trustees, however, and clergy of all denominations are empowered to make special arrangements for religious instruction. By this means the best facilities for religious instructions are given, without the assumption on the Government of any responsibility in regard to the instruction imparted.

323. Subject to the approval of the Provincial Government, all regulations for the public and high schools are made by the Minister of Education. The schools are under the control of local boards of trustees, elected by ratepayers, and are allowed to have none but certificated teachers. Education of children between the ages of 7 and 13 is compulsory for not less than 100 days in the year, but the law is by no means as strictly carried out as is desirable in the educational interests of the province. The following table gives particulars respecting the public schools of Ontario in the years 1877 to 1894, Roman Catholic separate schools being included:—

## PUBLIC SCHOOLS, ONTARIO, 1877-94.

YEAR.	Number of Schools Open.	School Population between 5 and 21 Years of Age.	Total Number of Pupils Registered.	Boys.	Girls.	Average Attendance.

1893.....	313	38,067	19,646	18,421	21,863	306,767	270,729	7 11	12 39
1894.....	328	39,762	20,509	19,253	23,328	392,393	337,307	8 48	14 46

1325. The total number of schools open in 1894 shows an increase of 735 over the number of 1883, the number of pupils an increase of 18,834, of which 8,247 were boys and 10,587 were girls. The average attendance increased 52,773.

The increase in the average attendance is a gratifying feature. In 1890 the average attendance was only 47·8 per cent of the number on the roll; in 1894 it was 55·5 per cent. In 1890 the average attendance was 40·6 per cent of the whole number of the school population; in 1893 it was 45·2 per cent.

In 1883 the average number of pupils in attendance for each school was 41, and in 1894 it was 44·9.

In 1883 each teacher had somewhat over 31 pupils on an average; in 1894 each teacher had 30·4.

In 1883 the female teachers numbered 59 out of every 100 teachers; in 1894 they numbered nearly 68.

1326. Separating the Roman Catholic separate schools from the other public schools, it is found that in 1894 the scholars in attendance in the Roman Catholic separate schools were 8·1 per cent of the total number in all the public schools. The Roman Catholics were nearly 17 per cent of the total population of the province. As the scholars in attendance in the Roman Catholic separate public schools were only 8 per cent of the total number in attendance, instead of 17 per cent, to correspond with the proportion the Roman Catholics have in the general population,—either the Roman Catholics have fewer children, or a smaller proportion attend school at all, or many of them attend the other public schools, or many of the public schools, being in districts where the Roman Catholics are the great majority of the population, are practically managed as separate schools.

The Roman Catholic separate schools numbered 328, and the average attendance was nearly 71 pupils to each school against 43 in the 5,649 other schools.

The teachers, in 1894, numbered for the Roman Catholic separate schools 714, and for the others 8,110. Each teacher in the Roman Catholic schools had charge of 32 pupils, and each teacher in the other schools had 30 pupils.

Of the teachers in the Roman Catholic public separate schools, 133 were males and 581 females; about 81 per cent were females. In the others, 67 per cent were females.

The average attendance in the Roman Catholic schools was 58·6 per cent of the number on the rolls. In the others, the average attendance was 55·2 per cent of the number on the rolls.

1327. There were 10 Protestant separate schools, all of which made returns, which show that there were 13 teachers, 2 male and 11 female; 520 pupils, 278 being boys and 242 girls; average attendance, 196; receipts, \$6,510, and expenditure, \$5,222.

1328. The following are particulars concerning the high schools in Ontario in the years 1877-94:—

## HIGH SCHOOLS, ONTARIO, 1877-'94.

Year.	Number of Schools.	Number of Pupils.	Boys.	Girls.	Average Attendance.	Receipts.	Expenditure.	AVERAGE COST PER PUPIL.

1329. In the High schools the number of teachers was 554, giving one teacher for each group of 42 pupils.

Of the total number of pupils the female sex had 51·9 per cent in 1894. They formed 45·6 per cent in 1880. In 1883 the total number of pupils was 11,843, and in 1894 the number of female pupils was 12,205, or 362 more than the total number in 1883.

In 1883 the average attendance was 48·8 per cent of the total number of pupils and in 1864 it was 61·5 per cent.

1330. In 1894 there were in the province 5,697 public school-houses, exclusive of Roman Catholic separate school-houses, of which 2,801 were of brick or stone, 2,443 frame and 451 log. In 1883 there were 5,284 public school-houses, of which 2,324 were brick or stone, 2,343 frame and 617 log. The proportions are, therefore: 1894, brick or stone, 49 per cent; frame, 43 per cent, and log, 8 per cent. 1883, brick or stone, 43·9 per cent; frame, 44·4 per cent, and log, 11·7 per cent. In 1850 there were only 99 brick school-houses in the province; now there are 2,226. In 1830 there were 1,466 log school-houses; now there are only 453. During the past year there were 43 new school-houses added to the equipment of the province, 17 brick, 10 stone and 16 frame.

1331. The following table gives the total receipts and expenditure for public school purposes, 1877-94:—

RECEIPTS AND EXPENDITURE, 1877-94.

YEAR.	RECEIPTS.			EXPENDITURE.

## 1333. KINDERGARTENS, 1891-94.

YEAR.	Number of Kindergartens.	Number of Teachers.	Number of Pupils.	Average Attendance.
.....	66	160	6,375	3,287
.....	85	200	8,056	3,190
.....	85	200	8,767	3,462
.....	90	184	9,340	3,681

A system of kindergarten instruction was first introduced into Ontario in 1872 and afterwards made part of the school system of the province by the Public School Act of 1885. There was an increase of 24 in the number of kindergartens in 1894, as compared with 1891; in the number of teachers, 24, and in the number of pupils, 2,965.

4. The next table gives the number of Teachers' Institutes and the number of members, together with the receipts and expenditure, for the years 1877-94.

## TEACHERS' INSTITUTES, 1877-94.

## NIGHT SCHOOLS.

1835.

YEAR.	No. of Night Schools.	Teachers.	Number of Pupils.	Average Attendance.
1891.....	36	76	9,930	686
1892.....	32	63	2,903	540
1893.....	28	65	2,492	522
1894.....	95	84	1,037	444

1336. There were also seven Art schools in operation, with, as far as can be ascertained, about 650 pupils. In connection with and under the control of the Department of Education were 289 Mechanics' Institutes, with over 439,456 books, and about 31,195 members. Their property was valued at \$423,476, with liabilities of \$14,896. Besides these there were twelve free libraries with upwards of 165,263 volumes and 67,233 readers, with assets amounting to \$328,950 and liabilities \$106,050.

The total number of pupils attending public, separate, high, normal and model schools in Ontario, not including colleges and private schools, was 507,904, an increase of 2,603 as compared with 1893.

1337. The second Friday in May in each year has been set apart under the name of Arbor Day, for the purpose of planting trees and improving the school grounds. In 1885 on that day, 38,940 trees, in 1886, 34,087 trees, in 1887, 28,057 trees, in 1888, 25,714 trees, in 1889, 21,281 trees, in 1890, 22,250 trees, in 1891, 15,697 trees, in 1892, 14,489 trees, in 1893, 14,103 trees, and in 1894, 14,244 trees were planted.

1338. The following table gives the number of teachers receiving superannuation allowances and the amount paid to them during the years 1880-95 :—

SUPERANNUATED TEACHERS, 1880-95.

## QUEBEC.

1339. Educational matters in the Province of Quebec are under the control of the Superintendent of Public Instruction, assisted by a council consisting of 35 members, and divided into committees for the management of Roman Catholic and Protestant schools, respectively. The schools are maintained partly by local taxation and partly by Government grants, and are individually controlled by local boards, or by the local clergy. As previously stated, religion is assumed to be the basis of education, and the

various Roman Catholic religious bodies and institutions are largely interested in such matters.

The school annals of the Province of Quebec are highly interesting. The first attempt to give instruction was made by the Recollets in 1616. In 1632 the Jesuits opened schools for the Indians. In 1637 a college was started in Quebec City. In 1639 the Ursuline Convent was founded—the first girls' school in Canada. In 1663 Mgr. Laval, Bishop of Quebec, established a seminary that became Laval University. In 1801 the Legislature passed an Act to establish free schools. In 1829 the Legislature passed an Act for the encouragement of elementary education.

The following table gives the number of educational institutions of all grades in the province:—

EDUCATIONAL INSTITUTIONS IN QUEBEC, 1894-95.

INSTITUTIONS.	Under Control of Municipalities.	Independent.	Elementary.	Superior.	Totals.
<i>Roman Catholic Schools.</i>

Grand total .....	147,328	146,626	258,638	35,316	295,411	229,859

1341. The number of Roman Catholic pupils in elementary schools was 172,223 and of Protestants 25,808, while in model schools and academies Roman Catholics were 79,933 in number and Protestants 8,216.

1342. The average attendance of pupils in elementary and superior schools was 146,351 and 74,817 respectively.

1343. The total number of teachers was 9,799, but exclusive of universities, special schools and religious orders the number was 5,960, of whom 4,652 were Roman Catholics and 1,308 Protestants, and the total amount paid to these for salaries was \$848,283, the average salary having been \$143. The teachers in religious orders numbered 3,527.

1344. The following particulars relating to the schools of Quebec are taken from the annual reports of the province.

## EDUCATIONAL STATISTICS, QUEBEC, 1892 TO 1895.

## NOVA SCOTIA.

1345. The Council of Public Instruction in Nova Scotia consists of the members of the executive council. There is also a superintendent of education. The local management of the public schools is in the hands of trustees, chosen by the ratepayers of the section.

The school annals of Nova Scotia go back to 1748, when the Lords of Trade and Plantations arranged, at the time steps were being taken to start settlement in Chebueto Bay, with the “society for the propagation of the Gospel in foreign parts,” for the establishment and maintenance of schools in certain rural localities in Nova Scotia, grants of land being awarded the

society to reimburse it. In 1780 an Act was passed for the establishment of a public grammar school in Halifax. In 1811 an abortive attempt was made by the Legislature to lay the foundation of a general educational system. In 1820 a more elaborate Educational Act was passed, the grants under it in the first year amounting to £2,500. In 1832 the total grant in aid of education was £4,000. In 1841 the provincial grant was increased to £5,000, and a Central Board established to give uniformity to the operations of the Boards of Commissioners. Further modifications were introduced in 1845, when the aggregate legislative grant was raised to £11,700. The Act of 1850 provided for a superintendent of education, the first to receive the appointment being a native of Nova Scotia, J. W. Dawson, now Sir William Dawson. In 1854 the Provincial Normal School was established. In 1864, under the guidance of Hon. Charles Tupper (now Sir Charles, Bart.), the Legislature laid the foundations of the present Public School system. At the ensuing session in 1865 the province led the way among all the Colonies of the British Empire in making local assessment for the support of schools the necessary basis for their legal recognition. In 1857 the province (first of all the Colonies of the Empire) voted an appropriation (£1,000) in support of a deaf and dumb institution. Nova Scotia has four universities: 1st, King's College, founded in 1788 and incorporated in 1802 by Royal Charter; 2nd, Dalhousie College, founded by Earl Dalhousie in 1821, its original endowment being derived from funds collected at the Port of Castine, in the State of Maine, during its occupancy by Sir John Sherbrooke, then Lieut.-Governor of Nova Scotia; 3rd, Acadia College, and 4th, St. Francis Xavier College.

1346. There were 2,305 schools in the province in 1895; the number of pupils enrolled was 100,555, and the average attendance 54,006, the latter having been 65 per cent of the number registered, as compared with 62 per cent in 1894. Attendance at the public schools of children between the ages of 7 and 12 is by law compulsory, but the regulation is not strictly enforced. The total number of teachers employed was 2,399.

The proportion of the population enrolled in the public schools, based on the estimated population of the province in 1895, was 1 in 4·5.

1347. The total Government expenditure for public school education during 1895 was \$238,760; the county fund amounted to \$119,900, and the sectional assessments to \$453,144, the three amounts making a total expenditure of \$811,804.

The census returns for 1891 showed that there were in Nova Scotia 570 persons who were deaf and dumb. Of these 255 were females and 315 males. Of the females 10 were blind as well as deaf and dumb, and 23 were insane as well as being deaf mutes. Of the males 18 were blind as well as deaf and dumb, 28 were insane as well as being deaf mutes.

Thus, of those afflicted with deaf mutism about 14 per cent were afflicted with blindness or insanity. Four per cent of the female deaf mutes were also blind, and nine per cent were insane as well as being deaf and dumb. Of the males 5·7 per cent were blind as well as being deaf mutes, and 9 per cent were insane in addition to being deaf and dumb.

1348. The following table of educational statistics explains itself:—

9 months.

In 1877 the population of Nova Scotia was 440,572, and in every group of persons there were 100 going to school. In 1891 the population was 525 and in every group of 525 persons there were 100 going to school. 6 per cent of the population were going to school in 1881 and 19 in 1891.

In 1877 boys constituted 55.4 per cent of the pupils and girls 44.6 per cent. In 1895 boys formed 51.6 per cent and girls 48.4 per cent. The proportion of the population in the public schools in recent years has contributed a larger proportion of the pupils in recent years than in the earlier years. The number of males of all ages in Nova Scotia in 1891 was 227,093. The pupils at the public schools numbered 52,804 or 23.2 per cent, and girls, 37,776 or 16.6 per cent.

In the whole province there were, according to the census, 83,733 families. The number of pupils in the public schools of both sexes being 81,304,

about 97 per cent of the homes, taken in the large, would be represented in the school-room.

months only. † Amount paid by Government only.

Victoria School of Art, Halifax, there were 115 students, being  
of 40 over the previous year. The receipts amounted to \$1,702  
expenditure to \$1,911.

## NEW BRUNSWICK.

1349. The school annals of New Brunswick date back to the beginning of the century, the first Act relating to education having been passed in 1802. By this Act the sum of £10 was granted to each parish to be apportioned to the schools by the Justices of the General Sessions of the Peace. The Act of 1816 authorized the General Sessions to appoint three trustees of schools for each town and parish, whose duty it was to raise money for the support of the schools, either by local subscriptions or assessment, the amount to be not less than \$120, nor more than \$360. The provincial aid was payable to the trustees and was not to exceed \$240 per year for the town or parish. A great step in advance was made in 1845, when the Lieut-Governor and the Executive Council were constituted a Board of Education for the province, with power to establish a training and model school at Fredericton, and to appoint two instructors of schools for the province. The provincial aid to teachers was made by warrants to the trustees. The Act of 1852 authorized the government to appoint a chief superintendent. The Act of 1858 repealed all previous Acts and provided for a Board of Education, defining its powers: a chief superintendent; the appointment of four inspectors for the province; the continuance and extension of the training and model school; the increase of provincial allowance to teachers, and the establishment of superior schools and of district libraries. It also provided that schools may be supported by direct assessments. The schools Act of 1871 provides, in addition to the provisions of the Act of 1858, that the schools shall be supported by assessment and be free and unsectarian.

An Act of 1805 provided for the establishment of a grammar school in the city of St. John, and that £100 should be paid annually from the funds of the provinces towards the master's salary. This was the first grammar school in the province. An Act of 1816 provided for the establishment of a grammar school in the town of St. Andrew's, and an Act of 1849 provided for the establishment of a grammar school in each county of the province.

The University of New Brunswick was established by provincial charter in 1800; founded and incorporated by royal charter in 1828, and reorganized by an amended charter in 1860. The history of the collegiate school is concurrent with the history of the university.

The provincial Board of Education of New Brunswick consists of the Lieutenant-Governor, the members of the Executive Council, the President of the University of New Brunswick, and the Chief Superintendent of Education.

1350. The total number of pupils enrolled during the year 1894 was 69,648, being an increase of 178; there was an increase in the number of schools, as well as an increase in the number of teachers, owing to more assistance being provided in schools where the attendance was large. The average daily attendance for the year was 58.48 per cent, that for the term ended 31st December, 1893, having been 61.89 per cent, and for that ended 30th June, 1894, 56.64 per cent. The proportion of the population attending the public schools in 1894 was 1 in 5.2.

The Government expenditure for the year on public schools was \$2; the county fund amounted to \$92,281, and the district assessment, 166, making a total of \$426,330. The average cost per pupil, of the pupils of superior and grammar schools, was \$6.13. The total expended by the Government in 1894, including grants, salaries, &c., was \$171,561, being 40 per cent of the total expenditure on of public education.

Arbor Day, on the same principal as that in Ontario, was held on May 1, 1894, when 2,684 trees and 607 shrubs were planted, and 572 seeds laid out.

The following table gives the educational statistics for the years 1877-84—

## NEW BRUNSWICK EDUCATIONAL STATISTICS, 1877-94.

An analysis of the census of the deaf and dumb of the Province of New Brunswick shows that there were 443 persons thus afflicted. Of these 44 were blind or insane as well as deaf and dumb. Three persons were recorded as being deaf, dumb, blind and insane. Fourteen males and 2 females were deaf, dumb and blind, and 19 males and 7 females were deaf, dumb and insane. The total males deaf and dumb were 266, and the total of females was 175.

Thus, 10 per cent of the total number of deaf and dumb were truly afflicted. Of the males 12.4 per cent were afflicted with three-fold deprivation, and of the females 5.1 per cent were thus afflicted. Somewhat over 1 per cent of the female deaf mutes were also blind, and just 4 per cent

were insane in addition to being deaf and dumb. Of the males 7.1 per cent were insane as well as deaf and dumb, and 5.3 per cent were blind in addition to being deaf and dumb.

The total Receipts and Expenditures by the Province of New Brunswick for school purposes, during the years 1877-94, are as follows:—

## RECEIPTS AND EXPENDITURES.

YEAR.	RECEIPTS.				Expenditure \$

\* The receipts in 1883 are for eighteen months. \*\* For ten months.

† The receipts in 1885 are for eight months.

‡ Not including receipts from district assessment for school buildings, &c.

§ Not including expenditure from district assessment for school buildings, &c.

The average cost per pupil, including the pupils of superior and grammar schools, was \$6.85.

## MANITOBA.

1354. The control of educational matters in Manitoba was formerly in the hands of a Board of Education, divided into two sections, one Protestant and one Roman Catholic; but by the Act of 1890, this arrangement, together with the separate school system, was abolished, and a department of education established, consisting of the executive council and an advisory board composed of seven members, four appointed by the Department of Education, two by the public and high school teachers, and one by the Council of the University of Manitoba. The validity of the above Act was called in question and the matter carried through the courts to the Imperial Privy Council.

1355. Two sections of land, 640 acres each, in every township, are reserved and held in trust by the Dominion Government as school lands for the purpose of aiding and promoting education, and it is estimated that upwards of 1,500,000 acres are available for settlement. These lands were for many years purposely kept out of the market in order to allow their value to increase; but in January, 1888, a number of sections were offered for sale at several points in the province, when 19,986 acres were disposed of for the sum of \$140,189, being an average of about \$7 per acre; in January, 1892, 53,030 acres were sold by auction, and realized \$421,518, being an average of \$7.95 per acre, and again in January and February, 1893, 12,603 acres were disposed of for the sum of \$89,505, or an average price of \$7.10 per acre.

1356. The progress of education in Manitoba has been very rapid, as the following figures show. The figures previous to 1890 are for Protestant schools only:—

EDUCATIONAL STATISTICS OF MANITOBA, 1883 TO 1895.

YEAR.	Number of Schools.	Number of Teachers.	School Population.	Number of Pupils.	Average Attendance.
1883.....	256	246	12,346	10,831	5,064
1884.....	326	359	14,129	11,708	6,320
1885.....	390	476	15,850	13,074	7,847
1886.....	422	525	16,834	15,926	8,611
1887.....	464	581	17,600	16,940	9,715
1888.....	495	675	18,850	18,000	9,866
1889.....	524	668	21,471	18,358	11,241
1890.....	627	840	25,077	23,256	11,627
1891.....	612	866	28,678	23,871	12,433
1892.....	600	902	29,564	23,244	12,975
1893.....	718	997	34,417	28,706	14,140
1894.....	884	1,047	36,459	32,680	16,280
1895.....	982	1,093	44,932	35,371	19,318

In 1895 there were 761 school-houses in the province, of which 636 were frame, 38 brick, 16 stone and 71 log. The number of trees planted was 5,595.

1357. The school age is 5 to 16 years, inclusive, and from the above table it will be seen that the average attendance was 43 per cent, while the proportion of the population at school was 1 in 5.7. Figures such as these not only demonstrate the wonderful progress of the province during the last 20 years, but must effectually dissipate any ideas that intending settlers might have about the difficulty there would be in educating their children, and must convince them that life on the prairies does not mean life without the most important benefits of civilization. Collegiate departments for more advanced education are attached to the public schools at Winnipeg, Portage la Prairie and Brandon, and the total number of pupils enrolled during the year was 370, 80 and 167 respectively. There is also a Normal School in Winnipeg for the training of teachers.

following table gives the particulars of Normal Schools in Manitoba, 5:—

## NORMAL SCHOOLS.

YEAR.	TEACHERS.		Number of Students at Long Sessions.	Number of Students at Short Sessions.
	Provincial Normal.	Local Normal.

.....	142,989	481,828	892,056	378,656	118,519	62,314	797,542

amount of debenture indebtedness was \$741,134, and the value of coal sites, houses and furniture was estimated at \$1,128,518.

## BRITISH COLUMBIA.

The educational system of British Columbia is free, undenominational and supported entirely by the Government. There is a

Superintendent of Education, acting under the Provincial Secretary, each school is locally controlled by trustees, elected by the ratepayers of each school district. The Lieutenant-Governor in Council is empowered to create new school districts as they become necessary, provided that each school district shall contain less than 15 children of school age, between 5 and 16 years of age.

1359. There was a general increase in schools, teachers and pupils during the year ended June 30th, 1895. The increase in the total number of schools was 13, in that of teachers 24, and in that of pupils 869, while the percentage of attendance was 63.86 per cent, being an increase of 2.3 per cent as compared with 1894.

1360. The educational progress of the province is illustrated by the following figures: In 1873 there were 25 school districts, 1,028 pupils, and the expenditure amounted to \$36,764; in 1895 corresponding figures were: school districts, 185; pupils, 13,482, and expenditure, \$189,037.

1361. The cost of each pupil on enrollment was \$14.02, and on average daily attendance \$22.95, being a decrease as compared with 1894. The whole of the expenditure is borne by the Government.

1362. The following table shows the number of schools, teachers and pupils in each class:—

# EDUCATIONAL STATISTICS OF BRITISH COLUMBIA, 1877-95.

## PRINCE EDWARD ISLAND.

1363. Educational matters in Prince Edward Island are under the control of a Board of Education appointed by the Government, and of a Chief Superintendent, and are supported by Government grants and partly by district assessments. The Government expenditure in 1895 was \$121, and that of the school boards \$39,426, making a total expenditure of \$160,426, being an increase of \$1,276 as compared with 1894.

1364. The school age is between the ages of 5 and 16, and it was estimated that there were upwards of 24,000 children between those ages in 1895, of whom 22,250 attended school during some portion of the year. The figures show an increase of 29 in the number of pupils enrolled and 40 per cent in the daily average attendance, and the percentage of attendance was 56 per cent as compared with 58.00 per cent in the previous year. The number of vacant schools in 1895 was 2, while in 1882 there were no less than 19. An Arbor Day was established in 1886, but the results have not been very extensive.

1365. The following table is a summary of the educational statistics of the province, 1885-95 :—

YEAR.	No. of School Departments in Operation.	No. of Teachers.	Pupils Enrolled.	Average attendance.	Percentage of attendance.	EXPENDITURE.		
						Government.	School Board.	Total.
						\$	\$	\$
1885.....	507	494	21,083	12,166	55.34	109,317	36,282	145,599
1886.....	509	498	22,414	12,612	56.27	111,992	36,787	148,779
1887.....	510	505	22,460	12,325	54.87	110,485	36,294	146,779
1888.....	512	509	22,478	12,248	54.49	108,846	38,609	147,455
1889.....	523	518	23,045	13,159	57.10	108,092	37,810	145,902
1890.....	529	529	22,530	12,490	55.43	113,626	37,610	151,236
1891.....	531	531	22,330	12,898	57.75	111,154	35,629	147,783
1892.....	538	538	22,169	12,986	58.58	114,570	36,542	151,112
1893.....	543	543	22,292	12,960	58.13	118,106	34,592	152,698
1894.....	556	553	22,221	12,849	58.00	122,077	37,854	159,931
1895.....	561	559	22,250	13,250	59.56	121,781	39,426	161,207

In 1895 there were 461 schools in the province, and 302 male teachers and 257 female teachers. The highest and lowest salaries paid under each grade of license are as follows :—

		Highest.	Lowest.
First class,	Male .....	\$786	\$310
"	Female.....	368	314
Second class,	Male .....	437	225
"	Female.....	405	180
Third class,	Male .....	241	180
"	Female.....	301	130

#### NORTH-WEST TERRITORIES.

1366. The educational system of the North-west Territories is under the control (within its attributes) of a Council of Public Instruction, consisting of the Executive Committee (4) and four appointed members without votes.

The law provides that no school district shall comprise an area of more than 25 square miles, nor shall it contain less than four resident heads of families, or a smaller school population than 10, i.e., children between the ages of 5 and 20.

No religious instruction is allowed in any public school before 3 o'clock in the afternoon, at which time such instruction as is permitted by the trustees may be given, parents having the privilege of withdrawing their children at that hour, if desired.

1367. The following comparative figures show what progress has been made of late years :—

YEAR.	Schools in Operation.	Teachers.	Pupils.
1887.....	111	125	3,144
1892.....	249	296	6,179
1894.....	330		8,925
1895.....	395		10,003

The following are the figures for the year 1895: number of schools—Public, 338; Roman Catholic, Public, 44; Roman Catholic, Separate, 11; and 2 Protestant Separate Schools. Number of pupils in attendance, 10,003.

The expenditure for schools in 1894 was \$121,057.

1368. The following is a concise summary of the preceding tables. Owing to the fact that the various provinces issue their reports at different periods, it is not possible to give the figures for the whole Dominion at a given date; but as, year by year, returns are made for, as nearly as possible, the same periods of those given below, the figures are almost as valuable for comparison as if they all represented the same year :—

EDUCATIONAL STATISTICS OF THE PUBLIC, HIGH, NORMAL, AND  
MODEL SCHOOLS OF CANADA.

† 1894.

a Included in public schools.

1369. The Public School expenditure in the Dominion and the several provinces per head of the population, the proportion the Government grants bear to the total revenue and the proportion that the grants of the several Governments and the people's assessments respectively bear to the total expenditure are given in the following tables:—

EXPENDITURE PER HEAD.

	1888.	1893.
Ontario.....	\$1 87	\$1 87
Quebec.....	0 81	0 87
Nova Scotia.....	1 51	1 45
New Brunswick.....	1 26	1 31
Prince Edward Island.....	1 36	1 40
Manitoba.....	2 74	4 84
British Columbia.....	1 40	1 87
Dominion*.....	1 56	1 90

\*North-west Territories included.

The proportion of the Government grant to total revenue of each province :—

	1888. Per cent.	1893. Per cent.

Quebec.....	4·23	3·89
Nova Scotia.....	29·62	22·59
New Brunswick.....	21·14	23·34
Prince Edward Island.....	42·82	54·31
Manitoba.....	23·20	19·57

Proportion of total grant to public school education paid by Government and by assessment :—

PROVINCES.	BY GOVERNMENT.		BY PEOPLE.	
	1888. Per cent.	1893. Per cent.	1888. Per cent.	1893. Per cent.
Ontario.....	7·11	7·11	92·89	92·89
Quebec.....	9·25	12·81	90·75	87·19
Nova Scotia.....	31·24	*23·46	68·76	*76·54
New Brunswick.....	33·56	40·48	66·44	59·52
Prince Edward Island.....	73·82	77·34	26·18	22·66
Manitoba.....	21·58	17·18	78·42	82·82

\*1892. The figures for 1893 are for 9 months only.

1370. Taking the provinces mentioned the average expenditure per head of their population is, for 1888, \$1.56, and for 1893, \$1.90 ; showing an increase of 34 cents, equal to 21·00 per cent in five years, which is a larger increase than the increase in the population. By provinces it appears: 1st, that Ontario's expenditure in 1893 remains the same as in 1888; 2nd, that Quebec has increased her expenditure by six cents per head, but is still a long way behind the other provinces ; 3rd, that of the Eastern Maritime provinces, two have increased their per head expenditure and one, Nova Scotia, has decreased hers, though still 14 cents per head in advance of New Brunswick and 5 cents in advance of Prince Edward Island. and that in comparison with Ontario the expenditure of the three Eastern provinces is 48 cents per head less ; 4th, that British Columbia spends on public school education the same amount per head as Ontario, and consequently more than the Eastern provinces ; 5th, that Manitoba appears to expend on education more than any of the other provinces, and has in-

creased her expenditure over 76 per cent, her population having increased in the same period 50 per cent; 6th, that in four of the provinces the proportion which the Government grant towards education bears to the total revenue at the disposal of the Government is less and in two is greater, in 1893 than in 1888, and that in the Province of Prince Edward Island more than one-half the whole revenue of the Government is devoted to educational purposes; 7th, that the people's assessments have increased proportionately to the Government grant in Nova Scotia and Manitoba; have decreased in Quebec, New Brunswick and Prince Edward Island, and have remained the same in Ontario; that Ontario shows the people's assessment to be higher in proportion to the grant made by the Government than any of the other provinces, being closely followed by Quebec.

1371. In the Year-Book, 1889, a concise history was given of all the principal higher educational institutions in the country, which it is not considered necessary, at present, to repeat, but the following summary table has been revised and shows that the value of their buildings, endowments, &c., was upwards of \$16,000,000, and that some 13,000 students were attending them. If the students attending these institutions, as well as those receiving tuition at a large number of private establishments, particulars of which cannot be obtained, are added to the pupils of the public, high and normal schools, it will be seen that the whole number of those undergoing instruction of some kind is considerably over one million, so that more than one-fifth of the population of Canada is at the present time receiving direct education.

Denominationally the higher educational institutions are as follows:—

King's College, Windsor; Bishop's College, Lennoxville; Bishop's College School, University of Trinity College, Toronto; St. John's College, Winnipeg; Wycliffe College, Toronto; Hellmuth Ladies' College, London, are under the control of the Church of England.

The University of Ottawa; St. Michael's College, Toronto; Laval University, Quebec; St. Boniface College, Winnipeg, are under control of the Roman Catholic Church.

The University of Queen's College, Kingston; Knox College, Toronto; Presbyterian College, Montreal; Manitoba Presbyterian College, Winnipeg, and the Brantford Ladies' College, are under control of the Presbyterians.

The University of Mount Allison College; The Wesleyan Theological College, Montreal; The Wesleyan Methodist College, Winnipeg; The Whitby Ladies' College; The Alma Ladies' College, St. Thomas; The Wesleyan Ladies' College, Hamilton, are under the control of the Methodists.

Acadia College University, Wolfville, N.S.; McMaster University, Toronto; Woodstock College, and Moulton Ladies' College, are under the control of the Baptists.

ESTIMATED number of males of voting age in 1894 :—

PROVINCES.	Number of Voters on Electoral Lists.	PROVINCES.	Number of Voters on Electoral Lists.
Ontario.....	587,733	British Columbia.....	57,680
Quebec.....	366,577	Prince Edward Island.....	27,008
Nova Scotia.....	118,221	Territories.....	47,531
New Brunswick.....	81,211	Canada.....	1,345,670
Manitoba.....	59,709		

Examination of the above tables shows that : 1st. The Franchise Act of 1885 broadened the franchise very considerably, the number of voters in proportion to population being in 1887, 21.49 per cent against 18.60 per

cent in 1882. 2nd. That the voters' lists of 1891 give 1,132,201 persons in the Dominion qualified under the provisions of the Act to vote for members of the House of Commons; that the census returns give the number of persons of the voting age at 1,268,310; that, thus, there were 136,109 more persons of the voting age than there were voters on the lists, indicating that when the duplications of names on the voters' lists are taken into account there were considerably more than 136,109 persons of the voting age who did not possess the franchise, or possessing it had neglected to have their names on the lists. 3rd. That the electoral lists of 1894 contain a greater number of names than the estimated number of persons of the voting age, indicating either that the duplication of names has been very much greater in the preparation of these last lists, or that practically the Franchise Act provides universal suffrage.

The following analysis gives the provinces in which the voters' lists contain more names than the census gives persons of the voting age and those in which the voters' lists contain fewer names. It will be seen that the provinces in which the voters' lists give more names than the census returns are Manitoba and Ontario. All the other provinces show more names on the census returns of persons of the voting age than are on the voters' lists. The duplication of voters on the lists must therefore be abnormally large in Ontario and Manitoba, in both of which provinces persons having more votes than one, and, consequently, being on more than one voting list, are relatively more numerous than in the other provinces.

INSANE.

1373. The number of insane in Canada in 1891 as obtained by the census was 13,355, of which 7,162 were males and 6,193 females.

In every 10,000 males there were 29·1 insane, and in every 10,000 females there were 26·1 insane.

The insane classified according to civil condition were : single, 9,506 ; married, 2,815 ; widowed, 721 ; unknown, 313.

Of the single, 5,441 were males and 4,065 females ; of the married, males were 1,239 and females 1,576 ; of the widowed, 218 were males and 503 females, and of the unknown, 206 were males and 107 females.

According to ages there were 762 insane under 15 years old ; 701 between 15 and 19 years old ; 2,429 between 20 and 29 ; 2,643 between 30 and 39 years ; 5,369 between 40 and 69 years ; 878, 70 years and over, and 576 whose ages were unknown.

Under 15 years the percentage was 0·04 ; between 15 and 19 years it was 0·13 ; between 20 and 29 it was 0·28 ; between 30 and 39 it was 0·45, and between 40 and 69 years it was 0·57 per cent, showing a larger proportion of the insane among the population between 40 and 69 than among other age groups.

According to nativity, 5,853 of the insane were born in Canada of parents who were both born in Canada ; 2,793 were born in Canada of foreign-born parents ; 612 were born in Canada of parents one of whom was born in Canada and 3,044 were foreign-born ; 1,053 were born in Canada, but the birth-places of their parents were unknown.

These constitute two groups : 1st, those whose parents were foreign-born, and, 2nd, all the others. The first group have 90 insane in every 10,000 of the foreign-born population. The second group have 18 insane in every 10,000 of the native born.

Divided by provinces the insane are distributed as follows :—

	Census of 1891 Per 10,000 of the people.
British Columbia .....	93·2 insane.
Manitoba .....	12
New Brunswick .....	27
Nova Scotia .....	30
Ontario .....	28
Prince Edward Island .....	30
Quebec .....	30
The Territories .....	5

1374. With the exception of Nova Scotia and Quebec, the principle adopted throughout the Dominion in the treatment of insane is that known as State-cure, and even in the case of the two provinces named the institutions are subject to the supervision of Government inspectors. Nova Scotia has the county farm system in part, and Quebec wholly so.

There are 17 asylums for the insane in Canada, all of which are supported entirely by Government, aided in some cases by municipalities, and the following table gives particulars of the number of patients, &c. :—

## ASYLUMS FOR THE INSANE IN CANADA.

## INMATES AND DEATHS.

Total.....	17		5,274	5,010	10,284	714	

In addition to the particulars given above there were 492 persons of unsound mind in the Halifax city asylum and poor-house and county asylums and poor-farms.

1375. In Ontario, on 30th September, 1895, there were 4,614 persons in the provincial asylums, and 18 in the Homewood Retreat, Guelph : 25 insane convicts in Kingston Penitentiary, and 25 insane persons in the common jails, making a total of 4,683 persons of unsound mind under public accommodation, while there were 91 applications for admission on hand, making a total of 4,779 persons of unsound mind known to the provincial government. The census of 1891 gives the total number in the province as 5,855. The number of insane in this province is increasing in greater ratio than the population.

1376. The following table gives such particulars as are available concerning principal public charitable institutions in Canada. Ontario is

the only province that publishes complete details of its various institutions ; and no particulars are available of the General Hospital in Montreal, or of the charitable institutions in the Province of Quebec, other than those given below :—

\* Not given.

The above figures show a Government expenditure of \$1,556,167, to which may be added the sum of \$55,725, given as Government aid in the Province of Quebec to charities generally, making a total Government expenditure of \$1,611,892. It is probable that the Government aid actually mounted to a larger sum, but it is difficult to get the exact figures from the various provincial accounts.

## TEMPERANCE.

1378. By the Canada Temperance Act, 1878 (commonly known as the "Scott Act," from the name of the member of the Senate who introduced it), it is provided that any county or city may petition the Governor General in Council praying that the Act shall be put in force in such county or city. Such petition must be signed by at least one-fourth of all the electors in the district applying. A proclamation is then to be issued, naming a day on which the votes of the electors are to be taken for or against the adoption of the petition, at which election only persons qualified to vote at the election of a member of the House of Commons are entitled to vote. If the adoption of the petition is carried, an Order in Council may be issued, bringing into force that part of the Act which provides "that no person shall, within such county or city, by himself, his clerk, servant or agent, expose or keep for sale, or directly or indirectly, on any pretence or upon any device, sell or barter, or in consideration of the purchase of any other property, give to any other person any intoxicating liquor." Certain provisions are made for the sale of wine and intoxicating liquor for sacramental, medicinal and mechanical purposes, and for the disposal of the manufactures of brewers and distillers. Such Order in Council cannot be revoked until after the expiration of three years, and then only on a similar petition and election, and if the result of the first election is against the adoption of the petition, no similar petition shall be put to the vote of the electors for a like period of three years. It is also provided that every person who, by himself or another, violates the above provision against the sale of intoxicating liquor, shall, on conviction, be liable, for the first offence, to a fine of \$50; for the second offence, \$100; and for the third and every subsequent offence, imprisonment not exceeding two months.

1379. The following are particulars of the results of the various elections that have been held under the Act, since it came into force:—

1380. Since the passing of the Act it has been submitted to the electors 135 times. Three times in 1878, 10 in 1879, 5 in 1880, 14 in 1881, 4 in 1882, once in 1883, 22 in 1884, 28 in 1885, 4 in 1886, once in 1887, 12 in 1888, 22 in 1889, once in 1890, twice in 1891, 3 times in 1892, once in 1893, and twice in 1894.

It is in force in 29 places. It was submitted to the people four times in Fredericton, N. B., and carried on each occasion. Westmoreland voted on it three times and carried it each time. Charlottetown voted on it 5 times, carried it three times, rejected it the fourth, and adopted it on the fifth occasion. Lambton voted on it 4 times, carrying it the first time, defeating it the second, carrying it the third, and defeating it the fourth. Halton carried it on the first and second voting but rejected it on the third. Stanstead sandwiched a carry between two rejections. St. John city defeated it on the two occasions it has had the opportunity to vote on the Act.

1381. The Act has been submitted to public opinion in nine cities and 71 counties. It is in force in two cities and 27 counties.

The following is a summary :—

Carried four times and still in force.....	1
“ three “ .....	1
“ twice “ .....	5
“ once “ .....	21
“ three times, rejected the fourth, carried the fifth. ....	1
At present in force .....	29
Defeated the first time and not submitted again .....	16
Carried the first election but defeated the second. ....	30
Carried twice and lost twice.....	1
Carried once and lost twice.....	1
Carried twice and lost once.....	2
Lost twice and not carried at all.....	1
	51

1382. Richmond county, P. Q., is under the old Dunkin Act, but an election was held in 1888 on petition to repeal that Act. It resulted in the defeat of the petition.

1383. The following statement gives the places in which the Canada Temperance Act was in force on the 31st December, 1894 :—

Albert, N.B.,	Guysboro', N. S.,	Prince, P.E.I.,
Annapolis, N.S.,	Hants, N.S.,	Queen's, N.B.,
Brome, Que.,	Inverness, N.S.,	Queen's, P.E.I.,
Cape Breton, N.S.,	King's, N.S.,	Queen's, N.S.,
Carleton, N.B.,	King's, P.E.I.,	Shelburne, N.S.,
Charlotte, N.B.,	King's, N.B.,	Sunbury, N.B.,
Charlottetown, P.E.I.,	Lisgar, Man.,	Westmoreland, N.B.,
Cumberland, N.S.,	Marquette, Man.,	Yarmouth, N.B.,
Digby, N.S.,	Northumberland, N.B.,	York, N.B.
Federicton, N.B.,	Pictou, N.S.,	

1384. The Canada Temperance Act is in force in one district in the Province of Quebec, in two in the Province of Manitoba, in 11 in the Province of Nova Scotia, in 11 in the Province of New Brunswick and 4 in the Province of Prince Edward Island.

In the provinces of Ontario and British Columbia the Act is no where in force. One county in Quebec province (Richmond) is under the Dunkin Act.

1385. According to the returns there were during the period 1884-94, 132,287 convictions for drunkenness. This is an average of 12,026 a year. The convictions in 1894 were 11,558. They were therefore 468 below the average. The annual average of the period 1884-94 is 2,394 convictions in every 1,000,000 of the people. The convictions have, therefore, decreased 4 per cent in 1894, as compared with the average of the 1884-94 period. It is, of course, impossible to tell whether this decrease is due to decrease in drinking or to decrease in activity of prosecuting those who get drunk.

1386. The convictions for drunkenness in the several provinces are given in the following table :—

It appears from this table that in 1894 out of every group of 667 of the inhabitants of Ontario one had been convicted of drunkenness, out of every group of 359 of the people of Quebec one had been convicted of drunkenness, while in the Province of Nova Scotia one out of every group of 361 had been so convicted. Ranged according to position with respect to sobriety, as tested by convictions, the provinces stand thus : Ontario, Prince Edward Island, The Territories, Nova Scotia, Quebec, Manitoba, New Brunswick and British Columbia. In the returns of 1892, as in previous years, the convictions before the North-west Mounted Police were not included.

The commissioners appointed to investigate the liquor traffic say :—

"The convictions for drunkenness and offences against the liquor laws, taking the whole Dominion, reached the highest point in 1888, since which date there has been a gradual reduction in the total of the combined offences. The Scott Act ceased to be in force in 10 counties in 1888 and in 19 counties in 1889 in which it had been previously adopted, and the Dunkin Act was put in force in one county, viz., Richmond, Quebec, in 1888.

"The convictions for drunkenness, taken separately, continued to increase from 1888 to 1890, when they reached the highest figure shown in the returns. From this date there has been a steady reduction, the ratio per 1,000 of the population being smaller in 1892 than in any year subsequent to 1894. The percentage of convictions for drunkenness to the total convictions was less in 1892 than in any year subsequent to 1880."

The more recent years, 1893 and 1894, indicate a continued improvement, especially 1894, when in every group of 435 persons throughout the Dominion one was convicted of drunkenness, as against one in every group of 341 persons in 1890.

## DIVORCES.

389. Gemmill on divorce says: "The primary meaning of 'Divorce' separation. As used in the British North American Act it means dissolution of the bonds of matrimony—the separation by law of husband and wife—and under the power given to 'make laws in relation to marriage and divorce,' the Parliament of Canada has since exercised itself in passing numerous acts for the dissolution of marriage. Perhaps, as has been observed, it was conceived that the power to do so would be delegated by Parliament to a court or courts constituted for the purpose, as had been done some few years before in England. But the Parliament of Canada has not seen fit to do so, and the legislative results have been special acts for divorce in individual cases; following the course of the Imperial Parliament before the passing of the Divorce Court Act."

In Canada, under the Union Act, 1867, divorce is one of the subjects assigned to the Federal Parliament. As, however, some of the provinces had established divorce courts before Confederation, they have been permitted to continue the jurisdiction which was conferred upon their courts. These provinces are: Nova Scotia, New Brunswick, Prince Edward Island and British Columbia. A divorce court was first established in Nova Scotia in 1739. It consisted of the Governor or Commander-in-Chief and members of the Executive Council. By Act (1866) the Judge in Equity became Judge Ordinary of the court. One of the assistant judges of the Supreme Court is now at the head of this court. The court has jurisdiction to declare any marriage null and void for impotency, adultery, cruelty and kindred within the prohibited degrees.

In New Brunswick a divorce court was established in 1791, and consisted of the Governor and five members of the Executive Council. In 1855 a judge of the Supreme Court was added, and in 1860 a Court of Divorce and Matrimonial Causes was created.

Prince Edward Island, in 1836, received a Court of Divorce, composed of the Lieutenant Governor in Council.

British Columbia exercises the power of granting divorces under an ordinance passed in 1867, after the union of the two Colonies of Vancouver Island and the Mainland, which enacted that the civil and criminal laws of England, as they existed on the 19th November, 1858, were in force in all parts of British Columbia.

In Ontario, Quebec, Manitoba and the North-west Territories divorce can only be obtained by legislation—an Act of the Parliament of Canada being necessary. The rules of the Senate touching divorce require the production of such evidence in support of the application for relief as would be deemed sufficient in a court of law; in other respects the matter is dealt with as for an ordinary private Act of Parliament.

1390. The following are the statistics of divorce, as given in the public records :—

## DIVORCES IN CANADA.

YEAR.	GRANTED BY PARLIAMENT.				GRANTED BY COURTS.			
	Ontario.	Quebec.	North west Territories.	Manitoba.	Nova Scotia.	New Brunswick.	British Columbia.	Prince Edward Island.

Total	37	14	1	2	71	58	28	

\* In British Columbia, in addition to the divorce, two judicial separations have been granted, one in 1892 and one in 1893.

This table shows that 211 divorces have been granted, of which 54 by the Dominion Parliament and 157 by the several provincial courts. Prince Edward Island courts have not granted a single divorce in the years. The general figures give an average of eight divorces a year for the whole of Canada.

The provinces which have courts of divorce have absolutely and relatively to population very many more divorces than the provinces which depend upon Parliament for divorces. With respect to the Province of Quebec the comparatively small number of divorces must be attributed to the influence of the Roman Catholic Church there. The large number in the Province of Nova Scotia is probably due to the fact that the cost of establishing many years ago is so small that the poorest in the land are prevented from seeking relief in the courts.

1391. The 211 divorces were granted in 119 cases where the husband was petitioner for relief, and in 92 cases where the wife was petitioner.

The following table gives the divorces by provinces and sex :—

PROVINCES.	Males.	Females.	Total.

nited States the Commissioner of Labour published a report on  
nd divorce for the years 1867 to 1886. From this report it ap-  
9,937 divorces were granted in the United States in 1867 and  
1886, an increase of nearly 157 per cent in 20 years. The popu-  
ably increased about 60 per cent in the same period.

The following statement gives the number of divorces granted in the States named in 1893:—

New York.....	1,476	New Jersey.....	25
Connecticut.....	396	Rhode Island.....	25
Delaware.....	20	Ohio.....	130

## ARCHIVES.

1395. The Dominion Archives were first established in 1872 owing to a numerously signed petition presented to Parliament in 1871 praying that steps be taken to collect and arrange the materials relating to the history of the country. On a joint report from the Senate and Commons, Parliament assigned to the Minister of Agriculture the performance of this important work.

A general statement of the work done appeared in the Year-Book for 1893.

The Archivist in his report for 1895 states that transcripts of the State papers in London continue to be received. The calendar of the papers presented in the 1895 report includes papers respecting New Brunswick, Prince Edward Island and Hudson Bay.

## INDIANS.

1396. A comparison of the figures published in 1892, 1893, 1894 and 1895 will disclose an apparent decrease in Canada's Indian population in 1893 amounting to 9,488 souls, and an increase of 5,048 in 1895 over 1894. Closer examination will show that of the decrease given in 1893, 9,381 have been taken from British Columbia, and it may be explained that the reduction is entirely attributable to the correction of former approximate estimates, rendered possible by improved facilities for ascertaining facts. It appears, therefore, that the population has about reached the stationary limit even among the Indians of Manitoba and the North-west Territories. Considering the comparatively short time that has elapsed since many of these Indians began to abandon their natural manner of life, the extent to which they have intermarried, the great difficulty in getting them to submit to the treatment and care required to cope with the various diseases which have accompanied the invasion of civilization, it may be assumed that we have arrived at a "survival of the fittest" and that hereafter a slight increase of population may be expected. This has shown itself in 1895, a

comparison of the Indian population in the older provinces in the last year and the previous year giving an increase of 460.

	1892.	1893.	1894.	1895.
Ontario.....	17,589	17,557	17,626	17,907

Peace River District Treaty Limits.....	1,725	1,725	1,725	893
Approximate—				
British Columbia.....	34,959	25,618	25,807	25,696
N.W. Territories outside of Treaty Limits.....	12,457	12,457	12,457	17,648
Totals.....	106,205	96,717	97,227	102,275

1397. The Indians are provided with schools, common, boarding and industrial. In all of these there are 291 distributed as follows: 81 in Ontario, 20 in Quebec, 8 in Nova Scotia, 5 in New Brunswick, 1 in Prince Edward Island, 29 in British Columbia, 54 in Manitoba and 80 in the North-west Territories. Besides these there are 13 Indian schools outside of the treaty limits.

The total number of pupils on the rolls and the average daily attendance are given at 8,175 and 4,819 respectively, and are distributed as follows:—

PROVINCES.	On rolls.	Attendance.
Ontario.....	2,425	1,406
Quebec.....	619	332
Nova Scotia.....	146	77
New Brunswick.....	102	60
Prince Edward Island.....	31	13
British Columbia.....	1,629	578
Manitoba.....	1,612	880
North-west Territories.....	2,273	1,455
Outside treaty limits.....	112	91
Total.....	8,349	4,802

1398. These figures indicate that the average attendance is 58.59 per cent of the total number on the rolls. This is better than the attendance of white children in the schools of Ontario, where the average daily attendance is 55.5 per cent of the number on the rolls.

1399. An increasing interest is taken by the Indians in the education of their children. The establishment of industrial and boarding schools at various points is deemed of great importance, as these schools have a much greater beneficial influence on the minds of the young Indians than have the day schools—since the attendance at them removes the children from the deleterious home influences and brings them in uninterrupted contact with higher civilization than their own.

1400. The number of industrial institutions and boarding schools in 1895 is as under :—

PROVINCES.	Industrial Institutions.	Semi-Industrial and Boarding Schools.
Ontario.....	5	2
Manitoba.....	3	3
North-west Territories.....	5	54
British Columbia.....	6	4

There are at present no institutions of the above nature in Quebec or in the Maritime Provinces.

1401. The following figures show that the Indians are becoming more and more sensible of the benefits of education :—

NUMBER OF PUPILS AT THE INDIAN SCHOOLS IN THE SEVERAL PROVINCES, IN THE YEARS 1892 TO 1895.

PROVINCES.	1892.	1893.	1894.	1895.
Ontario.....	2,273	2,310	2,341	2,425
Quebec.....	559	550	634	618
Nova Scotia.....	114	124	119	130
New Brunswick.....	104	108	102	102
Manitoba.....	1,500	1,488	1,454	1,612
British Columbia.....	687	786	843	1,029
Prince Edward Island.....	43	43	33	31
North-west Territories.....	2,295	2,284	2,610	2,385
Total.....	7,575	7,099	8,136	8,340

The increase in the general school attendance is not marked, being 213.

This, however, means more than is at first sight apparent, because the gradual introduction of the boarding schools to replace the day schools on the reserves necessitates a separation of children from parents, to which both are naturally strongly opposed, and Indian parents have to be educated

**up** to the point at which they will exercise present self-denial, with a view **to** the ultimate benefit of their offspring.

1402. A very interesting feature in connection with the older industrial schools in the North-west Territories is the farming out of advanced pupils among the white population.

The success so far attained in this direction is encouraging, and while help, so greatly needed in new countries, is afforded the settlers, the Indians acquire the ideas and habits of the settlers, and their mutual sympathy increases.

1403. The Government's treatment of the Indians has always in view their ultimate conversion into useful citizens. This, as a rule, must be done by engaging them in agricultural pursuits. The great success attained with regard to those most recently taken in hand was amply attested by the display of products at the Chicago Exposition. Cattle, upon which the Indians will have in all districts to depend largely, and in some look to as their mainstay, are carefully herded, and the practice of supplying Indians with anything in the shape of harness, implements or utensils, which they can be taught to make themselves, is being discontinued.

The aptitude displayed by Indians up to the point where imitation ceases is very remarkable.

1404. Only those brought into personal contact with the Indians can understand the ignorance, superstition and inaptitude that have to be overcome before the Indian can be persuaded to persevere in the simplest farming operations; but that the efforts of the Government are meeting with some success is shown by the following table of Indian farming transactions in 1895:—

## INDIAN FARMING TRANSACTIONS IN 1895.

PROVINCES.	Resident Indian Population.	Land Cultivated. Acres.	Land Newly Broken. Acres.	Number of Implements.	Number of Horses, Cattle, Sheep, Pigs, &c.	Bushels Grain.	Bushels Potatoes and Roots.	Tons of Hay.	Fish, Furs and other Industries.

1405. The quantity of land sold for the benefit of the Indians during the year 1894 was 41,297 acres, which realized \$76,418. The quantity sold in 1895 was 32,205 acres, which brought \$72,423. The quantity of surrendered lands now held by the Government for sale is about 461,613 acres.

The amount at the credit of the Indian fund, which consists of moneys accrued from annuities, secured to the Indians under treaty, and from sales of land, timber, stone, &c., surrendered by them was, on 30th June, 1894, \$3,539,943, the expenditure from which, charged principally to interest, amounted to \$284,708. The expenditure from parliamentary appropriations was \$968,563, making a total of \$1,253,271.

1406. In 1895 the amount at the credit of the fund on the 30th June was \$3,594,206, and the expenditure of the year from the fund was \$246,521. The expenditure from parliamentary appropriations was \$955,404.

1407. The following is a statement of the expenditure from the parliamentary grant :—

CHINESE.

1408. The Chinese Immigration Act went into force, as respects arrivals by vessels sailing from ports in North America, on the 20th August, 1885, and as respects arrivals by other vessels, on the 1st January, 1886.

The Act is Chap. 67, Revised Statutes of Canada, 1886, and has been amended by Chap. 35, Acts of 1887, and Chap. 25, Acts of 1892.

Since 1886 the total number of immigrants arrived is 13,919, of whom 13,633 paid fees amounting to \$697,153. Of this amount \$5,000 were refunded; the expenses connected with the Act were \$22,567. The share of the capitation fee paid to provinces was \$167,375.

During the same period, 1886-95, 7,237 persons have taken out certificates of leave or registered for leave. As a large number have left the country without registering, having no intention to return, the exact number in Canada is uncertain. The census of 1891 showed that there were in Canada 9,129 persons whose birthplace was China.

The year of largest number of arrivals was 1892, when 3,278 arrived. In 1895 the arrivals numbered 1,462.

### PATENT OFFICE.

1409. The following table shows the different transactions of the Patent Office in each year since 1st July, 1867:—

#### BUSINESS OF THE PATENT OFFICE OF CANADA, 1868-95.

YEAR ENDED 30TH JUNE.	Applications for Patents.	Patents.	Certificates.	Totals.	Caveats.	Assignments of Patents.	Fees Received, including the 10 per cent. Trade Mark Fee.

\* There were no caveats until 1869. † For 10 months.

1410. The limit of duration of a patent was formerly fifteen years, but by the Act 55-56 Vic., Chap. 24 (1892), this was extended to eighteen years, which period can be reduced by the applicant to six or twelve years.

ment of a proportionate fee. In 1888 there were 2,257 patents granted, of which 67 were for fifteen years, 7 for ten years, and the remainder, 2,183, for five years; and of this last number, 1,952 were allowed to lapse at the expiration of the term, showing that the large majority of Canadian patents are not kept in force more than five years.

11. The patentees in 1895 resided in the following countries, viz.: United States, 1,980; Canada, 707; England, 179; Germany, 102; France, and other countries, 85.

12. The model museum, which is designed to be a school of instruction in every department of science and mechanical invention, attracted upwards of 10,000 visitors, and is now situated in the new departmental block, Wellington street, whereby a much larger space is available.

13. The business in the copyrights and trade-marks branch in 1895 showed an increase, the receipts being \$2,209 more than those of 1894, and the following table shows the large increase in the business of this branch in the Confederation:—

Victoria .....	106	112	88	109	107	139	121	112

According to the census returns, 1891, for Canada, the birth rate in British Columbia was 23·16 per thousand of the population and the death rate was 13·94 per thousand. In Manitoba the birth rate was 32·53 per thousand and the death rate 10·36 per thousand. In New Brunswick the birth rate was 27·70 per thousand and the death rate 13·36 per thousand. In Nova Scotia the birth rate was 25·41 per thousand and the death rate 14·57 per thousand. In Ontario the birth rate was 24·50 per thousand and the death rate was 11·30 per thousand. In Quebec the birth rate was

36.86 per thousand and the death rate 18.91 per thousand. In Prince Edward Island the birth rate was 24.45 per thousand and the death rate 12.26 per thousand. In the North-west Territories the birth rate was 24.98 per thousand and the death rate 7.32 per thousand.

Manitoba is the banner province, having the second largest birth rate and the second lowest death rate, the result being that the prairie province has the largest excess of births over deaths.

1417. The following table gives the births, deaths and marriages in each of the respective countries, 1893 :—

BIRTHS, DEATHS AND MARRIAGES IN FOREIGN COUNTRIES, 1893.

PENITENTIARIES.

In punishment of criminals there are five penitentiaries in the  
at Kingston, Ontario; St. Vincent de Paul, Montreal,

Que. ; Dorchester, N.B. ; Stony Mountain, Man., and New Westminster, B.C. The total number of persons confined in these five penitentiaries on the 30th June, 1895, was 1,277, of whom 1,249 were males and 28 were females.

1421. By three-year periods, since 1881, the following is the average of convicts in the penitentiaries :—

AVERAGE OF CONVICTS IN PENITENTIARIES SINCE 1881.

PERIOD.	Average Number.	Average of Females.
1881-83.	1,163	32
1884-86.	1,126	41
1887-89.	1,149	26
1890-92.	1,243	24
1893-95.	1,231	31

There was an increase of 58 in the number of male convicts and a decrease of 4 in the number of female convicts, making a total increase of 54 as compared with 1894.

1422. Considered in relation to the growth of population, the following table shows that in every group of 3,981 persons one was in the penitentiary in 1895. This is a considerably smaller proportion than the average of the period 1881-95, which is one convict to every 3,976 persons.

PROPORTION OF CONVICTS TO POPULATION. 1881-95.

YEAR.	One Person in	YEAR.	One Person in
1881	3,560	1890	3,833
1882	3,886	1891	3,880
1883	3,882	1892	3,962
1884	4,204	1893	4,059
1885	4,082	1894	4,196
1886	3,824	1895	3,981
1887	4,002		
1888	4,285	Average	3,976
1889	3,966		

1423. The following tables give the number of convicts remaining in each of the penitentiaries on the 30th June of each year, the number discharged in each year, and the causes :—

1895.....	1,249	28	1,277	332	18	73	2

\* Includes the number of convicts sent to asylums, transferred to other penitentiaries and reformatories, removed by order of the court and remission of sentences.

1424. The following table gives the offences for which persons were committed to the several penitentiaries for each year, from 1881 to 1895, both inclusive :—

1425. Analysis shows the following proportions of the several classes of crime for which the convicts were sent to the penitentiary:—

	Average for three years.				
	1883-85.	1886-88.	1889-91.	1892-94.	1895.
Offences against the person.....	14.7	17.9	17.9	20.8	15.9
"          property.....	66.2	64.7	73.7	69.9	73.3
Forgery.....	2.9	4.0	4.0	3.3	3.7
Other felonies and misdemeanours.....	3.1	4.3	4.4	6.0	7.1
Offences not specified.....	13.1	9.1			
	100.0	100.0	100.0	100.0	100.0

Taking these convicts as an index, in a general way, it appears that offences against the person have decreased, that those against property and forgery have increased, and that other felonies and misdemeanours are on the increase.

1426. The succeeding tables relate to the birth places of the convicts, their ethnology, conjugal state, occupations and educational status:—

PERCENTAGES OF BIRTH PLACES OF CONVICTS COMMITTED TO THE PENITENTIARY.

BIRTH PLACES.	Per cent of total Popula- tion in 1891.	Convicts—per cent.				
		1883-85.	1886-88.	1889-91.	1892-94.	1895.
Canada.....	86.5	56.6	58.4	61.4	67.2	72.7
England.....	4.6	7.8	8.8	8.9	10.1	7.7
Scotland.....	2.2	1.5	2.2	1.9	2.9	2.7
Ireland.....	3.1	6.8	5.5	7.1	4.5	3.1
United States.....	1.7	8.7	9.8	10.0	9.7	9.8
All other.....	1.9	18.6	15.3	10.7	5.6	4.1

1427. In proportion to their numbers, those born in the United States supply by far the largest quota to the penitentiaries. The large number of "All Others" in the 1883-85 and the 1886-88 periods is probably due to foreign railway navvies, then in the country, building the Canadian Pacific Railway.

1428. With respect to youthful convicts, the table relating to ages shows that in the 1883-85 period 17.5 per cent of the convicts committed to the penitentiaries were under 20 years of age; in the 1886-88 period, 15.6 per cent; in the 1889-91, 14.6 per cent, and in the 1892-94, 13 per cent were under 20 years of age.

1429. The following table gives the birth places of persons committed to the penitentiaries during the years 1879 to 1895 :—

**BIRTH PLACES OF PERSONS COMMITTED TO THE PENITENTIARY DURING THE YEARS 1879 TO 1895.**

Prince Edward Island .. . . . .	3	June 30, 1892.	20	4	24
The Territories (Regina) .. . . . .	1	" 30, 1895.	19	3	22

\*Including 10 lock-ups, Central Prison and Mercer Reformatory, Toronto, and Ontario reformatory, Penetanguishene.

†Including 8 lock-ups.

‡Total number confined during the year.

The provincial governments of Nova Scotia and New Brunswick do not publish any returns of persons in their prisons, consequently application was made to the sheriffs of the several counties, almost all of whom responded, and thanks are due to them for their attention. Three counties (Carleton, Madawaska and Westmoreland) in New Brunswick, and two counties (Annapolis and Guysborough) in Nova Scotia made no returns.

CRIMINAL STATISTICS.

1438. The judicial system\* of Canada has been described in paragraphs 44, 45, 46, 47 and 48.

1439. The Act authorizing the collection and compilation of Criminal Statistics came into operation in 1876. The returns are yearly becoming more valuable, greater care being exercised in the collection. The whole system has been reviewed during the year 1893, with the result of adding to the returns the criminals dealt with by the North-west Mounted Police.

1440. The returns are compiled under two headings: "Indictable Offences" and "Summary Convictions." The first includes all felonies and misdemeanours tried by the competent courts and juries, whether following the general procedure in accordance with Chap. 174, R.S.C., or the summary procedure applicable to certain cases as provided by the Acts relating to "Speedy Trials," "Summary Trials by Consent" and "Juvenile Offenders," Chaps. 175, 176 and 177, R.S.C. The second includes all minor offences tried by justices of the peace, police magistrates or stipendiary magistrates under Chap. 178, R.S.C.

1441. The various indictable offences, which comprise the more serious crimes, are divided into six classes, as follow :—

- Class I. Offences against the person.
- II. Offences against property, with violence.
- III. Offences against property, without violence.
- IV. Malicious offences against property.
- V. Forgery and offences against the currency.
- VI. Other offences not included in the foregoing classes.

And the following list gives the principal crimes and offences that are included in each class :—

#### CLASS I.—OFFENCES AGAINST THE PERSON.

Murder and attempt to murder.  
 Manslaughter.  
 Shooting, stabbing, wounding, &c.  
 Rape and other offences against females.  
 Unnatural offences.  
 Bigamy.  
 Abduction.  
 Assault, aggravated and common.  
 Other offences against the person.

#### CLASS II.—OFFENCES AGAINST PROPERTY, WITH VIOLENCE.

Robbery, with violence.  
 Burglary, house and shop-breaking.  
 Other offences against property with violence.

#### CLASS III.—OFFENCES AGAINST PROPERTY, WITHOUT VIOLENCE.

Horse, cattle and sheep-stealing.  
 Larceny.  
 Embezzlement.  
 Felonious receiving.  
 Fraud.

#### CLASS IV.—MALICIOUS OFFENCES AGAINST PROPERTY.

Malicious injury to horses, cattle and other property.  
 Arson, burning, &c.

#### CLASS V.—FORGERY AND OFFENCES AGAINST THE CURRENCY.

Forgery.  
 Offences against the currency.

#### CLASS VI.—OTHER OFFENCES NOT INCLUDED IN THE FOREGOING CLASSES.

Carrying unlawful weapons.  
 Offences against gambling, municipal, liquor and other Acts.  
 Keeping disorderly houses and houses of ill-fame.  
 Perjury.  
 Smuggling, and offences against the revenue.  
 Other offences not included in the above classes.

1442. The following table gives the total number of convictions of all kinds in Canada, according to the above returns, during the years ended 30th September, 1888 to 1895 :—

## TOTAL NUMBER OF CONVICTIONS IN CANADA, 1888-95.

OFFENCES.	CONVICTIONS FOR THE YEAR ENDED 30TH SEPTEMBER.							
	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.
I. Offences against the person.....	4,790	5,284	5,093	4,787	4,864	4,589	4,599	4,652
II. Offences against property, with violence.	225	283	276	283	251	362	450	461
III. Offences against property, without violence.....	3,437	3,774	3,614	3,614	3,431	3,613	4,126	3,803
IV. Malicious offences against property...	332	236	247	253	242	386	615	390
V. Forgery and offences against the currency.	45	41	46	36	41	46	37	61
VI. Other offences not included in the above classes.....	28,820	28,813	29,264	28,442	26,168	26,657	26,329	28,218
Total.....	37,649	38,431	38,540	37,415	34,997	35,633	36,156	37,585

Since the report of 1892 was published, it has been discovered that the returns received by the Statistical Division of the Department of Agriculture did not include the cases in the North-west Territories tried by the inspectors of the Mounted Police Force, with the exception of those appealed from and tried by the judges and stipendiary magistrates of the North-west. On the discovery being made, the staff examined all the Mounted Police records from 1883. This work, involving a great amount of labour, has been completed and the following table prepared, giving the number of cases which should have been included in the reports published since 1882.

CASES TRIED BY STIPENDIARY MAGISTRATES AND INSPECTORS  
NORTH-WEST MOUNTED POLICE.

YEARS.	INDICTABLE OFFENCES.			Summary Convictions.	Total Convictions.
	Number of Charges.	Acquittals.	Convictions.		
1883.....	29	10	19	165	184
1884.....	58	36	22	235	257
1885.....	92	75	17	156	173
1886.....	56	39	17	314	331
1887.....	45	28	17	173	190
1888.....	29	25	4	139	143
1889.....	32	27	5	172	177
1890.....	47	36	11	154	165
1891.....	42	32	10	192	202
1892.....	77	67	10	286	296

The number of cases tried by Stipendiary Magistrates and Inspectors of the North-west Mounted Police since 1892 is not given separately, but is included in the total returns of the Territories.

1443. It must be borne in mind that the number of convictions does not represent a like number of individual criminals, because any person convicted more than once during the year, whether for the same or a different offence, is counted as a separate person for each conviction; as is well known, the same persons are convicted several times a year for such offences as drunkenness, vagrancy and similar offences.

1444. By provinces, the totals given above, not including the North-west Mounted Police returns, excepting for 1893, 1894 and 1895, are distributed as under, for the period 1884-95:—

TOTAL NUMBER OF CONVICTIONS OF ALL KINDS IN THE SEVERAL PROVINCES IN THE YEARS 1884 TO 1895, TOGETHER WITH THE KIND OF SENTENCES IMPOSED.

PROVINCES.	Year ended 30th Sept.	Total Convictions.	SENTENCES.				
			Committed to			Death	Various Sentences

	1895	1,028	13	925			99

1445. Of the total number of convictions in 1895, 5,474 were for indictable offences, being 216 more than in 1894.

1446. The following table gives the number of persons charged, the number detained for lunacy, the number convicted and the proportion of convictions to charges. It will be seen that the proportion of convictions to charges was considerably higher in 1895 than the average:—

## INDICTABLE OFFENCES.

YEAR.	Charged.	Detained for Lunacy.	Convicted.	Proportion of Con- victions to Charges.
1884.....	4,400	6	2,506	57.0
1885.....	5,518	12	3,797	67.9
1886.....	5,497	11	3,509	63.9
